

UED Investigation of Thin Film Melting

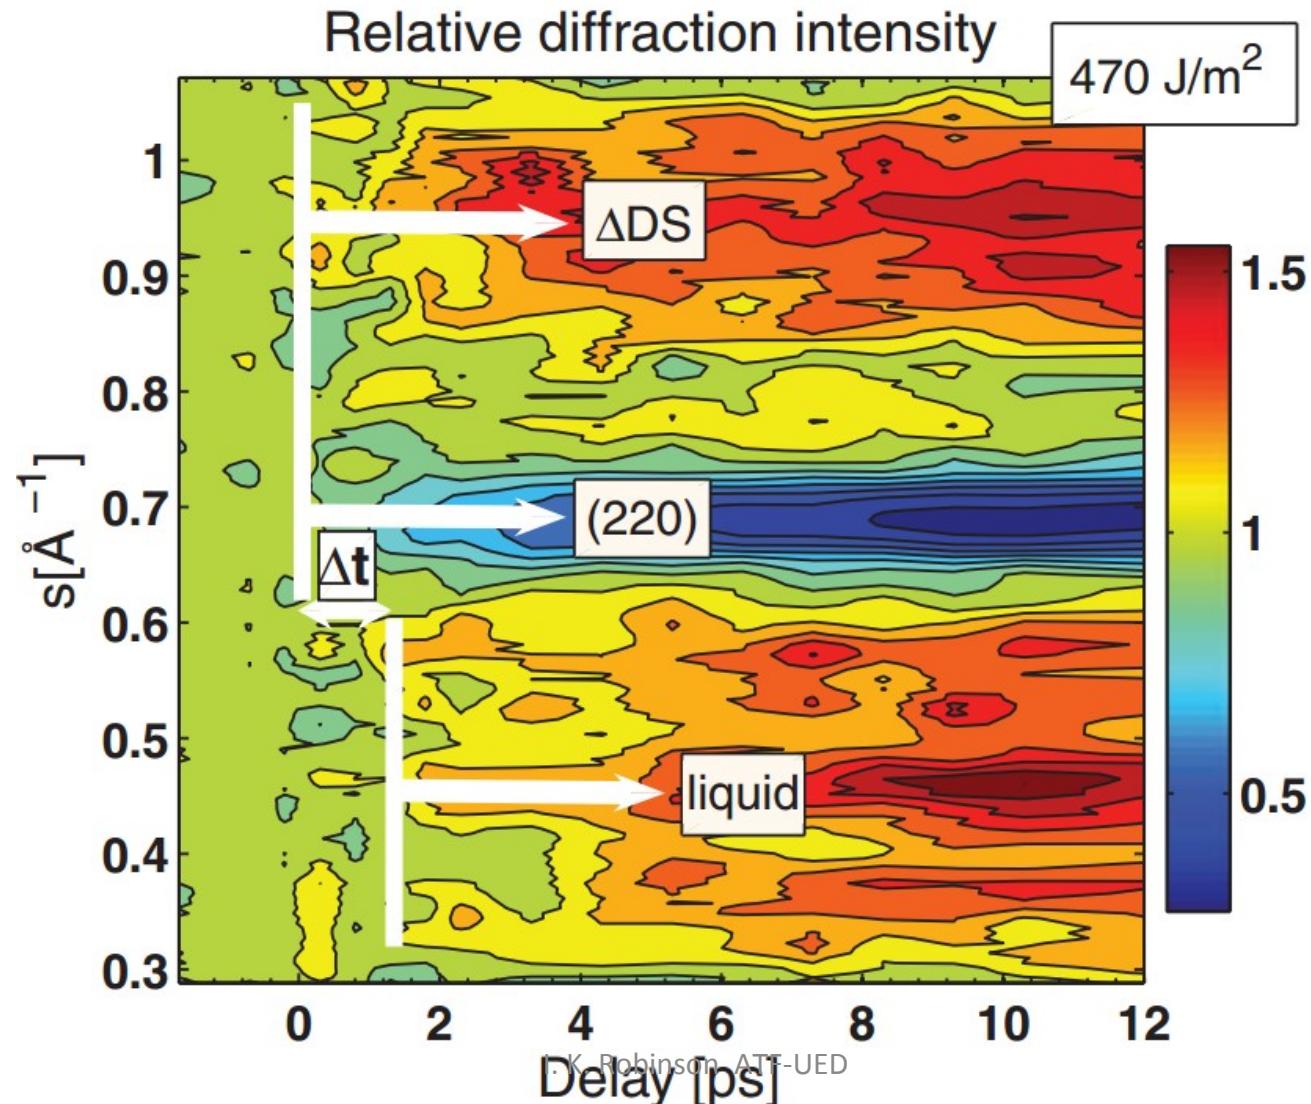

Ian Robinson
X-ray Scattering Group, CMPMSD

XFELs in Materials Science

- Pump-probe access to time scales of phase transitions
- Search for new “hidden” phases of matter
- LCLS (Stanford) already delivering, but little available time
- EU-XFEL in Hamburg will come on line in 2017
 - 3x greater capacity
 - Higher energy X-rays
- Some systems can be explored now with UED

