

Construction on the beam transport tunnel will begin in the fall. Through the 2000-foot transfer line, a heavy ion beam, generated in the Tandem Van de Graaff's two accelerators, will be transported to the AGS, where it will then be accelerated to an energy of about 15 GeV/nucleon.

Update

Tandem/AGS Link

Last year, the Department of Energy approved a proposal to link the AGS and the Tandem Van de Graaff accelerator, to create a facility for doing heavy ion research at energies up to 15 billion electron volts (GeV) per nucleon. At the end of June, the monies needed to begin this project were officially written into the Congressional budgets for fiscal years 1984 and 1985, allocating \$5.3 million for FY84 and \$5 million for FY85. Next week, the Contracts & Procurement Division will start calling for bids on construction of the heavy ion transfer line, a 2000-foot long, 10-foot diameter tunnel which will form the connection between the AGS and the Tandem.

Other areas that must be attended to before the project can be completed, in mid-1986, include:

- AGS — In order for heavy ions to circulate in the AGS, modifications must be made to the accelerator's injection, radio frequency and control systems.

- Tandem — To enable the Tandem, which operates on continuous current, to inject heavy ions into the pulsed AGS, two new pulsed ion sources will be installed. An intershield will also be installed, to increase voltage stability.

- Instrumentation — Modifications to the Multiparticle Spectrometer lead the kinds of instrumentation being considered for nuclear beam experimentation at the AGS. Another instrument under consideration is a high resolution forward calorimeter.

The completion of this project will mark the opening of a new area of physics research at Brookhaven. Intermediate mass ions, up to sulfur, supplied by the Tandem and transferred to the AGS through the new tunnel, will be accelerated in the AGS to 15 GeV/nucleon, then sent down the AGS beam line to collide with the fixed targets. At that point, researchers hope to observe new phenomena predicted to arise when nuclear matter is compressed to extreme states of temperature and density.

Energy Secretary at BNL

Secretary of Energy Donald Hodel visited Brookhaven for the first time on July 2, and he brought with him his Israeli counterpart, Minister for Energy Yitzhak Moda'i. Last December in Jerusalem, the two ministers set up a joint task force on energy cooperation aimed at long-term sharing of energy research and development activities.

Hodel was briefed by Lab Director Nicholas Samios on the Lab's present programs and future plans. The Secretary said he was "excited and intrigued" by what he heard and that

he looked forward to further briefings.

The Israeli Minister found the Laboratory "overwhelming" and said "one could take months to observe what is being studied here."

Moda'i and Hodel visited the NSLS, the Superconducting Transmission Line, PETT VI and scientists working on the SSC magnet. At the conclusion of their tour, they answered questions from the press at the Brookhaven House. Most of the questions centered on the Shoreham nuclear power plant. The Secretary said he was in favor of opening the plant.

Secretary Hodel (right) and Minister Moda'i talked to the press at the Brookhaven House.

Viewing a cross section of the SSC magnet being developed at Brookhaven are (from left) Robert Palmer, BNL; Mr. Moda'i; Mr. Hodel; Donald Pearlman, Exec. Asst. to Mr. Hodel; and Martin Blume, BNL.

Working With Energy Problems In Developing Countries

For over 30 years, the U. S. Agency for International Development (USAID) has been assisting these countries with programs to improve agriculture and health, and for the past decade, with energy policy and planning. USAID officers have responsibility for carrying out these programs in the field, but most are not energy experts.

To highlight the vital role of energy and to give its field officers an across-the-board perspective on energy issues, USAID asked BNL to prepare an energy training course. And so, for two weeks last month, 21 AID officers

met here to learn about various energy technologies, how to plan with limited energy resources and to hear about energy projects already carried out by AID. Included in the group were officers working in Mali, Morocco, Tunisia, Uganda, Liberia, Kenya, Upper Volta, Costa Rica, Yemen and Egypt, and representing the Africa, Asia and Latin America Bureaus of AID.

