

Luozhou Li
Columbia University

I am a graduate student at Columbia University, and am spending most of my time doing research in Center for Functional Nanomaterials at BNL. I am currently pursuing my PhD in Electrical Engineering, and focus on quantum photonics.

I have been working at BNL since this February. I attended ASAP Thursday gatherings almost every week, had great time and met lots of new friends there. I love to participate various activities, and served as vice president of Columbia University Chinese Students & Scholars Association (CUCSSA) for one year. Now I would be very happy to serve BNLers as an ASAP board member and it would be my pleasure to help keeping ASAP being a relaxed and entertaining place for all students and post-docs.
