

Atlanta Mayor To Speak Here

Maynard H. Jackson, Mayor of Atlanta, Georgia, will present a lecture titled "The Challenge of Black Politics" at Brookhaven on Saturday, June 21, at 8 p.m. in Berkner Hall.

Mayor Jackson's lecture will be the Sixteenth Associated Universities, Inc. Distinguished Lecture, and is open to the public as well as the Laboratory staff.

Mayor Jackson is Atlanta's first black mayor and the youngest mayor of a major American city. He has spurred the revitalization and prosperity of Atlanta by forging a working coalition of black and white citizens dedicated to the goal of constructive change through political action. A long time advocate of the political process as the most viable method of creating a better society, Mayor Jackson has been responsible for the active participation in local government of large numbers of people who previously had no political voice.

Jackson entered the political arena in 1968 when he left a position as attorney for the Emory Community Legal Services Center to declare his candidacy for the United States Senate. Running a hard race against incumbent U.S. Senator Herman Talmadge, Jackson was defeated in the race, but he carried the city of Atlanta with a 6000 vote margin.

"I was convinced then, and I am still convinced, that political action provides the most effective way of changing the nation, he says. "That idea is not popular with some people. There are those who advocate violent revolution and urban guerrilla warfare. I could not disagree more with such philosophies. There is unlimited potential for change and growth in the local governments of this nation."

In 1969, Jackson became vice mayor of Atlanta. After four years in this position, he was elected mayor.

Jackson was born in Dallas, Texas. He was the third of six children. When he was seven, his family moved to Atlanta, where his father pastored the Friendship Baptist Church.

Jackson entered Atlanta's Morehouse College at the age of 14, after he was accepted as a Ford Foundation early admissions scholar. He studied political science and history and received his B.A. in 1956

Mayor Maynard Jackson

when he was 18. He attended North Carolina Central University Law School, and after graduating founded Georgia's first and largest black law firm, Patterson, Parks and Franklin.

The AUI Distinguished Lecture series was started in 1966 to broaden the subject matter of lectures available at the Laboratory. The lectures are given at various times and focus on issues of current interest.

Past AUI lecturers have been doctors, lawyers, scientists, journalists, architects, public officials, philosophers and scholars. They have included such notables as Sir Isaiah Berlin, philosopher; Stewart Udall, Secretary of the Interior during the Kennedy and Johnson Administrations; Adam Yarmolinsky, internationally known lawyer and government advisor and Erwin Canham, Editor in Chief of the Christian Science Monitor.

Annual Biology Symposium

Martin Blume, Physics, lectures before an international group of scientists attending the Annual Brookhaven Symposium in Biology which was held this week.

During a break in the proceedings, Benno Schoenborn (right), Chairman of the Symposium Committee, shows his model of a myoglobin molecule to Werner Hirs (left), former Chairman of the BNL Biology Department and now at Indiana University; and Uli Arndt, of the MRC Laboratory of Molecular Biology in Cambridge, England.

International Conference - A First

The first conference to be organized in the new field which uses neutron scattering for the analysis of biological structures, was held at Brookhaven this week.

Neutrons were first used to analyze biological structures at BNL in 1968 by Benno Schoenborn. The new field was unique to Brookhaven until 1972 when there was a sudden burst of interest that ricocheted around the world. Today it is still a highly specialized field, with approximately 100 people involved in it, and less than 30 actively pursuing it.

The field is limited by the need for reac-

June 26 and June 27 Are Days To Remember

BNL needs your blood when the Bloodmobile of the Greater New York Blood Program visits the Laboratory on Thursday and Friday, June 26 and 27.

If a sufficient number of Laboratory employees and their families donate blood, every employee and his or her family will be eligible to receive an unlimited amount of blood, in case of need, within one full year. You, your spouse, dependent children, parents, parents-in-law, grandparents, and grandparents-in-law are covered. When the Bloodmobile visited BNL last year, over 724 donors answered the call to give.

