

George Reedy On The Presidency

In November 1971, George E. Reedy presented his views on "The Decline of Democratic Dialogue in Our Society" as the Twelfth George B. Pegram Lecturer at Brookhaven. In June 1973, these lectures, to which Reedy added a perceptive concluding chapter, were published by Columbia University Press under the title "The Presidency in Flux." Needless to say, the appearance of this work could hardly have come at a more conspicuous moment.

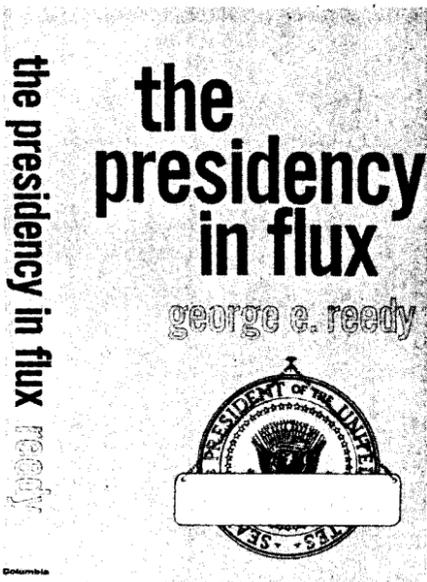

Reedy, once press secretary to former President Lyndon Johnson, now Dean of the Marquette University School of Journalism, is not a stranger to the "heat of the kitchen" and exhibits anything but an academic attitude about our society, the changes in our political institutions, the crisis in the presidency, itself.

When he was invited to give the Pegram Lectures, Reedy was a Fellow at the Woodrow Wilson International Center for Scholars housed in the Smithsonian in Washington. The year before, in 1970, he had published "The Twilight of the Presidency." In that book, as one reviewer pointed out, Reedy analyzed "the modern presidency as an institution increasingly remote from the people, a situation which has corrupted 'the classic democratic dialogue' and encouraged abuse of presidential power." Simply, as Reedy put it, "Power breeds isolation. Isolation leads to the capricious use of power." The Senate hearings currently underway provide ample confirmation of this.

In the new book, the same reviewer sees as its distinguishing feature, Reedy's "tempered optimism that emergent 'countervailing' forces - disaffected youth, women as 'an independent political force' and what he identifies as a 'new class of surplus people' (that growing body of Americans 'dispossessed from the traditional produc-

tion process') - might eventually coalesce and force the changes necessary to make the presidency more responsive to the commonweal, to cut through the 'brave new world' communications gap which compels the president and his aides to think of people more and more as 'columns of figures.'" While few may share his optimism, it may be necessary to accent his faith that Americans "have always succeeded in building new institutions to replace those that have fallen." It is clear that we will have to become more than just witnesses.

Furthermore, we cannot claim to be somehow remote from the current situation. One of the motives behind inviting Reedy to lecture at Brookhaven was the realization that science has come to occupy an unprecedented position within our political institutions. In the conduct of war and international relations, in the exploration of space, in the exploitation of the commons of the high seas, science has brought to the

Presidency instruments and potentialities of awesome power and variety.

It is no longer possible to speak of separate categories such as science and society, or of a government of men free of scientific or technological considerations. Our new knowledge, our expanded means, demand new institutions, or responsible changes in our old ones.

Such an institution as the Presidency reveals the critical nature of this modern problem. The same responsibilities remain, and yet the modes of decision making have changed but little, and the forces, such as science, which are remaking the world, are yet to be fully understood at the center of our democracy.

A copy of Reedy's book is on display in the library accompanied by a review of it by John Barkham for the *New York Post*.

—R.C. ANDERSON

Wood Tick Season

If you are planning a hike or a camping trip, beware of the common wood tick. These ticks are plentiful in wooded and grassy areas from the beginning of spring until the first frost in fall.

The mouth part (photographed here through a scanning electron microscope by Jack Kelsch) enables the tick to dig a hole into the skin. During this process it secretes an anesthetic liquid which deadens the area and allows it to suck the victim's blood.

If you are bitten, do not attempt to pull the tick out. The head may break off under the skin causing infection; squeezing will only force more secretions from its mouth into the body. Instead, use a q-tip soaked in

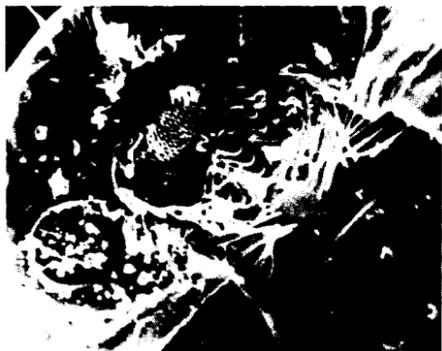

kerosine, gasoline, mineral oil or engine oil. Apply this to the tick and within about 10 minutes it should work its way out.

