

Palevsky Elected To Serve With LAMPF

At a meeting of the Los Alamos Meson Physics Facility (LAMPF) Users Group held at Los Alamos Scientific Laboratory on January 16, Harry Palevsky was elected Chairman of the first Executive Committee for a one-year term by representatives of the more than 40 institutions attending the meeting. Palevsky is Head of the Neutron Physics Group of BNL's Physics Department.

The Meson Facility is a proton linear accelerator, with top energy of 850 MeV, some ten times greater than the most powerful proton linear accelerator now in operation. However, the major difference is its very high intensity proton beam, which, upon hitting a target, can produce intense secondary beams of pi-mesons.

Expected to be operational in 1972, the Facility will be utilized by scientists from throughout the United States. For this reason, it was decided to establish a Users Group to provide a formal channel for the exchange of information between the LAMPF administration and scientists of other laboratories who will utilize the facility for their research, and to provide a means for involving scientists and engineers from users group in specific projects at LAMPF, and for offering advice and counsel to the LAMPF management.

It is planned that about 50 percent of the use time will be made available to outside users and an equal time will be utilized by LASL personnel.

Serving with Palevsky on the Executive Committee are David A. Lind, University of Colorado; Roy Haddock, UCLA; Harvey Williard, Case Western Reserve University; and Arthur Poskanzer, Lawrence Radiation Laboratory. Appointed as liaison officer of the Users Group was Lewis Agnew of LASL.

R. Ronald Rau, Chairman of BNL's Physics Department, attended the meeting in his capacity of consultant to LASL and member of the LAMPF Policy Board.

Meson Facility At Los Alamos Visited

Newly-elected members of the Users Group Executive Committee for the Los Alamos Meson Physics Facility toured the construction area for the \$55 million linear proton accelerator. Harry Palevsky, BNL, foreground, is chairman of the Executive Committee. Left to right in back are: David A. Lind, University of Colorado, 1970 Chairman-elect; Arthur Poskanzer, member, Lawrence Radiation Laboratory, Berkeley; Louis Rosen, LASL division leader in charge of the LAMPF project; Harvey Williard, member, Case Western Reserve University; and Roy Haddock, member, UCLA. —Los Alamos Photo

NED Becomes DAS Applied Research Emphasized

The Nuclear Engineering Department, which has been so named since 1952, will now be named the Department of Applied Science, according to Dr. Maurice Goldhaber, Lab Director.

The name change, effective today, has been approved by the Trustees of AUI, and reflects the fact that much of the present work of the Department is applied scientific research rather than engineering, and also that some of its work is not of a nuclear character.

According to Dr. Goldhaber, the Department will "continue to engage in scientific and developmental activities, principally of an applied nature, which fulfill recognized objectives of a National Laboratory, and which are consistent with the character of Brookhaven. Guidelines also require that these activities should be of a pioneering nature with a high degree of technical sophistication, and that they be required for the general research program of the Laboratory or that they fulfill a national need for which BNL has unique capabilities.

"Within this general framework, the activities of the Department can be grouped into three categories, as follows:

1. Research and development, not necessarily of a nuclear nature, directed toward applications of atomic energy;
2. Research and development, and engineering when required, in support of other scientific programs of the Laboratory;
3. Research and development in the service of other national needs, with the agreement of the AEC, where BNL's facilities and staff capabilities are superior to other agencies and where the foregoing guidelines are clearly satisfied."

On January 8, 1948, the Engineering Department at BNL was formed and was primarily concerned with work connected with the building of the Lab's graphite reactor. On January 1, 1949, Engineering was merged with the Nuclear Reactor Project and became the Department of Reactor Science and Engineering, under the chairmanship of Dr. Lyle B. Borst. Headquarters of the new department was at 29 Cornell Avenue.

On August 1, 1951, approximately a year after the reactor went critical, Dr. Borst left the Lab for the University of Utah. Clarke Williams and Marvin Fox shared the chairmanship of the department, with Williams in charge of research and Fox in charge of Reactor operations.