Laboratory Director George Vineyard is sending a letter to all employees explaining this year's Blood Program and asking for your continued cooperation and requesting the return of your pledge card by June 13. The message is clear: the success of this year's blood drive depends on you - each and every employee of the Laboratory. In order for BNL employees and their families to have an unlimited supply of that life-giving substance in times of need, we need your blood!

tors with high neutron fluxes, such as the HFBR. Besides Brookhaven, there are only three other centers for this type of research in the world: the Atomic Energy Research Establishment in Harwell, England; The Joint Institute for Nuclear Research in Dubna, USSR and the Institute Laue-Langevin in Grenoble, France. The National Bureau of Standards is starting a program.

Close to 85 people attended the conference, which was the 27th Annual Brookhaven Symposium in Biology. They came from all over the United States and Canada and from England, France, the Soviet Union, and Germany. The proceedings of the symposium will be published.

The seven sessions of the symposium were broken up by visits to the HFBR and various recreational activities. Trips were arranged to the Fire Island National Seashore and the mud flats of Moriches Bay for bird watchers. The visitors particularly enjoyed the tennis courts and the pool.

The Symposium Committee, which worked for six months arranging the conference, was chaired by Benno Schoenborn. Other members of the committee were: Richard Setlow, John Norvell and James Cain.

Avoiding High College Prices

With the price for a college education constantly on the rise, it is hard for many people to afford four years of college and even more difficult to go on for higher degrees.

The Laboratory has a solution to this problem through its tuition refund program. Whether an employee wishes to pursue a degree on the undergraduate or graduate level or to take courses related to their work, the Laboratory will refund all or most of the cost.

Persons working toward an undergraduate degree will be reimbursed for 75 percent of the tuition cost until a degree is attained, at which time the remaining 25 percent is refunded (this only applies to those courses taken within five years of receipt of the degree). Employees can also be reimbursed for vocational and correspondence courses. For graduate courses, the Laboratory will refund 100 percent.

Until recently, the program was administered for the Personnel Office by Peter Paige. Now George Sabine, with the help of Betty Pergan, coordinate it. "Through the program it is hoped employees will be better prepared to perform the assignments of their current positions, or better qualified when requesting consideration for transfer or promotion to other positions at the Laboratory," said Sabine.

Individuals interested in taking advantage of the tuition refund program should fill out an application two weeks prior to enrolling in a course. The application, signed by the applicant's supervisor and department chairman, should then be returned to the Personnel Office. After completing the course with a "C" grade or better, the cost will be refunded.

There are few limits to the types of courses the Laboratory will pay for, providing they are job-related. According to Lab policy, "The course must be pertinent to the work that the employee is doing or may be expected to do at the Laboratory, or that is required for a degree in a field of study pertinent to the work of the Laboratory."

Last year, \$40,000 was pumped into the program and this year the amount has increased by \$5000. Since the initiation of the program 20 years ago approximately 1500 people have benefited from it.

"If it had not been for the tuition refund program, I probably would not have started working for my undergraduate degree," said Gail Thompson, DAS, who recently completed a double major in physics and math. Most of her course work was paid for through the program. She came to the Lab in 1966 as a film scanner in the Physics Department, got her double degree in 1973 and became a physics associate in the Department of Applied Science. She is currently pursuing two master's degrees, an M.S. in physics from the Polytechnic Institute of New York and an M.S. in math from SUNY Stony Brook. Thompson then plans to get her doctorate in physics, specializing in experimental nuclear physics. Needless to say, she finds the program very worthwhile.

The tuition refund program paid for a large portion of Ed Byrne's, Plant Eng., undergraduate degree in business administration. He believes that if the Lab did not have the program, he probably would not have started working for a degree. "Because the cost of going to school now is so expensive, many people who would like to go can't," said Byrne. When he first came to the Lab, he was a clerk, and then was promoted to administrative assistant, and after his master's he hopes to become an accountant. He will start work on his master's degree in accounting in September, taking advantage once again of the tuition refund program.