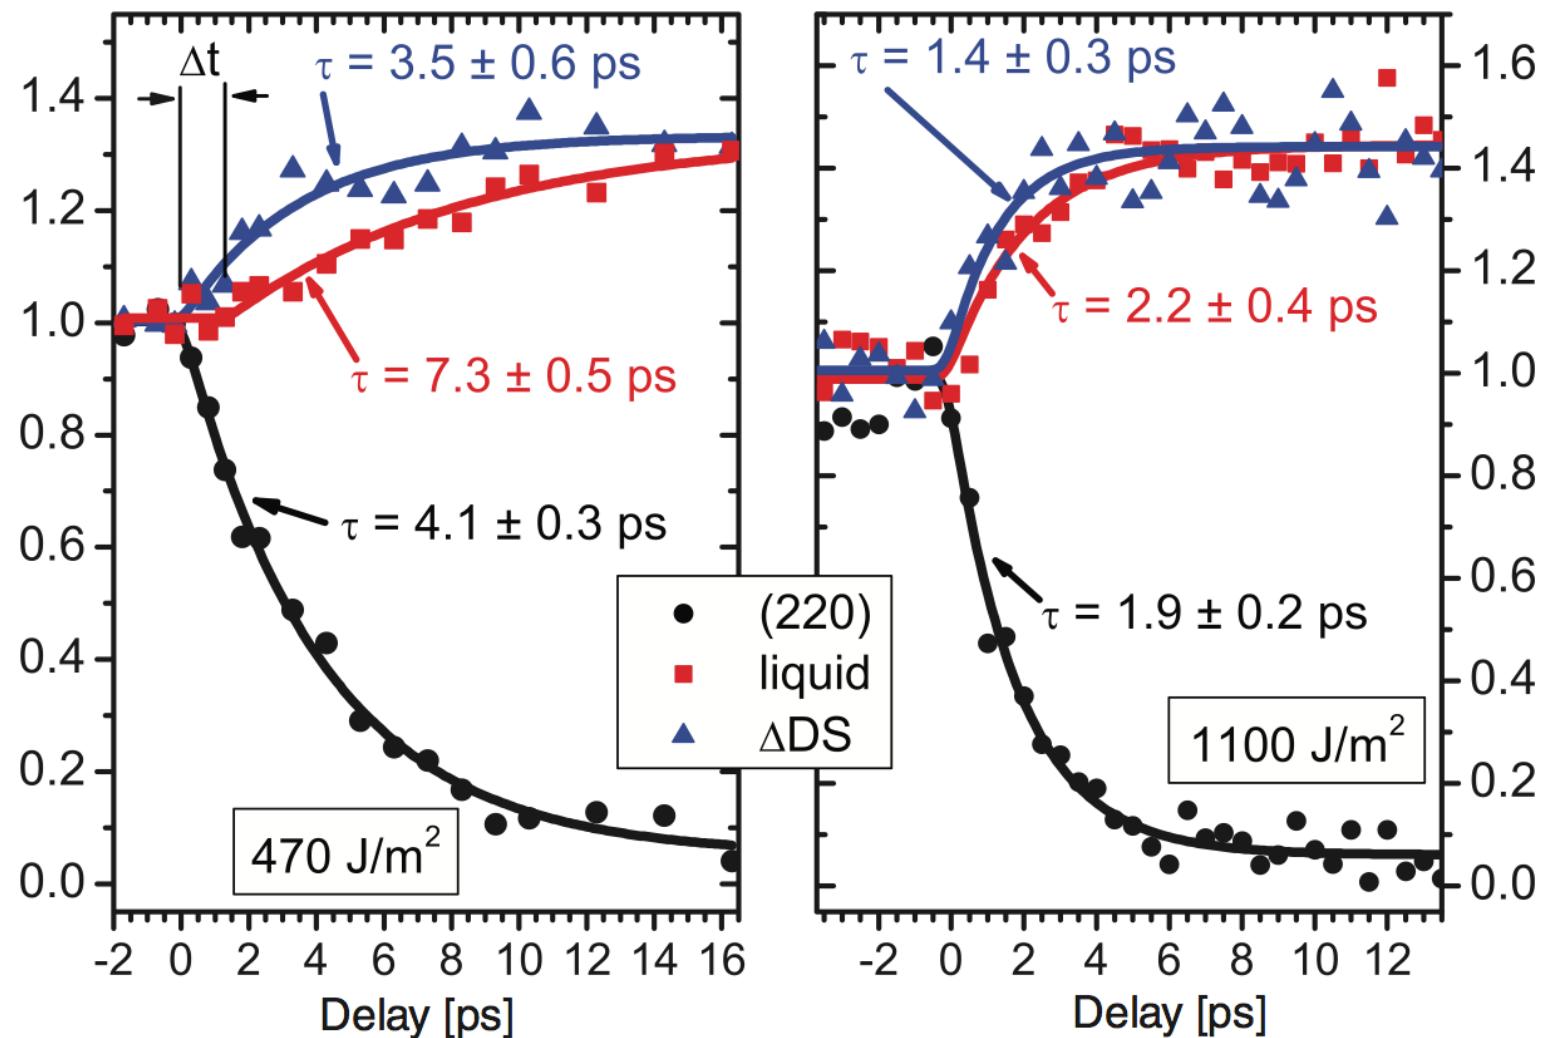

Transient Melting of Au (by UED)

