

Congressman Emilio Q. Daddario lectures in the BNL Theatre on "Shaping the Environment of Federal Laboratories." Daddario's lecture was delivered last Thursday, March 20, as one of a series established to broaden the subject matter available on issues of current interest and importance. —Humphrey

George C. Cotzias Honored By Chile

Dr. George C. Cotzias, Head of the Physiology Division of the Medical Center at BNL, was awarded a Dr. Honoris Causae Degree Monday night by Catholic University, Santiago, Chile. The citation noted his "outstanding achievements in medical science and service to the community."

Dr. Cotzias and his colleagues at BNL were the first to successfully develop a treatment for Parkinson's disease, using L-Dopa to alleviate the crippling symptoms. Concurrent with the development of the treatment for Parkinson's disease, Dr. Cotzias and his team were working with Dr. Ismael Mena and his colleagues at Catholic University, Santiago, Chile, to

George C. Cotzias

utilize L-Dopa, in much the same manner, as a treatment for chronic manganese poisoning, a severecrippler of many who work in the manganese mines of Chile. To date, L-Dopa when administered properly has produced dramatic results in those miners who are being treated.

The arrangement whereby Dr. Cotzias at Brookhaven and Dr. Mena at Catholic University in Santiago began to collaborate was made possible by the combined efforts of the Pan American World Health Organization of the United Nations, the U.S. Atomic Energy Commission, and the two institutions. Ever since the program began, Catholic University has had one of their people working with the Cotzias group here at Brookhaven.

According to Dr. Mena, the Honoris Causae is the highest honorary degree that can be awarded, and has not been given in the past five years. At the time of the award on Monday evening, Dr. Cotzias presented a talk on the L-Dopa treatment to a capacity audience in the main hall of the University. Present at the ceremony were Dr. Fernando Castillo, Rector of Catholic University; Dr. Manuel Monje, Dean of the Medical School; Dr. Ulpiano Blanco, representing the Pan American (continued on Page 2)

Cronkite Promoted To Rear Admiral

Dr. Eugene P. Cronkite, Chairman of BNL's Medical Department, and a member of the Medical Corps, US Naval Reserve, was promoted to the rank of Rear Admiral in ceremonies at the Navy's Bureau of Medicine and Surgery on March 12. The appointment was made by Vice Admiral George M. Davis, Navy Surgeon General.

A veteran of 12 years active Naval service, Doctor Cronkite has been a member of BNL's Naval Reserve Research Company 3-9 since April 1955.

During his tour of active duty from 1942 to 1954, Dr. Cronkite served at the Naval Medical School and the Naval Medical Research Institute in Bethesda, Md.; the Naval Hospital and Navy Receiving Station at Norfolk, Va.; with the Third and Ninth Marine Aircraft Wings; and aboard the USS Sylvania (AKA-44). He is entitled to wear the Army Commendation Medal, American Campaign Medal, Asiatic-Pacific Campaign Medal, World War II Victory Medal; the National Defense Service Medal; and the Armed Forces Reserve Medal.

In addition to membership in numerous civilian professional organizations, Dr. Cronkite presently serves as consultant to the Armed Forces Radiobiology Research Institute and the Clinical Center, National Institutes of Health in Bethesda; the Walter Reed Army Institute of Research; and the Institute for Defense Analysis in Washington.

Dr. Cronkite is married to the former Miss Elizabeth Kaitschuk, of Chicago. They reside in Setauket.

At a recent annual inspection of Naval Reserve Research Company 3-9, principal speaker and honored guest was newly-appointed Rear Admiral Eugene Cronkite, Chairman of BNL's Medical Department. He is being congratulated by Commander S. J. Tassinari, Commanding Officer of Naval Reserve Group Command 3-10 (right) and Captain Victor P. Bond, Commanding Officer of 3-9, and Associate Director of BNL. —Humphrey

BNL's Spectrum At Berkner Hall

There will be a special screening of BNL's movie, Spectrum, at 12:45 p.m. on Friday, March 28, in Berkner Hall. All Lab employees who are able to spare the time or to work it in to their lunch schedule, are invited to see this 25-minute show. Two groups who are touring the Lab on Friday will also be watching this prize-winning color film.

