

# The Tools You Need to Get Healthy and Stay That Way

*What are the keys to staying healthy and preventing disease?*

- Get recommended screening tests.
- Be tobacco free.
- Be physically active.
- Eat a healthy diet.
- Stay at a healthy weight.
- Take preventive medicines if your doctor prescribes them.

And at every checkup, you can talk with your doctor about how to stay healthy no matter what your age is. Remember to talk with your doctor to determine which tests are right for you based on your age, gender and family history. Deductibles, coinsurance and/or copayments may apply. Please see your benefits materials for details.

Use this checklist to talk with your doctor to determine what tests are right for you and to record details such as test date, results, next test date and questions to ask.

*Your CIGNA HealthCare plan focuses on helping to keep you well, rather than just providing benefits for covered illness or injury.*

## Men's Care Checklist

Test/Screening	Test Date	Recommendations/Average Range	My Results	Next Test Date	Notes/Questions
