

World Oil Situation Examined

Last week, some of the country's leading experts on energy and economic analysis met at Brookhaven for a workshop on the analysis of world oil supply and demand. The meeting, sponsored by ERDA's Office of the Assistant Administrator for Planning, Analysis, and Evaluation, was organized by Kenneth Hoffman, Head of the National Center for Analysis of Energy Systems at Brookhaven.

About 40 experts attended, including representatives from various government agencies, private industries, and universities. The group included economic and financial experts as well as geologists, engineers, and systems analysis specialists.

According to Hoffman, the purpose of the workshop was to review the state-of-the-art of analysis of world oil supply and demand and to recommend approaches to be used by ERDA in incorporating the results of such analysis in the planning of the nation's energy research and development program. Recommendations were also made for research and studies to increase our understanding of the impact of world oil price and trade. The role of R & D on new energy supply and end use technologies is important in providing alternatives to oil that could compete effectively at a reasonable price.

The workshop opened with presentations on the methodologies used in recent world oil and energy studies, including that of the Workshop on Alternative Energy Strategies at MIT. The major policy issues that are amenable to analysis were discussed, and included:

- the effect of a vigorous conservation program on world oil trade
- the role of R & D in developing alternatives to oil, thereby placing an effective ceiling on the long run price of oil
- the dynamics of oil supply and demand and influences on the producing countries need for revenues in their development, and
- the effect of changing oil prices on the world economy and on relative inflation rates in individual countries in various stages of development.

Estimates of the anticipated range of future world oil prices and trade are needed in the ERDA planning process and are influenced by all of the above complex issues. A number of specific models and analytical approaches to those issues were presented and discussed at the workshop.

Some conclusions of the workshop were that most of the economic models now being used are effective for mid-term and long-run equilibrium analysis. However, given the fact that oil supply prices are set on the basis of monopoly or dominant supplier considerations, and that the prices of domestic resources may be subjected to some degree of control, increased attention

should be given to modeling and analysis under unstable conditions.

The workshop also focused on the many uncertainties concerning the resources of oil and alternative energy forms available on a worldwide basis, and political considerations in oil producing and consuming countries. Recent studies pointing to a worldwide shortfall of oil supply, possibly as soon as the early 1980's, have identified a potential economic and social crisis of serious proportions that must be taken into account in energy R & D planning. The basic characteristics of the crisis have been described; however, further analysis is needed of the scope of the problem and of contingency plans involving technological and economic measures that may be implemented to ease the transition from conventional crude oil to alternative sources and a less energy intensive economy.

