Seven BNL Employees to Retire

Seven employees with a total of 111 years of service to BNL are retiring this Friday.

Burton C. Greenough, a crane operator with Plant Maintenance, who started at the Lab in 1947, sums up the feelings of the group with this poem:

... When I retire I'll stay up
and watch the Late Late Show,
and sleep the morning through.
Forget about the old alarm clock
for that's gonna retire too!

Burt is going to fly to Nova Scotia to visit relatives before settling down in Oakdale with his daughter.

Carl R. Glover (left above) a shift supervisor in the cyclotron, will live in Center Moriches and spend more time with his hobby of amateur radio operation.

Henry Hage (center) a general instrument machinist, will first go to Florida with his wife, and then return to his home in Port Jefferson where he will fish with homemade lures.

Julius Ulreich (right) Electronic Technician on fast choppers, will head for California on a three-month trip before looking for a job to keep him busy while he is not fishing.

Thomas Honnett (below left) experimental machinist, will go on a long camping trip, perhaps to California, and then return to Bellport and "just relax."

John M. Roecklein (center) electronics technician at the Van de Graaff, has no plans except to keep active. His "about 20 grandchildren" will probably assure this.

Frank Fournery (right) stock room supervisor at Biology, will spend winters in Florida and summers in Patchogue. He plans to fish at both places as often as possible.

Evacuation Drills In Residence Halls

Evacuation drills in BNL's Residence Halls will be conducted Thursday evening, June 29 and July 6. Evacuation of the Women's Residence, Buildings 258 and 259, will be conducted at 7:00 p.m. June 29, followed the same evening at 7:30 p.m. by the Woods Road Men's Residence, Building 170. On July 6, drills will be conducted at 7:00 p.m. in the Upton Road Men's Residence, Building 153, and at 7:30 p.m. in the Bell Avenue Residence, Buildings 176 and 180.

The standard BNL Evacuation signal is intermittent ringing of the building evacuation bells. In some cases, the intermittent ringing may be preceded by a steady ringing warning signal.

An evacuation drill in the 20 Upton Road Dormitory, Buildings 475N and 475S, is being postponed until modifica-

tions in the evacuation signals are completed.

In addition to a practice evacuation of the Residence Halls by the occupants, BNL's Fire and Police Group will participate in some of the drills to practice response, and emergency search and rescue procedures.

More detailed information will be distributed to each Residence Hall the day of the drill.

In the event of inclement weather, the drills will be postponed to a future date.

Post Office Hours . . .

The United States Post Office at Upton, N.Y. will be open from 8:15 a.m. to 2:45 p.m. on July 3, 1967. On July 4, the Post Office will be closed all day.

BNL Benefits Program (No. 2 in a Series)

Tuition Benefits . . . Further Increase Starts July 1

Did you know that for the past 12 years the Laboratory has had a tuition refund policy for employees who successfully complete approved and accredited college courses?

Have you ever said to yourself that you would like to go on and take some college courses, and perhaps obtain a degree, but somehow never got around to it because of commitments to your family, the military, or other reasons? Then read on, because this article is especially for you.

In this, the second in a series of *Bulletin Board* articles on the BNL benefits program, we want to call your attention to the generous educational benefits provided by the Laboratory to you.

For courses taken after July 1, 1967, BNL's tuition refund will go from 50% to 75% for courses taken with or without the intention of obtaining a bachelor's degree. Upon receipt of a baccalaureate degree after July 1, 1967, an employee will be reimbursed for the 25% difference between the previously reimbursed 75% and 100% of tuition costs. This reimbursement will be made only for courses required for the degree and taken after July 1, 1967, and taken within five years of the receipt of the degree.

For employees holding a baccalaureate degree and taking graduate level courses, the tuition refund will go from 50% to 100%.

The reimbursable costs referred to in this case represent out-of-pocket tuition expenses paid by the employee.

The 75% refund for undergraduate study will be made immediately after satisfactory completion of the course. The additional 25% will be refunded in a lump sum after the individual has been awarded a degree.

All courses must be taken at an accredited school, and must be related to the work the employee is performing, or expected to perform, at the Laboratory, or must lead to a degree in any field of study pertinent to the work of the Laboratory.

In addition, the Laboratory has appointed a committee to review correspondence courses from accredited institutions to qualify them for tuition refund benefits.

