View Notes

Form ID:	11243
Beamline Used:	28-ID-2
Start Date:	2/21/2018
End Date:	2/23/2018

SAF No.:	302105
Time requested this cycle:	2
Time received this cycle:	1

This user does not wish to be contacted with a status report.

1) How satisfied were you with the fraction of the year that the facility operates?
very satisfied

2) How satisfied were you with the Beamtime scheduled (i.e., was beamtime delivered on schedule were beamtime outages kept to a minimum)?
very satisfied
Comments:
I was actually granted more time than officially scheduled so many thanks to the beamline scientists for that opportunity. The storage ring went down but service was quickly restored. Regular status updates from the system helped organise experiments around the down time.

3) How satisfied were you with the beam performance (i.e., was beam or service maintained close to specifications)?
satisfied

4) How satisfied were you with the support for users provided by the NSLS-II staff?
very satisfied
Comments:
Special thanks to Jean Smiles for arranging collection of samples after they were delayed due to President's Day.

5) How satisfied were you with the support for users provided by the beamline staff?
very satisfied
Comments:
Full training was provided at the beamline on calibration and data acquisition. The online materials were particularly useful for familiarising ourselves with the procedures before visiting. Although not required, the beamline scientists stated they were available for support if needed.

6) Which of the following benefits have resulted or will soon result from your use of this facility this year?
Created new fundamental knowledge (i.e., basic research)
Discovered other new knowledge (i.e., applied research)
Dissemination of new knowledge via publication in peer-reviewed open literature
Trained students (undergraduate, graduate or postdoctoral associate)

7) How satisfied were you with the Safety Approval Form and the Beamline authorization processes?
very satisfied

8) How satisfied were you with the quality of general training (NSLS-II safety orientation, GERT, Stop Work) and BeamLine Operations and Safety Awareness (BLOSA)?
very satisfied

9) Are the training and safety procedures appropriate?
yes

10) What would you like the NSLS-II to do differently in the future that would assist users (not mentioned above)?
