BOWLERS CHOOSE YOUR ALLEYS —Oops, I Mean Tables

The big week is here. Decorations are part-way completed and tables will be set up by Wednesday! If your table will be decorated by the team - choose one early.

REMEMBER - Saturday, April 29, 8:30 p.m., Gymnasium. Free set-ups and bottle. Door prize, table prize and other surprises. See you there?

NOTE: Captains - don't lose those tickets!

HAVING TROUBLE FINDING A MATE

If you would like to enter the "2nd Open Bowling Tournament" on June 3rd at Port Jeff Bowl but are without the consent of a partner - call the "Match-maker" - Grace Siemen, Ext. 2164.

PRE-SEASON GAME Untouchables Still Undefeated

Last night the Untouchables defeated the (Brookhaven) world famed Metallurgy team 15 to 5.

Both teams fielded 10 men and the weather was perfect. There was exceedingly fine fielding on both teams for so early in the season and both teams were able to accomplish their first double plays of the season.

The Untouchables had a very good hitting average which included 5 hits for Guacci and 2 triples for Dioguardo. We, the Untouchables, would like to thank Metallurgy for their fine competition and sportsmanship, and we wish them the best of luck this season.

J. DIOGIUARDO

GYMNASIUM SCHEDULE

The Gymnasium will be closed for evening activities beginning Monday, April 24th, in preparation for the Bowling Dance. It will remain closed until its summer schedule begins sometime in June. Watch THE BULLETIN BOARD for further details.

PLAY BALL

Next Monday, May 2, the opening game of our Slo-Ball season will feature an inter-league affair between the long-standing Phoubars and a brand new E.O.A. team. Team entries in two leagues will play ball through the month of August. At the season's close, league winners will be matched in a play-off to determine the Laboratory Championship.

First Week's Schedule

Monday - Field No. 1, Phoubars vs. E.O.A.

Tuesday - Field No. 1, Old Timers vs. Metallurgy. Field No. 2, Untouchables vs. Potsareebies.

Wednesday - Field No. 1, Dirty Sox vs. Cosmotron. Field No. 2, Medical vs. Biology.

Thursday - Field No. 1, Gnats vs. Pop Ups. Field No. 2, Health Physics vs. Electronics.

SMALL BORE TOURNAMENT

On Site, Thursdays, 5:30 p.m.
May 4 - June 29
Entrance Fee \$1.00 - Trophies

TURN YOUR CLOCKS AHEAD

Daylight Saving Time will go into effect at 2:00 a.m. Sunday, April 30. So don't forget to turn your clocks ahead one hour before going to bed Saturday, April 29.

TABLE TENNIS TOURNAMENT

1961 Long Island Table Tennis Championships, April 28, 29. Open to all residents of Queens, Nassau, and Suffolk Counties. Application forms available at the Recreation Office. Call S. Rottenberg, Ext. 458, for further information.

TECHNICIANS WIN CHAMPIONSHIP

This year's All League Bowling Tourney turned out to be our most exciting one by far. During the 5-round competition the lead sawawed between all the clubs with 3 contenders battling down the stretch.

The Designers in their last game, with the help of Al Texiera's tremendous 8 timer 262, piled up a team total of 905 and what appeared to be a certain victory. However, the Techs and the Old Timers had other ideas, in the final game of the contest, as they rolled against each other and the Designers' leading score.

Up to the 9th frame it looked like a lost cause for both crews - then the Techs put 3 strikes on the books and entered the 10th with a glimmer of a chance. Every man marked, Hildebrand doubled, and it was up to anchorman Larsen who had to strike. Dick came through and the Technicians squeezed by the Designers by a mere 6 pins to take the championship.

HIGH GAMES - Texiera 262, Gangamella 221, Keating 213, Hildebrand 202-200, Sperry 200.

Playoff Standings

TEAM	POINTS
1. Technicians	69
2. Designers	68+42
3. Old Timers	65+26
4. Bugs	63+5
5. Twinkletoes	62+7

CLASSIFIED ADS

GROUP INSURANCE PLAN BOOKLETS

New Group Insurance Plan booklets are being mailed to the homes of all employees.