Before seeking a tuition refund, discuss the contemplated course with your supervisor and obtain his approval. Then contact the Personnel Office for the standard Tuition Refund application. Complete the application, have it signed by your supervisor, and be sure to return it to the Personnel Office at least two weeks before enrollment for review and approval.

If you have any questions, or simply desire more information about the various approved schools in the Long Island and New York City areas, contact the Personnel Office where course catalogs and other information is available.

(continued on page 2)

Vineyard Replaces Williams as Lab Deputy Director

Dr. George H. Vineyard will assume the post of Deputy Director of BNL on July 1, 1967. He replaces Clarke Williams who will retire on June 30, to become Research Administrator of the Marine Resources Council of the Nassau-Suffolk Regional Planning Board.

The first deputy director of Brookhaven was Gerald F. Tape, who was appointed to the post in October of 1951, and served until 1962, when he was appointed vice-president, and then president of AUI. In 1963, he was appointed a Commissioner of the AEC, the post which he holds today.

Clarke Williams, who headed the Nuclear Engineering Department when it was formed in 1952, replaced Tape as deputy director in March of 1962, and remained in that post until his retirement.

George Vineyard was born in St. Joseph, Missouri, and did his undergraduate and graduate work at the Massachusetts Institute of Technology, where he received his Ph.D in physics in 1943. After three years at the MIT Radiation Lab, he joined the faculty of the University of Missouri as Assistant Professor of Physics in 1947.

Dr. Vineyard joined the staff of BNL as a Physicist in 1954, and became Chairman of the Physics Department in 1961. In 1966 he was appointed Associate Director.

Vineyard is a Fellow of the American Physical Society, and a member of the society of Sigma Xi. He was a member of the Board of Associate Editors of the *American Journal of Physics*, and the *Physical Review*. His researches have included the application of neutrons to solid state physics, radiation effects in solids, and structural imperfections in solids.

Dr. Vineyard lives in Bellport with his wife Phyllis, and their two children, John, 19, a junior in Oberlin, and Barbara, 15, who attends Bellport High School.

Have You Noticed? . . .

"Urban Blight" in the downtown area of BNL is on the way out with the start of the removal of the utility poles along Brookhaven Avenue.

The new look is also being extended to the service road in between the Gym and the Administration Building. A new exit from the Theatre-Cafeteria parking lot has been constructed, and the entire roadway has been re-surfaced. Hopefully the lake that forms after each rainstorm in back of the Exhibit Hall will be eliminated.

Tuition — (continued)
Scholarship Benefits

In addition to the tuition refund benefits, there are a number of scholarships awarded annually, both to employees directly and to graduating high school seniors who are sons or daughters of BNL employees, including those who have retired.

Both last year and this year, two AEC Technician Scholarships were awarded to BNL technicians. These scholarships, which are financed by the Laboratory, enable the employees to attend the school of their choice full-time until they receive their degree. While at school, the employees continue to receive their salary from BNL, have all of their tuition and fees paid, and retain all of the fringe benefits of BNL for themselves and their families.

Barring a last minute snafu on the printing press or in transportation to BNL, a new "Insurance Highlights" booklet from Connecticut General will be available for mailing to every employee's home sometime next week. This six-page gate-fold booklet replaces the blue book from Connecticut General you now have, but does not replace the light green booklet with the word Certificate on the cover. Be sure to keep this CERTIFICATE.

Last year's winners were Richard Isler who is majoring in mathematics at the University of Illinois, and George Meinken who is majoring in chemistry at Rensselaer Polytechnic Institute. This year's winners were Norwood Greenlaw who plans to obtain an engineering degree from C.W. Post College, and Dean Easler who plans to obtain an electrical engineering degree from the University of Illinois.

On April 17, 1967, ten Associated Universities, Inc. (AUI) scholarships were awarded to high school seniors who are children of regular BNL employees. Scholarship winners who maintain proficiency in their studies and otherwise meet the annual requirements will receive the \$900 for each year of normal college attendance until a bachelor's degree is earned.

The AUI scholarship program was started three years ago, and to date 30 scholarships have been awarded.

The educational benefits discussed above cost the Laboratory in fiscal year 1967 (July 1, 1966-June 30, 1967) an amount in excess of \$75,000.

Q & A . . .

Last week we announced the start of a question and answer column, which we hope to make a regular feature of the *Bulletin Board*. The original intent was to restrict the questions to BNL's benefits program. However, because of the variety of questions received, the column will be opened to any questions posed by the readers. If the question does not involve an answer considered to be personally or officially confidential (e.g. - we cannot tell you someone's salary) we will make every effort to answer promptly. So let's have those questions - send them to the *Bulletin Board*, 40 Brookhaven Avenue.