R. Ernstorfer, D. Miller et al, Science 323 1033 (2009)

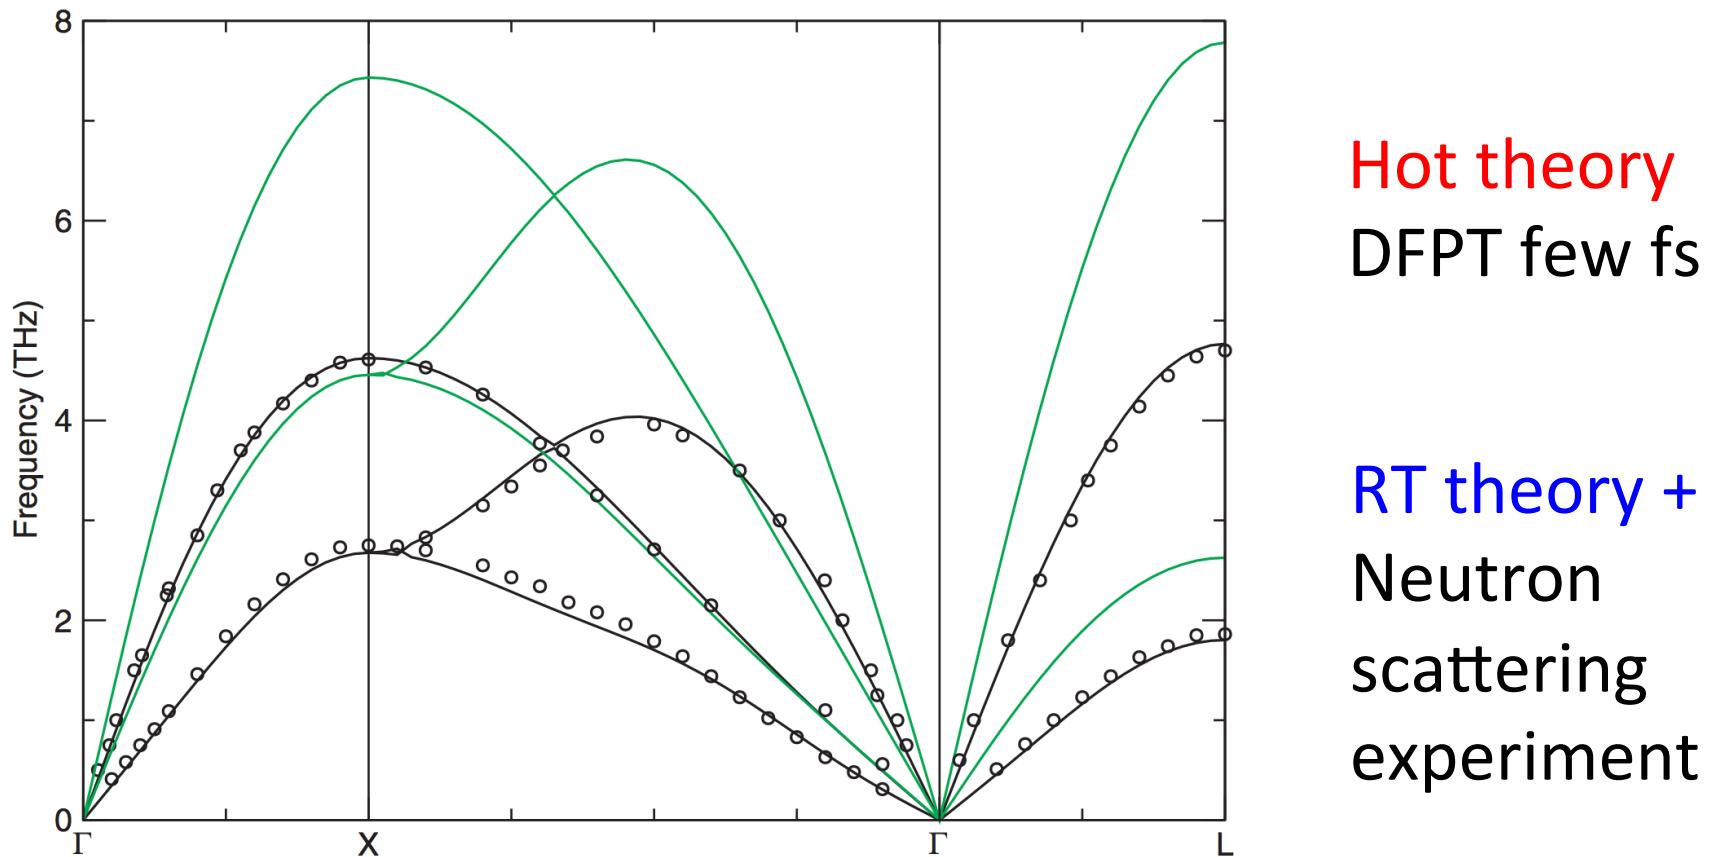

Transient Melting of Au (by UED)

