

## Second Prehearing On Shoreham Plant

LILCO's proposal to build the first unit of its Shoreham nuclear power plant had its second pre-hearing this week at the Rocky Point School. The first pre-hearing held before the Atomic Safety and Licensing Board took place on March 13. At that time, the attorney for the Lloyd Harbor Study Group (LHSG), asked the ASLB about its jurisdictional position regarding thermal discharge from nuclear power plants in view of the National Environmental Quality Control Act of 1969. This question was answered at this week's pre-hearing.

The ASLB ruled that evidence about thermal discharge would be admissible at the public hearing in so far as it relates to the existing standards under New York State jurisdiction. LILCO stated at the March 13 pre-hearing and again this week that it will meet the New York State standards, which have been approved by the Federal Water Pollution Control Administration (FWPCA). An attorney for the New York State Atomic Energy Council stated at both pre-hearings that it is reviewing LILCO's application and would not issue a permit unless LILCO did meet the standards.

The Lloyd Harbor Study Group, which in March was granted a 60-day postponement for the public hearing from March 27 to May 25, requested still another postponement, which was denied by the ASLB. Part of the basis for this request was the potential that the radiation standards might be changed to a lower maximum level. The delay was denied on the basis that the Shoreham plant will operate at radiation levels that are only a small percentage of what is permitted under guidelines. Guidelines are regularly under review by the IPRC, NPRC and FRC, and if new data supports a change, changes are made.

The Suffolk Scientists for Cleaner Environment and Safer Power, a group of over 40 scientists who live in Suffolk County, were granted permission to be an intervenor in favor of nuclear power at the public hearing. This group is headed by Dr. Vance Sailor, physicist at BNL, with Andy Hull, head of environmental monitoring at BNL and long-time resident of Shoreham, as its treasurer.

The public hearing will begin as scheduled on May 25 at 10 a.m. in the auditorium of the Joseph A. Edgar school on Route 25A in Rocky Point. All major parties to the proceedings must have their written statements prepared and available to all parties by May 15.

The major parties are the applicant (LILCO), the AEC, the Suffolk Scientists for Cleaner Environment and Safer Power, and the Lloyd Harbor Study Group. A number of other witnesses, both pro and con, will make a limited appearance. The end result will be a ruling by the Atomic Safety and Licensing Board granting or denying LILCO the right to proceed with construction.

At a later date, other hearings will be held to determine whether LILCO is given an operating permit.

Questions regarding either the Shoreham plant itself or the procedures involved in its construction and operation can be directed to the *Brookhaven Bulletin*, where answers will be provided using the latest and most accurate source.

## BNL On TV Again

"The Unseen World," a 3M Special to be seen in color on Sunday, May 3, 8-9 p.m., on ABC-TV, lifts a veil of mystery to reveal some of the hidden wonders of life that are not visible to the naked eye.

Some of the footage of microscopic subjects was filmed by Robert Smith of BNL's Photography Department.

The script of this unique special, produced by Jules Power for ABC News, was written by the prolific science writer, Isaac Asimov, and marks his first venture in the television field. Eddie Albert is the narrator.

## Second Shoreham Prehearing

During a break in the Atomic Safety and Licensing Board hearing at Rocky Point School, groups of intervenors gather to plan strategy for the balance of the meeting. Public hearings on the granting of a construction permit to the Long Island Lighting Company will be held starting on May 25. —Humphrey

Vance Sailor, Chairman of the Suffolk Scientists for Cleaner Power and Safer Environment.

G.F. Hadlock, AEC Headquarters attorney, (left), meets with A. Hull and C. Williams.

## Old World Herons Settle Down Here

Traffic entering the site last Friday morning was brought to a screeching halt as people stopped to watch a pair of Cattle Egrets feeding on the grass near the intersection of Brookhaven Avenue and Upton Road.

The two white birds appeared unconcerned at all the attention given to them by Lab employees, and in spite of being thoroughly drenched by downpours of rain throughout the day, remained in the general vicinity of the Theatre.

Proper identification of the birds as Cattle Egrets: *Bubulcus ibis* was first made by Dan Schaeffer and later confirmed by Dennis Puleston and Gilbert Raynor. These Egrets are slightly larger than a Snowy Egret, and have yellow, rather than black legs and bill. The Cattle Egret has a splash of yellow-brown on the chest and the back of his head.