The following year, again on August 1, Lab Director Leland Haworth directed that two separate departments be formed, one to be the Nuclear Engineering Department and the other to be the Reactor Department.

Under the chairmanship of Clarke Williams, NED was also responsible for operation of the Hot Lab. At the time of the formation of the new department, the BNL annual report noted a Lab-wide personnel freeze during the spring and summer of 1952 due to budget uncertainties. No new personnel were to be hired to increase the staff beyond the 1952 level of 1412 permanent employees.

Dr. Williams continued as Chairman of NED until May 1, 1962, when he was appointed Deputy Director. He was replaced by Dr. Warren E. Winsche, present chairman of the Department. Dr. Winsche, who had spent the eleven previous years with E.I. DuPont de Nemours and Company, mainly at the Savannah River Laboratory, was Head of the Chemistry and Chemical Engineering Division of the Nuclear Engineering Department when he left BNL in 1951.

Adams Accepts 300 GeV Post

Dr. J.B. Adams, presently Member for Research of the United Kingdom Atomic Energy Authority has accepted and will take up his new appointment in the next few months of Director of the 300 GeV Project at the CERN-Meyrin Laboratory.

When the new European high energy physics laboratory is established, he will be appointed Director General.

On learning of Adams acceptance, Professor Bernard P. Gregory, Director-General of CERN, commented that it would be a pleasure to have Dr. Adams return to Meyrin and he could be certain to receive every assistance in preparing for this new European project.

AAAC Meetings Promote Lively Discussion

Part of the audience at a meeting with the Affirmative Action Advisory Committee.

Harold Avent, Chairman of the Affirmative Action Advisory Committee.

Advisors and members of the Affirmative Action Advisory Committee answer questions from the floor at one of the recent meetings in the Physics seminar room. Chairman Harold Avent (right) acts as moderator. Other members of the panel are (Left to right) Joseph Washburne, Personnel Manager; Louis Remsberg; R.C. Anderson, Assistant Director, Scientific Personnel; Paul Kelly; Walter Milian; Ella McLean; Isaac Cole, Personnel; George Bryant; and Margaret Hind.

—Humphrey

'A Cubed C' Holds Four Lab Meetings

During the past week, the Affirmative Action Advisory Committee completed a series of meetings with all employees of Brookhaven Lab to acquaint them with the aims and obligations of the committee.

The meetings, held in the Physics Seminar Room, were held at four different times in order to make it possible for any interested employee to attend. Invitations were sent to those "who have an interest in and are concerned with the problems of minorities."

Each meeting followed the same format, opening with an introduction of the Committee members and advisors, followed by a presentation by several members of the committee. After the formal program was finished, questions from the floor were answered by members of the committee.

Chairman Harold Avent spoke to each group of the aim of the committee to solicit the cooperation and understanding of Lab employees, and said that the ultimate goal is to assist the Laboratory to arrive at a point where there will be no further need for an affirmative action program.

The necessity for establishing lines of communication between Blacks and Whites was pointed out in the light of past experience. While the Lab has always had a policy of non-discrimination, there was never an affirmative program undertaken to reverse inequities of the past.

As brought out in the meeting, affirmative action is the responsibility of each employee, and can result in a change from the policies of the past to a positive program that will be effective now.

Since its formation, the committee has made many recommendations to the Director that have resulted in affirmative action being taken in areas of recruitment, hiring, training, housing and education. It is hoped that the current programs of meeting with the employees will serve the purpose of enlisting the support of all employees through discussion and understanding of the problems associated with equal opportunity at Brookhaven Lab.

Cooking Exchange Meeting

On Thursday, January 30, a meeting of the Cooking Exchange will be held in the Apartment Area Recreation Building from 3 to 5 p.m. Various casserole dishes will be demonstrated at this meeting.

Each adult will be asked to contribute 50¢ to pay for the cooking demonstration and the babysitters which are provided for children.

