BROOKHAVEN NATIONAL LABORATORY

Child Development Center to Open on Schedule, September 3

After three years of planning and a nine-month-plus gestation, BNL's Child Development Center (CDC) will open on schedule at 8 a.m. on Tuesday, September 3 — the first day of on-site day care for BNL employees' children ages eight weeks to four years.

With room for 96 youngsters in the old-fashioned barn-like building now being finished on Yale Road in the apartment area, the CDC has an enrollment of 61 kids, who are registered for either part- or full-time care. While the infant center is full, there are two openings in the toddler group, five spots available for three-year-olds, and many spaces awaiting four- and five-year-old preschoolers.

Before the first day of day care, however, parents who have registered their children at the CDC and others who are interested are invited to Berkner Hall at noon, on Tuesday, August 20, to meet the CDC staff, including its director, Deborah O'Neill.

"We want the center to have a family atmosphere, and, since the children are going to be cared for on the same site where their parents work, we think that this will happen naturally," explains O'Neill, who will supervise three teachers, seven teaching assistants, the head of the infant center and five infant caregivers.

"To encourage the start of this relationship, we're holding this meeting, during which we'll introduce our staff and the program formally, and then have time for informal introductions and discussions with the parents," adds O'Neill.

In addition to the CDC director, parents will meet Steve Held and Stephen Gordon, the executive director and business director respectively of Child Care Management Inc., the corporation established to manage CDC; Barbara Carstairs, head of the CDC's infant center; and CDC teachers Danielle Carter, Nancy Ford and Susan Lang.

The center will also be staffed by an office manager, Carmen Fortugno, who will answer CDC's Ext. 7426 and direct any parent's concerns; a cook, Nancy Fariello, who will prepare the children's snacks and lunch; and a visiting nurse, who will be at the CDC three times a week for an hour each time.

Both O'Neill and Carstairs come from Just Kids Early Childhood Learning Center in Middle Island, which was originally established by Gordon and Held to provide child care for the children of BNL employees. O'Neill has nine years' experience there, while Carstairs has been there for five years.

O'Neill began her tenure at Just Kids by team teaching preschool classes that included handicapped children. After instructing kindergarten, she developed an enrichment program for the day-care center, so that the children could enjoy special activities such as acting, cooking or computing at the beginning or end of their day. O'Neill was then promoted to supervisor of Just Kids' infant center.

Deborah O'Neill holds a bachelor's degree in early childhood education from the Southampton campus of Long Island University and is currently pursuing her masters' in liberal arts at the State University of New York at Stony Brook. She also completed coursework in infant-toddler education at the Bank Street College of Education in New York City.

Roger Stoutenburgh

Susan Foster (left) and Deborah O'Neill unpack toys at BNL's Child Development Center.

"Just Kids is an exceptional place — for both the children and the staff," comments O'Neill. "So I'll be modeling my approach after the success of Just Kids."

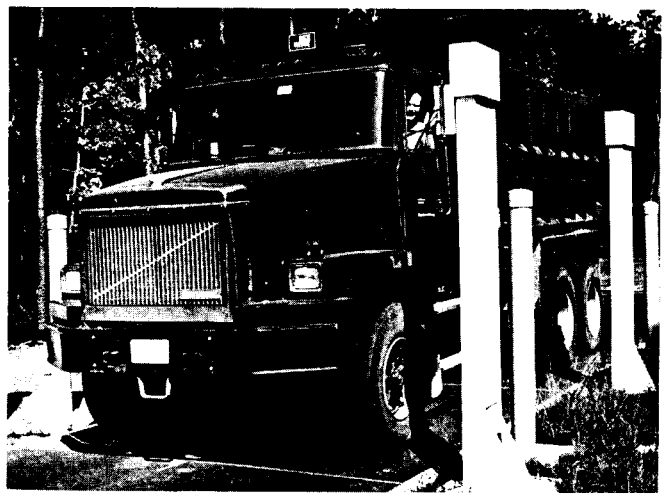
In fact, the newly hired staff is undergoing an initial orientation at Just Kids. The staffers will be coming on site next week, to assist O'Neill in setting up the center's equipment and toys in Bldg. 373.