R. Ernstorfer, D. Miller et al, Science 323 1033 (2009)

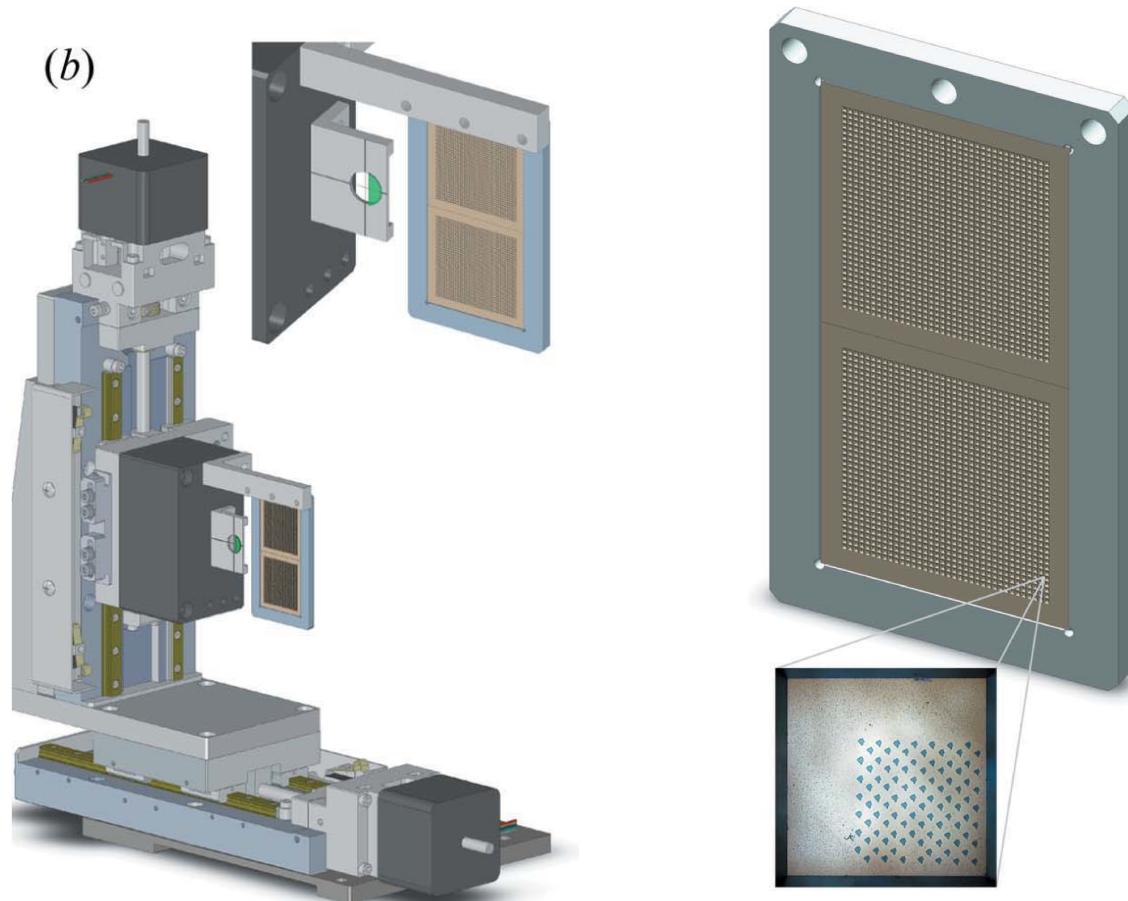

Calculated Phonon band structure of Au electron heating ($T=6\text{eV}=7\times 10^4\text{K}$)

Recoules et al PRL 96, 055503 (2006)

MAXIC chamber for SACLA

Changyong Song et al, J. Appl. Cryst. **47** 188 (2014)

Total scattering

Lars Ehm (SBU)

Experimentally observable total structure factor:

$$S(Q, \omega) = \frac{1}{2\pi h} \int G(r, t) \exp\{i(Q \cdot r - \omega t)\} dr dt$$

Total scattering → Bragg and diffuse scattering

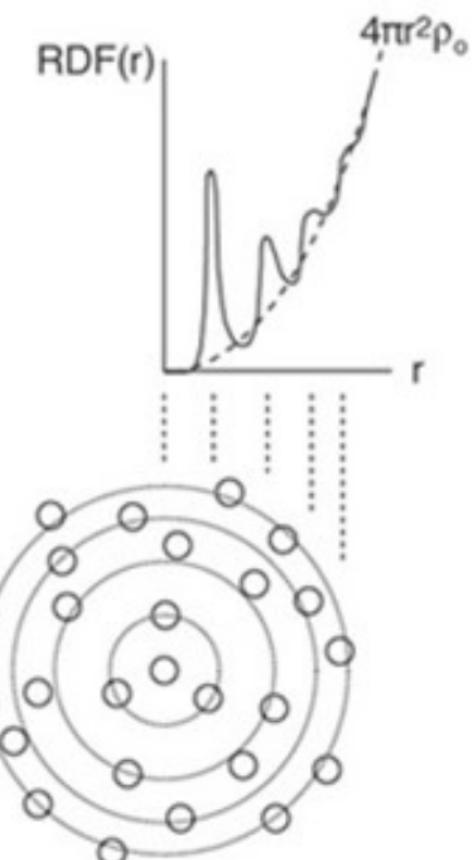

Fourier transform → Pair Distribution Function

What do we get from PDF?

- Probabilities of finding atom pairs separated by distance r
 - Short, intermediate, and long-range structure