Life Saving Classes For Lab Children

Applications are now being accepted at the Recreation Office for two life saving classes which have been arranged for children of Laboratory employees. Both 12-week programs will begin the first week of February and meet once a week for an hour and a quarter lesson. Classes will start promptly at 3:45 and end at 5:00 p.m.

Class C - Jr. Life Saving - Tuesdays - Will start on February 4.

Qualifications: 1) Must not be less than 12 nor more than 15 years of age, or in the 7th through 10th grades, and in sound physical condition. 2) Must be able to swim 100 yards in reasonably good form using any combination of strokes.

Class D - Sr. Life Saving - Thursdays - Will start on February 6.

Qualifications: 1) Must be 16 years of age or more, or in the 11th grade, and in sound physical condition. 2) Must be able to swim 220 yards in good form using any combination of strokes.

Registration fee for either class is \$10 and will include a life saving manual. Students who do not have a season pass to the Pool will be required to pay the 35¢ admission fee at each session.

Appropriate Red Cross Certificates will be awarded to those who have completed the necessary qualifications at the end of the program.

Deadline - Registration accompanied with the fee will be accepted until January 31, or before, if the class maximum is reached.

Here and There

Dolores del Castillo

"Observable Modes and Pseudo-Modes imbedded in the Continuous Spectrum of the Linearized Boltzmann Operator for the Wave and Poisoning Problems" was the title of the lecture delivered by **James Thurber** (Applied Math) during a Transport Theory meeting held at Virginia Polytechnic Institute, January 20-22.

Lloyd A. Schairer (Biology) presented a paper entitled "Further radiobiological studies of Tradescantia following orbital flight" at a recent Biosatellite Symposium held in Dallas. Kodumudi M. Marimuthu (Biology) also attended this meeting.

A seminar entitled "Genetics and Physiology of T7" was given by **F. William Studier** at the Albert Einstein College of Medicine.

The U.S. Patent Office announced on January 14, 1969 that U.S. Patent No. 3,421,543 had been granted to the AEC for "Gas, Low Pressure Differential Regulator" invented by **Mordechai Montag** (Mech. Engr.).

BERA Election Soon

The BERA Executive Board, at its January 15th meeting, appointed a Nominating Committee which will select a slate of candidates for presentation on the ballot to all employees for the annual election of Executive Board members in February.

The members of the Nominating Committee are listed as follows and will meet to select the slate on Wednesday, January 29th.

Robert Meier, Accelerator	Ext. 7534
Donald MacKenzie, Nucl Engr.	572
Graham Campbell, Appl. Math.	7213
Victoria Levis, Physics	2341
John Craig, Instr. & H.P.	2965
Harrison Worthington, Central Shops	558
Walter Chornoma, Plant E & P	2382
Charles Kim, Medical	7487
Raymond Stoenner, Chemistry	669
Lloyd Schairer, Biology	388

Scuba Diving Course Offered At Lab Pool

Arrangements have been made to offer employees and/or their spouse a 12-week course of instruction in the techniques of skin and scuba (with tank) diving at the Laboratory Swimming Pool.

Mr. Louis Cafone, Deputy Chief Scuba Diving Instructor of the Suffolk County Vocational Education and Extension Board, will provide the instruction and direct the course.

The first lesson will be an "orientation" meeting at which time the instructor will describe the details of the course and the nature of the equipment the individual will be required to supply. Each of the registrants will be given a Scuba Diving Manual at no cost. The first four weeks will deal with skin diving techniques employing the use of fins, snorkel and face mask. If you have these items, bring them and your bathing suit to the first class. If you do not, wait until the instructor advises you on what type to buy.

Although the balance of the course deals with tanks it is not necessary to buy one to join the class. Arrangements can be made, if necessary, for equipment rental.

The University of the State of New York will issue a Scuba Diving Certificate to those who have satisfactorily completed the course.