The booklet, revised April 1961, brings up to date all changes in the Insurance Plans since the last printing of the booklet in March 1959.

When you receive the new booklet, the obsolete blue booklet may be destroyed. If you have not received your copy by the end of the week, please call Personnel Services, Ext. 2107.

BNL IDENTIFICATION CARDS

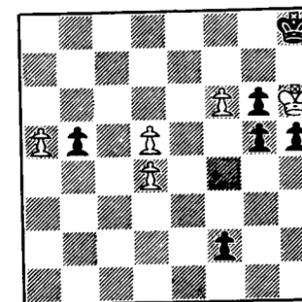

All employees are responsible for seeing that their BNL I.D. Cards are always in good condition. Please check yours. If the card is soiled, broken or cracked, or if your photograph is old or description inaccurate, please report to the Security Office for a replacement.

BNL EMPLOYEE INJURED

On April 17, an employee of the Shops Division was injured when a hand bending brake fell (cause as yet undetermined) from a work bench. It is believed that the employee attempted to catch the brake as it fell and thus pinned his left hand between the brake and the floor. Further information will be obtained after the employee's return to work.

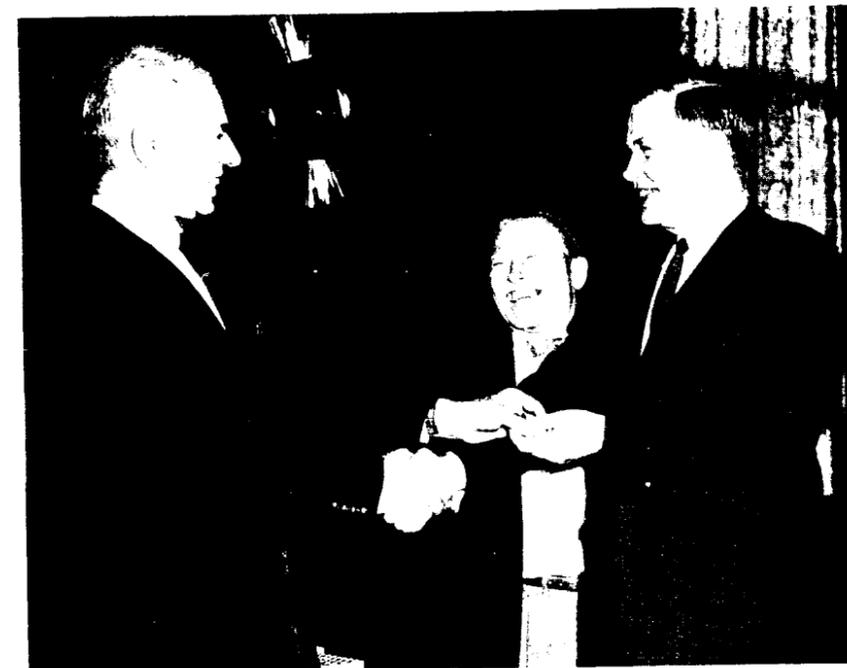

This ended our most recent no-lost-time accident record at approximately 700,000 man hours and marks the second such injury of 1961.

CHESS PROBLEM

In this week's problem, black is only one move away from queening its pawn, but white wins. Answer elsewhere in this week's BULLETIN BOARD.

TEN YEAR PINS PRESENTED

Dr. G. Tape receiving his 10 year pin from Dr. Haworth with R. Vogt of Personnel Services joining in the presentation.

Dr. Leland J. Haworth, former Director of the Laboratory, awarded ten year pins and certificates to 51 employees on Friday, April 21, at the Brookhaven Center. These employees had completed ten years of service as of December 31, 1960. Dr. Haworth expressed the appreciation of the Laboratory for their long and faithful service. In his brief talk, he mentioned that approximately 30% of Brookhaven employees have worked at the Laboratory ten years or more.

Dr. Haworth, who returned to BNL to attend a meeting of the Board of Trustees of AUI, took this opportunity to make the ten year pin presentation. He has recently taken up his duties as a member of the Atomic Energy Commission.