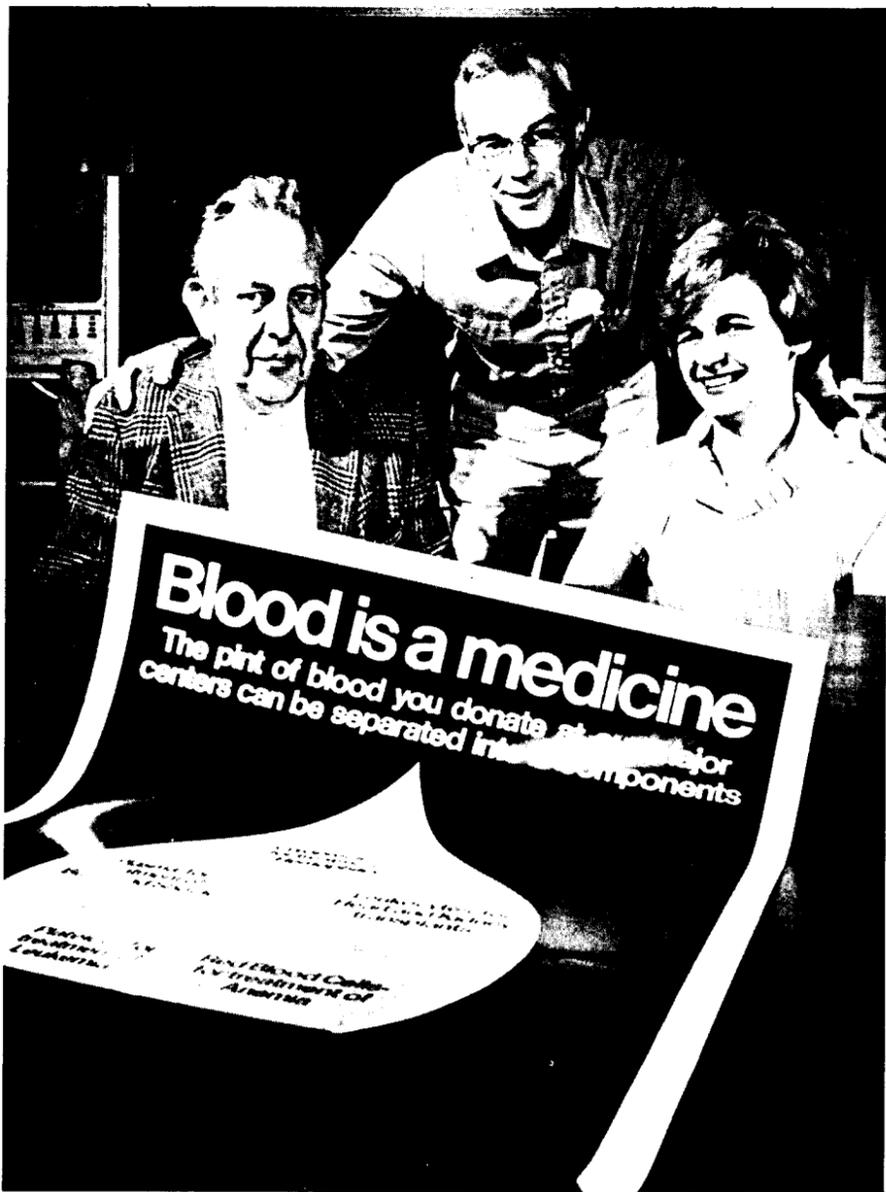

Change in Federal Withholding Tax

Weekly and monthly paychecks distributed after June 8 will reflect a lower Federal Withholding Tax and, consequently more take home pay. The lower withholding is a result of the "Tax Reduction and Simplification Act of 1977" recently passed by Congress and approved by President Carter.

The new tax law provides for a standard deduction of \$3200 for married persons filing jointly and \$2200 for single persons (or heads of household). This replaces the standard deduction which ranged from \$1700 to \$2400 for singles (or heads of household) and \$2100 to \$2800 for married.

An important part of the new law which did not affect withholding rates was postponing the effective date of the provisions of the "Tax Reform Act of 1976" on sick pay until January 1, 1977. The effective date previously had been January 1, 1976. There may be a number of employees affected by this change who will find it to their benefit to file an amended tax return for 1976 if they qualify under the "old sick pay exclusion rules."

Some Examples of Effect on Federal Income Tax Withholding		
Married with a total of 4 exemptions		
Monthly - Wages	Old Law	New Law
\$1000 to \$1040	\$105.50	\$ 85.60
\$1200 to \$1240	\$139.50	\$121.80
\$1600 to \$1640	\$225.40	\$214.80
Weekly - Wages	Old Law	New Law
\$200 to \$210	\$18.40	\$14.30
\$250 to \$260	\$27.70	\$23.30
\$300 to \$310	\$36.20	\$33.30

Martin Van Lith (Staff Services) and Edie Thornhill (Director's Office) were the first to present their pledge cards to Jerry Kinne for the 7th annual Brookhaven Blood Drive. They are the first of what is hoped will be a large contingent of Lab employees who will donate their blood when the Bloodmobile rolls in on June 29 and 30.

A Wise Investment

Although the Greater New York Blood Program sends out six mobile units a day all year to collect blood from many industries, schools and other institutions on Long Island, it depends on the blood collected from BNL at the end of June to supply the blood bank for the increased demand over the July 4 holidays.

This is an awesome responsibility. And, as with any bank, if there are no deposits, there can be no withdrawals.

Keeping the bank supplied is a continuing job, and Brookhaven's concentrated two-day drive is an important part of this year-round effort.

Keep in mind that not only you, but every member of your family, age 17 to 65, can donate blood to the program. In the case of 17-year olds only, proof of age is required before blood can be taken.

Send in your pledge cards now to Gerry Kinne, Bldg. 460.

A Big Break

Only two weeks are left for submitting applications to the Technician Training Program - a chance to go to school during the day, free from worry about who's going to pay the rent.