She continues, "At Just Kids, the administration has an excellent relationship with its staff — so, as a result, its employees stay. This is unusual in the child-care field, where staff turnover is a big concern to both administrators and parents. My goal will be to encourage my staff to pursue their interests and utilize their gifts to the benefit of the children, as well as their own benefit as preschool caregivers and educators."

At the CDC, the ratios of children to staff are smaller than the minimums set by New York State law: The ratio of infants to caregivers will be 3:1; the ratio for toddlers, 4:1; for three-year-olds, 6:1;, and for four- and five-year-olds, 6:1.

(continued on page 2)

Drive-Through Monitoring Station Given Green Light



Roger Stoutenburgh

The truck driven by Kerry Botts, Plant Engineering Division, is being monitored in the new system.

There's a new BNL pathway for trucks — through the recently completed vehicle radiation monitoring station located on Princeton Avenue between Upton Road and Weaver Drive.

In service since July 29, the station contains a detector that is extremely sensitive to certain common radionuclides. The detector performs an important final check to ensure that no significant amount of radioactive material is accidently included in a vehicle load.

According to Alan Kuehner, head of Technical Support in the Safety & Environmental Protection Division (S&EP), "The new station is one of the latest measures in the Lab's comprehensive plan for protecting the environment, both here and off-site."

At the station, vehicles being checked include all those loaded with waste materials for off-site disposal, or those with items going to or from BNL's scrap-metal yard. Department and division management may also issue their own requirements that vehicles picking up from or delivering materials to their areas should pass through the monitor.

A statement that all vehicles removing materials from BNL may be required to pass through the monitor both on entering and leaving the site is being inserted into all contracts issued by S&EP. Materials removed from radiological areas must, in addition, be monitored according to the provisions of the BNL Safety Manual. Vehicles carrying radioactive materials packaged according to U.S. Department of Transportation regulations, however, are exempt from these requirements.

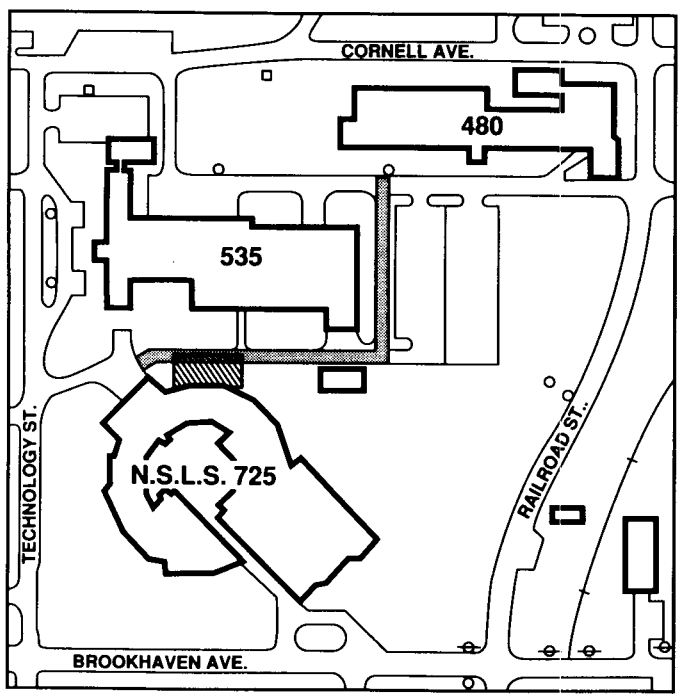
The simple procedure for using the station entails driving at under five miles per hour through the monitor and exiting at a green light.

A yellow light indicates that the vehicle was going too fast to be adequately monitored, so the driver must go through it again, but more slowly.