Speakers were drawn from BNL, other laboratories, universities (in particular, SUNY Stony Brook), consulting firms and USAID. Guest lecturers included Dr. Mohan Munasinghe, Senior Advisor to the Presi-

dent of Sri Lanka and Dr. Irving Friedman, member of the International Advisory Board to The First Boston Corporation.

Most of the participants came from Africa where wood fuel is a big fraction of that continent's energy resources and where supplies are dwindling. To move into the 21st century requires a modern, diversified energy system — a highly expensive venture, given the current energy prices. It is much more difficult for Africa to industrialize now, than it was for Western countries when oil was cheap.

In the meantime, as a bridge, transitional strategies are being developed for a more efficient use of present energy resources. David Jhirad, chairman of the conference, and a member of the International Energy Group of BNL's Department of Applied Science, says that there will be 650 million people in Africa by the year 2000, of which 250 million will be urban dwellers. One of the strategies envisioned is the building up of large plantations around urban areas to provide wood for charcoal, the principal form of fuel used in the cities. It has also been recommended that Africa use wood for small power stations and exploit the small oil and gas deposits distributed around the continent.

Brookhaven was asked to prepare the course because of its long experience in diverse energy projects for AID and DOE. For example, the International Energy Group has just concluded a 5-year training program which has educated nationals of developing countries in the many aspects of energy. Because a major part of the export earnings of their countries is spent on imported oil, says Jhirad, "the whole question of finding affordable alternatives is of the highest priority." Jhirad is planning to go to Washington for a year to help AID develop new programs tailored to specific countries and regions, in an attempt to implement some of these alternatives.

Inside Info

Martin Blume, Associate Director for Low Energy Physics and Chemistry, has been named a Fellow of the American Association for the Advancement of Science. He was cited for "significant contributions to understanding of the magnetic properties of matter, and for leadership in the development of the National Synchrotron Light Source."

Some of the USAID officers attending the energy training course at BNL from June 18-29 were (from left): Gary Bricker, Morocco; Mohamed Ali Hassairi, Tunisia; Sally Patton, Washington, D.C.; Martin Bush, U. of Florida (a speaker); and Jon Anderson, Africa Bureau.

Peter Horton

Sunday Tour

Visitors to the Lab this Sunday, July 15, have a special treat in store for them. They will see an entertaining and educational live stage show called "Energy Today and Tomorrow" presented at noon, 1 p.m. and 3 p.m. The show features an array of unusual electronic teaching devices, like an animated garbage can that demonstrates the value of recycling, a bicycle that generates electricity, an electrostatic precipitator to control pollution and an electric motorcycle.

The program also includes a bus tour of the Lab site and a guided walking tour of the Exhibit Center. Visitors may arrive any time between 10 a.m. and 3 p.m.

Headache Study

Volunteers are needed for a new study on headaches utilizing PETT (Positron Emission Transaxial Tomography) to quantitatively assess regional brain glucose metabolism. The project is seeking volunteers who are prone to hangover headaches. (Confidentiality will be maintained). Prospective participants may obtain more details on the studies by contacting Dr. Howard Sachs at the Health Sciences Center, SUNY Stony Brook, 444-1432.

Gould on Evolution

"There is a pattern in the history of life, but it is not the pattern that we thought," argued evolutionary theorist Stephen Jay Gould in his "Pattern and Non-Pattern in the History of Life" presentation on June 28 at Brookhaven's 30th AUI Distinguished Lecture.

During his talk to a standing-room-only crowd, Gould referred to Darwin's belief that species should progress as they adapt to the environment and compete for reproductive success. The paradox of this belief is that species do not progress. "Evolution to me seems to be a lot of backing and forth and going here and there, and we still have the same basic designs," said Gould.