Registration (accompanied by the \$2.00 fee*) is now being accepted at the Recreation Office for the following two classes:

Class A - Monday 5:15-6:30

Class B - Tuesday 5:15-6:30

Deadline for registration - January 31 - 1:00 p.m., or when the class maximum of 30 is reached.

If enough employees sign up (minimum 10 per class) the sessions will begin on February 3 and 4.

Applicants must be in sound physical condition and capable swimmers. After the 6th week of classes they will be required to 1) tread water three minutes - one minute without using hands, 2) swim 200 yards using any stroke or combination of strokes, 3) tow an inert swimmer 40 yards, 4) stay afloat fifteen minutes - two minutes without using hands or feet, and 5) swim under water 15 yards without pushing off side of pool.

For additional information, call George Sabine, Extension 391.

*This fee is intended to cover only minor operating expenses. Individuals will be required to pay the normal admission fee of 35¢ per visit.

BERA Dance

Put a little romance in your life. Take your lady-fair for a walk down Lovers' Lane on St. Valentine's Night.

The Central Shops Dance Committee is planning a memorable evening for you on Friday, February 14th in the Gymnasium. Decorations will be lavish, the orchestra under the direction of Tony Forlano and featuring vocalist Margie Farrell will be titillating, door prizes will be unique, and give-aways will be amusing.

BERA will supply the ice, chips n' pretzels and cold drink cups. Beer and soft drinks will be sold.

Admission will be \$1.50 each for employees and escorts and \$2.00 each for guests. Tickets will be sold at the door - no reservations will be needed.

Make your plans now to be at the Gymnasium at 9:00 so you won't miss a moment of what promises to be a fun-filled night.

Bowling News

Irma Carl

Purple League

S & M with a 2975 series moved into first place. If they continue that pace they will wrap up the second half before we know it.

Carl Cantera bowled a 202-541 series, Joe Rolfe 211-533, Mike Iarocci 208-525 and Winnie Felice 203-519. Dick Vogt had a 519 series and Joe Cuccia a 514.

Pink League

Fiscal Assets have a hold on the No. 1 spot what with taking 14 points in the first two weeks of the second half. The All Toes have a slim margin of three pins over the Medigals for the No. 2 spot. A high gross series of 633 was bowled by Marie Brenner and a 631 by Diana Bartelt.

We're not doing too well in the 200 class so we're going to start reporting some of the well-above-average scratch games - just to show the potential is there!! Marge Stoessel 179; Marie Brenner 175; Carol Beckner and Pat Oster 172; Mary Craig 167; Arden Neber 165; Pat Towey 157; Rose Rosati and Kay Trautwein 150; and Ruth Petit, Diana Bartelt and Ginny Diebel 147.

Red League

Sandbaggers, Bar Flies and Dimwits are tied for first. Bio Rads are not tied with anyone for last place!!

L. Baker rolled a 228, P. Klotz 212, J. Berech 207, R. Meier 203, S. Kiss 202 and a 201, and R. Newlands 201.

Green League

Looks like the Electrons are trying for first place this half too. Fire Department one point behind them in second place. T. Holmquist rolled a 224/550; Lou Potter, Sr. 216/534; and D. Menago 186/522.

Call For Musicians And Cast Members

Musicians are needed to play in the orchestra for the musical "Gypsy" which will be performed by the BNL Theatre Group on May 16, 17, 23 and 24. We would like to welcome employees and their family members who can play the following instruments: violin, saxophone, viola, oboe, trumpet, bassoon, trombone, French horn, baritone saxophone, flute and piccolo, clarinet and alto sax, clarinet and bass clarinet.

Alien Address Registration

During January of each year, every alien in the United States must report his address to the Commissioner of the Immigration and Naturalization Service. Alien address report forms are available at the U.S. Post Office, 2 Center Street.

Hospitality News

It will be wigs 'n things at the next regular Hospitality Committee coffee meeting to be held on Monday, January 27. The time is 10 a.m. to noon, and the place is Apartment 6-C. The wig demonstration will be sponsored by the Village Wig-In of Patchogue.

