

Portraits of Chaos on Display

Science becomes art in an exhibit called "Portraits of Chaos," which the BERA Art Committee will present in Berkner Hall on September 6, 7 and 8.

The portraits are actually original drawings and computer plots from the early days of chaos research by Japanese scientist Yoshisuke Ueda. Ueda, who is on the Faculty of Engineering at Japan's Kyoto University, first became interested in chaotic motions in the early 1960's. He will be at the exhibit to answer questions about the drawings and computer plots that illustrate his work.

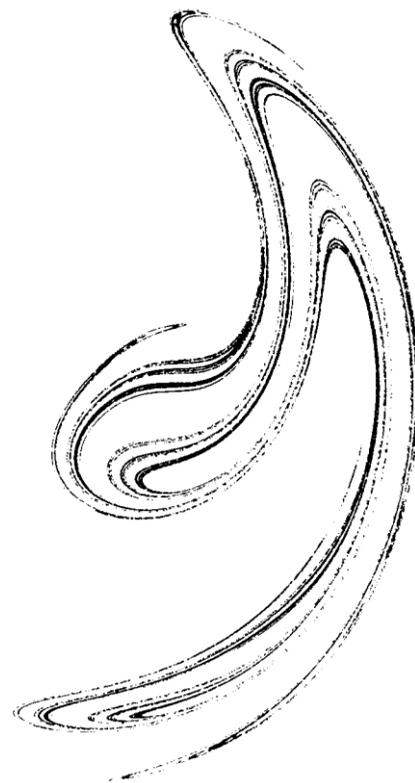

To help increase viewers' understanding and appreciation of these fascinating portraits, Bruce Stewart of the Applied Mathematics Department will give an introductory talk on "Portraits of Chaos: How to Read Them."

Stewart's talk is scheduled for 4:30 p.m., on Tuesday, September 6, in Room B, Berkner Hall, to coincide with the opening of the exhibit, from 4:30 to 7 p.m., in Room C. On Wednesday and Thursday, the exhibit will be open from 11:30 a.m. to 1:30 p.m.

In its mathematical sense, chaos is something produced by a dynamical system that doesn't seem to have anything random about it, but which behaves in a random way when it settles to a rhythmic pattern called a strange attractor.

One example is a dripping water faucet, which may either drip steadily, at regular intervals, or erratically, at random intervals. Such complex dynamical systems can also include the weather, the stock market and the national economy.

Ueda was one of the world's first scientists to recognize the significance of such complicated behavior in dynamical systems described by sim-

The computer painted this portrait of the strange attractor resulting from the Duffing oscillator studied by Yoshisuke Ueda: $dx/dt = y$, $dy/dt = -ky - x^3 + B \cos t$; where $k = 0.1$, $B = 12.0$; 100,000 points were plotted.

ple mathematical equations. In an article in the *International Journal of Non-Linear Mechanics*, he recalled, "It was on 27 November 1961 when I met with chaotic motions in an analog computer simulating a forced self-oscillatory system. Since then my interest has been held by the phenomenon..."