Population . . . Problem and Solution

Dr. Roger Revelle, Director of the Harvard Center for Population Studies, will present the 1969 Pogram Lectures, starting on Thursday, April 17.

The title for the series of three lectures is "The Population Problem and What Can Be Done About It." The first lecture, on April 17 will be titled "Mankind Divided - The Rich and The Poor." The second lecture, on April 22, will be "Can the Poor Countries Feed Themselves?" and the third, on April 24 will be "What Must Be Done to Solve the Population Problem."

Dr. Revelle is internationally known for his investigations of the physical nature of oceans, and has devoted much of his time in recent years to the problems of developing countries. He was decorated in 1964 by the President of Pakistan for developing a plan for increasing agricultural productivity in that region.

Before coming to Harvard, Dr. Revelle was University Dean of Research for the University of California. Revelle College, the first of the new colleges established in the University of California, San Diego, was named in his honor

Daddario Proposes More Involvement In National Problems

Congressman Emilio Q. Daddario, AUI Distinguished Lecturer, was welcomed to BNL by Orrin Dwyer, Chairman of the Lecture Committee. Dr. Maurice Goldhaber, Lab Director, introduced Daddario, who titled his talk "Shaping the Environment of the Federal Laboratories."

Mr. Daddario, who is Chairman of the Science, Research and Development Subcommittee which recently submitted a full report to Congress on the Utilization of Federal laboratories, said in his talk at Brookhaven Laboratory on March 20, "Last April in opening hearings on this subject, I noted the finite limits of government resources assignable to science and technology and that we must learn to accommodate within these limits the needs for part of new requirements for research and development. It is our view that the alternative of interagency use of Federal laboratories should be a real, viable option and not a paper tiger."

Mr. Daddario advocated the use of Federal laboratories to support efforts to overcome those social problems which are addressed by new legislation, such as the Omnibus Crime and Safe Streets Act. This approach would also be true for other national problems such as pollution of our environment, transportation, etc.

Scientists See Problems

"As a Congressman," Mr. Daddario told his audience, "I have been able to visit Federal laboratories and to meet with and come to know their scientists and engineers. And I would say that I have found among them a compassionate regard for the problems of our society. They are not living in an intellectual vacuum, isolated from the concerns of real life. This aware-

Emilio Q. Daddario answers questions at the informal reception that followed his lecture.

ness encourages me to do what I can to provide the capability and opportunity for laboratories - and their people - to respond to these needs, within limits set by prudence and good judgment. With sufficient flexibility in resources leading to such involvement, I am convinced that Federal laboratories can become more exciting and productive centers for innovation in research. In doing so I would expect that we would add to the already high morale of our laboratory staffs by the positive affirmation that they are a part of society and that they are expected to seek ways to bring their special talents to bear upon its needs. I am not calling for Utopia. What I propose would have to take place within the bounds of reason, moderation and common-sense."

Five Recommendations

Mr. Daddario noted five recommendations that he believed would make Federal laboratories more responsive to national problems. They are:

1. A restatement of current policy for laboratory utilization;
2. A visibly established responsibility for carrying out the policy;
3. Agency guideline for this purpose;
4. Discretionary funds for some laboratories, depending upon size and purpose of the laboratory. These funds would be used as an incentive for creative and innovative work;

Congressman Tours Lab Facilities

Accelerator Department Chairman G.K. Green (right) points out AGS features to Congressman Daddario (second from right) as Harvey McChesney, AGS, and Orrin Dwyer, AUI Lecture Chairman look on. —Humphrey

At an informal meeting with members of the BNL staff in the Biology Department, Congressman Daddario listens to George Woodwell (left) explain the ecology program.

Daddario

(continued)

5. Mechanisms for laboratories to contribute to current social problems having considerable scientific and technological components. Our laboratories with their special capabilities "can become strong outposts in our struggles with the changing problems of our day."