The appearance of this Old World Heron in the eastern part of the United States in

the spring of 1952 caused a sensation in the ornithological world. Cattle Egrets are now quite common in Florida, and have occasionally been seen in New York and Long Island in the past few years. As early as the late 50's a pair took up temporary residence in a turkey hatchery in East Moriches.

If the Brookhaven Egrets should take up permanent residence and nest here, it would be the first occurrence of their nesting in New York State. Even if the visit of the pair is of short duration, it is rare indeed that these birds appear so far north at such an early time of the year.

People who wish to photograph the Egrets are cautioned to stay in their automobiles with their cameras. The birds are becoming quite tame, but are reluctant to allow a human to walk too close to them.

However, they seem to have no fears of cars, and will stay quite still if the photographer stays in his vehicle.

When this Cattle Egret first arrived at BNL he was soaked and dejected looking.

After a week at Brookhaven the Cattle Egret shows he has a neck, and can be dry and sleek.

While on the ground the Cattle Egret looks at first glance to be a white chicken feeding in the grass. But when he takes flight, the grace and beauty of the Egret is apparent to all. The Egret is of the Ibis family, related to the sacred Egyptian bird. In his native Africa, the Cattle Egret can be found in great numbers in any field where large herds of hoofed animals congregate. Coming in for a landing after a flight over the Medical parking field, this Egret makes a beautiful picture. Most Lab employees hope that the Egrets will take up permanent residence on site. —Humphrey

## Radiation Risks Grossly Inflated Scientist Declares

"Scare-laden" statements which imply that current U.S. standards for radiation emissions from nuclear power plants could lead to thousands of additional cancer deaths were assailed this week. Such statements were labeled as "gross exaggerations" and "scientifically indefensible" attempts to sway the public against nuclear power. Operation of such plants, now and in the foreseeable future, would not contribute even one additional cancer fatality per year, according to Associate Director Dr. Victor P. Bond. The cancer death "calculations" are the work of Drs. Gofman and Tamplin, both scientists at Lawrence Radiation Laboratory, Livermore, California. They have implied that nuclear reactor emissions could result in 32,000 additional cancer deaths annually.

Speaking at an Atomic Industrial Forum "Workshop on Radiation and Man's Environment," held last week at Buck Hill Falls, Pennsylvania, Dr. Bond said that the two nuclear critics had overestimated the risk and had "enormously exaggerated the dose an individual might receive by depicting a situation that is totally impossible within radiation guidelines." The implied effect of their estimates of exposure to the

Dr. Victor P. Bond

public from power reactors were at least several thousand times too high, Dr. Bond said, and include risk estimates which in his opinion "are in excess by a factor of at least 10, of the already conservative upper limit estimates recently presented by a task group of the International Commission on Radiation Protection." As a result, Dr. Bond continued, "one can make the firm statement that rather than 32,000 deaths per year, the exposure from power reactors is so low that even one death per year is unlikely to result, now and almost certainly in the foreseeable future."

Citing examples of misstatements by Drs. Gofman and Tamplin, Dr. Bond declared: "Their numbers are given as 'hard incontrovertible facts.' Any such numbers are purely hypothetical and should be given as a range of zero to an upper limit. They state that the incidence of all cancers is increased by radiation. Current evidence does not support their contention. They state that all cancers are induced by radiation, at approximately the same incidence per unit dose (one of their 'laws') and that a doubling dose of about 100 rads is reasonable for all forms of cancer." The fact is that available evidence is quite to the contrary." Dr. Bond also accused the two critics of using his own animal-experiment data, which included both benign and malignant tumors (primarily benign) and implying that all the tumors were malignant.

If the Gofman-Tamplin estimates of risk per unit dose were correct, Dr. Bond told his audience, "The exposed, studied and documented cases of the Japanese (bomb victims) and radiologists who received doses hundreds to thousands of times higher than permitted by Federal Radiation Council guidelines for the public, should have shown more obviously increased death rates. Not only is this not