The questions and answers received since last week's issue are as follows:

Q. What is the new option for workers retiring at 62 as stated by the Laboratory in *Newsday*, Friday, April 14, 1967, page 9? So far the Laboratory has not announced the new plan. Perhaps you could clear this matter up with an article in the *Bulletin*.

A. Wow! This first question is a dandy. The option referred to in the question is a

Looking for a Handout?

Barbara Fitzgerald, AEC, is brave enough to get close to a Cecropia Moth that took up residence in the office of Charles Yax, Director of Finance and Administration.

Cole to Chair Advisory Group

Lab Director Maurice Goldhaber has appointed Isaac Cole of the Physics Department to be chairman of an Equal Opportunity Advisory Committee.

The committee will advise the Director on recruitment, training and placement, and it will help him evaluate implementation of the Laboratory's policy on equality of opportunity.

Other members appointed to the committee are: Harold Avent, George Bryant, Walter Milian, Mildred Pavelec, and Louis Remsberg. Suggestions concerning the Committee's problems should be given to any of the above or to J.S. Washburne, Personnel Manager, or Dr. R.C. Anderson, Assistant Director for Scientific Personnel.

Coming Event . . .

Showstoppers '67 will be held at the Brookhaven Center, July 26, 27, & 28, 1967. Cabaret style, admission free.

Yankees vs. N.Y. Mets

Four box seats left for Wednesday, July 12th Mayor's Trophy Game. Tickets available at Recreation Office.

new one that permits an employee to retire before age 65, have a stable income throughout retirement, and still get maximum social security benefits. This is done by arranging for higher payments from TIAA in the period before age 65 and deferring social security benefits until later. At age 65, when social security payments are highest, the employee's TIAA income is reduced by the amount of his social security benefits, thus providing a stable income from the first day of retirement. Obviously this is not a detailed explanation and we could easily use the entire *Bulletin Board* to explain all of the possibilities. We strongly urge that anyone interested in a complete and detailed answer contact Personnel Services.

Q. In case I die before I retire will my widow get any benefits from my retirement plan?

A. Yes, not only your widow, but any beneficiary you name. For example, there is an option that provides a lump sum payment, which is equivalent to having another insurance policy. This and other options will be included in a forthcoming retiree benefits article in the *Bulletin Board*.

Summer Driving Tips .

With vacation time approaching, and more people heading for the thruways and the expressways, this is a good time to review some of the emergency procedures that might be encountered.

Before discussing specific emergencies, there is one basic rule that applies to all situations - think before you act. Often, an instinctive reaction, such as slamming on your brakes while skidding, may be the wrong reaction. And to protect yourself from injury: (1) **always use your seat belts**; (2) keep your car doors locked to help keep them shut; and (3) keep your dashboard and rear shelf free of sharp or heavy objects that may turn into flying missiles in a crash.

Blowouts and Slowouts - A blowout is a sudden collapse of a tire. It generally occurs with tube-type tires when the inner tube explodes. A slowout, which generally occurs with tubeless tires, is a rapid loss of air. In either case, the sudden collapse of the tire throws the vehicle off-balance. To regain control, hold tightly to the steering wheel, steer straight ahead and ease up on the accelerator. Do not brake because this will upset the balance of the vehicle.

You may receive warning of an impending blowout or slowout by a thumping sound caused by a bulge in the tire. Or, if the tire is losing air rapidly, it will pull the car sideways. Under-inflation is one of the most common reasons for blowouts and slowouts. An under-inflated tire loses its shape, and the excessive flexing of the loose rubber creates a rapid heat expansion of the air. Under-inflation also breaks and weakens the tire structure. To prevent tire breakdown, check your air pressure frequently. When traveling with heavy loads, or for long distances at high speeds, increase the air pressure in all tires by four pounds to help the tires keep their designed shape. Check the pressure when the tires are cool.

Running Off the Pavement - If your wheels drift onto the shoulder of the road, don't try to swerve back onto the pavement or you might throw your car off balance. Instead, stay on the shoulder and ease up on the gas. After you've slowed down, turn gently back onto the pavement.