After a spirited question period following his speech, Daddario met with the audience in an informal reception at the Brookhaven Center. Alan Thorndyke, Physics Department, an old school chum of Daddario was host to the Congressman for the night.

Daddario's arrival for the lecture had all the elements of a suspense drama due to the weather on Thursday night. Set to arrive at BNL at 5:15 for a pre-lecture press conference, Daddario's plane was delayed because of weather, and was held up over Riverhead for more than an hour as Lab officials waited.

When his plane was finally cleared to land, it was 6:10 p.m., and he arrived at the dinner given in his honor just as the main course was about to be served.

Friday morning Congressman Daddario went on a tour of the Lab that included conferences with many members of the scientific staff. He ended his visit with an informal luncheon with 50 members of the staff at the Brookhaven Conference Center.

Physics Colloquium by Deputy Director

Shock Waves and Solid State Physics was the subject of a Physics Department Colloquium given by Dr. George H. Vineyard, former Chairman of the Physics Department, and now Deputy Director of BNL. —Humphrey

Golf Tips

The basic factor in all good golf shots is the grip. Get it right and everything else will fall into place. Start this season off right by getting a good grip on a pen and filling in your BERA Golf Association application.

All tournaments and league matches are with handicap so you don't have to be an Arnold Palmer to play - and win.

Come on out and "rough it" this summer. Call BGA President Dick Hildenbrand, Ext. 7777, for information.

Remember, the deadline for league entries is April 1st - So hurry!

Cotzias

(continued)

World Health Organization; and Edward M. Korry, U.S. Ambassador to Chile.

Dr. Cotzias' talk on Monday evening, as well as his arrival at the Santiago airport last Saturday, were televised and widely reported in newspapers throughout Chile. According to Dr. Mena, who talked via phone to a representative at Brookhaven immediately after the ceremony, "This has been a great event in Chile in recognition of a beautiful accomplishment. We are very proud of Dr. Cotzias, and of our association with him and his colleagues at Brookhaven National Laboratory."

Ten Students Win AUI Scholarships

Ten AUI Trustee Scholarships for high school seniors who are children of BNL employees have been awarded. The scholarships are for \$900 a year at the schools of the students' choice and are renewable each year of study towards a bachelor's degree.

This coming June, the first ten of the forty present scholarship winners will graduate and no longer receive benefits from the program. Since the scholarships were first awarded in 1965, approximately \$90,000 has been disbursed by the AUI fund at the rate of \$900 each year for each winner.

Of the ten winners this year, four are seniors at Bellport High School, two are from Center Moriches High School. Two more are from James W. Young High School in Bayport, and one each from Central Islip High School and Ward Melville Senior High School in Setauket.

The winners are as follows:

Barbara L. Dexter, daughter of Edward W. Dexter of the Accelerator Department, lives in Setauket and attends the Ward Melville H.S. She plans to attend Cortland College.

Roy S. Lewis of Bayport is the son of Winfield J. Lewis, Jr. of the Department of Applied Science. Roy is attending the James Wilson Young H.S. and plans to pursue his degree at the University of Rochester.

Andrew R. Pate of Bellport attends the Bellport Senior H.S. He is the son of Howard R. Pate of the Medical Department, and will study at Columbia University.

Shryle F. Roesch is the daughter of Arnold M. Roesch of the Physics Department. She lives in Manorville and attends the Center Moriches H.S. She plans to attend C.W. Post College.

Haruo Shirane, son of Gen Shirane of the Physics Department, lives in Bellport, attends the Bellport Senior H.S., and will start his studies at Wesleyan University.

Kathleen A. DeMatteo, of Center Moriches and Center Moriches H.S., is the daughter of Raymond F. DeMatteo of Photography and Graphic Arts. She plans to attend SUNY, Potsdam.

Virginia McLaughlin, daughter of Bernard F. McLaughlin of the Accelerator Department, lives in Blue Point and attends James Wilson Young H.S. She plans to attend SUNY, Geneseo.

Richard V. Sailor, son of Vance L. Sailor of the Physics Department, lives in East Patchogue and attends Bellport Senior H.S. He will pursue his studies at Amherst College.

