

## **Wen Hu**

### **Brookhaven National Laboratory**

I joined BNL as a postdoc in June, 2014 and belong to the department of Photon Sciences. Be a scientist, cooperation and communication is pretty important. The postdoc life in BNL can be colorful or just simple/lonely, depending on your behavior.

As many postdocs and students here, I'm a foreigner and feel it is necessary to attend social events, know more people, make friends, seek cooperation and future career opportunity.

ASAP is such a platform, giving postdoc and students a room to know people and share information, and giving us a chance to know other people's research, which could link to a cooperation.

I attended several ASAP social events in 2014, such as summer BBQ, dinner, games, presentation skills, career development event, and YRS2014, and enjoyed a lot. Happy for obtaining a poster prize in YSR2014.

It is my belief that my experience and organization skills will directly contribute to ASAP, and be a new member of ASAP board will advance to my future career.
