

## Atlanta Mayor Speaks of Past, Present and Future

Before an audience of over 300, Mayor Maynard Jackson of Atlanta discusses the challenge of black politics.

Mayor Jackson (left) and Bob Thomas, Chemistry, get reacquainted after many years.

## Atlanta Mayor Sees Politics As The Last Non-Violent Hurrah

Speaking before an enthusiastic audience in Berkner Hall last Saturday, Mayor Maynard Jackson of Atlanta stressed the importance of politics as "the last non-violent hurrah for the masses of people in this country to change how we live." He was the 16th AUI Distinguished Lecturer.

Mayor Jackson spoke at length about the history of black politics, and the present and future challenge of black politics. The ultimate challenge of black politics in this nation is to make sure it works, he said. "Will politics work to extricate the oppressed from the dungeons of deprivation?" he asked. He fears that the option is not a non-violent one, but emphasized that he is committed irrevocably to non-violent social change.

Although Mayor Jackson considers racism to be the most immediate problem facing America, he is convinced that it is not the ultimate problem. "Ultimately the problem is between those who have and those who do not have." The way to change this is through the voting process, he said.

Black political action has a history of repression and has been very controlled, he said. "But even in the face of economic reprisals, KKK violence, lynchings and intimidations of every kind, black people have continued to fight for the right to vote." During the civil rights movement of the late 1950's and the 1960's, the fight for the right to vote gained national and international attention. Young people, black and white, poured into southern towns and cities determined to make the American dream a reality. Finally in 1965 Congress passed the Voting Rights Act, guaranteeing the protection of the black voters. "In my opinion, that is the most significant piece of legislation in the 20th century," commented Mayor Jackson.

Because of the Voting Rights Act of 1965 "the American political landscape has taken on a blacker hue in the last ten years," said the Mayor.

The Voting Rights Act has resulted in

Mayor Jackson responds to a bit of humor from the audience.

the election of over 110 black mayors across the country, a sizable and articulate black caucus in the U.S. Congress and black representation on boards and town councils in cities and towns across America, said the mayor.

Now there is a danger of "resting on our laurels," he emphasized. "Simply because we are black politicians we must never think that to be a black elected official is enough. It is not enough to be a black anything anymore than it is enough to be a white anything." Continuing he said, "My blackness, and that of all black elected officials in this country, does not answer the complex questions facing America today; my blackness does not insure my constituents of enlightened and progressive leadership, and my blackness must not be an excuse for inaction or ineptitude."

He stressed the importance of black elected officials being sensitive to feelings of the "old guard power structure." We must try to make them (the old guard power structure) see that the expansion of the long standing coalition between business and government, to include the grass roots community, does not signal the end of a long period of prosperity and plenty, it does not mean that our cities and towns with black leaders are going to wither and die, but it signals the dawn of a new day in which all segments of all communities can have equal access to the decision-making process, to the enrichment of that process and not to the destruction of it."

The importance of citizen involvement at every level cannot be overemphasized, said the Mayor. This type of involvement is the only way our communities can survive. "Our urban communities are in desperate need, particularly for vital, energetic people who are not afraid to tackle the overwhelming problems of our cities."

On a final note, Mayor Jackson said that citizens must be convinced that cities are worth fighting for. Otherwise, "we are going to find ourselves confronted with empty asphalt and concrete canyons echoing with the terror of crime and the loneliness of total alienation."

During the question and answer period, the Mayor was asked about the extent of his future political plans. He said he would like to run for a second term as mayor and then enter the race for governor or U.S. senator. Failing either of these exploits, he would return to the law firm he built, which is the largest black law firm in Georgia.

What does the mayor think of Alabama governor George Wallace? asked another member of the audience. "Governor Wallace has not changed his spots," said Mayor Jackson. He does not believe that Governor Wallace will win the nomination for president.

Bob Thomas, Chemistry, was the man responsible for getting Mayor Jackson to speak at the Lab as an AUI Distinguished Lecturer. Thomas and Jackson were baptized together in the church pastored by Jackson's father.

### No Bulletin Next Week

Because of the two holidays on July 3 and 4, the *Brookhaven Bulletin* will not be published next week. Ads that have been submitted will appear in the July 11 edition.

Have a happy and healthy vacation.