If the light turns red, the driver calls Ext. 4207 at S&EP during working hours, or Ext. 2238 at Police Headquarters at other times. The vehicle is then taken to a checking area where any radioactive material can be removed.

— Liz Seubert

Don't Even Think of Blocking SMERF



To allow emergency vehicles unrestricted access to the Synchrotron Medical Research Facility (SMERF) at the National Synchrotron Light Source (NSLS), the shaded roadways and the striped parking in the accompanying map have been designated an NSLS medical emergency access area.

As such, the area has been added to the Lab's parking ticketing program, which is administered by the Police Group of the Safeguards & Security Division. Therefore, anyone found parking there illegally is subject to a $50 fine, to be charged against the employee's department or division's operating funds.

At SMERF, a team of scientists and physicians use an experimental technique called transvenous angiography to generate two-dimensional pictures of patients' coronary arteries, and these images are used for diagnosing heart disease.

Since the shaded roads provide the only approach and exit from SMERF for emergency vehicles, these roads should not be obstructed in any way. In addition, the small parking area indicated by stripes on the map contains two slots that are assigned to SMERF for emergency vehicle parking. Thus, these spaces as well may not be obstructed with illegally parked cars.

Chasman Scholar

The Laboratory community is invited to the sixth presentation of the annual Renate W. Chasman Scholarship for Women, sponsored by Brookhaven Women in Science.

On Tuesday, August 20, at 4:30 p.m., in Berkner Hall, Room B, the 1991 Chasman scholarship of $1,000 will be presented to Mary Robinson of Smithtown, who is completing her masters' degree in mathematics at the State University of New York at Stony Brook.

Light refreshments will be served following the ceremony.

Suggestion of Safety

When labels fall off bottles of homemade preserves, you may find yourself eating strawberry jam rather than beach plum jelly. But labels that fall off bottles of chemicals in a science laboratory may cause a more serious situation.

Recognizing that, Russell Dietz, Head of the Tracer Technology Center in the Department of Applied Science, suggested that BNL stock color-coded chemical wash bottles that are permanently labeled. Shown here with samples of bottles now in the BNL stockroom, Dietz won $75 from the Employee Suggestion Program for his bright idea.

Now, researchers who need to use acetone, acetonitrile, bleach, ethanol, ethylacetate, isopropyl alcohol, methanol, methyl ethyl ketone, toluene or water can order labeled bottles right from stock. And for any compound not mentioned, the Lab also stocks an unlabeled wash bottle. All of these easy-to-handle, 500-milliliter bottles are made of polyethylene, with a wide mouth and a stem on the lid.

These bottles may be used only for chemical laboratory research activities. Bottles used in laboratory activities that fall outside of a chemical laboratory scale, or operations which are classified as production-type activities, for example work in Plant Engineering, Central Shops, or the National Synchrotron Light Source, or activities such as glass washing require additional hazard labeling. Users should contact their building Safety & Environmental Protection Division representative for additional guidance.

Roger Stoutenburgh

In Memoriam

Gerhard Tiller, Instrumentation

Gerhard Tiller, a senior staff specialist and the administrator of the Instrumentation Division, died on July 25 at his home in Shoreham, following a six-year battle with cancer. He was 71 years old and had pursued a Lab career that lasted more than 41 years.

Gerhard Tiller

"Working at the Lab was more than just a job to Gerry," reflects Sy Rankowitz, the Associate Head of Instrumentation. "He had no intentions of retiring: Until the very end, he didn't want to give up the work and the people he enjoyed so much. He was a very sociable person, and I don't know of anyone who didn't like Gerry. We all are going to miss him very, very much."

Adds Staff Services Division Manager Ron Manning, who worked with Tiller earlier in the Physics Department, "Gerry was the consummate gentleman, known to many on site for his trademarks — his bright red socks, ancient dog-eared manilla folder, his marvelous subtle sense of humor, and his total dedication to the Lab and every task that he undertook. It was a pleasure to know and work with him."