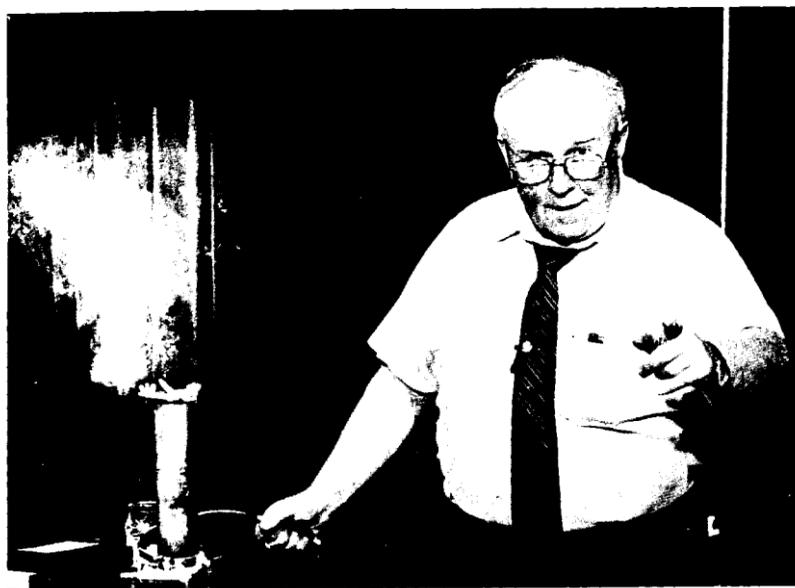

Thanks to the continuing work of chaos pioneers like Ueda, and with the help of ever more powerful computers, researchers are now applying the science of chaos to such complex systems as electrical circuit theory and sleep/wake cycles, with the hope of making the unpredictable understandable and, possibly, even predictable.

Ueda's portraits beautifully illustrate how unchaotic chaos can appear, when one knows how to look. Included in this exhibition will be his plots from simulations of chaotic dynamics done as early as 1961; drawings of invariant manifold structures in forced nonlinear oscillators; and the spectacular large strange attractors made at the request of the National Museum of Sciences, Techniques and Industries, which opened in Paris in 1986.

Inside Info

In attendance at the 19th National Training Program on July 28-30 in Baltimore, which was sponsored by Federally Employed Women, were BNL's Supervising Librarian Carol Beckner, Technical Information Division, and Senior Administrative Services Assistant Bette Morgan, Applied Mathematics Department.

Representing BNL, Beckner and Morgan were among 5,000 women employed by the federal government and its contractors at this three-day series of workshops. From the hundreds of seminars offered, they each attended five, on such topics as assertiveness training, effective communication and leadership dynamics.

Roger Stoutenburgh

Forewarned Is Informed About Electrical Safety

Nearly 1,000 BNL'ers learned about the "dos and don'ts" of using electricity on August 25-26, from electrical safety expert and wizard showman Edward Eagan. Eagan, who is with the Boston office of the U.S. Department of Labor's Occupational Safety & Health Administration (OSHA), presented three 1½-hour, one-man shows — full of anecdotes as well as information — about electrical hazards and safety, especially in the everyday use of power tools and appliances, and in surprising situations. For instance, in this picture Eagan is seen making the point that any particulate — including corn starch — can become an explosive in the presence of an electrical spark.

Shroud of Turin Talk Next Week

It surfaced in approximately 1350, in the little town of Lirey, France — a linen burial cloth bearing an image. Was that cloth, known today as the Shroud of Turin, used to wrap the body of Jesus? Was the image of Jesus miraculously imprinted in the cloth?

The answers to these long-debated

Robert Villarreal

questions are now being sought by both theologians and scientists. One chemist who has already grappled with them is Robert Villarreal, Manager of the Analytical Laboratory at Argonne National Laboratory, West, in Idaho Falls, Idaho. Villarreal consulted on analyses of the Shroud of Turin done in 1978 and reviewed some of the proposals for the carbon-14 dating studies that are now drawing to a conclusion.

Villarreal will draw on this experience in an afternoon colloquium he will give on the "Scientific Investigation of the Shroud of Turin." Sponsored by the AUI Lecture Committee, the talk will take place on Thursday, September 8, at 3:30 p.m., in Berkner Hall, while Villarreal is at BNL for a meeting of Department of Energy's Analytical Managers, being held September 6-9. All are invited to attend the lecture. A reception will follow.

