

**Laura Barrio**  
BROOKHAVEN NATIONAL LABORATORY

In May 2008 I started as a post-doc in the Chemistry Department. My work focuses on the study of catalysts by synchrotron radiation techniques, so I divide my time between the Chemistry Department and the NSLS.

The ASAP, with its regular Thursday meetings, has given me an excellent opportunity to meet new friends and I would like to help other newcomers to find a relaxed and entertaining atmosphere here at BNL.
