1.0 POLICY

All members of the Clinical Research Center of Brookhaven National Laboratory shall be properly trained and knowledgeable of all requirements relating to the collection, control and disposal of medical and other hazardous wastes generated in the course of carrying out an approved clinical research study.

2.0 MANAGEMENT PLAN FOR THE CONTROL OF MEDICAL AND OTHER HAZARDOUS MATERIALS:

- 2.1 The selection, handling, storage, use and disposal of medical and other hazardous materials shall be addressed in the BNL required Experimental Safety Review (ESR) applicable to the research study.
- 2.2 All CRC staff members directly involved in research that use or generate medical or other hazardous materials shall complete all training required by BNL.
- 2.3 All chemicals procured or otherwise acquired for use in an approved clinical research study shall be properly identified, labeled and tagged by the BNL Chemical Management System ("CMS").
- 2.4 All pharmaceuticals used in connection with an approved clinical study shall be controlled by the CRC Pharmacy, as described in Section 8.2 of this Manual.
- 2.5 Medical waste generated during a clinical research study shall be disposed of in accordance with applicable BNL policies. The BNL on-line "Standard Based Management System" (SBMS) shall be accessed to obtain the most current version of applicable regulations.
- 2.6 All spills, exposures or other incidents relating to the use or disposal of hazardous materials shall be reported to the appropriate BNL officials (as required by BNL policy described within SBMS).
- 2.7 The CRC Manager shall be responsible for ensuring that Tier 1 inspections of the CRC facilities are performed at least annually and any deficiencies found are corrected in a timely manner.