James M. Shreeve is the son of a member of the Medical Department, Walton W. Shreeve. James lives in Bellport and attends Bellport Senior H.S. He will begin his college career at Brown University.

Michael R. Welch of Central Islip is the son of Frank P. Welch of Photography and Graphic Arts. He will graduate from Bellport Senior H.S. this Spring and in the Fall will begin his college studies at Rensselaer Polytechnic Institute.

Ellis To Retire

After 21 years as a Staff Shop Technician in the Accelerator Department, Alfred O. Ellis has decided to retire.

When asked what he would do with all his spare time, Ellis said that he will travel out West for awhile in a trailer and then return to his home in Bayport where he will keep busy by working in his machine shop in his cellar.

Mr. Ellis has admitted that one of the things he'll miss most at the lab will be the boys in the shop.

Teenage Art Show Planned For BNL

Artists who are at least 13 years old, and not yet graduated from High School, are invited to submit entries for exhibit at the Hospitality Committee's Tea and Sherry party on Wednesday, May 7th at the Brookhaven Center.

All forms of art are acceptable including pottery, paintings, and sculpture. Prospective exhibitors must be related to Lab employees, and are asked to register their entry before April 11. Evonne Hammond, who is accepting entries, would like to know the name, age and grade of the artist, as well as the name of the related Lab employee, the home phone number and a brief description of the work entered. This information should be sent to Mrs. Hammond at the Personnel Office, Building 185, as soon as possible.

Dollars and Sense

Leon Meshel

Are You an Average Taxpayer?
by Frank Federmann

For those BNL employees who itemize their tax returns, the following chart should be of special interest. This chart shows the average deductions of taxpayers in 1966 for interest, taxes, medical expenses and charitable contributions.*

While it may be interesting for those who itemize their deductions to compare them with these average figures, the chart is certainly not to be considered as indicating amounts which would be allowed by the Internal Revenue Service. In any case, claimed itemized deductions must always be capable of substantiation.

Average Deductions For				
Adjusted Gross Income	Contributions	Interest	Taxes	Medical and Dental
\$ 2,500	\$139	\$ 180	\$ 184	\$ 286
3,500	161	231	242	341
4,500	186	299	289	368
5,500	202	388	340	374
6,500	216	451	391	359
7,500	226	515	463	357
8,500	250	576	517	371
9,500	269	636	581	379
12,500	326	730	712	414
17,500	466	910	995	568
35,000	818	1,302	1,603	1,031

*(The government has not supplied figures for "miscellaneous deductions.")

It should be noted that this chart is two years old, and since then, most costs have gone up. The increases in medical costs, interest rates, and taxes (especially the real estate taxes, which are considerably higher on Long Island than in most other locations in the country) should be considered when comparing the national averages to your own tax return. Remember - you must be able to substantiate *all* itemized deductions.

Correction

Due to an omission error in last week's *Dollars & Sense*, the paragraph concerning *Real Estate Taxes* is being reprinted below (the portion that was omitted in last week's article is underlined).

You may deduct amounts actually paid to local taxing authorities during 1968. Be careful not to include payments to an escrow account; just include payments made by your bank (mortgagee) and/or payments you made directly. Special assessments are generally not includable as real estate taxes.

Everything's Coming Up Roses . . .
on May 16, 17, 23, and 24

The Baja Marimba Band

Two shows in one night with each feature a top entertainment group will be offered Saturday, May 3, for the annual BERA Special Event.

The Brothers Four, a folk-sing group, will open the evening program and will be followed by Julius Wechter and The Baja Marimba Band. For sheer numbers, this will be a big show, as the Baja Band has nine members, and the Brothers number four.

In addition to the smooth music with a Latin beat that comes forth when the Baja Band plays, the visual impact of the costumes of the band is something special. Droopy moustaches, colorful serapes, and zany staging all add to the show when Wechter and his group are on.

The Brothers Four, on the other hand, are different from other popular singing groups in that they have all had recent haircuts. This is not to imply however that this is a square group. They manage to cut through the ethnic barriers inherent in folk music and strike a common chord with music lovers of all tastes and ages.