Veronica Evans, DAS, views the program as an incentive for people to get started on a degree. "Once they get started, they will go on and on, until they reach their goal," she said. She was reimbursed for a year of course work she took towards her undergraduate degree in math, and for

(Continued on page 2)

Peter Chen Leaves Lab For Position In D.C.

Peter Chen, Assistant to the Director for Affirmative Action, left the Laboratory last week to become Deputy Assistant Administrator for Equal Opportunity Programs at the National Aeronautics and Space Administration (NASA), in Washington, D.C.

Chen has been at BNL since March 1, 1971. Commenting on his departure, Laboratory Director George Vineyard said, "Peter has made great contributions to the Laboratory's Affirmative Action programs and although he will be very much missed at Brookhaven, we wish him well in his new endeavor."

The search for someone to take Chen's place has already begun. In the interim, Renée Flack, Equal Opportunity Assistant, will handle the day to day problems of the office and assist the Director in carrying on the functions of the Affirmative Action Office until a replacement has been found.

As the head of the Lab's Affirmative Action program, Chen was concerned that minorities and women be given equal opportunities for employment, promotions and upgrading. He also coordinated many programs which gave minorities opportunities they might not have had otherwise. "He brought sensitivity, communication and understanding between minorities and the Lab structure," said Renée Flack.

Peter Chen

Medical Insurance For Dependent Students

Children of Laboratory employees over age 19 are eligible for Dependent Student coverage providing they are unmarried and are attending school on a full-time basis. The Laboratory's Dependent Student coverage for children who are graduating from college and do not intend to continue their studies on a full-time basis will automatically terminate three months after the date of their graduation from college.

For information regarding individual insurance coverage call Personnel Services, Ext. 2877.

Tuition Refund (Continued)

several programming courses. When she first came to the Lab, she was a chemical technician in the Health Physics and Safety Division. After getting her degree, she became a programming assistant in the Department of Applied Science. She plans to stick with the computer field.

When Ben Scala, Fiscal, exhausted his VA benefits, he used the Lab's tuition refund program to complete his bachelor's degree in business administration. His degree played an important role in his promotion from assistant cashier to accountant. "I have been an accountant for many years, but nowadays you need that piece of paper to back it up," he said. He is now working on his master's in business administration with an emphasis on accounting. "The tuition refund program is one of those fringe benefits that should be taken advantage of," he said.

Getting a college degree while working at the Laboratory does not mean instant promotion, but it could increase an employee's chances.

Questions about the tuition refund program can be answered by George Sabine, Ext. 2879. Applications are in each department and in the Personnel Office. Personnel also has a generous supply of catalogues from local and out-of-state colleges.

A Plus For Space Exploration

Laboratory Director George Vineyard presents Carl Flatau, Accelerator, with a certificate of recognition from the National Aeronautics and Space Administration (NASA). Looking on are (left to right): William Graves, Technology Utilization Officer; Mark Barton, Accelerator Department Chairman and John Blewett, Special Assistant to the Director for Energy. The certificate is in recognition of a contribution to NASA made by Flatau while he was a consultant to an aerospace company in Denver under contract to NASA. Flatau developed a control system for the remote manipulator system of the orbital shuttle, an airplane-like rocket for space exploration, projected for flight by 1977. The control system will facilitate the movement of cargo on and off the space shuttle. Flatau began developing remote manipulator systems during the AGS conversion project in the late 1960's.

Discount Tickets

BERA has recently become a member of the Long Island Recreation Association (LIRA). Because of this membership BNL employees will, from time to time, be given the opportunity to get discount prices on tickets to various athletic events. Such an offer is now being made for the following matches:

	Indiana Loves
July 11	San Diego Friars
July 8	Boston Lobsters
July 11	Hawaii plus
July 16	San Diego vs. Boston
	Cleveland Nets
July 23	Indiana Loves
July 30	Pittsburgh Triangles
August 1	S.F. Golden Gaters
August 11	

New York Sets Tickets		
Normal Price	Special LIRA Price	
\$6.00	\$3.75	
5.00	3.00	
4.00	2.50	

For reservations please contact Bill McGinley, New York Sets (516) 794-9500.