As recently announced, the program will provide an opportunity for six Laboratory employees to attend Suffolk Community College to obtain an Associate in Applied Science Degree, interspersed with on-the-job training. Not only are all school expenses paid, but the successful applicants will also receive full salary and fringe benefits while attending school full time. Preference will be given to wage employees who have worked at the Laboratory for at least six months prior to June 24, the application deadline, and who earn no more than \$194 per week, base pay.

So far, Personnel has received 40 applications, with male and female applicants running about 50-50.

This is the second such program at the Laboratory. The first was in 1969, and six employees attended Suffolk Community College full time for 32 weeks. They received a certificate in electronics and fol-

lowed their academic study with one year of on-the-job training. Five of the original group are still at the Laboratory and they all agree that the 1977 plan is a step forward.

Most of the credits they earned for the electronics certificate did not count towards an associate's degree, so they view the present program as a definite plus. In the last few years, all of them have taken additional college courses at night towards a degree. Dick Murgatroyd, who is with the beam diagnostics group at the AGS, has obtained an associate's degree in business. Although Murgatroyd had the technical credits, he chose to take his degree in business and is now pursuing a bachelor's degree at the New York Institute of Technology.

There is no question that they all appreciated the opportunity to move ahead faster than they might otherwise have done. In this respect, Edwin Taylor, who is involved in keeping the computers and related equipment at Applied Math in good working order, found the program "very helpful," as did George Hughes, who is working at the staff shop in the Safety & Environmental Protection Division.

Ken Sutter works now with the corrosion
(Continued on page 2)

Some participants at the ERDA-sponsored workshop on the analysis of world oil supply and demand were: (from left) Henry Jacoby, Sloan School of Management, MIT; Kenneth Hoffman, Head of Brookhaven's National Center for Analysis of Energy Systems; Edward Hanrahan, ERDA; and Emil Nelson, ERDA.

Smoke Detectors

Employees who ordered smoke detectors in December are asked to please pick them up as soon as possible at the BERA Film Service Office in the Cafeteria. Office hours are 11:00 a.m. to 3:00 p.m., Monday through Friday.

Training Program

(Cont'd)

group at DAS and says that being able to go to school during the day, rather than at night, was great, "particularly when you have a family."

Of particular interest to John Barry, who is with the alternate fuel study program at DAS, was the on-the-job training in various departments. He found this gave him a good overall view of what was where at the Laboratory, and the information proved useful in his later work.

Now six more employees will be able to take advantage of an improved and extended program. Following the June 24 application deadline, interviews of the candidates will be scheduled. The successful applicants will be notified on July 1.

Coffee Championed

For a change it's good to hear that something you've been doing happily for years isn't going to produce cancer, or do you in some other way. According to a study conducted by the Duke University Medical Center, "Persons who drank five or more cups of coffee a day were at no greater risk from heart attacks, strokes or any other causes than those who drank little or none."

The research examined the coffee-consuming habits of 2,350 adults in rural Georgia, and the relative incidence of fatal coronary heart disease, stroke and all other causes of death in the same population over four and a half years.

The investigators said that other studies linking coffee with coronary heart disease, bladder cancer and other conditions, didn't take into account the number of cigarettes smoked along with the cup of coffee. It would, therefore, appear that if you leave the weed alone, the bean won't hurt you.

Cafeteria Menu

Week Ending June 17, 1977

Monday, June 13

Tomato vegetable soup
Keilbasy & sauerkraut 1.15
Grilled ham steak & 1 veg. 1.30

Tuesday, June 14

Cream of potato soup
Southern fried chicken & 1 veg. 1.15
Macaroni & cheese & 1 veg. 1.05
Hot deli - veal & peppers

Wednesday, June 15

Beef barley soup
Tuna noodle casserole 1.10
Hot deli - corned beef

Special

Cup of soup
Tacos & refried beans
Pie or ice cream
Small beverage
\$1.87 plus tax

Thursday, June 16

Chicken noodle soup
Chili dogs & rice 1.05
Salisbury steak & 1 veg. 1.25

Friday, June 17

New England clam chowder
Broiled filet & 1 veg. 1.15
Roast sirloin of beef & 1 veg. 1.35
Hot deli - meatballs & peppers

"An expert is a man who has made all the mistakes, which can be made, in a very narrow field." — Niels Bohr (1885-1962)

Forty-eight students will spend the summer at the Laboratory to carry out research projects in various departments. Checking in at Berkner Hall on Monday were: (from left) Mark Walsh, University of Illinois; Jose Martinez, Columbia University; and Jay Berman, Cooper Union.