## Housing Ready For Summer Guests

Each year, as summer draws near, Staff Services work feverishly to accommodate the many summer visitors with on-site housing. During the last three years has been an extremely difficult task. An overflow of visitors has created the need for between 10 and 20 additional housing units.

The increase in summer visitors is largely due to two factors. The new and expanded beam lines that have gone into operation at the AGS have resulted in a 50 percent year-round increase of visitors using the AGS. Also, new research programs related to energy have increased the number of new staff, consultants and advisors. Many consultants and advisors stay at the Lab for several weeks at a time and because many are from the academic community, the summer is the preferred time.

This summer the housing problem has been alleviated by the addition of 16 mobile homes to the Brookhaven landscape. They are grouped adjacent to the houses in the apartment area.

The mobile units, secured from the

Housing and Urban Development Administration (HUD), had previously been used to house storm victims of hurricane Agnes in the summer of 1972. When the need for emergency housing passed, HUD was left with hundreds of surplus trailers. The trailers were offered to government agencies for the price of shipping them. Sixteen will serve BNL's need for additional housing.

Lou Harson, Plant Engineering, headed the project to install the new trailers and Staff Services was responsible for making them ready for occupancy. The Site Maintenance Group supervised the clearing of the land, moving them into position and the landscaping around them. All the units are equipped with a smoke-detection system that is directly linked to the Fire House.

Today, eight of the mobile homes are fully furnished and are either being lived in or are ready for occupancy. All on-site housing is booked up for the summer including the 16 new homes, said Dorothy Metz, general supervisor of housing, travel and transportation.

### Getting It All in Place

Charlie Johnson, Plant Engineering, makes sure a newly positioned mobile home is level.

Dick Morris, Plant Engineering, moves a mobile home into position.

## Cooling Off

A watering hole in a remote area on-site provides a refuge for some seeking relief from the summer's stifling heat.

## Hospitality News

For the months of July, August and September the monthly coffees will be "Evening Get-Togethers."

The first get-together will be held Monday, July 7, from 8 to 10 p.m. in the Recreation Building in the Apartment Area.

Mrs. Bunny Schaefer will show us her outstanding button collection.

Please come, chat with your friends and neighbors, and meet newcomers.

## Off-Site

A youngster hoards a prize retrieved from one of the many farm stands found along Sound Avenue.

Saunter Along  
Sound Avenue

This is the first in a series of articles describing things to do off-site for the summer visitor. Each week a different summer activity in Suffolk County will be discussed.

Summer is a time for vegetable and fruit lovers to take advantage of the numerous farm stands which line many of the Long Island roads. One road overflowing with stands selling fresh vegetables, fruits and home-made baked goods is Sound Avenue.

Sound Avenue forks off of Route 25A, several miles east of the junction of William Floyd Parkway and 25A. An easy way to find it is to follow the signs to Wildwood State Park.

About half a mile after turning onto Sound Avenue, one is confronted by Lewins Strawberry and Peach Farm, which sprawls over 600 acres of choice farm land. Lewins sells many kinds of fruits and vegetables, some grown on their own land and others imported from different parts of the United States. It is a great tourist attraction because it is large and offers a good variety. During the appropriate seasons, people can pick their own strawberries, peaches and tomatoes. Lewins and Davis

Peach Farm, in Mount Sinai, are the largest peach farms in Suffolk County. Davis also offers an impressive selection of apples in the fall.

Further east on Sound Avenue, in the farm belt of Suffolk County, there are numerous small and medium sized farm stands, each with its own character and variety. The Young Farm Stand is fashioned after a country store one might find in the Pennsylvania Dutch Country. Although they sell a limited amount of fruits and vegetables, they tend to lean more towards a gift store. There is a very good selection of calico prints and items, such as patchwork quilts, made from them.

Briermere Farm is known for its home-made baked goods. Fresh pies made from fruits in season, raisin bread and tea cakes adorn the shelves as do an assortment of preserves. They also have peach and apple orchards and vineyards, and sell a variety of vegetables and potted plants.

One of the smaller stands that is particularly charming is Sunburst Acres. All summer long, they have a plentiful supply of vegetables which are picked several times a day to insure freshness.

Near Mattituck, Sound Avenue becomes a four-lane road, and not too far from where this change occurs, there is a raspberry farm. The farm is located on the left going east between Mattituck and Cutchogue. During July people can pick their own, which is much cheaper and more sporting than buying raspberries in the grocery store.

