

David W. Shaffer

BROOKHAVEN NATIONAL LABORATORY

I have been working in the Chemistry Department at BNL as a Research Associate since June, 2014. Before coming to BNL I worked as a postdoctoral scholar at the University of California, Irvine and at the Joint Center for Artificial Photosynthesis at CalTech. I received my PhD from the University of California, Irvine in 2012. I did my undergraduate studies at the University of Pennsylvania.

I am interested in helping ASAP continue to be an important professional and social resource for the community of young scientists at BNL. I think that it is important to provide career guidance with activities like the panel at YRS. I would also like to help organize regular social events and encourage increased participation, maintaining a strong community to support new and continuing post-docs and students.