If the head breaks off under the skin, you should contact a physician as soon as possible. As is the case with any organic matter, it will decompose under the skin if allowed to remain in the body, causing an infection which is usually more annoying than deadly. Tick bites also may cause Rocky Mountain Spotted Fever which occurs periodically in isolated cases on Long Island.

Any commercial tick repellent applied to the shoes, socks and pant legs before camping trips will usually guard against tick bites.

Face and mouth of wood tick.

Looking into the jaw of a wood tick.

Patriotic Strip

Rita Greenhouse

The newest Executive suggestion on how to conserve energy has just been issued from the White House - take off your clothes. It is hoped that by relaxing dress codes in offices, employees will be cooler, and therefore less inclined to over-use air conditioning.

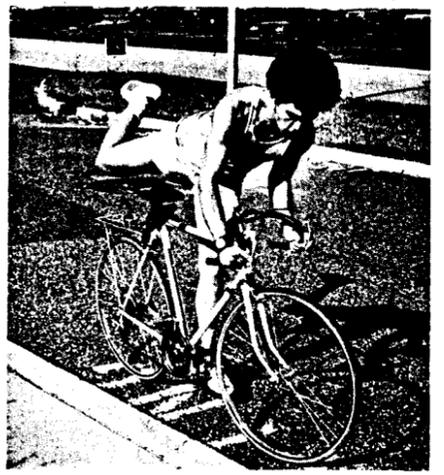

The idea of a new dress code doesn't phase Ann Will and Ann DerMateosian as they "cool it" casually during a leisurely crocheting session.

Since Americans are not a people who take Presidential suggestions lightly, we can speculate that Mr. Nixon will receive our full cooperation. During peacetime or war, the nation has always rallied around the call to action from the Chief Executive. The Depression gave us the Civilian Conservation Corps, World War II gave us victory gardens, and now the energy crisis will give the world the "patriotic strip."

After years of puritanical modesty, officialdom is asking us to "let down" to cool off. But how will the new dress codes be implemented? Will cut-offs be cut off, minis micro-ed and halters abbreviated? Will the rest of the country finally be catching up with BNL?

Will Washington officials follow the example of one DAS employee and go to work in velvet hot-pants and sneakers? Will

Nat Greenhouse prepares to mobilize for cool on his way to work.

we soon see members of what is left of the White House staff cycling to work in swimming trunks like one BNL health physicist? Will the President himself abandon his blue serge for shorts and sandals in imitation of Brookhavenites?

In the interest of science, BNL must still remain one step ahead of the rest. Here we will probably carry the President's suggestion to the limit as we mobilize in the inter-

Stanley Cherouski didn't need a Presidential suggestion to abandon his jacket and tie.

est of cool. Walls and corridors will be plastered with slogans to inspire us, like, "Better bare," and "Strip for Peace" causing the phrase "Uncle Sam wants you" to take on new meaning.

Of course there will be opposition to the new policy. Health Physics and Safety will be in an uproar. "Where will we wear our film badges?" they'll ask. Naturally we can not abandon certain safety practices. Cafeteria workers will still wear hair nets and aprons. Safety shoes, hard hats and safety glasses will also be required in certain areas.

Despite the proposed changes, we can rest assured that somewhere on site stalwart-suited gentlemen will remain in their fortresses of conservatism as a reminder of days gone by when men wore ties and air conditioning was plentiful.

Gypsy Moths

If the Gypsy Moth has been annoying you, perhaps a solution is at hand. About three weeks ago, The American Can Company distributed several hundred experimental moth traps on site in the apartment area. The purpose of the traps is to catch the male moths and thus prevent breeding. The traps have been designed in various configurations to determine the most effective shape for a non-toxic end to the Gypsy Moth invasion.

Suffolk County Volunteer Firemen's Recognition Week

Beginning the week of July 23, 1973 Suffolk County's one hundred and nine volunteer fire departments will celebrate "Suffolk County Volunteer Firemen's Recognition Week," Ronald Buckingham, Director of the Department of Fire Safety-County of Suffolk, New York, announced recently. To celebrate this important occasion, many events, demonstrations and exhibits will be held at the Smith Haven Mall in Lake Grove.