In 1978, using x-ray and chemical techniques, scientists could not con-

(Continued on page 2)

Summer Science Draws to a Close

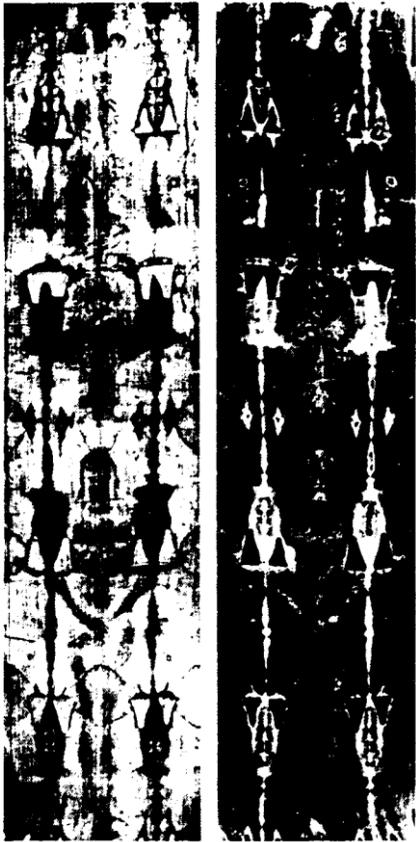

The Office of Educational Programs introduced a new Community Summer Science Program at the Lab this summer, and most of the 25 Suffolk County high school students who participated were on hand for this end-of-session photo. All of them attended the morning lectures given by Laboratory scientists throughout the six-week program, and about half also had afternoon internships, which gave them the opportunity to work in a research environment with a sponsoring BNL scientist.

Shroud of Turin (cont'd)

clusively answer the questions about the Shroud. Though they are more definitive, carbon-14 dating techniques were not used at that time because a

The dorsal and frontal image of the Shroud of Turin.

handkerchief-sized piece of the 14 x3½-foot cloth would have been required.

In carbon-14 dating, carbon atoms are separated within a sample. A count of the individual carbon-14 nuclei tells how much carbon-14 has been lost from the sample. The fact that carbon-14 decays at a known rate makes it possible to date the sample.

By 1986, new carbon-14 dating techniques had made it possible to test pieces about the size of a postage stamp. Under a Roman Catholic Church protocol, such testing was at first to be done by seven laboratories, including BNL. In a controversial move, however, the Archbishop of Turin eliminated four labs, including BNL. The remaining three laboratories have completed their tests, and the official results are expected to be released shortly.

"Carbon-14 dating can only determine the age of the Shroud, but it cannot determine whether it was the actual burial shroud of Jesus," Villarreal said in a phone interview. "There's no conclusive way to resolve the questions. The tests can only point in one direction or another."

In addition to discussing the known results of the many studies that have been conducted up to this time, Villarreal will present the historical background of the Shroud of Turin, recount legends and myths associated with the cloth's history, and explain the Old and New Testament symbolism involved.

Service Awards

The following employees received service awards during the month of August:

Forty Years	
Murray J. Klein	Reactor
Thirty Years	
Benon H.J. Bielski	Chemistry
Leon Green	Nuc. Energy
Benjamin Magurno	Nuc. Energy
Paul A. Michael	App. Science
Twenty-Five Years	
Richard Lehmann	AGS
Erno A. Ostheimer	Accel. Dev.
Robert L. Schuman	AGS
Robert J. Warkentien	AGS
George C. Warner	AGS
Twenty Years	
Mary Doroski	MIS
Ten Years	
Clement Auguste	Light Source
Roy A. Barone	S&EP
Eva S. Bozoki	Light Source
Robert A. Chmiel	Physics
Jan M. Collinson	App. Science

Walter DeBoer	App. Science
Pamela A. Esposito	Chemistry
Dennis Hall	DCP
Raymond C. Karol	Reactor
Ronald S. Longacre	Physics
Stephen V. Musolino	S&EP
Ronald J. Orsini	Central Shops
Charles Trabocchi	AGS
Neil A. Wade	AGS
Arlene Wolochuk	Director's Office
Martin H. Woodle	Light Source
John J. Woods	AGS