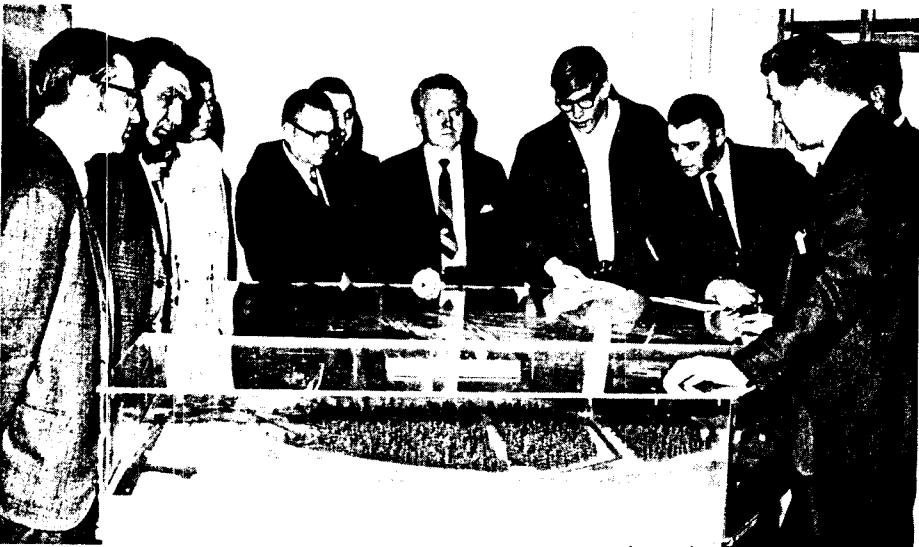

(Continued on Page 2)

**Medical Seminar**

Professor Rupert E. Billingham, University of Pennsylvania, (center) gave a Medical Department seminar on the "Origins and Objectives of Transplantation" last week. Shown with Professor Billingham are: (left) Dr. Eugene Cronkite, Chairman of the Medical Department and, Dr. A.D. Chanana, Head, Division of Experimental Pathology.

**IBEW Reps Visit Lab**

Presidents and Business Managers of IBEW utility unions were taken on a tour of Brookhaven last Friday. These IBEW representatives from the North-east area had been in attendance at a regional meeting in Plainview before coming to the Lab where they were joined by Charles Geonie, President of the local unit of IBEW. In the picture one group was being shown a model of the AGS before going on a tour of that research facility.

**Wage And Salary Conference**

On April 23 and 24 Brookhaven was host to the annual AEC Laboratories Wage and Salary Conference. Representatives from 10 AEC Laboratories attended the conference which was devoted to discussions on a number of topics of particular interest to AEC Labs. Representing BNL were: Joseph Washburne, Chairman, Richard Schonberg, Peter Paige, and R.C. Anderson.

**Epstein To Lecture On Environmental Pollutants**

Samuel S. Epstein, M.D. will speak on Thursday, May 7, on "The Toxicology of Environmental Pollutants." The lecture will be delivered in Berkner Hall at 11 a.m.

Dr. Epstein is Chief of the Laboratory of Environmental Toxicology and Carcinogenesis at Children's Cancer Research Foundation in Boston, Massachusetts, and Secretary of the Environmental Mutagen Society. He also has served as Chairman of the Advisory Panel on Mutagenicity of Pesticides to the Secretary's Commission on Pesticides and Their Relationship to Environmental Health, of the Department of Health, Education and Welfare. Dr. Epstein is also associated with Harvard University's Medical School.

**Here and There**

Claire Lamberti

A.O. Allen (Chemistry) was recently in Buenos Aires, Argentina for an international meeting on "Primary Radiation Effects in Chemistry and Biology." He delivered the opening plenary lecture and participated in a symposium on "Very Early Effects" which included twenty scientists from six countries. Harold Schwarz (Chemistry) also participated in the Buenos Aires symposium.

Lewis J. Greene (Biology) recently presented a seminar on the "Isolation and Structural Studies on Pancreatic Secretory Trypsin Inhibitors" at the Worthington Biochemical Corporation in Freehold, New Jersey.

Dr. Barry Gordon (DAS) gave a seminar and consulted on curriculum for the Brookhaven Semester Program at Tougaloo College, Tougaloo, Mississippi on April 26.

John Frizzola and Robert Brown (both of Meteorology) participated in Earth Day by lecturing to the 6th Grade of the Clinton Avenue School, Pt. Jefferson Station, on the role of the meteorologist in solving environmental pollution problems.

Dennis Puleston (Information) gave Earth Day speeches on environmental problems at Bayport High School and Terryville School, Pt. Jefferson.

Dr. Donald Hnatowich recently arrived in the Chemistry Department to spend seven months of a Fellowship awarded to him by the National Research Council of Canada. He will collaborate with Jerry Hudis and Morris Perlman (both of Chemistry) on photoelectron spectroscopy studies.