Breakdown on an Expressway Pavement - If your vehicle breaks down on an expressway and it is not possible to get it off the pavement - for example on a bridge overpass - turn on your emergency warning lights or directional signals, have all occupants leave the vehicle, and walk back along the highway toward oncoming traffic. In this way you can warn approaching drivers and, if your vehicle is struck, you will not be hit by flying debris or a runaway vehicle. However, if you have a flat tire on a section of the expressway where there is no shoulder or exit, drive on the flat until you reach a place where you can get the car off the pavement. You can drive for several miles on the flat tire. This probably will ruin the tire, but you will be preventing a possible tragic accident.

Fire - If white smoke begins to come from under the hood, the liquid in your cooling system probably is boiling. Pull to the side of the road and turn off your engine. Overheating in slow-moving traffic can be avoided by shifting into neutral and racing your engine during pauses. This will speed up the fan and the circulating water pump.

Windshield Wiper Failure - If your wipers suddenly fail in a blinding rain, slow down, roll down your side window, and put your head out so that you can see ahead of you. Then move your car off the highway.

Letters To The Editor

Dear Sir:

We were very delighted at the showing of your movie, "Brookhaven Spectrum." This movie is very informative, giving the general outline and main jobs at the Lab. It explains each job and its purpose very clearly, so most people could at least follow what was happening. The second point about the movie is that it is very interesting to see what goes on in the Lab. What made it interesting is that it didn't get too technical, therefore it is not boring. The third notable fact about the film is that it relates different techniques used in the peaceful control of the atom. The film also shows that it would be very interesting, along with a great opportunity, to work at the Lab. We also think that "Brookhaven Spectrum" should be shown elsewhere, so that other people may have an understanding of Brookhaven National Laboratory.

William Hutchinson and Biology Students
James Wilson Young High School, Bayport

Dear Editor:

Now that the "Roar of the . . ." has calmed down how about making nominations for the next BNL production? Some of mine would be Pat Towey as Momma Rose in "Gypsy" with Pat Zimmerman in the title role and Tony Nappi as "Ponti" in "How to Succeed in Business Without Really Trying."

—Phil Davis

Dear Sir:

My husband is a great guy, but he talks funny. I wonder if any of the other wives have the same problem.

It took me a long time to realize that when my husband talks about a "hardware man," it is not a salesman of nuts and bolts. Now I know HE is talking about a fellow who designs computer and data processing equipment.

When he talks about "software" I used to think it was linens, towels and such. He's really talking about the instructions that make a computer do what is wanted.

When he talks about a "model," he doesn't mean me in a swimsuit (not even when my waist was a little more trim). He means a string of digits which can make a computer think it's a nuclear reactor or a mixture of radioisotopes.

What can we wives do about this?

Specialist: He knows more and more about less and less until he knows everything about nothing.

Jack of All Trades: Knows less and less about more and more until he knows nothing about everything.

Expert: Carefully avoids all small errors as he sweeps towards the grand fallacy.

FUN and FACTS

About Bowling..... by Dick Ericson

The Hook: A thing which pops loose in proliferation when body English is extreme. Best idea is to use other type fastener, and twist to your heart's content. It's part of the fun.

The Hook: A hook is more effective than a straight ball in accomplishing a perfect hit, which occurs when the ball comes in at the perfect angle. With the hook ball a deflection action is imparted to the pins. Rather than going straight back standing erect, the pins go down at an angle giving what we call a blocking effect. One pin can carry three or four others. A hook is recommended.

Bowling Clinic and Exhibition at Port

A gala bowling exhibition and clinic will be held at the Port Jeff Bowl on Saturday, July 22 from 2 to 5 p.m.

This bowling party will feature Andy Varipapa with his dazzling bag of trick shots. As an extra added attraction, Bill Bunetta, of AMF's Staff of Champions and member of PBA, will put on a "score high" bowling clinic. Bunetta is one of the best bowling instructors in America and his clinic is guaranteed to help beginners and high scorers alike. And to top it all, there will be an hour of free bowling for everyone who attends.

The "Score High" Bowling Party is open exclusively to employees of BNL, and each employee is welcome to bring one guest (wife, husband, friend). There will be a registration fee of \$.50 for each person attending, (just to know how many will be attending) and this fee will be distributed in the form of various door prizes.

Deadline date - July 14 - Sign up now at the Recreation Office.