All matches will be held at the Nassau Coliseum.

Can You Believe It?

The runners in the 3000-mile run have less than 300 miles left to complete their goal. An all out effort is scheduled for noon-time today, as all the participants gather at the Cafeteria to complete the 3000-mile run. A large crowd is expected to cheer the runners in the final laps of their cross-country odyssey.

Letters To The Editor

To all my friends at BNL:

I regret that I didn't have the opportunity to personally say "au revoir" and "thanks" for all of the courtesies and cooperation extended to me while here at BNL.

Thanks to all supervisory personnel, Maurice Goldhaber and George Vineyard for their unwaivering support.

Special thanks to all of the Brothers and Sisters for their confidence . . . Right on! Hang In There!

Sincerely,
Peter H. Chen

Courses Planned For Summer at Stony Brook

An art and humanities tour of Holland and France, workshops in ballet and modern dance, and a soccer coaching workshop are among the variety of credit and non-credit offerings and recreational activities planned for this summer at the State University of New York at Stony Brook.

A ten day tour of Holland and France will acquaint students with art works housed in a variety of collections in several European cities. The July 3 through 18 tour costs \$599 (plus an optional \$67.05 if taken for three undergraduate credits) and will be led by faculty from the Informal Studies Program.

Some 40 other informal studies non-credit courses will also be offered during the summer months. Designed to develop students' interests and skills in a variety of recreational pursuits, the course topics range from offerings in art and photography to sailing, contract bridge, karate, and an introduction to collecting antiques. For further information on the art and humanities tour, and other Informal Studies courses, call 246-5939.

A wide range of recreational activities including a weekly film series, informal concerts, outdoor cabarets, bike trips and special events, planned for the summer months, will be open to the University community through the purchase of a summer session activities card for \$10. Cards will be available for sale to individuals at least 18 years old at the Polity Office in the Stony Brook Union; for information call 246-3673.

Bids For Vending Machine

BERA announces the sale of an eight year old beer/soda vending machine. The capacity of this machine (No. 3121040) is approximately 10 cases of cans.

Bids should be sent to the Recreation Office, Building 185, starting on Monday, June 9th. The machine may be inspected at Building 87 between the hours of 1 and 2 p.m. during the week of June 9-13.

The highest bidder will be contacted on Monday, June 16th.

Credit Where Credit Is Due

The photographs of the BERA Theatre Group's production of LUV, which appeared in last week's Brookhaven Bulletin, were taken by Kurt Fuchel, Applied Math.

The Bloodmobile Is Coming!

Preparing for the arrival of the Bloodmobile, June 26 and 27, are (left to right): Gerald Kinne, Chairman of the BNL Blood Drive; Martha Grossman, Suffolk County Representative for donor recruitment, Inter-County Blood Services, a division of the Greater New York Blood Program; and Sharon Rosenhagen, who is assisting Kinne.

Biking At Its Best

Brookhaven means people, demonstrated last Sunday by BNL employees at the spring bike-a-thon. The skies were gray, but the enthusiasm was bright and so was the race. If you enjoy action and good competition, this was the event to watch. Early morning downpours did not keep 24 cyclists from the starting line with mild temperatures for the event. A sudden shower waited for the final racer to cross the finish line, announcing the success of the race.

Bob Powell, the man with the gun, sent the seniors and women off in one group and the juniors in a second group on the 17½-mile journey around the Lab. The Radio Club kept the waiting crowd informed on the whereabouts of the racers. In record time, four cyclists came toward the finish line. Michael Coppersmith nosed out his three oponents in an exciting sprint, and Lucy Kinne bettered her previous time by more than ten minutes to win the women's class. The junior division also set a new course record as Fred Blume beat Gregory Jordan by a second.