Students Here For Sun & Study

Swimming, tennis, biking... the introductory talk sounded like an indoctrination to an Adirondack resort. But really, Assistant Director R.C. Anderson was welcoming 48 college juniors and new graduates to the annual BNL Summer Student Program, which began last Monday.

Anderson shared points of both historical and cultural interest with the new Student Research Assistants. Glenn A. Price, head of Academic Relations, stressed the immense learning opportunity for undergraduates in the summer.

Price reminded them, "If you wanted to earn money you would be out clamming for the summer." But, in fact, most students consider the tax-free \$125 weekly stipend a generous sum. However none of the veterans complained about the \$10 raise over last year's (\$115).

One student, Jose Martinez, commented on his expectations for the summer: "... mostly an academic life right now. The only other thing I can see so far is sports and maybe getting together with other people to see sights like the Sunken Forest on Fire Island."

Martinez also expressed an interest in playing on the student team in the BNL volleyball league. However being a graduate of Columbia University in physics, he felt names like "Charming Quarks" and "Strange Bosons" would be more appropriate team names than the bland title "Summer Students."

Like several other new residents in Compton (men's) and Curie (women's) Houses, Martinez pointed out that the team would be coed. Though men outnumber women in the summer student program (28 to 19), they are still hoping for an even turnout.

Social Life

For many summer students, the social activities are as important as the athletics (if not more so). On the second day of the program, one girl was already inquiring about how to organize some parties.

Fortunately some plans are already in the works. Renee Flack, Affirmative Action, has been involved with summer student parties for several years. Last summer she ran a series of weeknight discos that will be repeated beginning in July.

In addition the Hospitality Committee, co-chaired by Ginny Thein and Pat McKenzie-Wilson, sponsored two parties last summer and expects to continue its efforts this year. Based on the testimony of veteran summer students, the new participants in the program anticipate a stimulating social season.

Looking Back

Surprisingly, social life in the summer student program has not changed too drastically over the years. Joseph Ash, an engineering associate in DAS, came to BNL in the summer of 1969 after graduating from Queens College in physics. He liked it enough to come back the following summer and eventually accepted a position at BNL.

"It was pretty good here in the summer," said Ash. "There were a few parties, but we sort of made our own too and headed further out the Island a lot."

The biggest problem that most recent summer students mentioned was the difficulty of transportation. This does not come as a surprise to coordinators of the program either, because as Ash reflected on his col-

lege days he added: "The worst part is you really need a car to have a good time."

The one real change has been in the background of students in the summer program. Jack Van't Hof, now on the scientific staff of the Biology Department, came for the summer of 1958 in between graduate studies at Michigan State University

Looking back, Van't Hof said, "At that time the program predominantly involved graduate students, who are usually better trained in lab procedure and take less time to be introduced to the work."

Graduate students in the summer student program were able to do more in-depth work because of their backgrounds. Van't Hof, who is now supervisor for one of this year's undergraduates, explained that grad students are more independent and have greater insight, but added that "the nature of the work is probably the same."

For Undergrads Only

Now, the summer student program is exclusively for undergraduates selected on a competitive basis during their junior or senior year of college.

Jay Berman, is going into his senior year of electrical engineering at Cooper Union. He is working under Seymour Rankowitz, Instrumentation Division.

At a late-night dorm rap session, Berman describes the oceanography research study he expects to be involved in with great enthusiasm. He distinguishes research from the "pure engineering" he expects to do, but his remarks draw a physics summer student into a philosophical debate on applied science.

After his senior year of college, Berman is not sure what he wants to do next. He mentions graduate school in engineering, business school, or some combination. But already (his second day here) he noted another summer student trying to decide between graduate study in science and law school. In many cases this is the time in life when the Brookhaven experience can have an impact on the student's decisions.

