NLSLS REVISION LOG		
Document Number:		LS-ESH-0020
Subject:		Biosafety Requirements at the NLSLS
Rev	Description	Date
A	Original Document	3/6/2000
B	<p>This document has been updated to reflect the recent changes that were made to the Biosafety in Microbiological and Biomedical Laboratories (BMBL) 5th Edition manual. These changes include the following:</p> <ul style="list-style-type: none"> • Additional detail is required on warning signs, including biosafety level, lead experimenter’s name and phone number, and required procedures for entering and exiting the area. • All gloves and any other contaminated PPE must be discarded as regulated medical waste. • The lead experimenter is responsible for ensuring that all personnel working on the experiment have the appropriate expertise and training. • All personnel working on the experiment who are susceptible to infection or women of childbearing age should be provided with information regarding immune competence and conditions that may predispose them to infection. These individuals should self-indentify so that they can receive the appropriate counseling and guidance. 	12/12/2007