Arrivals & Departures

Arrivals	
Ludwid Kowalski	Director's Ofc.
Janene L. Morrow	S&EP
Mary E. Riddick	S&MD
This list includes all employees who have terminated from the Laboratory, including retirees:	
Departures	
Nanette J. Connor	DAS
Hubert Frank	Central Shops

Their Good Ideas Pay Off

Over the past few years, these three Department of Applied Science employees have used the Employee Suggestion Program (ESP) to provide the Laboratory with ideas that have aided in resolving the problem of costly deposits and monthly charges on compressed gas cylinders no longer in use. For their suggestions, (from left) Richard Wilke, Oceanography Associate; James Hurst, Senior Materials Science Associate; and Neal Carciello, Chemistry Associate, each received \$100 from the ESP.

Original, cost-saving suggestions for the Lab are always welcome, and employees who submit new ideas will receive a "thank you" mug from the ESP.

Also received were letters addressed to BNL at Troy, NY; Upjohn, NY; and Upper Yonkers, NY.

Holy cow! Week seven in the Team Safety program* is here and the home teams had a full sweep of the games. As of the date of this report, there have been no field losses, although one player lost additional time but was still on restricted duty from the original injury.

Three Plant Engineering teams — Heavy Equipment Shop, Grounds and Roads and Steam Shop — may be the first pennant winners on September 12. Keep up the safe work!

The Supply & Materiel teams all remain undefeated, and their first winners could be on September 26. Central Shops, with three undefeated teams, is also looking for its first pennants that day.

Big rumor on the field is that another Division will soon join the league. Negotiations have begun for additional field space, and word is that their hitters are big guns.

Let's keep up the safe record of play! *Twenty-five teams are participating in the Lab's Team Safety program. As five teams have incurred lost-time injuries, 20 are now in the running to be the first to be rewarded for their safe practices with a pizza or deli luncheon. Time goals ranging from 8 to 12 weeks have been established for the teams based on their previous lost-time frequency.

The Holiday Created by the States

You know that the Lab will be closed on Monday, September 5, for the Labor Day holiday, but maybe you weren't aware that:

- No federal legislature created the holiday.
- No Senator or Congressman sitting in Congress ever proposed that Labor Day should be a holiday in the States.
- Labor Day came into being through city and state action.

It's true that, on a June day in 1894, Congress passed, without discussion, an act making the first Monday in September of each year a legal holiday in the District of Columbia and the Territories. But no mention was made of a holiday in the states. By that time, however, 31 states had, on their own, designated the first Monday in September as a holiday.

How did it start? In May 1882, New York City union official Peter McQuire proposed the date for honoring "those who from rude nature have delved and carved all the grandeur we behold." He recommended observing Labor Day on the first Monday in September because "it would come at the most pleasant season of the year, nearly midway between the Fourth of July and Thanksgiving, and would fill a wide gap in the chronology of legal holidays."

McQuire's suggestion was adopted by the Central Labor Union of New York, and the first, unofficial Labor Day was held September 5, 1882.

The first state bill to set up the legal holiday was introduced in the New York legislature. But the state of Oregon moved faster and passed the first such bill into law in February 1887. During the same year, New York, Colorado, Massachusetts and New Jersey legislatures also created the holiday. By 1894, 26 more states followed suit, before the Congressional action.

The 48th state to pass a Labor Day law was Wyoming, in 1923; and Alaska and Hawaii honor it as a result of the Act of Congress, 94 years ago, when they were still territories.

Coming Up

"Ozone Depletion at the Ends of the Earth" will be discussed in a lecture by chemist Susan Solomon of the National Oceanographic & Atmospheric Administration, on Friday, September 16, at 3:30 p.m., in the Hamilton Seminar Room in the Chemistry Department, Bldg. 555. A reception will precede the lecture at 3 p.m.

All are invited to attend this talk, sponsored by Brookhaven Women in Science, which will be followed by a dinner at a local restaurant. For reservations, at \$23 per person, call Joyce Tichler, Ext. 3801.