Everyone is welcome to attend. Bring the children.

Local 2230 Meets

A general business meeting of Local 2230 IBEW will be held on Thursday, January 23. The meeting will be at the Knights of Columbus Hall in Patchogue, and will begin at 8 p.m.

French Group at BNL

The next meeting of the group will take place on Wednesday, January 29, at 8:30 p.m. in the small meeting room of the Conference Center.

M. Marcel Blistène, well known movie director, will deliver the first of two lectures entitled "Jean Cocteau, Poète de l'Ecran" (Jean Cocteau, Poet of the Screen). Both this lecture and the second, to be given on March 24, will be illustrated with 16mm movies.

Among M. Blistène's movies may be mentioned "Etoile sans Lumière," with Edith Piaf and Yves Montand, and "Macadam" with Françoise Rosay and Simone Signoret. Blistène is also known as a radio and television director.

A donation of one dollar per person will be collected, and refreshments will be served.

What To Do With Your W-2 by Frank Bloom

Sometime within the last few days BNL employees should have received their W-2 forms for 1968. Employees should check their W-2's for accuracy of the following information:

1. Gross pay
2. Social Security number
3. FICA employee tax withheld (for 1968 should be 4.4% of gross pay up to \$7800)
4. Federal and state tax withheld (if you retain the year's pay statements fine, if not consider retaining weekly or monthly pay statements for 1969)
5. Ignore New York City form NYC-2 unless there was N.Y.C. withholding (BNL had about 150 N.Y.C. residents as employees during 1968 - mostly in summer programs)
6. If you had excludable sick pay during the year, the amount should be indicated on your W-2, in a separate box with an asterisk (*).

If there are any errors on your W-2, or if you have not yet received your W-2, contact the Payroll Department as soon as possible.

Trial Witness Causes Courthouse Scene

Abigail Williams, reported leader of the group of girls involved in teenage orgies in a Salem woods, screams at photographers in the courthouse. Behind Abigail, Reverend Hale, a court investigator, stands with Reverend Parris, father of one of the girls involved. Others in the picture are an unnamed witness and a court attendant. According to sources close to the court, steps are being taken to prevent outbreaks of emotion during the trial. —Humphrey

Nude Dancers At Sylvan Pot Party Involve Community

The recent discovery of a group of teenagers, including a minister's daughter, participating in moonlight orgies in a woodland near Salem, has precipitated an investigation by authorities of the actions of several adult members of that staid community.

A source close to the court, in preparing the case for trial, said that initial investigation has disclosed the involvement of "many influential members of the community."

The wild woodland parties were brought to light by the parent of one of the teenagers, Rev. Samuel Parris, who discovered the group of girls dancing in the nude around a smoking pot that was filled with un-named herbs and materials. Reverend Parris said that his daughter was obviously under the influence of some psychic drug when she returned to her home.

In the ensuing investigation, the girls charged that they were being led by some persons in the community who forced them into obscene and irresponsible acts. The prosecuting attorney has revealed that testimony will be brought out during the trial which will prove beyond a shadow of a doubt that the children were led into their actions by leading members of the community. He has also revealed that possible murder indictments will be asked as a result of testimony given by some of the participants of the woodland orgy.

The public trial will be held in the courthouse on Brookhaven Avenue at the corner of Columbia Street, starting on Friday, January 24. Because of the sensational aspects of the testimony, no person will be admitted to the proceedings without a ticket, which must be obtained either at the courthouse door before the start of the trial, or from one of the court clerks as listed elsewhere in this paper.

The Salem witchcraft trials of the Seventeenth Century when reported in the language of the Twentieth Century are quite easy to relate to the present days of pot parties, student demonstrations, race riots and exotic religious sects.

Buy Your Crucible Ticket Now!

"The Crucible" performances will be on January 24, 25, 31 and February 1. Tickets may be purchased at any one of the following locations:

AEC.....	Barbara Strohm
AGS.....	Carmen Falkenbach