Born in Germany on May 25, 1920, Tiller was about five years old when he was brought to America by his parents. Raised in Medford, Tiller loved to recall how a kindly elementary school teacher took him under her wing, teaching him how to speak proper English without a foreign accent.

Tiller became a U.S. citizen during World War II, when he served the U.S. Army from 1942-45, during which time he received his training in fiscal administration. After the war, Tiller was stationed at Camp Upton, as a civilian employee of the Army. When the site was changed over from a military induction camp to a scientific national laboratory, it changed hands from the Army to the Atomic Energy Commission (AEC); Tiller stayed on, working for the AEC from 1946-49.

Tiller began his long association with the Lab on January 31, 1949, working as a senior clerk in Accounts Payable. In September 1950, he became a bookkeeper in what was then Bookkeeping. Tiller moved into Fixed Assets in December 1951, where he was a senior clerk before being promoted to an administrative aide in May 1956 and then to a junior auditor in July 1958.

It was during that time when TIller came to know by heart the life numbers of almost every BNL employee.

"Back then, everyone picked up their paychecks at the bank, and Gerry was the one who handed them out according to name and life number," explains Supervisor of Payroll Operations Viola Malloy of the Fiscal Division, who was Tiller's companion during his last years. "As a result of his wonderful memory, he amazed everyone he met around the site by remembering their names and life numbers."

When the Fiscal Division was consolidated in January 1960, Tiller continued as a junior auditor, working in Internal Audit with Fred Hohmann, who is now Manager of Accounting in Fiscal.

"I worked with Gerry all of one month — but, in that short time, I made a life-long Lab friend," recalls Hohmann. "He was one of the happiest and best-natured people I know, and also one of the friendliest, warmest, most considerate and caring. He was lots of fun — good to joke and laugh with. After knowing and enjoying the man for 30 years, I do miss him."

Tiller moved into the Physics Department in July 1961, as an administrative aide. He was promoted to administrative assistant in August 1965.

"Gerry worked in the Bubble Chamber Group, which had its own administrative staff because of its size," explains Ron Manning, who was the Physics Department Administrator at that time. "When I was new to the department, Gerry shared his corporate memory with me — he was a wonderful source of history." During the early 70s, Tiller moved into Manning's office to handle departmental budgets and accounting.

Tiller's transfer to Instrumentation came in January 1976, when he came to the division as a staff assistant to take on the administrator's job. As such, Tiller took care of the division's budget, personnel paperwork, vendors and purchases, property inventory, radioactive materials control, and maintenance and safety oversight.

Working as Tiller's assistant since 1978 was Cheryl Williams, now a senior staff specialist, who remembers, "He was marvelous to work with — he really wanted to see you succeed, so he shared all that he knew with you, and he was ready and willing to help you with anything. He was a very special man — a good person to work for, as well as a loving and caring friend."

In 1979, Tiller became one of the founding members of the Scientific Program Administrators Group, which was formed and still exists to enable closer communication among the administrators of the scientific divisions and departments.

Continuing as Instrumentation's administrator, Tiller rose up the scale twice more: In October 1982, he was made a staff specialist, and, in October 1986, he was named to his final title.

Tiller's wife of many years, the late Joan Tiller, who had been a senior office services assistant in the Technical Information Division, died at age 56 in 1982, also of cancer. Though Gerhard Tiller was diagnosed with the disease July 1985, he continued working until December 1990.

Gerhard Tiller was buried on July 29 in Washington Memorial Cemetery in Coram. In addition to his dear friend Viola Malloy, Tiller is survived by his daughter Nancy Smith of Brooklyn, son Robert Tiller of Syracuse, daughter Karen Rothman of Southold, and six grandchildren.

Contributions in the memory of Gerhard Tiller may be made to Eastern Long Island Hospital, Greenport. — Marsha Belford

Child Center (cont'd)

O'Neill selected the CDC staff with one philosophy in mind: to be able to provide the youngsters with a developmentally appropriate program. "As we help the children learn through exploration and experience, it is important that we challenge them, but not overwhelm them with inappropriate tasks," comments O'Neill.