One of Berman's first concerns about local sights of interest was to find a brokerage house. He explained he likes to "keep in touch with the market," especially since his ten shares of 20th Century Fox began to climb.

"I like to do unusual things," explained Berman. "I hear there's a race track across the street." —Cliff Cockerham

AUI - IBEW Negotiations

The labor contract between Associated Universities, Inc. and Local Union 2230 of the International Brotherhood of Electrical Workers expires July 31, 1977. The first negotiation session took place June 1 at the Brookhaven Center.

Members of the Laboratory Negotiations Committee are: J. Grisoli, W. Milian, J. White, and J. Washburne.

Members of the Union Negotiations Committee are: C. Geonie, F. Candiano, C. Hobson, D. Johnstone, J. O'Reilly, S. Streckli, L. Morris, R. Farmer, G. Dioguardo, J. Solvato, S. Gracia, F. Norton and Ms. Dorothy Husted, IBEW International Representative.

Auskern Honored

Allan Auskern, a member of the scientific staff of DAS who died suddenly last year, was awarded his Ph.D. degree posthumously from the State University of New York at Stony Brook. The degree was presented at the University's 17th Annual Commencement Exercises on May 22 and was accepted on behalf of the Auskern family by his son, Barry.

As a further measure of the regard in which Auskern was held at Stony Brook, the Department of Materials Science of the College of Engineering, awarded him its annual Outstanding Achievement Award.

Access To The Site

Until further notice, the north gate is to be used by Kokolakis construction personnel only. All employees are to use the main gate, or, if coming from the east, may use the south gate. BNL bumper stickers should be affixed to all cars. Although delays are minimal at the main gate, anyone having difficulty getting to work on time, should plan to leave home a bit earlier than usual.

Biology Mini Tour

Tomorrow's public tour of the Laboratory will feature a visit to the Biology Department. The mini tour will include an explanation of the use of *Tradescantia* plants to monitor environmental mutagens, and an exhibit on DNA repair processes. Also scheduled for display is the Ames test that is used for screening suspected carcinogens, and the use of gel electrophoresis to monitor experiments in gene expression. The complete program also includes a guided bus tour of the Laboratory and a stop at the Exhibit Center. Hours are from 10 a.m. to 4 p.m.

Children's Summer Rec Program

The 1977 Children's Summer Program begins on Wednesday, July 6, and ends on Friday, August 26.

Registration applications may be picked up at the BERA Sales & Services Office in the Cafeteria between 11:00 a.m. and 3:00 p.m. or at the Personnel Office Reception Desk between 8:30 a.m. and 5:00 p.m.

The On-Site Recreation Program is available for children of on-site residents only. It is held in the Recreation Building in the Apartment area on Monday through Friday from 9:00 a.m. to 11:30 a.m. and on Tuesday through Friday from 1:00 p.m. to 3:00 p.m. Evening events will be announced. There is a \$25 fee for the first child; a \$15 fee for the second child and a \$10 fee for each additional child.

The sessions will provide a varied program including instruction and play (group and individual games, arts and crafts, athletic activities). Special programs such as movies, contests, scavenger hunts, puppet shows, dances, etc., will be scheduled to add variety to the regular activities.

Swimming Classes

Swimming classes are available for children of Laboratory employees only. Each child will be scheduled for one lesson a week. There is one participation requirement: a minimum height of 48". Classes will be held on Monday through Friday from 1:30 to 3:00 p.m. The fee is \$12 for each child, and children will also pay the daily admission fee of \$1 or present a season ticket.

Other Activities

These activities are open to the children of Laboratory employees only. Special events at the swimming pool will be held each Friday from 3:15 to 4:30 p.m. On Monday through Thursday, between 3:30 and 4:30 there are various activities - tennis on the courts and basketball, badminton and volleyball in the gym.

BROOKHAVEN BULLETIN

Published weekly
for the employees of
BROOKHAVEN NATIONAL LABORATORY

BERNICE PETERSEN, Editor

40 Brookhaven Ave., Upton, N.Y. 11973
Telephone (516) 345-2345

CARL R. THIEN, Public Relations Officer

Letters To The Editor

Dear Members of Brookhaven Lab,
My family and I wish to extend our heartfelt thanks for the way you have rallied around us during the time of my dear wife's death. Especially my co-workers at Bldg. 422 and the Cricket Club. Since I have been with the Lab you have made me feel good. For this I am grateful and I will forever remember your kindness.

