Description from: http://colossus.net/movie-reviews/movies/f/farewell_conc.html

“Farewell My Concubine spans fifty-three years, presenting the lives of two men against the historical backdrop of a country in upheaval. Initially banned in China but shown to international acclaim, Chen Kaige's film is one of the year's true masterpieces. Deserving of its award at Cannes and of its prominent position in 1993's New York Film Festival, Farewell My Concubine is a motion picture experience that few will soon forget after leaving the theater.”