To explain the evolutionary success of some organisms over their competitors, Gould suggested the periodic occurrence of brief, cataclysmic events on earth. These events cause a random mass extinction of species by mechanisms for which organisms cannot prepare. "Mass extinction," declared Gould, "resets the clock frequently enough so that if any progress is accumulating, it is undone sufficiently often."

Gould stated that until about six months ago he thought that the entire resolution to the paradox of no progress could be read out of his own theory of punctuated equilibrium, which holds that most evolutionary changes

Stephen Jay Gould in one of the labs in the Biology Department which he visited after his arrival at BNL.

do not accumulate slowly and gradually, but instead occur geologically instantaneously. Gould now believes that the undoing force of mass extinction is more important.

—Sally Sargent

Stock Aid

In a recent Resource Management Project, George Dioguardo, Supply & Materiel, focused on the confusion that sometimes occurs on withdrawals from the Stores Inventory System. Problems range from an employee's inability to find the proper item in the stores catalogue, to ordering the wrong amount due to the unit of issue.

As a result of his project, it was decided to assign Dioguardo to deal with specific problems. If you are experiencing any difficulties in requisitioning material, call him on Ext. 2375 and he will put you on the right track. Users in the same work area should get together before calling, in order to reduce the need for duplicate discussions.

As before, questions or problems relating to the type or quality of materials stocked, should be directed to the Quality Control Section on Ext. 2979.

In Memoriam

Philip Connolly, a physicist in the Omega Group, Physics Department, died on July 1 at Mather Memorial Hospital. He was 54 years old.

A Canadian citizen, Connolly received his Ph.D. from Cornell and spent a postdoctoral year there before joining the Physics Department on September 19, 1960. He was in the Bubble Chamber Group for many years and was associated with the major discoveries of the Omega minus particle and the first charmed baryon. His major interest has been in the use of the computer in this physics, which culminated with the electronic neutrino experiments currently at the AGS. Long time associate, senior physicist Hywel White, said, "his technical expertise and his solid contributions will be sorely missed."

Connolly was a resident of Shoreham. He is survived by his wife, Roseann, and a sister, Eileen Travis of Rothesay, N.B., Canada.

Graduation Day for Police

As Jack Barry's bagpipe rang out, the company of five BNL patrol officers-to-be marched in unison across the softball field last Tuesday afternoon. The audience of about 25 had gathered to witness the event, the first of its kind, and patiently anticipated the final step in the training program: graduation.

The five proud officers are: Michael Huskey, Michael Mallon, Doreen Spires, Robert Schmidt, and Barry Cunningham. Spires and Cunningham will be assigned to a squad on site, while the others are temporarily assigned to assist in an upcoming tactical training program.

The event was orchestrated by Captain Pat Cahill, the police group's training officer, who spent three months training the recruits, which she regarded as "excellent." Since she came to Brookhaven eight years ago there has never been a ceremony of this kind, and as the newly appointed training officer, she felt that it was time one was held. "They deserve the recognition," she said.

Cahill recounted the story of how the group planned the successful apprehension of a person who was responsible for a series of thefts in a building

on site. They worked well together, she said, and for their fine job, they received excellent police duty awards.

Also on hand to address the company were Len Emma, Manager of the Safeguards & Emergency Services Division; Bernard Brennan, Superintendent of Police; and Suffolk County Police Sgt. Bruce Payton. Said Payton, who assisted in the training, "These five are exceptional. I congratulate them on a good job well done."

As a result of their three-month training program, which included methods in tactics, patrol functions, firearms, arrest authority, CPR, first aid, radiation training, and site familiarization, Cahill thinks this company will play an important part in the positive changes taking place in the Lab's police protection. "The police group is changing in the direction of more security," she said.

Brennan commended Cahill's work with the trainees. "She's done one hell of a job," he told the audience, who gave her a warm round of applause. Cahill pinned the excellent police duty awards on the graduates' uniforms. They fell into line as trainees for the last time, took a step backward, and

Jack Barry of Plant Engineering playing the bagpipes at the ceremony. Originally a base drummer with the Suffolk Police Emerald Society, he learned to play the reed instrument in 1970, and purchased his own "pipes" last year.

were dismissed. Joyously, they flung their hats in the air.

