

Respirator Fit Testing

Why Change Respirator Fit Testing

The SHSD is continuously assessing the format for services to:

- improve performance
- enhance program effectiveness
- provide additional field services

Radiological Control Division is providing a resource to perform fit testing allowing S&H personnel to increase efforts in field service.

The fit test service will still be provided as an overhead function.

Safety and Health Service Request

Safety and Health Services is providing a web based Service Request page.

- A service may be requested by any department representative, or employee and tracked until completion.
- A unique project number will be automatically assigned to the request and the information entered to a database.
- The IH Field Supervisor will assign the request to the department S&H representative.
- Automatic e-mails will be generated to verify the request and notify the S&H rep of the request
- Requestors will be able to view their requests at anytime.

Please forward all questions about this site to: [John Peters](#)

 One of ten national laboratories overseen and primarily funded by the Office of Science of the U.S. Department of Energy (DOE), Brookhaven National Laboratory conducts research in the physical, biomedical, and environmental sciences, as well as in energy technologies and national security. Brookhaven Lab also builds and operates major scientific facilities available to university, industry and government researchers. Brookhaven is operated and managed for DOE's Office of Science by Brookhaven Science Associates, a limited-liability company founded by the Research Foundation of the State University of New York on behalf of Stony Brook University, the largest academic user of Laboratory facilities, and Battelle, a nonprofit, applied science and technology organization.