Tickets for the Double Special will go on sale tomorrow, and will be offered only to Lab employees and their guests for the first two weeks. After that, tickets will be sold to the public until the capacity of the Theatre is reached.

Reserved seats for the performance will be sold to Lab employees and their families for \$4.50 each, while guests and the public will have to pay \$6.00 for a ticket. Because of the limited number of seats, and the visual importance of this show, Recreation Director George Sabine urges that seats be reserved early for the best locations.

Local Artists In Special Concert

A special free concert, sponsored by the BERA Concert Group, will feature three local artists on Tuesday, April 8 in Berkner Hall.

Jean Snow, Soprano; Catherine Curran, Flutist; and Ann Jupp, Pianist are all residents of Brookhaven Town, and well known to local concert audiences. This concert will not be a part of the regular BERA Concert Series, but will be a special complimentary concert.

Jean Snow, Soprano, received her Master's degree from the State University of New York in Albany, and her studies include work with Yves Tinayre, Robert Bloom and Warner Bass. She has concertized extensively, appeared at Town Hall, on WNYC radio, WRGB and CBS-TV, has sung in opera, operetta and oratorio. She has sung with the Massapequa Symphony and the Brookhaven Symphony. She is a member of the National Association of Teachers of Singing.

Catherine Curran, Flute, received her Bachelor of Music degree from Trinity University, San Antonio, Texas. She studied with William Kincaid. She has played with the Houston and San Antonio Symphonies and other orchestras, and is first flute with the Suffolk Symphonic Society, the Brookhaven Symphony and the Huntington Festival Orchestra. She has been heard in solo recital in Houston, the Lubbock Chamber Series and on Long Island.

Ann Jupp, Pianist, received her BA from Wellesley College where she studied piano with David Barnett. Mrs. Jupp has given numerous recitals locally.

Two Shows For One This Year At May BERA Special Event

The Brothers Four

Movie Tonight

Thursday, March 27, 8 p.m. Berkner Hall

Tillie and Gus

In this classic comedy W.C. Fields is quite at home as a card shark, suspicious of fraud when he discovers that his niece and nephew are about to receive only part of their inheritance.

Light refreshments will be served after the movie.

On May 15 - it is planned to show some movies about Cuba and Colombia made by two different groups for the next special bonus movie. The US Navy and the Newsreel Film Makers of New York present two opposite viewpoints to the economic and political turmoil in these two countries.

Subscription tickets are still on sale at the door before every movie showing, which entitle the holder to ten regular admissions and admission with one guest to all special bonus showings for which an admission fee cannot be charged. The tickets, which cost \$10. are good for one year from the date of purchase. Old subscription tickets may be used for admittance to any of the movies, regular or special bonus.

Spring Movie Schedule

- March 27 Tillie and Gus, with W.C. Fields
- April 10 Playboy of the Western World, with Siobahn McKenna
- May 1 A Day at the Races, with the Marx Brothers
- May 15 Special Bonus Movie for subscription ticket holders only*

*Originally scheduled for April 3.

Scuba Diving Classes

Notice to all Members - Classes will resume on Monday, April 7 and Tuesday, April 8.

2nd Annual BNL Round Robin Pistol Shoot

The BNL - PD & Upton Rifle & Pistol Club will have a pistol shoot for .38 and .22 Cal. guns at the BNL Pistol Range, open to all employees. Entries must be members of the BNL - PD or Upton Rifle & Pistol Club, in good standing. BNL employees may join U.R.P.C. to qualify.

First match 10:00 a.m. - April 12th. Succeeding matches, same time, on May 17th, June 14th, July 12th, August 16th, September 20th and October 18th. Entry fee - \$1.50 per entry.

The 1968 season BNL Round Robin Pistol Shoot was very successful with an enthusiastic turnout of shooters of varying capabilities.

A total of 72 trophies was awarded to shooters in Class A, B & C individual events, Class A, B & C two-man team events, and the Lucky Target event.

Two additional trophies were awarded for the highest score achieved during the season in the .38 and .22 Cal. individual events.