To Your Health

AIDS: Facts and Myths

AIDS, acquired immune deficiency syndrome, is one of the most serious health problems in the world today, and, unfortunately, BNL employees are not immune to this health threat.

However, AIDS is preventable. As it is not a casually transmitted disease, BNL employees cannot get AIDS from the usual workplace activities, and BNL employees with AIDS do not present a health risk to other employees in the workplace under usual work conditions.

Physician Laura Sbarra, head of the Occupational Medicine Clinic (OMC), will present these and other facts during the seminar "AIDS: Facts and Myths," on Wednesday, September 7, from noon to 1 p.m., in Berkner Hall. Sponsored by the OMC's Health Promotion Program, the seminar is open to the Lab community.

In addition, Sbarra will discuss the Lab's recently issued policy on this disease and answer any questions.

Sbarra will emphasize that BNL does not discriminate against employees or prospective employees with AIDS, that employees with AIDS are entitled to the same Lab benefits as other BNL employees and that employees with AIDS or those concerned about working with a coworker with AIDS may receive information and counseling at the Occupational Medicine Clinic.

Weight Watchers

A few spaces remain in the fall Weight Watchers class. If you wish to register, come to the first of the eight sessions, to be held on Wednesdays, starting September 7, from 5:15-6:30 p.m., in the Safety & Environmental Protection Division conference room, Bldg. 535. Fees are \$50 for continuing members and \$25 for new ones, as the Lab is splitting the cost with them. For more information, contact Health Promotion Specialist Elaine Friedman, Ext. 2699, Tuesdays and Thursdays.

To the Editor

It was good to see Virginia Pond [in the August 19th Bulletin] reminding us that there was indeed a Lindenmere before Imelda [Marcos]. However, the story would not be complete without taking note of what happened immediately after the early post-WWII period.

The Lindenmere became, and remained for many years, a cozy, old-fashioned resort hotel; the first-class restaurant, run by the Amendes as chefs and bakers, was open to the public. I put up both my parents and several friends at the Lindenmere on several occasions in the late 50's and early 60's, and I also remember having dinner there quite often.

One day, Mr. Amende showed me the guest book, which dated back to the BNL-housing days and included such signatures as Dwight D. Eisenhower, Robert Oppenheimer and I.I. Rabi, among others.

Tickets Going on Sale For Metropolitan Opera

On Wednesday, September 7, family circle tickets for certain performances of the 1988-89 Metropolitan Opera season will go on sale at the BERA Sales Office in Berkner Hall. Office hours are from 9 a.m. to 2 p.m. Employees may purchase as many pairs of tickets as they wish. All sales will be final; no refunds or exchanges.

Ticket Prices:
Tuesday and Friday evenings \$17.50
Saturday evening \$18.50

Date	Opera
Saturday, Oct. 1	Giulio Cesare
Friday, Oct. 7	Giulio Cesare
Saturday, Oct. 22	Il Trovatore
Tuesday, Oct. 25	Gotterdammerung
Friday, Nov. 4	Cavalleria Rusticana Pagliacci
Saturday, Nov. 5	Gotterdammerung
Tuesday, Nov. 15	Il Barbiere di Siviglia
Friday, Nov. 18	Il Barbiere di Siviglia
Saturday, Dec. 3	Carmen
Friday, Dec. 9	Carmen
Tuesday, Dec. 13	Cavalleria Rusticana Pagliacci
Saturday, Dec. 17	Madama Butterfly
Tuesday, Jan. 3	Aida
Friday, Jan. 13	Le Nozze di Figaro
Saturday, Jan. 14	Hansel and Gretel
Tuesday, Jan. 17	Il Trovatore
Saturday, Feb. 18	Don Carlo
Friday, Mar. 3	Idomeneo
Saturday, Mar. 4	Salome
Tuesday, Mar. 14	Werther
Friday, Mar. 17	Salome
Tuesday, Mar. 28	Rigoletto
Saturday, Apr. 1	Eugene Onegin
Tuesday, Apr. 11	Billy Budd
Friday, Apr. 14	Billy Budd
Friday, Apr. 21	L'Elisir d'Amore

