

Neil Robinson

Brookhaven National Laboratory

Research Associate
Condensed Matter Theory Group
Condensed Matter Physics and Materials Science Department

In late September 2014 I started as a research associate in the Condensed Matter Physics and Material Science department at BNL. Before joining BNL, I received my D.Phil. in Theoretical Physics from the University of Oxford, UK and I was an undergraduate in Physics at the University of Exeter, UK. In my role at BNL I use both analytical and numerical techniques to study various problems in strongly correlated low-dimensional quantum systems.

Having attended the events laid on by ASAP during my time at BNL, I feel motivated to volunteer to be a board member. I'd like to be part of the effort to ensure BNL remains an interesting and entertaining place to be a student and postdoc. I'd be happy to help with organizing the Young Researcher Symposium, which I found to be full of interesting talk and a great opportunity to meet other postdocs and students shortly after arriving at BNL.
