

Nathalie Bouet
BOSTON UNIVERSITY

I'm a post-doc from Boston University working at the NSLS.

I spend a large amount of my time at BNL and was living on-site the last 6 months, that's why I really feel concern by the integration and well-being of the students and post-docs coming to work here.

The ASAP was the first place for me to socialize and cross the cleavages between the different science fields present at BNL.

I would like to make sure this will be the same for others.