Golf Tournament

The sixth BGA golf tournament will be held on Monday, September 19, at the Indian Island, Suffolk County golf course. The tournament will be conducted as a two-person scramble. Contact John Usher, Ext. 2096, for starting times. Please call with at least your scramble twosome; tee-time priority will go to completed foursomes. Tee times are reserved for 10 a.m. through 12:30 p.m., so sign up as soon as you can. Deadline for sign-up is September 16.

Greens fees are \$9 for Suffolk residents, \$20 for nonresidents and \$4 for senior citizens. Tournament entry fees are \$1 for BGA members and \$2 for nonmembers. All fees can be paid to the starter. Riding carts can be rented for \$18 each, pull carts for \$2 each.

Cafeteria Menu

Week of September 5

Monday, September 5	
Labor Day	
Snack bar service only — 9 a.m. to 2 p.m.	
Tuesday, September 6	
Cream of zucchini soup	(cup) .75 (bowl) .95
Pork chop chasseur w/1 veg.	3.10
Chicken chimichanga w/1 veg.	2.95
Baked fresh fish w/1 veg.	2.95
Hot deli: Pastrami	(bread or roll) 2.85 (hero) 2.95
Wednesday, September 7	
Chunky tomato soup	(cup) .75 (bowl) .95
Southern-fried chicken w/1 veg.	3.05
Stir-fried beef Oriental	3.10
Hot deli: Corned beef	(bread or roll) 2.85 (hero) 2.95
Thursday, September 8	
French onion soup	(cup) .75 (bowl) .95
BBQ brisket of beef w/1 veg.	3.10
Crabmeat cakes w/spaghetti	3.10
Meat cakes w/onions and 1 veg.	3.10
Hot deli: Breast of turkey	(bread or roll) 2.85 (hero) 2.95
Friday, September 9	
Fish chowder	(cup) .75 (bowl) .95
Veal Parmesan w/spaghetti & garlic bread	3.10
Seafood Newburg over noodles	3.10
Hot deli: Fried fish on a bun	2.85

Going, going, gone!

If you missed the first one two years ago, here's a second chance to attend an Art Expo and Auction, where you can view and purchase artworks such as the one show here by Irving Amen. Other well-known artists to be represented will include Pablo Picasso, Salvador Dali, Norman Rockwell and Mary Vickers.

This entertaining and informative art event will be held on Saturday, September 17, in Berkner Hall. The artwork can be previewed beginning at 7:30 p.m., and the auction will begin at 8:30 p.m. It is sponsored by Brookhaven Women in Science (BWIS), as their sixth fund-raiser for the Renate W. Chasman Scholarship for Women.

The auction will be conducted by Marlin Art of Deer Park. The works on the auction block will include lithographs, oils, watercolors and enamels — all by established artists. The bidding will start as low as \$40. Payment by check is preferred, though American Express, Master Charge and VISA will be accepted.

If you wish to browse instead of buy, your presence is more than welcome, as the Scholarship Fund's

commission and its minimum take will be determined by the number of people at the auction.

The event is open to the public, and admission is a \$5, tax-deductible contribution to the Scholarship Fund. Wine and cheese, soft drinks, coffee, tea and cookies will be served free of charge. And, after the last work is sold, a door prize donated by Marlin Art will be awarded.