Dr. George C. Cotzias has been invited to give the Wartenberg Lecture at the 22nd Annual Meeting of the American Academy of Neurology. The American Academy of Neurology is meeting at the Americana Hotel in Bal Harbour, Florida April 27-May 2, 1970. Dr. Cotzias will present the Wartenberg Lecture entitled "L-Dopa in Parkinson's Syndrome" on Thursday, April 30th at 1:30 p.m.

Brookhaven Scientists scored a double header this week in the April 24 issue of Science magazine. Both George M. Woodwell and John M. Olson of the Biology Department. Woodwell's article was titled "Effects of Pollution on the Structure and Physiology of Ecosystems." Olson's article was "The Evolution of Photosynthesis."

**TIAA-CREF Changes Permitted This Month**

Every year, during the month of May, participants in the A.U.I. Retirement Plan may request that the apportionment of their and the Laboratory's contributions between TIAA and CREF be changed. Such changes are effective the July 1st following the change request.

Participants who have previously applied all contributions to TIAA, the fixed annuity program, may apply as much as 75% of subsequent contributions to CREF, the variable annuity program. Conversely, participants may also reduce or terminate contributions to CREF and increase their TIAA contributions accordingly. Any such changes will affect only future contributions and will have no bearing on accumulations in either TIAA or CREF up to the effective date of the change.

Change forms and further information regarding the A.U.I. Retirement Plan may be obtained by calling Personnel Services, Extension 2106.

Public Relations Officer

**Tune In!**

#165 - I should like to know the total numbers of males and females employed by the laboratory prior to the recent budget cuts; also the numbers of males and females who have recently been asked to leave.

It seems that there are rather more females than males asked to leave amongst my personal acquaintances; and I cannot believe that the laboratory, as an Equal Opportunity Employer is guilty of discrimination. Please set my mind at rest in this matter.

I think the easiest way to answer your questions is to give you a number picture of the Laboratory on a pre-layoff date of 2/28/70 and a projection of the same figures to a post-layoff date of 4/30/70.

Total Employment	3084	2898
Female Employees	502	472
Female % of Total	16.2%	16.2%

The projection is based on anticipated terminations between 2/28 and 4/30 and includes both voluntary and involuntary terminations. It would appear that, as always, the ladies are holding their own.

—Peter Paige

#166 - Would you please explain to me why a man was hired in Biology, while a couple of hundred other people were losing their jobs at the Lab?

As you are undoubtedly aware if you have been following the Brookhaven Bulletin for the past month or so, the "Positions Available" column has been listing job openings at the Laboratory as well as at other organizations. Last week, for example, eight openings at Brookhaven for candidates with specialized skills were listed.

All openings that develop at the Laboratory are first made available to qualified employees. If there are no candidates, the position is then offered to non-employees. In the Biology case, if there had been qualified employees on the layoff list, one of them would have been offered the position.

—Peter Paige

**Radiation Risks**

(contd)

true, but refined epidemiological and statistical approaches were required to detect any increases of the neoplasms most easily induced even at high dose levels of radiation."

Turning to individual, as opposed to population exposure, Dr. Bond calculated that current practice would limit dose to a person living at the boundary of a power reactor to about five millirems per year, or one per cent of the permissible individual limit. He compared this with up to 100-millirem per year doses incurred through medical X-rays; 100-millirems per year from living in some concrete houses, due to natural radioactivity in the building materials; and one or more millirems for a transcontinental jet flight, due to cosmic radiation.

The five-millirem exposure, Dr. Bond declared, "yields an upper limit additional probability of death from cancer of any type of less than one in a million per year. In other words, a million years of living at the site boundary would yield a probability of less than one additional cancer." He compared this with the risk of one in 4,000 per year from auto deaths, a risk of one in 200 per year of serious injury in an auto accident, a "natural" risk of some one in 1,000 per year of dying from cancer, and a large risk from smoking.

**Ladies Watch**

Postmaster Steve Garrett has received a Timex Lady's Watch in the mail that he doesn't know whom to deliver to. The watch was sent to the Timex Corp. in Little Rock, Arkansas, for repairs with no identification of the sender other than Brookhaven National Laboratory. The watch has a chromium expansion band, and no other distinguishing marks. Further information may be obtained by calling the Brookhaven Bulletin, Ext. 7238.