On May 18, 1973 the Honorable John V.N. Klein, Suffolk County Executive, issued a proclamation to commemorate this week. The proclamation noted that there are over 11,000 firefighters in the 922 square miles of Suffolk and last year volunteers responded to 33,000 alarms in protecting the over one million Suffolk County residents. The proclamation and events of the week are to remind residents of the essential service and to express appreciation of the work and efforts of Suffolk County's volunteer firemen.

The schedule of activities begins on Monday evening, July 23, at 7:00 p.m. at the Smith Haven Mall where many local and state dignitaries will be on hand for opening ceremonies. During the week the aisles of the mall will be alive with many educational exhibits, antique and modern equipment, dramatic demonstrations, displays and much more. Outside the mall, actual fires will be extinguished each evening from 6 to 9 p.m. by the various fire departments. The week's events will conclude on Saturday evening, July 28, at 7:00 p.m., when a parade of over 100 pieces of equipment will circle the mall. There will also be live rescue demonstrations with men jumping off the mall's roof, cars being crushed and then opened in seconds by modern extricating equipment, and thousands of volunteers on review.

Youth On Campus

Shirley Froberg from the New York Telephone Company demonstrates correct telephone usage to Youth on Campus students Thearl Barnard, Karen Swincinski, Shona Jenkins and Dianett Milum.

Youth on Campus Program Underway

Learn while working is the theme of this year's Youth on Campus Program. On July 9, 29 students began an eight week program involving basic skills development, vocational guidance, and on the job training at BNL. The annual YOC program will continue through August 31 under the direction of George Sabine and assistant Kay Hunt of Personnel.

On Tuesday, Ann Flood and Patricia Wilson from the Accelerator Department, began a series of bi-weekly "Office Practices" classes to improve students' typing and basic office skills. During the first session, they offered their experience at BNL as a resource to the women who attended.

The students have been assigned to work in technical and clerical areas where they can receive job training and personal help. Most were recruited through high school guidance counselors or BNL employees; 12 were returnees from past summers.

Area high schools represented include Riverhead, Longwood, Sachem, Center Moriches, Bellport, Greenport, and Port Jefferson. Graduates are attending or planning to attend Suffolk Community College, Pace University, New York Community College, Concordia, Howard University and SUNY.

Thearl Barnard, a sophomore from Pace University, is back for her second year in the program. She currently works in the Affirmative Action Office as a clerical assistant. Evelyn Jackson from Suffolk Community College, is also back for a second summer at BNL. "I think it's a good program," she said of YOC. Commenting on her training at the lab she said, "If you want to learn something, the best thing to do is work at it." One of the first-timers in YOC is Randy Alford who works in the Summer Recreation Program for children of Brookhaven employees.

In addition to regular duties, the students are scheduled for a series of tours throughout the lab, and several lectures, including one by James Hicks from the Labor Department and another by M. Daconta from the U.S. Postal Service.

Pat Wilson and Anne Flood assist Youth on Campus director George Sabine during the first "Office Practices" class.

Pamela Treadwell and Carol Smith pour over information about business telephone procedures.

Staff Services Note

There are forms for almost everything. To facilitate telephone directory and mail service a Report of Change Form (241D) exists. Prompt submittal of a completed form will insure that mail and telephone calls will continue to be directed to the recipient rather than to an old address or extension number. The forms are available from Stationary and from pages XXXI and XXXIII in the BNL Directory.

We consider all Laboratory employees as potential reporters and would like to solicit news articles from you. When something is happening in your area that you think is of interest to the entire community why not try your hand at writing it up as a short article and send it to the editor? Any article selected by the editor, who could use a fair amount of material each week, will bear the credit line of the person who wrote it.

Walter R. Kirkman, Jr.

Walter R. Kirkman, Jr. of Plant Engineering, who had been employed at BNL since August 6, 1962, died at his home in

West Sayville on July 15 at the age of 49.

Kirkman was co-founder of West Sayville Boy Scout Troop 212. He and David Hartley began the scout troop about 20 years ago in the basement of the West Sayville Fire Department. The troop, which began with 6 members, grew to number 60. Kirkman, who for over a decade had been assistant scoutmaster and for a brief time scoutmaster, arranged with Hartley for the troop's first camping site in Bellport about 18 years ago.