Tickets may be purchased in advance from the following BWIS ticket sellers:

	Bldg.	Ext.
Penny Baggett	902B	5154
Nicole Bernholc	535A	2027
Eva Bozoki	725C	3701
Pat Carr	179A	7192
Harriet Castro	134D	5152
Maryann Castrogivanni	535A	3898
Alyce Daly	197D	5203
Rae Greenberg	510A	5564
Louise Hanson	815	7709
Mary Kinsley	426	5232
Ruth Ann Lutz	460	7774
Harriet Martin	477A	3487
Flo O'Brien	475	4953
Cindy Pohlig	459	3301
Sharon Spark	515	4111
Jean Stafford	185A	3336
Pat Webster	1005	4628
Bonnie Wesolowski	555A	4301

Note to Diners

The Lab will be closed on Monday, September 5 for the Labor Day holiday, and food services will be affected as follows:

The Cafeteria snack bar will be open from 9 a.m. to 2 p.m. on Saturday, Sunday and Monday, September 3-5.

The Tap Room at the Brookhaven Center will be closed Saturday, Sunday and Monday, but will reopen at 5 p.m. on Tuesday, September 6.

The vended food service in Bldg. 912 will be in operation throughout the Labor Day weekend.

Hospitality News

The next Hospitality Committee get-together will be held Tuesday, September 6, at 9:30 a.m., in the Brookhaven Center. Plans and suggestions for upcoming Hospitality Committee activities will be discussed. If you have any ideas, this will be a good opportunity to discuss them.

Spouses of Lab employees and guests are invited to join us. Please come and bring the children. Coffee, tea and danish will be served. Juice and cookies will be provided for the children.

Just Down Your Alley?

If you would enjoy getting together with coworkers to add some fun and excitement to your Thursday evenings — then you'll want to organize a team to play in the Mixed League of the BERA Bowling League. The season begins on Thursday, September 8, at 6:30 p.m., at the bowling alley in Shirley.

At this writing, the Mixed League can accommodate two more teams, each with a minimum of two women and two men. The Women's and Men's Leagues are both full, but all the leagues are always in need of substitutes.

For information or to sign up, call Maria Apelskog, Ext. 3138, or Fern Simes, Ext. 3969, by Tuesday, September 6.

Stockroom Closings

All Supply & Materiel Division (S&MD) stockrooms will be closed for inventory on Thursday and Friday, September 15 and 16. To give S&MD sufficient time to prepare for the inventory, all necessary stock withdrawals should be made prior to 5 p.m. on Wednesday, September 14. Emergency requirements should be processed through John Scharpeger, Ext. 2974.

Equipment Demo

Representative products from all divisions of Tektronix, Inc., will be shown at an equipment demonstration in Berkner Hall on Friday, September 9, from 10 a.m. to 3 p.m. Among the many products on display will be the company's latest offerings in digitizing oscilloscopes, spectrum analyzers, logic analyzers and color graphics terminals.

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position, with consideration given to candidates in the following order of priority: (1) present employees within the department and/or appropriate bargaining unit, with preference to those within the immediate work group; (2) present employees within the Laboratory as a whole; and (3) outside applicants. In keeping with the Affirmative Action plan, selection decisions are made without regard to age, race, color, religion, national origin, sex, handicap or veteran status.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all non-scientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment.

Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Employment Manager, Ext. 2882.

LABORATORY RECRUITMENT - Opportunities for Laboratory employees only.

2935. ASSISTANT BUYER POSITION - Requires a bachelor's degree in business administration or equivalent experience. Will be responsible for the economical and efficient procurement of tangible commodities with low monetary value. Will coordinate procurement from requisition to delivery in accordance with standard operating procedures. Contracts and Procurement Division.

2936. OFFICE SERVICES POSITION - Requires excellent communication skills as well as some knowledge of scientific vocabulary and BNL programs. Will provide general information and assist scientific staff in locating library materials. Additional duties will include checking and shelving materials and photocopying for users and division. Knowledge of catalog use and arrangements helpful. Technical Information Division.

OPEN RECRUITMENT - Opportunities for Laboratory employees and outside applicants.

