

Status IH Baseline Monitoring

ESH Coordinators Meeting

Presented by: John W. Peters of SHSD

September 12, 2007

IH Monitoring Update

- Colden/COEH (completion date next week)
 - Additional \$25k added to contract; end date the same
 - Field work ended
 - Data Input Continuing
 - Hazard Analyses Being Completed
- S&H rep
 - Field work ongoing
 - IH Scheduler being updated
 - Colden is not updating; S&H rep will need to complete updates from list of Colden monitoring

IH Monitoring Update

Colden Sample Events

June	12
July	22
August	22
September	?? (a few)

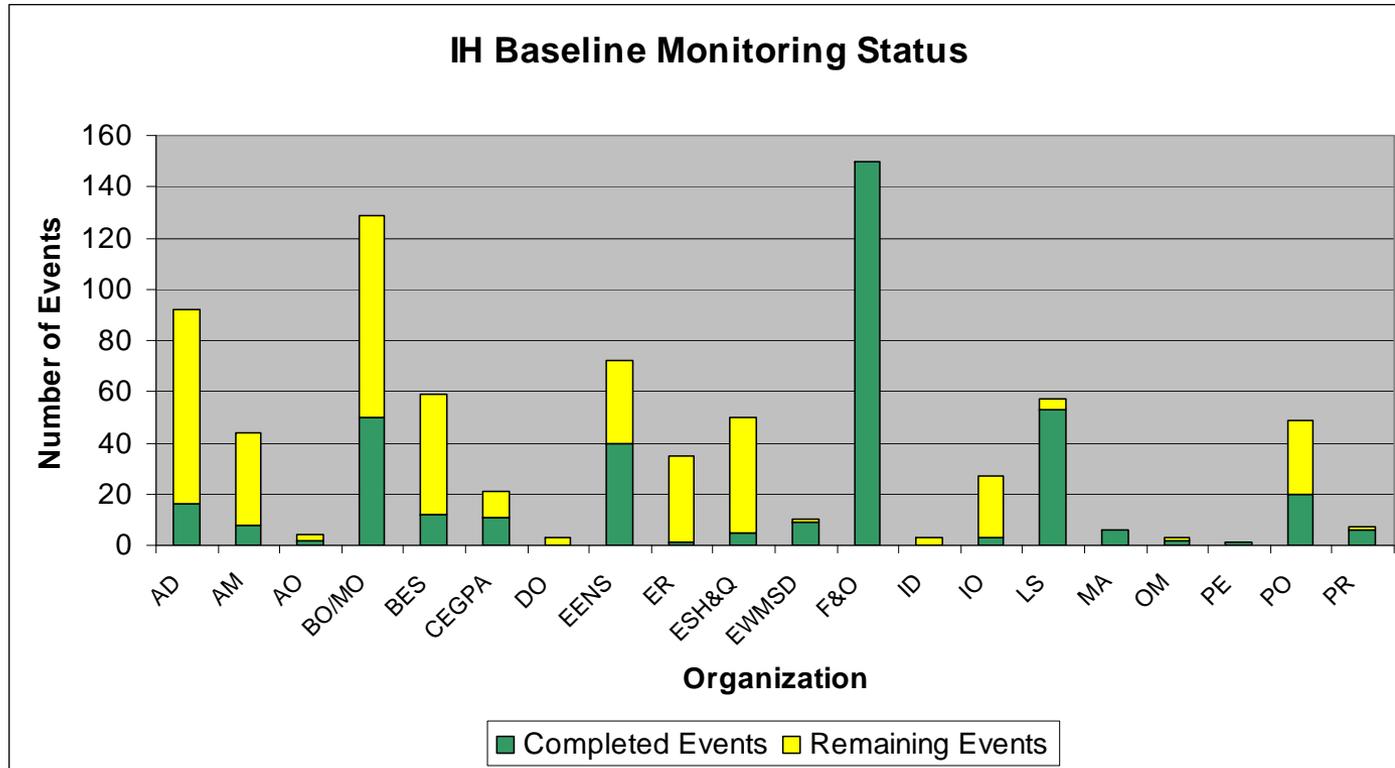

Note: includes air sampling, noise monitoring and wipe sampling events; capability was there to complete many more but few opportunities available

Colden Hazard Analyses

~140 ESRs will be reviewed and monitoring action recommended as necessary.

Summary statement should identify non-monitoring conditions

IH Monitoring Update

Notes:

- does not include recent Colden work.
- chart completed 7/31/07
- many are one time events not repeats or multiples; does not allow for statistical assessment of exposure
- S&H reps are continually finding additional events as we look closer and take higher profile

IH Monitoring Update

New Concerns and Projects - ISM

- Asbestos air sampling in locations identified with presence of pipe insulation
 - (other areas?)

- Soldering stations
 - Both air sampling during soldering work and wipe sampling in general vicinity

- Contractor IH Monitoring
 - Discussions underway on best approach