—Maurice DuBois

Captain Pat Cahill addressing BNL's five newest patrol officers during a ceremony held last Tuesday on the softball field. She is flanked by Len Emma, Manager of the Safeguards & Emergency Services Division on the left, and Bernard Brennan, Superintendent of Police. The officers, in uniform, are: (from left) Barry Cunningham, Doreen Spires, Michael Huskey, Robert Schmidt and Michael Mallon.

Safety Shoes

The on-site safety shoe attendant will be on vacation the week of July 23. No safety shoes will be issued during this period. Normal operations will resume on Monday, July 30 at 1 p.m.

NYC Train Trips

Listed below is a revised schedule of train trips. Wednesday trips depart the Patchogue railroad station at 7:55 a.m. and cost \$5 for a round-trip ticket. Departure time on Saturday is 8:31 a.m. and the cost \$6.50. Return can be made on any train the same day.

Wednesdays	Saturdays
July 18	Aug. 25
Aug. 1, 15, 29	Sept. 15, 29
Sept. 5, 19	Oct. 13, 27
Oct. 3, 17, 31	Nov. 17, 24
Nov. 7, 21	Dec. 8, 15
Dec. 5, 19	

Reservations may be made by sending a check payable to BNL to Box 322, Upton, N. Y. 11973. Checks must be received 48 hours prior to a trip. Include your phone number, address and date of the trip you want, on your check. Write separate checks for separate dates. Tickets will be given to you on the train.

Hispanic-American Society

The Hispanic-American Society is sponsoring a picnic at the BERA Recreation Park on Saturday, July 21 (rain date, July 22). Frankfurters, hamburgers and soft drinks, along with dancing, music and games, are included in the admission price of \$3 per person. The Laboratory pool will be available for use between 1 and 6 p.m. at regular admission prices.

For information and tickets, contact Juan Alvarez, Bldg. 326, Ext. 3084; Victor Gonzalez, Bldg. 479, Ext. 3357; Jose Medina, Bldg. 134, Ext. 7636; Irma Montanez, Bldg. 460, Ext. 3325; Irving Montanez, Bldg. 911A, Ext. 2540; Jose Sanchez, Bldg. 452, Ext. 3296.

Cricket

In the first match of the season played on June 16, the Brookhaven International Cricket Club lost to Staten Island by 84 runs. Batting first, the visitors scored 188. This proved to be beyond the reach of the Lab team, which replied with a score of 104. John Millener took top honors with 36, Raj Chaudhuri and Dave Cox each scored 21.

The second of this season's games will take place away, against Oyster Bay on Sunday, July 15. For further information, call John Millener, Ext. 3853, or Dave Cox Ext. 3818.

Shopping Bus

For the convenience of on-site residents, a shuttle bus to the Shirley Pathmark shopping center leaves Fleming House parking lot every Saturday at 9 a.m. and returns by 1 p.m. If, for some reason, it is necessary for some passengers to leave or return at other times, see the driver at 9 a.m. about an intermediate run.

WIS Party

Come and meet Brookhaven Women in Science at their Fifth Annual Cocktail Party on the patio of the Brookhaven Center on Wednesday, July 18 from 5 to 8 p.m. Hot and cold hors d'oeuvres will be served and a cash bar will be available. The cost is \$4.25 per person. Make a reservation by sending a check, payable to BNL-WIS, to Caroline Kramer, Bldg. 475, or call her at Ext. 2673.

Bowling

Priority applications for bowling next season have been submitted to last year's team captains. They must be returned by July 31. Questions can be directed to Richard Scheidet, Ext. 5284, or Charles Bohnenblusch, Ext. 4758.