2937. SCIENTIFIC ASSOCIATE - Requires BS or MS in chemistry, environmental chemistry or oceanography, or equivalent experience. Responsibilities will include development of gas chromatographic separations for a wide variety of natural and anthropogenic volatile halocarbons in seawater. Must be able to spend limited periods at sea. Previous gas chromatography experience required. Department of Applied Science.

2938. ENGINEERING POSITION - Requires a BS in mechanical engineering and a minimum of five years experience in the design of HVAC systems, process piping, fire protection, and underground utilities. Duties will include the preparation of engineering drawings and specifications for bidding and construction purposes, and the development of project scope through direct user contact. Plant Engineering Division.

Motor Vehicles & Supplies

87 CHEVY SPRINT - stick shift, am/fm stereo cass., 2-dr., good cond. Walter, Ext. 3499 or 757-6392.

87 HONDA REBEL - must sell, low miles, \$1,500 or take over payments. Jim, 874-4159.

87 MAZDA RX-7 - power sunroof, 21k mi., asking \$12,500. Ext. 4837 or 289-4980.

87 IROC-Z - 350 cu in., a/t, o.d., tinted glass, fully loaded. 286-9456.

86 SUBARU GL-10 WAGON - turbo, 4wd, 5-spd., 48k mi., loaded, mint, 4-yr. warr., asking \$10,950. Henry Ext. 4547 or 727-7227.

86 AUDI 4000S - 4-dr. sedan, black, a/c, p/s, p/w, sunroof, 5-spd., am/fm cass., alum. wheels, 55k mi., \$9,000. 281-5565.

86 HYUNDAI - 5-dr., a/t, a/c, am/fm cass., 17k mi., \$5,000. Ext. 3089.

86 VOLVO 240GL WAGON - a/t, full pwr., leather, cruise, am/fm, 18k mi., 70k warr., perfect cond., \$16,990. 728-0273 eves.

86 CAMARO - fully loaded, custom woodgrain dash, T-tops, alarmed, red/silver, 26k mi., \$8,950. Ext. 4962.

86 KAWASAKI KLR600 - on/off road, 1,500 mi., elec. start, w/2 helmets & cover, immac., \$2,000. Bob, 874-2131.

85 FORD RANGER PICKUP - 6 cyl., 5-spd., long bed, low mileage, excel. cond., \$5,400. Darrin, 765-5220 after 6 p.m.

85 FORD ESCORT - blue hatchback, 4-spd., 43k mi., am/fm, good cond., \$2,500. Mike, Ext. 3855 or 3010.

84 LeSHARO WINNEBAGO - 19' motor home, fully equipped, sleeps 4. 475-0509.

84 FORD F-150 PICKUP TRUCK - 4wd, 4-spd., 351 engine, asking \$8,000. 929-8467 after 5 p.m.

84 CADILLAC COUPE DeVILLE - rebuilt engine, all new parts, asking \$5,500. 289-4980.

83 TOYOTA CELICA LIFTBACK - a/t, cruise, am/fm, 65k mi., clean, \$5,200. Witkover, Ext. 4607 or 368-0452.

83 RENAULT ALLIANCE - am/fm cass., excel. cond., 47k mi., runs well, \$1,950. Weber, 744-8655.

83 KAWASAKI 750 LTD - 4-cyl., 2k mi., excel., like new, asking \$1,700. 654-0889 or 924-0651.

83 BUICK REGAL - a/c, p/s, p/w, am/fm, champagne landau top, excel. cond., \$4,000 neg. Bob, Ext. 7238.

83 CHEVY S-10 - 4-spd., very good cond. 325-0447 after 6 p.m.

82 PLYMOUTH RELIANT STATION WAGON - very economical, excel. cond., 75k mi., \$2,500. Yosepha, Ext. 3403 or 3129.

82 VW RABBIT - 4-dr., am/fm stereo, excel. cond., \$1,750. Mark, Ext. 4289.

82 DODGE 024 - 2-dr. hatchback, 4-spd., sporty, body excel., \$950. 471-4665, 467-2422.