From 8 a.m. to 5:30 p.m. during the work week, CDC kids will take part in a theme-based curriculum, designed to promote their emotional, cognitive, physical and social skills at age-appropriate levels. While themes — such as cultures of the world, and dinosaurs, crawly things and things that hatch — will change periodically, activity centers within each group will remain constant. By being able to chose activities — such as dramatic play, computers and science, or reading — that interest them, children's independence will be fostered.

"We'll have an open-door policy, so the parents can drop in to see their children, have lunch or visit with them for a while," adds O'Neill. In addition, there will be an open house after work one evening soon after the center opens, so parents may tour the facility and meet the teachers, caregivers and aides who mind their children during the work week.

Parents with children at the CDC will also be involved in the center's program through a parents' council, which will be established in early October during an open meeting and meet monthly after that.

The council will consist of eight parents, two elected from each of the four age groups to which their children are assigned. Two staff members, the CDC director, BNL's Employee Relations Counselor Susan Foster, and the two CCMI owners will round out the council. Foster will continue as liaison between the Lab and the CDC.

"We'll work together to address any concerns and issues put on our agenda," explains O'Neill. "And, we'll also plan special events, such as potluck suppers, that will foster the center's family atmosphere."

— Marsha Belford

BNL parents who would like to register their young children for the Child Development Center may call CDC Director Deborah O'Neill, Ext. 7426, to discuss their day-care needs and CDC openings.

Golf Tournaments

Indian Island

The fifth golf tournament of the 1991 Brookhaven Golf Association season will be a two-person scramble, to be held on Monday, August 19, at the Indian Island County Golf Course in Riverhead.

Tee times will run from 11 a.m. to 1:30 p.m., depending upon the number of golfers who sign up. To arrange a tee-off time, call John Usher, Ext. 2096, today, which is the sign-up deadline. All would-be participants are asked to complete their foursome before calling.

The greens fees are $13 for Suffolk County residents. Riding carts are available for $22, while pull carts are $3. In case of rain, call the pro shop, 727-7776.

Swan Lake

On July 30, 47 BGA golfers participated in the Swan Lake Golf Club. The winners were:

Flight	Gross	Net
A	John Millener	Peter Bond Arty Dick
B	Joe Klemish	Eldon Schmidt
C	Barry Karlin	John Bennet
D	Donald Gator Gates	Tony Baltz

Longest Drive: Peter Bond, Hank Arnessen
Closet-to-the-Pin: Joe Bauernfeind, Joe DePace

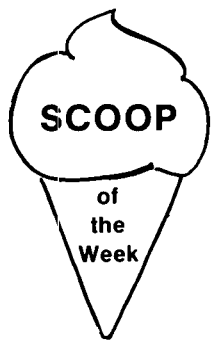
Look! Limericks!

The ads in the Bulletin today,
Have excited a reader to say,
"The sales are so great,
I can buy things cut-rate,
Even I can afford things this way."
— Fern Simes, Physics Department

You want something to buy or to sell?
A walk in the woods with your belle?
Technical articles?
Search for new particles?
You'll find all of it at BNL.
— Morris Strongson
Computing & Communications

Now some travel here with enjoyment,
While others exhibit 'annoyment'
Some stay weeks, months or years,
Some entire careers.
Some are fit for no other employment!
— Barry Arbeit
Computing & Communications Division

Scoop of the Week



One scoop gets dished out for a story suggestion during week number nine of the fourth annual Scoop of the Week contest.

Ralph Weston is hereby awarded a Scoop for suggesting the story on the radiation monitoring station.

Throughout the summer, the Bulletin is trading scoops of your favorite frozen dessert for hot tips on news and features around site. So, to enter the Scoop of the Week contest, rush your news and feature scoops to the Bulletin, Bldg. 134, or call Ext. 5053.

If you scoop the Bulletin's informed sources and a story based on your idea is published, then you'll win an official certificate for a scoop of your favorite cold dessert, compliments of Service America Corporation and redeemable at the Cafeteria.

