

**Arbin Timilsina**

BROOKHAVEN NATIONAL LABORATORY

I am a Research Associate in the Physics department at BNL. I participate in the activities of the Electronic Detector Group (EDG) as a member of the Deep Underground Neutrino Experiment (DUNE) and Short-Baseline Near Detector (SBND). I earned a B.S. in Physics from Minnesota State University, Mankato, and a Ph.D. in Nuclear Physics from Iowa State University.

During my graduate school, I was stationed here at BNL as a member of the PHENIX collaboration, to focus on detector and data analysis work. During my 5+ years here at the lab, I have been very fortunate to participate and get involved in various scientific and social events; I was an oral presentation committee member for Young Researcher Symposium (YRS) 2013 and a communications committee member for YRS 2014. As a member of the ASAP board, I intend to work towards strengthening ASAP's goal of bringing new and continuing students and PostDocs together in social and professional settings.