Before coming to Brookhaven, Kirkman worked for the Long Island Lighting Company. He was a native of Missouri who came to Long Island after World War II. While serving in the Army he participated in the Normandy invasion. He was a past master of the Masonic Lodge in West Sayville.

Kirkman is survived by his wife Barbara, three daughters, and two sons. Masonic services were held on Tuesday and religious services on Wednesday, followed by burial at Union Cemetery, Sayville.

Movie Tonight

This week's offering of the BERA Summer Film Festival features a trilogy of rib-tickling comedies featuring three of the greatest names in screen comedy - Chaplin, Fields, and the Marx Brothers. Now, for the first time, these names can be seen on the same bill in *The Classic Comedians*.

The first film in the package is Chaplin's 1917 short, "The Vagabond." Early in the film is an hilarious chase sequence involving Charlie and a group of street musicians. Later the Tramp rescues a waif and falls in love with her, only to see her turn her affections to an artist. This bittersweet romance was one of his first experiments in mixing comedy and pathos.

W.C. Fields' sheer audacity and sarcasm permeate "The Fatal Glass of Beer," the second film in *The Classic Comedians*. Made early in his sound film career in Hollywood, it contains all the elements found in his later work: a total disregard for women, dislike for children, irresponsibility, and an incredible knack for spinning outlandish tales, which he inevitably tries to pass off as true.

"Room Service," a full-length Marx Brothers feature, winds up the program. Originally a Broadway play, it was totally revamped by Groucho, Chico, and Harpo to suit their talent for creating total insanity. One outlandish scheme follows another as they try to leave a hotel without paying the bill. Ably assisting them are Lucille Ball and Ann Miller.

At a time when it is difficult to find screen entertainment for the whole family, *The Classic Comedians* is a wonderful opportunity to "get away from it all" and enjoy honest belly laughs. The complete program is about 120 minutes.

Show time is 8:30 p.m. in Berkner Hall. Tickets are available at the door and are priced at \$1.00 for adults, and 50 cents for those under 18. Employees, families, friends, and the general public are invited.

Next week's presentation will be *Rachel, Rachel*, directed by Paul Newman and starring Joanne Woodward, Estelle Parsons, and James Olson.

Hospitality News

There will be an afternoon meeting of the Hospitality Committee from 2 to 4 p.m. at the Recreation Building in the apartment area on Wednesday, July 25. All ladies are cordially invited to attend.

Summer Recreation Program

The gorilla leads the way as a group of active youngsters pursue him during the morning recreation program in the Apartment area.

The treasure hunt comes to a happy end as the children rush to investigate the contents of the treasure box.

Winners in the penny fetch at the afternoon swimming program at the Lab pool.

BERA Summer Program Forges Ahead

Some would say that Friday the 13th is the unluckiest of days. As it turned out for participants in the BERA summer recreation special events, last Friday was filled with pleasant surprises - for all but a certain gorilla.

The day began at the Recreation Building with a long and diligent search for buried treasure. Two teams of eager children crisscrossed the area, seeking new clues, and pressing onward to the treasures they knew lay waiting. Each was rewarded with a chest full of treats, and they victoriously paraded back to the hall with leaders Rich Parsons and Barbara Smalle.

Their work was not finished, however, as reports of a roaming gorilla led to the organization of a safari to rid the land of this menace. With forty pairs of watching eyes sweeping the landscape, it didn't take long for the beast to be spotted. Led by program director Jim Waite, the hunters subdued the gorilla soon after he jumped from his tree. He was pinned to the ground first by Francisco Mana, and shortly engulfed in leaping bodies.

The heroics now over, the afternoon Penny Fetch at the swimming pool provided a great opportunity for fun and profit. The pool was alive with splashing, diving fetch-

ers for nearly fifteen minutes before the winner emerged with a total of \$1.23 in coin.

Apparently, the persistent gorilla did not have enough, for he loped onto the pool deck soon after the activity ended. He circled the pool, trying to terrorize anyone he could, but found his only victim to be Recreation staff member William Kenzig, whom he backed onto the diving board and forced into the water. A bit too excited at his success, he soon fell in himself. Wet and wild, he swam to the pool's edge. There, his mask was ripped off, and a soggy Randy Alford, BERA's Youth-On-Campus worker, was revealed.

The day was complete, and none could doubt the luck of Friday the 13th.

Don't forget BERA's specials for next week:

Thursday, July 26 - Record Hop, Recreation Building, 9:00 p.m. - summer students and employees.