STN Training

Free, beginner-level training on the STN system will be offered on Wednesday, August 21, from 9-11 a.m. and again from 1-3 p.m., in the PC Training Room, Bldg. 475.

STN International, produced by Chemical Abstracts Inc., is a scientific and technical information network, which gives direct access to some of the world's best sci-tech databases.

Unique features of the system include: advanced chemical structure searching, numeric search capabilities, chemical reaction searching, and access to the full text of many scientific journals. In addition, STN databases cover many subject areas, including: chemistry, engineering, math, physics, geology, biotechnology, thermodynamics, energy, patents and materials science.

STN is designed and operated *by* scientists and engineers *for* scientists and engineers, so it is attuned to the needs of technical searchers.

To register, contact Arline Willsey, Ext. 3490. Class size is limited to 16.

Call for Bowlers

Although summer is not yet over, bowling season approaches, so it's time to "think bowling" again!

Applications for the Tuesday night men's league in Port Jeff and the Thursday night mixed league in Shirley are available at the BERA Sales Office. If enough women are interested, the women's league will be revived at Port Jeff.

This year, registration fees are $18 for men and $16 for women. Priority registration for existing teams is due by today, while new team registration is due by next Friday, August 23.

So, if you're bowled over by life, come out for a night of good company and fun — you don't have to be a great bowler to join, just a willing one!

Potential women's league bowlers and anyone with questions should call Maryann Reynolds, Ext. 5241.

Cafeteria Menu

Monday, August 19	
Soup: Beef barley	.75/.95
Entree: Fried chicken w/1 veg.	3.10
Entree: Braised Swiss steak w/1 veg.	3.10
Fitness: Chef's choice	3.10
Carvery: Hot pastrami sandwich	2.85
Grill: Reuben on rye w/cole slaw	2.85
Tuesday, August 20	
Soup: Chicken gumbo	.75/.95
Entree: Baked herb chicken w/1 veg.	3.10
Entree: Sautéed liver & onions	3.10
Fitness: Chef's choice	3.10
Carvery: Hot roast beef sandwich	2.85
Grill: Cheese steak sandwich w/cole slaw	2.85
Wednesday, August 21	
Soup: Cream of tomato	.75/.95
Entree: Chicken à la king	3.10
Entree: Chef's choice	3.10
Fitness: Vegetarian plate w/5 veg.	2.25
Carvery: Hot Black Forest ham sandwich	2.85
Grill: 3-cheese melt w/French fries	2.85
Thursday, August 22	
Soup: Seafood-spinach	.75/.95
Entree: Sea scallops w/linguini	3.85
Entree: Fish fry sandwich w/French fries	3.10
Fitnesss: Shrimp salad on croissant	2.25
Carvery: Hot corned beef sandwich	2.85
Grill: Fanta-sea fare	2.85
Friday, August 23	
Soup: Manhattan clam chowder	.75/.95
Entree: Chef's choice	3.10
Entree: Macaroni & cheese	3.10
Fitness: Broiled fish w/1 veg.	3.10
Carvery: Hot turkey sandwich	2.85
Grill: Tuna melt w/French fries	2.85
Breakfast w/coffee, 7:30 - 10:30 a.m.	2.65

Mon.: 2 eggs, bacon, one pancake, home fries
Tue.: Western omelet, home fries, toast
Wed.: Spanish omelet, home fries, toast
Thu.: 2 eggs, bacon, cheese on croissant, fries
Fri.: French toast, 2 eggs, bacon, home fries

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position. Consideration is given to candidates in the following order: (1) present employees within the department/division and/or appropriate bargaining unit, with preference for those within the immediate work group; (2) present employees within the Laboratory; and (3) outside applicants. In keeping with the Affirmative Action plan, selections are made without regard to age, race, color, religion, national origin, sex, handicap or veteran status.