Schedule

- 2:00 p.m. to 3:00 p.m. - Free bowling for all
- 3:00 p.m. to 4:15 p.m. - Bill Bunetta Bowling Clinic
- 4:15 p.m. to 5:00 p.m. - Andy Varipapa exhibition

Tickets Available Personnel Services

Discount Tickets: Tickets may be purchased at 20% discount. (No discount for Saturday night performances.) Schedules and prices are posted in the Recreation Office.

Mineola Theatre: Now through July 2 Menasha Skulnik in "Jacobowsky & The Colonel"; July 11-16, June Havoc in "A Delicate Balance."

Westbury Music Fair: Now through June 25 John Raitt in "On a Clear Day You Can See Forever"; June 27- July 2 Tony Tanner in "Half a Sixpence."

Exchange Coupons: L.I. Fair at Roosevelt Raceway June 30 to July 9.

Eugene O'Neill Theatre: Now through June 29, "The Odd Couple."

Yankee Stadium: N.Y. Generals Soccer July 1, 4, 9. N.Y. Skyliners Soccer June 27, July 2, 8. Yankee and Met Box Seat Baseball Tickets on sale at the Recreation Office.

Yankee games: June 24, 25; July 13, 14, 16, 17.

Met games: June 26, 28, 29, 30, July 2, 4, 5, 7.

Tennis Tourney Set First Round Play Begins July Tenth

The 1967 BNL Tennis Tournament is scheduled to get under way in early July. Entries are being accepted for Men's and Ladies' Singles, Men's Doubles and Mixed Doubles.

Simple elimination (one loss and out) will be held in each event, provided there are enough entries. Participants will play one match each week, with the date, time and courts to be mutually agreed upon by the opponents.

Tournament play will begin the week of July 10.

The deadline for entries is July 6. A fee of fifty cents per person for each event entered must accompany the registration.

Register at the Recreation Office in the Gym.

BNL Rifle Club . . .

In a no holds barred rifle match to decide the league championship, the BNL nimrods' high calibre performance under pressure proved to be too much for the Sperry team. Shooting shorthanded and at their competitor's range, BNL overwhelmed Sperry with a 756-737 score.

Sperry, shooting ten men as against BNL's seven, started off in their usual rugged competitive style both on and off the range. However, by the end of the second relay, it became obvious that BNL was going to compile their highest score in 4 years of shooting and take their third Long Island Industrial League title in succession.

The team, composed of team captain Peter Colombo, with Roy Domish, Pete Fallon, Tony Finocchio, Ed Hart, John Jacobs, Al Lukas, Bob Medina, and Jack Walker will be presented with a myriad of trophies at a league dinner to be held at the Holiday Manor in Bethpage.

BERA Film Series

Thursday, July 6, - 8:00 p.m.

Lecture Hall

High Infidelity

A thoroughly delightful quartet of stories exploring four aspects of marriage and infidelity.

In **The Scandal**, a husband is annoyed by the attentions and supposed designs of a young man to his wife; the real reasons for the attachment come as a surprise.

Sin in the Afternoon, probably the funniest of the group, has Charles Aznavour in a madcap and protracted attempt at seduction of Claire Bloom with an unexpected ending.

Monica Vitti's portrayal of a jealous wife in **The Victim** is a tour de force for this talented actress, especially in the sequences with Jean-Pierre Cassel as the understanding (and lecherous) friend.

Modern People has a hard-working cheese-maker, Ugo Tognazzi, with a passion for gambling who loses everything in a baccaret game. The winner offers to cancel the debt in exchange for one night with the loser's wife. Tognazzi must then convince his wife to go along with the agreement.

While not exactly made for children, this film is hardly a corrupting influence; rather, it is a witty and sharp comment on human nature. —Harvard Lyman

Fish Tales

by John Tagliavia

If "Ziggy" Clausen ever asks you if he should throw back your five pound striper simply because you have been catching eight and ten pounders, for an hour, do not jokingly say yes and turn your back as Pete Delmonte did. It took Joe Damm three hours to stop laughing over that one and four hours before Pete would speak to Ziggy again.

The late spring "Bluefish Bonanza" never materialized as predicted. There has been, however, a thin trickle of fish feeding southwest of Robins Island, in the "Cows Neck" area. Catches have also been reported in the Long Beach area and in and around Sag Harbor. The "Cherry Grove" area west of Gardiners Island has been a real disappointment. However, if "Captain Cooch" is right, the fast rising temperature of Gardiners Bay may still spark a bit of the action that was commonplace in previous years.