Nanocrystalline materials

- Fit structural models
- Crystal size

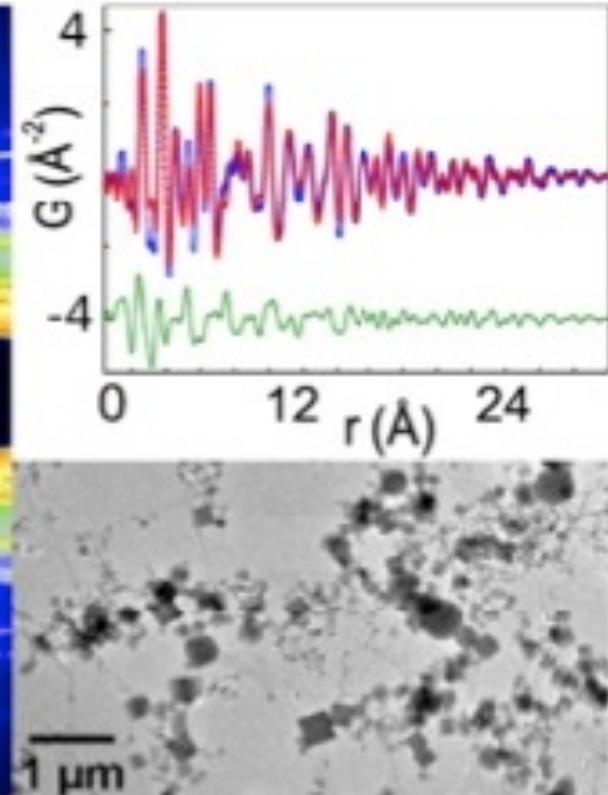

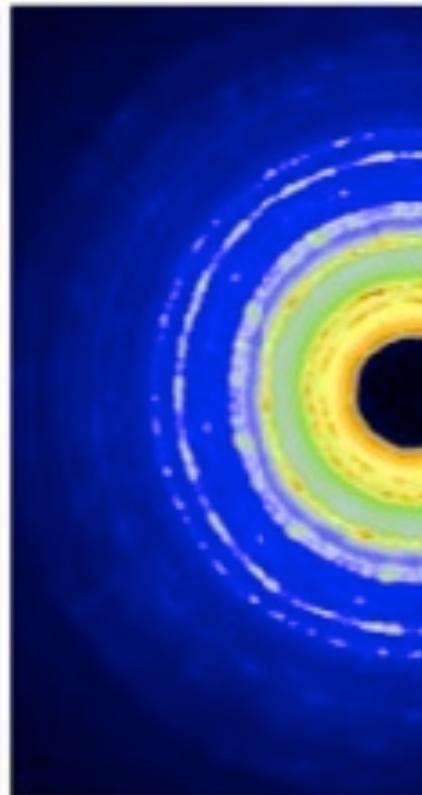

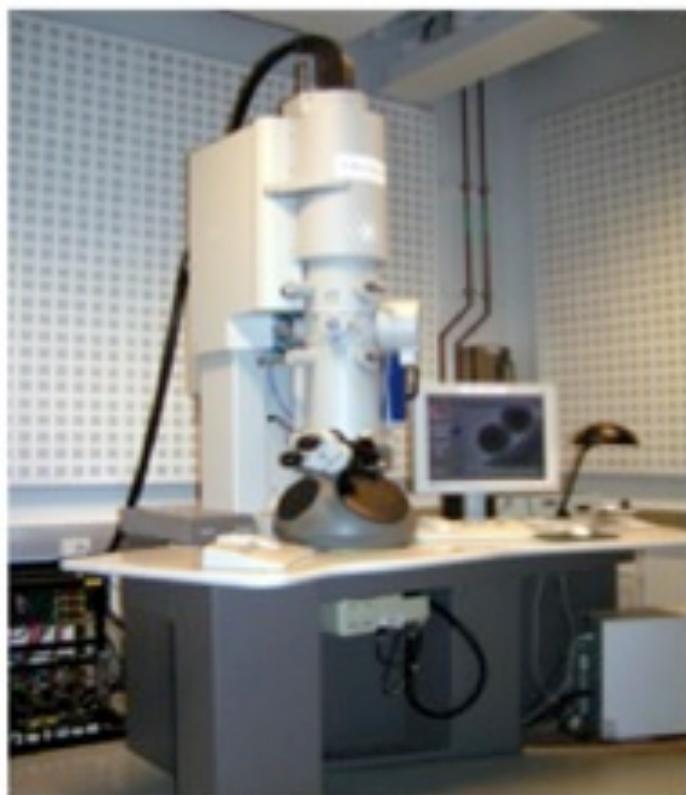

N. K. Robinson ATF-UEP