**Center Summer Schedule**

Beginning Friday, June 5, the Brookhaven Center will be open every evening from 5 p.m. until 11:30 p.m. This schedule will remain in effect until late September.

Dinner will be served until 8 p.m. daily. The bar hours are 5:00 p.m. to 11:30 p.m. Sandwiches are available after the dining room closes.

The services are available to all employees of the Laboratory, Associated Universities, Inc., the Atomic Energy Commission and their guests.

**Cafeteria Menu**

**Week Ending May 7, 1970**

Friday, May 1	
Old Fashioned Clam Chowder	
Fish 'N' Chips/Tartar Sauce	.70
Round Roast of Beef & 1 Veg.	.80
Shrimp Chow Mein on Rice w/Noodles	.85
Monday, May 4	
Chicken Chowder	
¼ Roast Chicken w/1 Veg.	.80
Breaded Pork Chop w/1 Veg.	.85
Macaroni & Chopped Beef w/1 Veg.	.80
Tuesday, May 5	
Beef Barley Broth	
Baked Meat Loaf w/1 Veg.	.80
Beef Chop Suey on Rice	.75
Broiled Chicken Livers w/Bacon & 1 Veg.	.80
Wednesday, May 6	
Cream of Mushroom Soup	
Veal Patti Parmigiana w/1 Veg.	.85
Knockwurst/Sauerkraut/Mashed Potatoes	.75
Fried Scallops w/Tartar Sauce & 1 Veg.	.90
Thursday, May 7	
Yankee Bean Soup	
Roast Sirloin of Beef w/1 Veg.	.80
Old Fashioned Chicken Pie	.80
Spaghetti w/Italian Sausage & Tomato Sauce	.85

## Feel the Vibe-Rations

It's Special Event time and BERA is happy to confirm the rumor. It's true - Lionel Hampton - King of the Vibes - is coming to BNL with his internationally famous inner circle orchestra.

"The Hamp" is one of America's all-time great jazz musicians. He has made personal appearances all over the world, appeared on every major musical television show, made countless recordings and performed at four Presidential Inaugurations, the latest for President Nixon.

Mark June 6th on your calendar and get your tickets early. Tickets go on sale Monday, May 4th, at the Recreation Office for employees, family, and their guests. On May 18th, they will be available to the general public. The price of admission will be \$4.00 each for employees and family, and \$5.00 each for visitors and general public.

Note: All seats are reserved. Why sit in the last row when for the same price you can sit up front? Don't delay - get your tickets early.

## Attention BERA Bowlers Bowling Awards Night Is Friday, May 8

The doors of the Gymnasium will open at 8:00 p.m., with the first door prize being awarded at 8:30. This will not be the only prize of the evening; there will be prizes for the best decorated table. The table decorations will be limited to those that can be carried in. Additional door prizes will be awarded at midnight and a number of other delightful surprises should keep everyone happy.

An ample supply of beer, pretzels, chips, set-ups and assorted foods will be available during the evening. Music for the night will be furnished by a lively combo and it will last from 9:30 until 1:30. Please plan to come.

- |            |                                |
|------------|--------------------------------|
| 8:00 p.m.  | Doors open                     |
| 8:30 p.m.  | First door prize to be awarded |
| 8:45 p.m.  | Awards presentation            |
| 9:30 p.m.  | Dancing begins                 |
| 10:30 p.m. | Best decorated table award     |
| 11:30 p.m. | Serving of food, coffee, etc.  |
| 12:00 a.m. | Awarding of door prize         |
| 1:30 a.m.  | The party is over              |

At noon on Monday, May 4, a layout of the Gym will be available at the Recreation Office for selection of team tables to be made by team captains. The decorating committee and volunteers will meet at 5:30 to decorate the Gym. Workers are needed, so please call Pat Oster, Ext. 7538, and leave you name.

Each bowler is entitled to bring one guest. Tickets will be given to your team captains in the very near future. These tickets are not transferable.

## Spectators Welcome To Bowling Championship And Happy Hour

You are all invited to come to the Port Jeff Bowl on Saturday, May 2, and cheer on your favorites as the men's and ladies' league winners compete for the BNL Championships. The matches will start at 2:30 and conclude at about 4:00.

From 4:00 to 6:00, there will be a "happy hour." All drinks will be 50¢ and there will be free hors d'oeuvres and live music, compliments of Port Jeff Bowl.