BROOKHAVEN DIVERS CLUB TO MEET

The next meeting of the Brookhaven Divers Club will be held on Monday, May 1, at 7:30 p.m. at the Pool. A club dive will be planned for the following week. All interested divers are urged to attend.

If you have been thinking of joining the Club but have not yet done so, why not come down, join the meeting, and take a swim? The pool will be open to all members and guests following the business meeting.

ILLUSTRATION (NOT GUARANTEED)

The amount of your TIAA retirement income will depend on the amount of premiums paid each year, your age at retirement, the income option you select, dividends declared by TIAA, and other factors. Although it is not possible to foresee changes in these factors and their effect on your TIAA annuity, the following illustration may be helpful in planning for your retirement years:

Your TIAA annuity income would be \$ 3241.00 per year...

IF the amount of periodic premiums paid during 1960 is paid in each year thereafter until your annuity income begins . . .

and

IF your annuity income begins at the age shown in item 3 and you elect the Single Life Annuity option, which pays the largest income to you but provides no income for a surviving beneficiary . . .

and

IF TIAA's current Minimum Rates and its 1961 dividend scale are neither increased nor decreased.

At this time every year, each participant in the A.U.I. Retirement Plan receives a Report of Premiums and Benefits from Teachers Insurance and Annuity Association (TIAA), the company which administers our plan.

The report (a blue slip) shows the status of your accumulation in TIAA only. If you have elected to participate in the College Retirement Equities Fund (CREF), the variable annuity, you will receive from them at a later date another report showing your additional accumulation in that plan.

Because we feel that the TIAA report is very important to everyone, we have reproduced above a report similar to the one received recently by each participant. In the reproduction shown, we have illustrated the approximate status of an employee, now about forty years of age, with an annual salary in the area of \$6000. Participation in the plan started shortly after its inception in 1948, with all premiums applied to TIAA only.

For ease of understanding place your TIAA report on top of the above illustration and refer to the item numbers. After reviewing your own report, if you have any questions about it or the plan, call R.L. Vogt, Personnel Services, Extension 2107.

Illustration: This figure shown on the stub at the right (\$3241.00) is an additional calculation started with this year's report. Please note that it is based on the three assumptions described on the stub. In addition, another important factor in this calculation is the age of the individual as of December 31, 1960, which, of course, determines the number of years of participation remaining until retirement age 65. The younger of two employees having the same salary will have a larger projected retirement income.

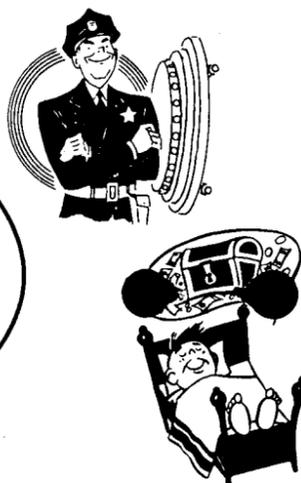

Item No. 1: Contract No. A 70000: Each employee participating in the plan has received a TIAA contract. The number shown in this column on your report should correspond with the number on your contract.

Item No. 3: The Age Your Annuity is Scheduled to Begin: Normal retirement age at the Laboratory for all employees is sixty-five (65), as shown in this column.

Item No. 2: The Sum of All Premiums Paid in 1960: During the calendar year 1960 this employee contributed \$291.36 into the TIAA fund, and the Laboratory contributed \$479.67, or a total sum of \$771.03, as shown in that column.

Item No. 4: The Annual Single Life Annuity Already Purchased at the End of 1960: This is the amount (\$814.32) the employee would receive annually as a single life annuity, beginning at age sixty-five, if he had left the Laboratory as of December 31, 1960. Of course, all premiums paid into the TIAA fund from December 31, 1960 until age sixty-five will increase the amount shown.

Item No. 5: The Value of the Death Benefit at the End of 1960: The amount in this column (\$6491.17) is actually the total accumulation in the TIAA fund since the employee started participation through December 31, 1960.

The amount shown in column No. 5 is stated as the Death Benefit, because if an employee dies before retirement, this accumulation is like a paid-up insurance policy, and the beneficiary receives not only the amount the employee has contributed, but also the Laboratory's entire contribution, plus interest and dividends.