Sincerely,
Joseph Mead

To the Editor:

It seems a shame that there are a few individuals on site that can be as low as to take a few tomato sets grown in a hallway window.

Ken Sutter
D.A.S.

Volleyball

The spring-summer volleyball league is off and running, with the women fitting well into the Employee's League style of play. Following a ragged start, the Left-overs dropped out, and were replaced by the New Team, which is mostly from SUNY Stony Brook. New players seem to be picking up fundamentals very quickly, and hard shots are now routinely returned. These mixed teams would now be competitive in the Employee's League as it existed only a few years ago. Current standings are:

	Won	Lost	Pct
New Team	8	1	.889
Thunderbirds	7	5	.583
Setups	10	8	.555
Pushovers	5	7	.416
Scurves	6	9	.400
Leftovers	0	6	.000

Of interest to volleyball fans: The East Coast Women's All Stars (Olympic candidates) will face a team of Suffolk County men at Mattituck High School at 7:00 p.m., Saturday, June 11. The East Coast All Stars are coached by Scott Mosé of Staten Island, who is training his women for a shot at the 1980 Moscow Olympics. Tom Owens and Greg Donaldson from BNL will play for the men's team. A preliminary match will begin at 7 p.m., featuring the East Volleyball Club of junior women (18 and under) playing the Smithtown Volleyball Club, which is composed of players from the Smithtown championship team. Admission will be \$2.00 for adults and \$1.00 for students.

Soccer

The Brookhaven National Laboratory squad will play the 1976 Brookhaven Town League champions from East Moriches-Center Moriches-Moriches-Eastport on Sunday, June 12.

The game will be played at the BERA field and will start at 6:00 p.m. Interested summer visitors are welcome to play.

The annual game with the New York Oldtimers is scheduled for June 25 at home at 2:30 p.m.

Intrasquad scrimmages are held each Monday evening, starting at 5:15 p.m.

Mountain Club

There will be a meeting on Thursday evening, June 16 in the North Room of the Brookhaven Center at 7:30 p.m.

Plans for another trip on the Delaware River for the weekend of June 18th will be discussed.

Come with ideas for future trips. All are welcome.

In Appreciation

The BNL Tour Guides assembled for this photograph after their annual luncheon on Tuesday. In addition to their regular jobs, they volunteer their services as guides to touring professional groups and college students throughout the year. In the rear (left to right) are: Audrey Bangel, Ted Erickson, Gail Bird, Don David, Sharon Rosenhagen, Elinor Adams, Marge Stoeckel, Cathy Van Noy, Janet Sillas, Vinnie Lodestro, Frances Scesny, Louise Kilcoyne-Tanner and Madeline Windsor. Seated on the left aisle (front to back) are: Anne Mauro, Karen Kalish, Elaine Rowland, Carole Kerr, Marie Brenner and Pam Walton. Seated on the right aisle (front to back) are: Carolyn Eterno, Elizabeth Pergan, April Donegain, Joan Perullo, Joan Svegliato and Bonnie McNair. Tour guides not present for the picture were: Audrey Blake, Francine Donnelly, Jackie Larrie, Michele Rabatin and Gail Waite.

Golf

After one month of the golf season, the team leaders are:

- Group 2 - Bob Feindt, Jack Scharpeger
3 - George Korhut, Joe Mayeski
4 - Peter Bond, Bernie Comfort
5 - Phil Borzi, Jon Scott
8 - Ted Dahne, Joel Magee

The other three groups are very close. In Group 1, Myrton Kinney and Al Teixeira hold a small lead on Bill Sampson and Lou Snead. Jack Fontana and Skelly Frei have a slight edge on the team of Audrey Blake and Dave Thomas in Group 6. The closest race is in Group 7 where four teams are tightly bunched with Bill Taylor and Bob Vignato holding the lead.

Bike Race Best Yet

The 1977 BNL Spring Bicycle Race took place last Sunday in almost ideal weather and had the biggest crowd and fastest time in 6 years of BNL racing.

A total of 33 entrants signed up, and 30 finished. A sizzling pace by the lead pack knocked almost 4 minutes off the best previous time.