If you would like to join in the fun, call the Recreation Office, Ext. 2808, and leave your name.

## Soccer

M.T. Hutchings

Now that the light evenings are here again we are playing outside once more at 5:30 p.m. sharp on Mondays at the Softball Field. All are welcome to come and play; sneakers and shorts are all that is required although soccer shoes (about \$8) are an advantage. We have our field marked out now, and shall have the new goal posts up as soon as they arrive. Activities will range from eleven-a-side, 90-minute practice games to a seven-a-side inter-departmental league. Call Ext. 7193 or 7608 for details.

Manchester United are playing Bari of Italy on Wednesday, 6th May at Randall's Stadium. We hope to get up a party to go to this match, and perhaps others later in May. If interested call John McCafferty on Ext. 2582.

**Southampton College 5 V BNL 4 (2-2)**  
Our second game of the year resulted in a narrow defeat on a very breezy Saturday afternoon, April 17th, at Southampton. A goal down after only a few minutes due to a defensive misunderstanding, we quickly drew level with a goal by Mariscotti from close range, and then went ahead when Cox scored after the keeper had mishandled. However, the lively College left winger equalized before half-time with a fine run and shot. Two breakthroughs by the College in the second half put them ahead 4-2, but then, as our defense mastered their attack, first Boyun and then Batchelor scored at the other end with beautifully placed shots to put us level. We were all set for a draw when we unfortunately conceded a penalty through an unnecessary handling offense, and the College star forward made no mistake with the kick.

### BNL 1 V Huntington 2 (0-1)

Sunday, April 19th found us hosts to the Huntington Second XI once again at Yaphank in a hurriedly arranged match. Nevertheless, a beautiful afternoon and a well laid out pitch provided the setting for another good game against a well drilled team. Although the Huntington attack always looked the most dangerous, play was even for much of the game. Huntington's first goal came shortly before half time, a hard shot hitting the underside of the crossbar was judged to have crossed the line before rebounding out. Aided by a strengthening wind they went two up five minutes after the interval when their left wing put in a hard shot which Cantera did well to parry away only to see their center forward hit it home. We then had a number of close chances and Hubberstey got one back after hitting the woodwork twice, but we couldn't make the equalizer. Nevertheless, with more domination in mid-field and a little more imagination in our forward play we should soon be back on the winning patch!

## Theatre Group Meeting

Monday, May 4th, 8:30 p.m.  
At The Theatre

A new experience for our Group will be the subject of this May meeting.

Readings will be presented from the following plays:

Medea - Euripides

Medea - Anouilh

and

Murder in the Cathedral - T.S. Eliot

Becket - Anouilh

As you can see, the characters and situations are the same for each of the two plays. We can take an interest in how two different authors treat like situations.

Also at the meeting, the Advisory Committee will put forth their final selections for next year's season, voting to be held in June.

Remember - An interesting evening, Monday, May 4th, at the Theatre.

## Swimming Pool Hours

Monday through Friday

12:00 noon - 1:30 p.m.

employees only

3:00 p.m. - 9:30 p.m.

employees/family/visitors\*

The pool is closed on all BNL holidays. \*Visitors must accompany the employee who is permitted to bring a maximum of five visitors per family each visit.

The Gym will be closed starting May 4 thru May 11 to prepare for Bowling Awards Nite.

## Free Concert At Berkner Hall

The BERA Concert Group is happy to announce that on Monday, May 11, 1970, at 8:30 p.m., in Berkner Hall, the Music Department of the State University of New York at Stony Brook will present a special performance by the newly formed University Orchestra, David Lawton, conductor. The program will include Bach's Concerto for two violins and orchestra in D Minor, Beethoven's Symphony No. 2, Opus 36, and the first performance of a new work composed especially for the orchestra by Timothy Imlay.

The forty piece University Orchestra was founded this year by David Lawton, who just joined the Music Faculty at Stony Brook. The orchestra has given three concerts to date, and the present one will be its fourth and final appearance this season. Lawton comes to Stony Brook from Berkeley where he was conductor of the University of California Symphony Orchestra last year. Currently completing a Ph.D. thesis on the early Verdi operas, he has studied conducting with Nino Sanzogno in Milan, Italy.