Softball

Games for week of June 25

League I	
Big Sticks 10 - Six Pax 7	
Blue Jays 10 - Phoubars 5	
Ravens vs. Ice Pops	No score reported.
Moles vs. Renames	No score reported.
League II	
Scream 12 - Faze II 9	
Dirty Sox 13 - Magnuts 7	
Medical 14 - Random Errors 0	
Lights Out vs. Titans	No score reported
League III	
No Names 3 - Farm Team 1	
Nads 13 - Source 6	
Survivors vs. E-Z Riders	No score reported
League IV	
Septembers 19 - Underalls 5	
TNT 14 - Kidz-R-Us 9	
Mole-Esters vs. Turkeys	No score reported
Makeup game:	
TNT 12 - Septembers 9	
League V	
Who Cares 18 - Space Kadets 4	
No Feedback 15 - Erasers 5	
Mudville Sluggers 8 - Foul-Ups 5	
Makeup game:	
No Feedback 13 - Mudville Sluggers 8	

Health Seminar

The next employee wellness seminar, "Physical Fitness: Evaluating Different Exercise Programs," will be held at noon on Thursday, July 19 in Berkner Hall. Ken Cody, exercise physiologist at North Shore Rehabilitation and Sports Medicine Center, will be the speaker.

Cafeteria Menu

Week Ending July 20

Monday, July 16	
Chicken rice soup	(cup) .65
	(bowl) .85
Beef teriyaki & rice pilaf	2.20
Quiche Lorraine & 1 veg.	1.90
Hot Deli: Turkey breast	(bread) 1.95
	(roll) 2.10
Tuesday, July 17	
Lentil soup	(cup) .65
	(bowl) .85
Pot roast of beef & 1 veg.	2.05
Broiled fish fillet & broccoli spears	1.85
Hot Deli: Sloppy Joe's	2.00
Wednesday, July 18	
Beef noodle soup	(cup) .65
	(bowl) .85
Fresh ham w/sweet potato & applesauce	2.00
Spaghetti and sausage	2.10
Hot Deli: Pastrami	(bread) 1.95
	(roll) 2.10
Thursday, July 19	
Split pea soup	(cup) .65
	(bowl) .85
Sweet 'n sour pork on rice	1.95
Veal patty scallopine & 1 veg.	1.95
Hot Deli: Top round of beef	(bread) 1.95
	(roll) 2.10
Special: Top your own cheese cake	.95
Friday, July 20	
New England clam chowder	(cup) .65
	(bowl) .85
Seafood platter	2.15
Salisbury steak & 1 veg.	1.90
Hot Deli: Knockwurst & sauerkraut	(bread) 1.85
	(roll) 2.00

The Brookhaven Highlights from January 1982 to March 1983 (BNL 51700) is now available from the Library. Call Ext. 5068.

Vaudeville Auditions

BNL employees, their families and friends are invited to showcase their talents in the 7th annual BERA Vaudeville Show, to be held August 24 and 25 at the Brookhaven Center. Auditions will be held in the North Room of the Center at 7:30 p.m. on Monday, August 13 and Wednesday, August 15. A professional piano accompanist will be at the August 15 audition only.

Whatever your specialty — comedy, magic, juggling, singing, dancing — you'll find an appreciative audience at this summer entertainment event. If you have questions, call the director Jane Love (286-1136), or Penny Baggett (Ext. 5154).

Runners' Corner

With a heavy heart we announce the death of Edward F. (Ted) Landry. On Sunday, July 1, he was hit by a car and killed while bicycling near his home. Ted was president of Brookhaven Lab Roadrunners until he left BNL two years ago. His friendship will be missed by all that knew him. Contributions to the Edward Landry Trust Fund can be sent to First City Bank, P.O. Box 974, Addison, Texas 75001, or to Elaine Landry, 18 Epsom Course, Brookhaven, N. Y. 11719. For further information, call Jeanne Penoyer, Ext. 2614, or Gus Prince, Ext. 5079.