According to Frank Langdon, Bill Kisel-yak, and Kurt Jellet, blowfish as well as bluefish have been absent from the spring scene. If there is a decline in the blowfish population this summer, lures that are predominantly orange in color may not be popular with the bass and blues. This however is not a prediction. I still have not gotten my foot out of my mouth.

The latest rumor is that Doctor Love of Medical is wistfully thinking of switching to monofilament sutures. That's probably as close as he will get to his fishing tackle all summer.

Friedlander Elected Theatre Group Head

At its general meeting on June 22nd, members of the BERA Theatre Group elected officers for the 1967-68 season. Those elected were:

- President - Gerhart Friedlander
- Vice President - J. Anthony Nardi
- Secretary - Pat Zimmerman
- Chairman of the Advisory Committee - Anna Passell
- Chairman of the Program Committee - Jerry Friedman
- Co-Chairmen of the House Committee - Carol and Dick Roberts

At this time the Theatre Group would like to congratulate the newly-elected officers and offer thanks to the officers who served so well during the past year.

In addition to election of officers, an amendment to the By-laws was passed to provide that in voting for play selection proxy votes would be allowed if notice of such proxy reaches the Secretary by 5:00 p.m. on the day of the meeting. This amendment is qualified by a limitation that no one person may exercise more than two proxies.

The meeting was concluded with a prepared reading from "J.B." by Archibald MacLeish.

Baseball Special . . .

You cannot afford to miss out on this BERA Special. On Tuesday, July 25 for only \$4.00 you get a \$3.50 box seat for the only N.Y. Yankee - Minnesota Twins ball game, plus a bus ride from BNL to the ball park and back. The bus is leaving at 5:45 p.m. from the Cafeteria parking lot. Game time is 8:00 p.m. Please do not miss out on this opportunity. Make your reservations at the Recreation Office now.

Swimming Classes For Children Set, Will Run 7 Weeks

Beginning July 5th, the Children's Summer Swimming Program will be in full swing. The program, handled by four swimming instructors, will run for seven weeks with each classification scheduled for one lesson a week.

Children should bring bathing suits, towels, and 35 cents for admission. Girls are required to wear bathing caps. Children should not bring watches, rings, or other valuables with them.

It is suggested that a light lunch be eaten no later than noon and that children arrive at the pool no earlier than 12:50 p.m. Lessons will begin at 1 p.m. and the children will be dismissed at 2:30 p.m. Off-site children must remain in the pool area until retrieved by parents. On-site children may leave only to go directly to their apartments.

Challenge & Public Notice

Since it is a well known fact that the best athletes at BNL are employed on the Owl Shift, and further, since these great athletes, by virtue of working hours, are precluded from most of the BERA league competition.

Let all men know that the *Bubble Chamber Group Scanning Dept. Owl Shift BNL Championship Softball Team* is now ready to challenge any team on site that is brave enough to venture onto the field of combat.

In fairness to all we must insist upon the following conditions:

- 1) Our opponents must be sportsmen enough to accept the horrible beating in good grace.
- 2) The game will have to be played on a Friday evening (due to work schedule).
- 3) A "Kitty" shall be mutually provided so that vital athletic equipment, such as Beer, hot dogs, Beer, soda, Beer, hamburgers, Beer, etc. can be purchased.
- 4) Wives, girlfriends, children, etc. of team members shall be invited to partake of the repast.

If you have the courage to accept this challenge, call "Babe" Brown at Ext. 574 before 8:15 a.m.

Signed:

"Babe" Brown - Trainer, coach, and handyman
 "Boog" Lesse - Home-run hitter and girl chaser
 "Roger" Melvin - Flawless fielder and Medic
 "Mickey" Scott - Shortstop and chef
 "Pepper" Peterson - Waterboy and banjo hitter
 "Yogi" Occhiuzzo - Left out and hurt
 "Twinkle-Toes" Davis - First round draft choice of Uncle Sam

P.S. Since our spring training was conducted from 12-8, we may be a little rusty in our first outing in daylight - if so we demand a rematch.

BERA Film Schedule

June 15 - August 31

- July 6 High Infidelity
- July 13 Red Desert
- Jammin' the Blues
- July 20 The Servant
- House of Cards
- July 27 Cangaciero
- Aug. 3 To Love
- An Oscar for Mr. Rossi
- Aug. 10 An Evening of the Erotic and Sensual
- Aug. 17 Nothing but a Man
- City of James Joyce
- Aug. 24 The Trial
- Aug. 31 World without Sun
- Moscow Circus