Mets Baseball Fans

Tickets are going fast. Don't be disappointed because of procrastination. Call the Recreation Office on Ext. 2808 to see if the dates you want are still available.

IBEW Meets Tonight

Tonight, Thursday, March 27, there will be a general meeting of Local 2230 of the IBEW at the Knights of Columbus Hall on Railroad Avenue, Patchogue.

The meeting will start at 8 p.m., and will consist of a regular agenda plus a report on new members. An election conducted by the National Labor Relations Board on site, was held on Thursday, March 20, at which the Laboratory's Telephone Operators voted to be represented by the IBEW for collective bargaining purposes.

Gypsy To Feature BNL Favorites

When Gypsy opens at the BNL Theatre on May 16, Lab audiences will be pleased to see some of the favorite actors and actresses of other BNL productions back in action.

Pat Towey, who has had several leads in past Theatre Group offerings, will play the part of Rose, mother of Gypsy Rose. Pat has lately been making a mark for herself in professional circles with appearances at supper clubs throughout the Island and in Manhattan.

Barbara Strom, also familiar to BNL audiences, plays the part of Louise, or the grown-up Gypsy. Barbara has also like Pat been in local and Metropolitan supper club engagements, and is hoping to make music her permanent career.

Charlie Meinhold, whose last appearance was in Heartbreak House, will take on the portrayal of Herbie, and play opposite Pat Towey as Rose's agent and boyfriend.

The three strippers who teach Gypsy the tricks of the trade are Marie Garafola as Tessie Tura; Anna Passel as Miss Mazepa; and Hennie Rogers as Miss Electra.

Paul Kelly, who designed the elaborate sets for the show is no newcomer to scenic design, having worked on most of the major shows produced here. For Gypsy, his piece de resistance will be a runway that extends out into the second row of seats and makes a pit for the orchestra.

Tickets for Gypsy are now available at the Recreation Office and at the Box Office set up in the cafeteria every day at lunch time. This week a special floating Box Office will be operating in the Physics Department Lobby only during the lunch period. Each week until show time, this "floating" box office will move to a new location in one of the major departments.

Tickets are for sale this week only for employees, their families and their guests. Next week the tickets will go on sale to the general public. All seats are reserved, and cost \$1.50 for employees and family, and \$1.75 for guests and the public. Children will be admitted for only fifty cents.

Bowling News

Purple League

The Phoubars were tripped up by Bagel's Bums as S&M "lowered the boom" on the Fiscal contingent. Phoubars lead was reduced to six points with four nights left.

Joe Cuccia bowled a 212-565 series, Mike Guacci 202-559, John Van Norman 200-542, Mike Iarocci 222-540, Ed Sperry 536, Carl Cantera 514, Jack Austin 508, and Vinnie Bilms 203-494.

I know some girls are bashful, but I didn't think they were on the Fiscal Assets. Can you imagine waiting two weeks to accept an invitation from some gentlemen who bowl (?) to bowl? The only question is - our hours or yours? Of course we'll bring the refreshments.

Pink League

There seems to be no stopping the Medigals who have now increased their possession of first place by five points. Last week, the Fizzles pushed two teams aside to ease themselves into third position by one point. The "Honor Roll" was attained by Mae Madden, Beverly Nine, Renee Rosati, and Brita McGonigle.

Red League

The Sparks have finally caught up with the Sandbaggers to tie for 1st place. These two teams will not give up easily. It should be a good fight and there isn't much time left.

There have also been quite a few records set this week. For High Scratch Series Ken Robins beat his previous record of 610 to 618. High Gross Series record was broken by John Sucher with a 709, and High Gross Game was reset by Monroe Petty with a 281.

Our 200 games this week were rolled by C. Buzzeo - 201, J. Ferrante - 206, J. Sucher - 209, R. Larsen - 218, R. Sick - 223, M. Petty - 240, K. Robins - 234 and 210. S. Earle also rolled his first 200 game of 232 for a gross series of 700.

The Alley Babbas and the Bio Rads are fighting it out for last place with only three points separating them.