Friday, July 27 - Scavenger Hunt, Recreation Building, morning program.

Diving and jumping contest, and paper plate race, swimming pool, 3:00 p.m.

(All Parents Invited)

- Randy Alford

Hams Emergency Test

On Saturday and Sunday, June 23-24, members of the Brookhaven National Laboratory Amateur Radio Club once more competed in the annual Field Day contest sponsored by the American Radio Relay League.

This event is designed to test the preparedness of the thousands of amateur radio operators across the country to maintain emergency communications in the event commercial telephone wires and power lines were to be put out of commission by a natural disaster.

The BNL hams set up their portable communications center at the picnic area on site, drawing electricity from two gasoline-powered generators to run two complete transmitting and receiving stations with three antennas. While plans for the event had been made weeks ahead of time, all this equipment was set up within a few hours on Saturday. The stations were manned around the clock from 4:00 p.m. Saturday until the end of the contest on Sunday afternoon, during which time communications were established with well over 600 amateurs in all parts of the United States, including Hawaii and Alaska. Canada, Australia and New Zealand were also contacted.

Radio Club Field Day

Radio Club members at work in the operating van during the American Radio Relay field day are: Jeff Harvey, Ralph Lindgren, Warren Herzil, Dave Klunk, and Joe Meo.

While the official results of the contest will not be available for several weeks, participants were of the opinion that their performance amply demonstrated the technical and communications skills needed to make amateur radio a viable part of the relief effort in any future emergency.

Club members participating were: Warren Herzil - WA2ELO, Bob Kinsey, Joe Meo - WB2KTN, Jeff Harvey - WB2ZOH, Warren Hayes - K2UYR, Dave Klunk - K3CHX, Ralph Lindgren - WA2RDK, Fred Martin, Stan Sajnicki - WB2NYQ, and Ed Hagelberg - W2INT.

Swim Lessons In Full Swing

The Recreation Staff has swimming lessons for youngsters 48" and taller going full swing daily at the swimming pool. Each day at one o'clock a new group of non-swimmers, beginners, advanced beginners, intermediates or swimmers enters the pool and is taught the basics by a fine group of instructors including Richy Parsons, Barbara Smalle, Mary Grace Lazzaro and Bill Kenzig.

The staff and students are enjoying the program while the important job of learning to be at home in the water and handle oneself in it is being accomplished.

Special events are taking place each Friday at the pool at 3 p.m. On July 13, the penny fetch was a huge success and on July 20, the kids will participate in the inner tube derby and kickboard races.

Sounds like fun for all!

IBEW Meetings Cancelled

Local 2230 has cancelled its General Meetings for the months of July and August. The next regular monthly meeting will be held on September 27, 1973 at 8 p.m. in the K of C Hall in Patchogue.

Softball

Dick Ruffing

Brookhaven League

In last week's softball action the Old Timers defeated Metallurgy 7-2. Don Cassidy had a homerun for the Old Timers.

In the second game of the evening the Blue Jays outscored the Dirty Sox 11-6. George Oldham had a homerun for the Jays. The other big hitters were Tom Prach and Doc Carsten each with 2-3. "Speedy" Carsten also had one of his now famous 3-base homers.

National League

A five o'clock thunder shower washed out the scheduled games for this league.

Laboratory League

Good pitching by Fred Hohmann led the Charlie Browns to a 22-10 victory over the Converts. Mohring, Jesaitis and Piel had homeruns for the Charlie Browns.

No score reported on the game between the Bubble Boys and the Phoubars.

University League

The Gotcha's, trailing by six runs going into the bottom of the seventh inning, scored seven runs to win over the Different Strokes by one run 14-13. A very exciting ball game for the Gotcha's.

The game between the Oh Kays and the Odd Couples was won by the Oh Kays by a forfeit.

Placement Notices

Each week, the BROOKHAVEN BULLETIN lists personnel placement requisitions currently being processed. The purpose of these listings is, first, to give notice of all non-scientific staff positions being filled and, second, to give employees an opportunity to request consideration for themselves or others whom they wish to recommend to BNL. In filling vacancies, the Laboratory's objective is to give first consideration to present employees, as follows: employees within the immediate group having the vacancy, employees within the department or division, employees within the Laboratory as a whole.

For further information regarding a placement notice, please contact Employment Supervisor, extension 2879 or 2882.

TECHNICAL SPECIALIST - B.S. degree or equivalent in biology or chemistry. Participate in the study of neurological disorders. Medical Department.