The race course distance was recently remeasured with a calibrated wheel and found to be 16.53 miles (26.60 km), rather than the 17.5 miles previously thought. The best time corresponds to an average speed of 23.5 mph (37.8 km/hr). The lead pack was so tightly bunched at the finish line that the timers were swamped; times for the 2nd through the 9th places are estimated.

As usual, thanks are due Hermann Geist (Carpentry) and his daughter who handled registration and recording; Dick Watson (Physics) helped with timing.

BNL police manned the North Gate, and a Suffolk County Police car paced the lead pack along Route 25. Myrton Kinney supplied a CB radio for base, and Cindy Morgan supplied and drove the CB equipped sag wagon.

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position, with consideration given to candidates in the following order of priority: (1) present employees within the department, with preference to those within the immediate work group; (2) present employees within the Laboratory as a whole; and (3) outside applicants.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all nonscientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment, as indicated below. Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Personnel Placement Supervisor, Ext. 2874 or 2882.

LABORATORY RECRUITMENT: Opportunity for present Laboratory employees.

201. SUPPLY & MATERIEL SENIOR CLERK - Supply & Materiel Division.

202. LABORATORY CUSTODIAN - Two positions. Plant Engineering Division.

OPEN RECRUITMENT: Opportunity for present Laboratory employees and outside applicants.

203. ENVIRONMENTAL SCIENCE ASSOCIATE - BS degree or equivalent. Requires good analytical and computational abilities. Familiarity with environmental issues and energy technologies is desirable. Department of Applied Science.

204. ASSISTANT AUDITOR - AAS or BS degree or equivalent in accounting. Three to six weeks' travel per year is required. Duties include interface with ADP, bank reconciliations, payroll and investment auditing and assisting with varied financial and operating audits. Associated Universities, Inc.

205. TECHNICIAN - AAS degree or equivalent in electronics. Background in pulse analog circuitry and the development and testing of high voltage and rf systems is required. NSLS. Physics Department.

206. TECHNICIAN - AAS degree or equivalent in electronic technology with working experience in the design and construction of digital and analog circuitry. Familiarity with computer interfacing and radiation monitoring desirable to work on proton beam instrumentation. Accelerator Department.

207. TECHNICIAN - AAS degree or equivalent in electro-mechanical technology with background in setting up and operating sensitive electrochemical, high temperature, high pressure equipment. Department of Applied Science.

208. TECHNICIAN - AAS degree or equivalent in mechanical technology. Some experience with high vacuum systems is preferred. Accelerator Department.

209. TECHNICAL SPECIALIST - AAS degree or equivalent in mechanical technology with background in mechanical systems construction and maintenance. Experience in electronic and pneumatic control systems is desirable. Two positions. Department of Applied Science.

Autos & Auto Supplies

68 PONTIAC V-8 - New tires, new brakes, new heating system, good running cond. \$375. 473-2455.

74 WHITE LA SABRE - Convertible, 54,000 mi, all extras, immaculate. \$3700. Dot, 283-2916, 626-1272.

67 FORD LTD - Air cond, new brakes, new snows, radio, tape deck, good cond. \$200. 924-4208.

14" WHEELS - Chevy, Ford, Pontiac. \$5/pr; tires, 775-14-800-14. \$8 ea; manual transmission 1965 Dodge Dart. \$25. Bob, Ext. 4636, 289-0357.

RADIALS - (3) GR78x15 Goodyear steel belted, free installation. \$30. Lunchtime calls only, Ext. 4597; eves, 475-4935.

70 HONDA - 350 street cruiser, electric start, excel cond, just tuned. \$600. Eric, 744-3225 eves.

E-Z POWER CONVERTER - Converts 12 volt DC power from engine alternator to 110 volt DC. \$12. Manny, Ext. 2582.

FRONT BUMPER - Ford 77, small dent. \$20. Bob, Ext. 4228.

74 CHEV TRUCK - 1/2 ton, p/s p/b a/t, dual gas tanks, cap, buckets, excel cond. \$3725. Bob, 473-3987, Ext. 4547.

16" GM WHEELS - (5) w/tires, 6 lug, from pickup or carryall. \$2 each. 363-6597.

67 PLYMOUTH FURY - Runs but should be repaired. \$75. Steve, Ext. 4064.