Our special thanks to all who helped make this event a success. Don't forget to join us in the fall race.

Senior Men		
1	Michael Coppersmith	46:39.0

BGA Golf

The first 18-hole tournament of the year was held at the Pine Hills Course on May 29. Despite very pleasant weather, the course resulted in the highest scores posted in our tournaments in many years. The primary reason probably was the unfamiliarity of most players with this course, particularly on the back nine where the hitting area can not be identified from the tees.

Two very fine net scores were turned in, Jesse Becker's 67 and Joe Mayeski's 69. Joe's round was sparked by a beautiful tee shot on the third hole which left him only two feet from the pin. The shot won the closest-to-the-hole contest and Joe got his birdie too!

The longest drive contest was on the 18th and was won by Bob Sasey. The top five scores in each category were:

Gross		Net	
Lawrence	87	Becker	67
Korhut	89	Mayeski	69
Racaniello	89	Racaniello	73
Casey	92	Feindt	76
Mayeski	93	Lawrence	77

Gym and Pool Hours

Starting Saturday, June 14, the Gym will be closed on all weekends. Locker rooms will be open on Saturdays and Sundays from 1:00 to 6:00 p.m.

The pool summer hours will begin on Monday, July 7. They will be as follows:

Monday through Friday	
11:30 a.m. - 1:00 p.m.	employees only
1:00 p.m. - 2:30 p.m.	swimming instructions
3:00 p.m. - 9:30 p.m.	employees/families/guests

Saturdays & Sundays	
1:00 p.m. - 6:00 p.m.	employees/families/guests

All recreation facilities will be closed on Thursday, July 3, and Friday, July 4.

A Journey Over The Seas

Julianna and Bruno Salvadori travelled over 4000 miles to come to Open House '75. Married in Italy on May 10, they decided to come to the United States for their honeymoon; they even made a special excursion to Niagara Falls. Julianna, a pre-med student from Florence was fascinated by Brookhaven's laboratories and research programs. They were both impressed by the vastness of the Lab and its international flavor. They noted in particular, the friendliness apparent at the Lab, which they termed *sympatico*, an Italian word which lacks a translation in English but, loosely translated, means more than friendly.

Official & Special Events

Placement Notices

Each week the Personnel Office lists personnel placement requisitions, currently being processed. The purpose of these listings is, first, to give notice of all non-scientific staff positions being filled and, second, to give employees an opportunity to request consideration for themselves through the Personnel Office. In filling vacancies, the Laboratory's objective is to give first consideration to present employees, as follows: employees within the immediate group having the vacancy, employees within the department or division, employees within the Laboratory as a whole.

For further information regarding a placement notice, or to request consideration for an available position, contact Supervisor, Personnel Placement & Development, extension 2874 or 2882.

121. TECHNICIAN - A.A.S. degree or equivalent in mechanical technology with experience in the construction of cryogenic devices and the operation of hydrogen and helium refrigerator systems. Shift work. Accelerator Department.

122. TECHNICIAN - A.A.S. degree or equivalent in electronics/electrical technology to construct, maintain, and modify radiation and industrial safety systems. Experience and interest in relay-based circuitry very desirable. Accelerator Department.

123. OFFICE SERVICES ASSISTANT - Department of Applied Science.

124. SECRETARY - Energy Policy Analysis Group. Department of Applied Science.

125. RESEARCH SERVICES ASSISTANT - Temporary position. Biology Department.

Autos & Auto Supplies

- 66 MERCEDES BENZ 200 - New short block, ac, am/fm, auto, pb, immac in/out. \$2400. M. Sautter, 924-3338.
- RIMS - 15x17", full sz GM, Ford, Merc. \$6 pair. Goudsmit, Ext. 2543.
- 69 FORD TORINO - V8, 2 dr hdt, auto, ps, good cond. 751-0812 after 6.