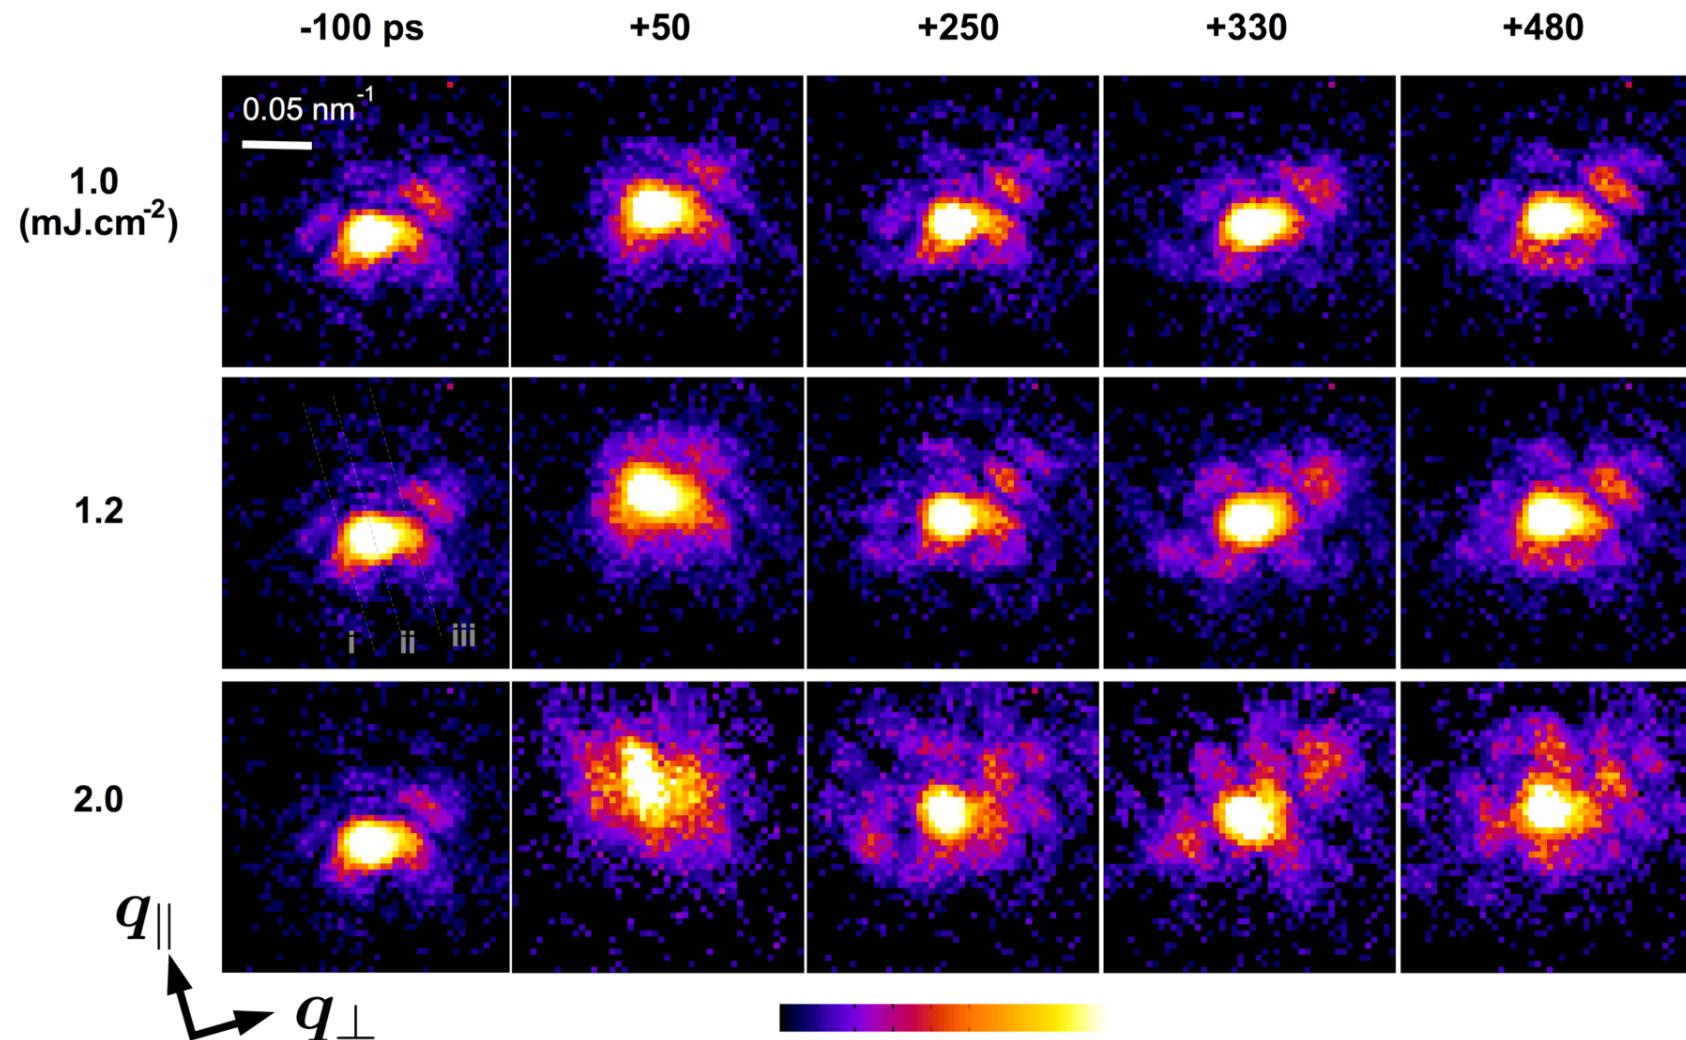

Electron Pair Distribution Function

M. Abeykoon et al, Z. Kristallogr. **227** 248 (2012)
NaCl TEM, ED and ePDF

Pump Probe Au Nanocrystal Diffraction

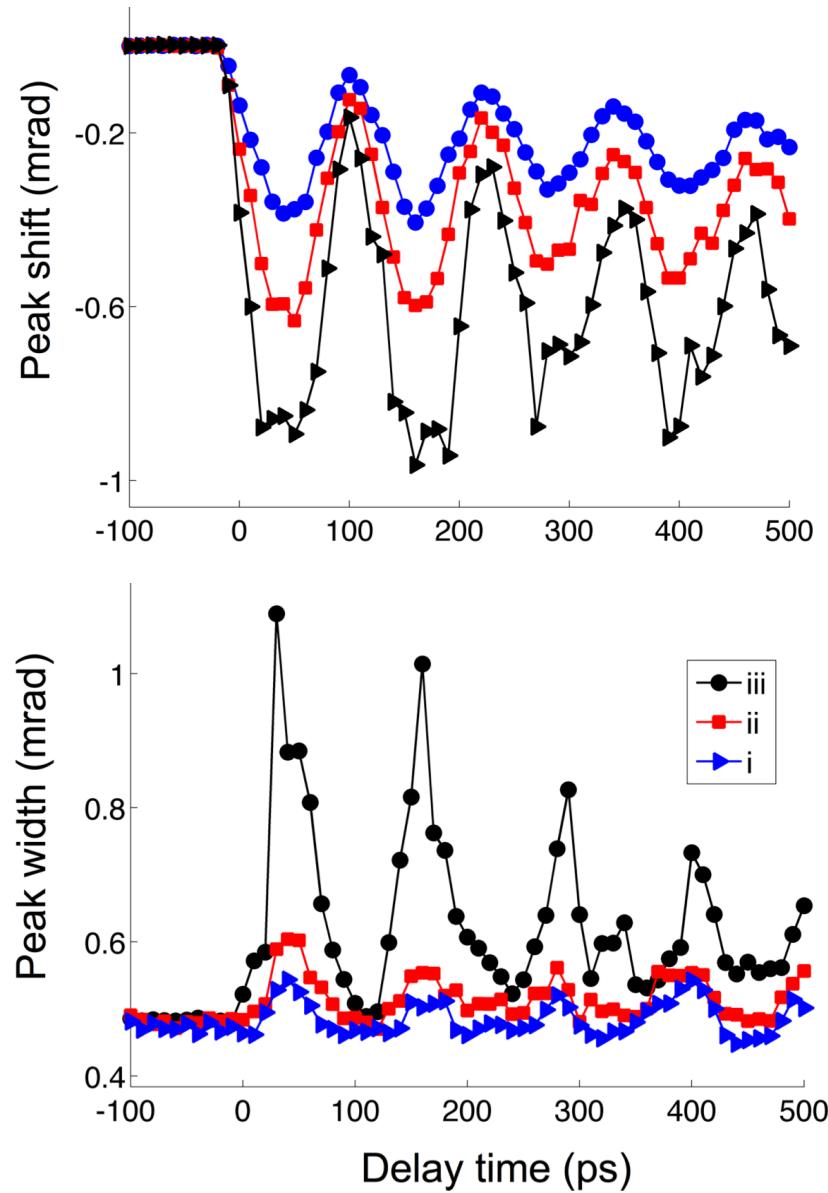

Jesse Clark et al, PNAS **112** 7444 (2015)

Dependence on Laser Fluence

Jesse Clark et al, PNAS 112
7444 (2015)

1.0 mJ cm⁻²
1.4 mJ cm⁻²
2.0 mJ cm⁻²

Dependence on Laser Fluence

Jesse Clark et al, PNAS 112 7444 (2015)