Each week, the Personnel Division lists new placement notices. The purpose of these listings is, first, to give employees an opportunity to request consideration for themselves through Personnel, and, second, for general recruiting under open recruitment. Because of the priority policy stated above, each listing does not necessarily represent an opportunity for all people.

Except when operational needs require otherwise, positions will be open for one week after publication.

For more information, contact the Employment Manager, Ext. 2882, or call the JOBLINE, Ext. 7744 (282-7744), for a complete listing of all openings.

BROOKHAVEN BULLETIN

Published weekly
by the Public Affairs Office
for the employees of
BROOKHAVEN NATIONAL LABORATORY

ANITA COHEN, Editor
MARSHA BELFORD, Assistant Editor
LIZ SEUBERT, Reporter

35 Brookhaven Ave., Upton, N.Y. 11973
(516) 282-2345

The vacancies listed below have been exempted by the Director's Office from the current freeze on open requisitions.

LABORATORY RECRUITMENT - Opportunities for Laboratory employees only.

DD 0640. OFFICE SERVICES POSITION - Requires AAS or equivalent experience and excellent word processing, recordkeeping, organizational and communication skills. IBM PC experience desired. Will provide secretarial support to the Reactor Operations Support Group. Duties will include typing procedures, correspondence and reports; making travel arrangements; and organizing and maintaining files. Must be able to obtain and maintain a security clearance. Reactor Division.

DD 0641. OFFICE SERVICES POSITION - Requires AAS or equivalent experience and excellent word processing, recordkeeping, organizational and communication skills. IBM PC experience desired. Will provide secretarial support to the Maintenance Group. Duties will include typing procedures, correspondence and reports; making travel arrangements; and organizing and maintaining files. Must be able to obtain and maintain a security clearance. Reactor Division.

OPEN RECRUITMENT - Opportunities for Laboratory employees and outside applicants.

LF 8629. ENGINEERING POSITION - Requires BS in health physics, nuclear engineering or physics. Advanced degree and ABHP certification preferred. Knowledge of neutron dosimetry and computers is desirable. Work will involve research facility review for radiation-protection concerns. Will assist in resolution of radiation-safety questions and program development. Must be able to obtain and maintain a security clearance. Safety and Environmental Protection Division.

LF 3182. SCIENTIFIC ASSOCIATE POSITION - Requires BS degree in economics, as well as good quantitative and verbal skills. Will conduct analyses of the economic, institutional and environmental aspects of improving the efficiency of energy use, with emphasis on energy use in buildings. Department of Applied Science.

MK 8692. TECHNICAL POSITION - Requires an AAS or equivalent; good background in electronics, fire alarm systems, telecommunications, computer databases; and significant relevant experience. Will be responsible for planning, organizing, and supervising the Site Fire Alarm System database, hardware, maintenance, personnel and fire alarm projects. Will establish system requirements and specifications, and coordinate work between Laboratory staff and outside vendors and contractors. Must have good communication skills, and be able to obtain and maintain a security clearance. Safety and Environmental Protection Division.

DD 8693. ENGINEERING POSITION - Requires BS in engineering or equivalent capabilities, and experience in the investigation and analysis of safety incidents. Demonstrated analytical skills, excellent oral and written communication skills, and experience with computer database management, spreadsheet systems and statistical analysis also required. Safety and Environmental Protection Division.

NS 8691. QUALITY ASSURANCE POSITION - Requires BS in scientific discipline and several years' QA experience. Duties will include auditing, design review, procedure writing, training and oversight for QA requirements. Familiarity with ANSI/ASME NQA-1 standards very desirable. Safety & Environmental Protection Division.

DD 0837. GLASSBLOWER POSITION - Requires completed apprenticeship, and 10 to 15 years' experience constructing, modifying, and repairing scientific glass and quartz apparatus. The ability to work from rough sketches also required. Will maintain and service a one-person glassblowing facility; will provide highly skilled technical assistance on matters of design, use, and capabilities of scientific glass and quartz apparatus. Chemistry Department.

