

Fan Wu

BROOKHAVEN NATIONAL LABORATORY

My name is Fan Wu. I'm currently a postdoc at the Chemistry department of the Brookhaven National Laboratory. I received my Ph.D degree in chemistry from the University of Chicago in March 2005. My research at BNL focuses on the mechanistic study of metal catalyzed reactions at the molecular level and use this information to rationally design improved metal catalysts for various processes, such as hydrogenation. I consider ASAP to be an important organization to address the social and technical interests of the young scientists at BNL. I am running for the governing board of ASAP to fulfill the missions of ASAP, and to provide quality service to the members of ASAP.
