

OCCUPATIONAL SAFETY MANAGEMENT INFORMATION SYSTEM (OSMIS)

SYSTEM UPGRADE

Jack Ellerkamp
ES&H Coordinators Meeting
August 20, 2002

REASONS FOR UPGRADE

- Antiquated system – FoxPro 2.5 – no longer maintained by Microsoft
- No one associated with original system development currently working at BNL.
- Need to make more user friendly and expand access
- Conform database to info needs

CURRENT STATUS

- Almost completed
- CAIRS reports for last quarter were printed from Microsoft Access and included causes where the information was available.
- Reports conform closely to sorting needs to help analyze data
- More user friendly

FUTURE DEVELOPMENTS

- Will allow anyone with the need to download data and reports.
- Will function in conjunction with SBMS form.
- Only designated SHSD personnel will have access to make adjustments.
- Will allow for electronic uploading and downloading of reports.