Motor Vehicles & Supplies

90 GEO STORM - 5-spd., red, a/c, alarm, speaker sys., excel. cond., ask. $9,000; 84 Honda 200X ATV, ask. $450. 698-8514 after 5 p.m.

89 DODGE DAYTONA - 5 spd., 2-dr., a/c, p/s, p/b, air bag, am/fm, $4,495. Ext. 3543 or 489-5289.

88 YUGO - body & interior excel., good for parts, $75; 73 VW Fastback, recent motor, runs well, needs minor electrical, $300. George, Ext. 4584.

88 VIKING POP-UP CAMPER - 170, stove, potty, sink, ice box, sleeps 6, $2,100. Tony. Ext. 3194.

88 CHEVY PICKUP - ¾ ton, 4x4, V-6, a/c, cap, am/fm-cass., linerbed, 46k, excel. cond., $9,250. Lori, Ext. 3046.

87 TOYOTA COROLLA GTS - twin cam, new brakes, exhaust, am/fm cass., 5-spd., ac, p/b, p/s, excel. cond., $5,300. Marie, Ext. 2907 or 399-3401.

87 DODGE SHADOW - 5-spd., a/c, 53k miles, mint cond., $5,000. John, Ext. 7623.

87 DODGE RAM 50 - 4x4, 5-spd., am/fm, p/s, p/b, auto lock hubs, ask. $5,300. John, 758-5902.

87 MITSUBISHI CORDIA - 5-spd., a/c, new exhaust, clutch, $3,000. Mike, Ext. 4293.

85 SUBARU GL - 4WD, wagon, 5-spd., a/c, am/fm/tape, $2,500. Alan, Ext. 2928, 929-0461.

85 MUSTANG LX - 2-dr., 4-cyl., p/s, p/b, p/l, 80k, well maintained, $1,900. 874-3927 after 5 p.m.

84 BUICK REGAL - 40k mi. on new Goodwrench engine, new trans. & exhaust, ac, all power, $2,000. Frank, Ext. 4284 or 698-1176.

84 CHEVY MONTE CARLO - V-6, auto, p/b, p/s, p/w, tilt, some body damage, 70k +. 924-7476.

84 CAPRICE - station wagon, p/s, p/b, a/c, needs some work, $2,500 or best offer. 399-5454.

83 YAMAHA VIRAGO - 750cc, black, mint cond., garaged, extras, $2,000, neg. Charles, Ext. 5211.

83 CHRYSLER LEBARON - 4-dr., a/t, p/b, p/s, p/w, a/c, excel. cond., 68k miles, $2,150. Les, Ext. 2920.

82 YAMAHA XS400HS MOTORCYCLE - 6k mi., many access., $800 neg. 878-2702 after 6 p.m.

82 FORD MUSTANG - V-6, p/w,. p/b, p/w, a/c, stereo w/cass., mint cond., $1,700. 661-5695 eves.

82 KAWASAKI KZ 440 - 13k miles, belt drive, 2 helmets, goggles, shop manual, mint, ask. $800. 727-3608.

82 VW RABBIT - body excel., engine needs work, $200, neg. Craig, 395-1084, leave message.

81 FAIRMONT - runs well, a/c, good stereo, $500. George, Ext. 4584.

81 FORD GRANADA - a/t, a/c, runs well, $345 neg. Ext. 5801.

81 FORD GRANADA - 4.3L, 6-cyl., a/t, p/s, p/b, ac, 4-dr., white w/red top & int., $495. Frank, Ext. 7519 or Vita, 277-0464.

(continued on page 4)

81 BUICK - s/w, a/t, a/c, dependable, no rust, recent brakes, exhaust, tires, $900 or best offer. Ext. 5080 or 751-1884.

80 FORD VAN - new 16.5" tires, battery & parts, needs engine work, best offer. Ext. 4719.

79 HONDA PRELUDE - grey, moonroof, 90k mi., runs well,, needs some work. Vera, Ext. 7108.