Soloists for the Bach Concerto will be violinists Ira Lieberman and Irene Lawton. Lieberman, who holds a doctorate in musicology from Columbia University, is presently a teacher of music theory and performance in the Brentwood High School District. An active performer, he recently gave a recital at Stony Brook with harpsichordist Kenneth Cooper. Mrs. Lawton is a graduate of the Wurzburg Conservatory where she studied violin with Heinz Endres, first violinist of the Endres Quartet in Munich. She has appeared frequently as a soloist and chamber music performer at Berkeley.

Talented young composer Timothy Imlay is a pupil of Billy Jim Layton, and a cellist in the orchestra. His piece calls for the division of the orchestra into separate groups: two of strings, one of woodwinds, one of brass, and three of percussion, plus piano and electric organ. Much of the excitement of the work is the result of conflict between the groups. The players engage in a variety of unusual performance techniques, including a certain amount of improvisation.

The concert is open to the public and is free of charge.

## Bowling News

Irma Carl

The week of April 20 was Sweeps week in Patchogue and Port Jefferson and a good time was had by all - more so by the winners of all the loot!!

Betty Nolan and Flo Weiss of the Pink League were entered in the singles and doubles events of the SCWBA 12th Annual Tournament. During the doubles both girls held their own, but during the singles Betty rolled a beautiful scratch series of 559. This, with her handicap, puts Betty in an excellent position of retaining first place and first prize money for this event. Hearty congratulations to both gals for a job well done.

## May And June Met Tickets

The Recreation Office still has Met tickets available for May and June. Look the list over; there just might be a date that interests you.

All are night games with the exception of May 30 (Holiday) and June 21 (Sunday).

May 5 Los Angeles

6 Los Angeles

7 Los Angeles

11 Montreal

26 St. Louis

27 St. Louis

29 Houston

30 Houston

June

17 Cincinnati

21 Philadelphia

29 Pittsburgh

30 Pittsburgh

## Movie Group

The Movie Group will meet on May 1st at 12 noon in the Cafeteria at the big round table at the planter. The final list of movies for this summer's showing will be chosen. All newcomers are welcome.

## Softball

Tom Lee

In order to get the season started in a nice orderly fashion, I will go out on a limb and evaluate the teams and give my projected winners. This will give a little extra drive to the players to "sock it to me."

### Brookhaven League

By far the best balance this League has had in quite a few years. Each team, due to the disbanding of a few teams, has added valuable players to its roster.

It would be quite a crime not to pick the Blue Jays who have been champs since time began, but this year could be the year for the Oldtimers. These two teams should have a neck and neck fight with a "you pick 'em" for the champ. Dirty Sox might be the sleeper and sneak in. A.M.D. and S&M both have good balance but the older teams can go with experience one more year.

### National League

Metallurgy all the way. Their age is old but their spirit young. This team has great balance if you can keep them away from their refreshments for 7 innings. Also, if they can't all go on vacation at the same time. Deadwoods up from Lab League could make it a race, with the rest of the League fighting it out for third. Phoubars and Pop-Ups a little short on players as are the Bubble Boys. The Rat Pack will field a team and we know that their refreshments will not be left to sit for 7 innings.

### Laboratory League

Bio-Meds on the basis of last year's record, with Chemistry as a dark horse. Charlie Browns will again win a couple of games in between beers and the Six Pacs, down from the National League, will win their share. Converts could have their best year and, who knows, might even take it all!

Good luck to all. Have a good season, win or lose. If you don't agree with my picks, call George on 391 - he always has an open ear to your complaints.

## Stony Brook Events

The State University of New York at Stony Brook invites the public to the campus for a series of lectures, concerts, a carnival, and free performances by the Jefferson Airplane and the Open Theatre from Friday, May 1, through Thursday, May 7. Unless indicated, the events are open to the public, without charge.

### Friday, May 1

A glittering carnival midway with Ferris Wheel, children's rides, dart games, nickel pitches, a cigarette rolling contest, continuous treasure hunts and concession booths selling German and Israeli food will be open from 6 p.m. to 9 p.m. on the library mall.

The Jefferson Airplane will perform before a crowd expected to exceed 15,000 spectators at 9 p.m. on the campus athletic field.

### Saturday, May 2

The carnival midway with more than 30 booths will be open from noon until 9 p.m.

The Open Theatre will perform its recently premiered Off-Broadway production, "Terminal," at 9 p.m. in the Gym.

### Sunday, May 3

The carnival midway will be open from noon until 6 p.m.
