

Craig Garafola
SUNY @ STONY BROOK

I am a research assistant at SUNY @ Stony Brook affiliated with the Medical Department at Brookhaven National Laboratory. I am currently pursuing my PhD in Genetics and am studying depression from a genetic perspective. I have been at the Lab for a several years and have been participating with ASAP on for at least two years now. In the past year as Vice President I have been a part of replacing and upgrading some of the aging equipment. We also opened a Facebook group to further the organization's mission of facilitating networking and discovering opportunities for both professional growth and personal fulfillment while here at BNL. I would like to continue to assist ASAP in its mission to bring about an atmosphere that is more welcoming, nurturing, and exciting for the students and post-docs that visit BNL. ASAP is a great way to meet new people, network, and find out about various forms of entertainment available on the island.