Mentioned above is just a sampling of the many farm stands found on Sound Avenue from its beginnings off Route 25A to its termination in Greenport.

The growing season on Long Island is filled with variety and often begins as early as May. Typical summer vegetables include tomatoes, corn, zucchini, summer squash, cucumbers, beets, peppers, eggplants, peas, onions, green beans, wax beans, lettuce and cabbage.

June is strawberry season and many farms on Sound Avenue and elsewhere allow visitors to pick their own. Unfortunately, this week will probably be the last for the strawberries although some farm stands say their might still be some next week.

August and September are noted for peaches, and both the yellow and white variety are available on Long Island. In the fall there are many varieties of apples and fresh apple cider.

Besides apples, the fall also produces pumpkins, acorn and butternut squash, cauliflower, broccoli and brussels sprouts. The infamous Long Island potato is plentiful the year round.

## Indian Dance Troupe Presents Tagore Drama

One of the most unusual programs ever presented at BNL will be seen and heard on Friday, July 11, in Berkner Hall when Suchitra Mitra and her dance company, known as Rabisirha, will appear in Tagore's Dance Drama "Tasher Desh" (Land of Cards).

The company of 16 dancers, six vocalists and five instrumental musicians has been touring North America for the past month and has been very well received. They will perform at BNL just before returning to India.

Suchitra Mitra is one of India's best known and most respected singers, and last year was awarded the highest honor in the arts that her country offers, "Padmashree." This honor recognized not only her singing but also her sensitive interpretations of the songs and poems of Tagore.

Tasher Desh was originally conceived by the renowned Nobel laureate poet Rabindranath Tagore as a short story, almost a half century before it first appeared in its present dramatic form. It is a satire on the error of living too closely by conventions.

The drama opens with a prince, who symbolizes youth, disclosing to his friend, a merchant's son, his feeling of utter boredom with the life of ease he was leading and his desire for an adventurous voyage across the seas. They set out on their voyage and end up shipwrecked on an unknown island.

This island is inhabited by people who are drawn in the image of playing cards, and labeled according to an unchangeable code of rules. They can perform only rigid movements as if they have no will of their own. They also seem to be quite content with an existence in which all actions are controlled by a fixed code of conduct sanctified by tradition. The presence of the prince creates an upheaval in the thought processes of the islanders. The drama describes how the prince inspires a new awareness of the beauty of nature in these people. The maidens start singing songs of love. Clouds appear to bring mystic messages to them from beyond the horizon. A princess is seen busy gathering flowers in the forest which was almost unheard of before. They start dreaming of romance. The drama ends when the king of this new island is finally overcome and freed from the age-old bonds of rigid conduct, and all the people join in singing the song of emancipation.

Although the songs are in Bengali, there is additional spoken commentary and this will be in English. Even those who do not speak Bengali should be able to follow the story line easily.

The program will be sponsored jointly by Dowling College, the India Association of SUNY at Stony Brook, World Yoga Society, Inc. and BERA. It will begin at 8:30 p.m. Admission will be \$2.00 for students and \$3.00 for others.

## New Orleans Extra

Debaprasad Majumdar of DAS, and Anthony Judd, Cambridge University, presented a paper at the New Orleans Annual Meeting of the American Nuclear Society. Majumdar's paper was titled "Failure Irradiated LMFBR Fuel Pins in a Transient Overpower Accident." To celebrate the favorable reception to his research, Majumdar purchased a straw hat to wear going home from the New Orleans conference.

## Tennis Tournament News

Reminder - tennis players are reminded to sign up for the annual BNL tennis championships starting the weekend of July 12-13. Competition is in men's and women's singles, doubles and mixed doubles, depending on the number of entries. Sign up now at the BERA Sales Office in Berkner. The deadline is July 9, and there is a 50¢ charge for each participant per event.

## A Study In Chemistry

Nina Marie Le Noir, a junior at Hollins College, is spending this summer working with Herb Bernstein and Larry Andrews in the Chemistry Department. She is one of 64 other students participating in the Summer Student Program. She will be working on the CRYSNET Project, writing computer programs for the three-dimensional construction of molecules from known fragments. Above, Herb Bernstein acquaints her with the CRYSNET terminal. This is not Nina's first experience with a computer or a large scientific laboratory. She is systems manager of the PDP 8 at her college and she spent six weeks at Holifield National Laboratory doing molecular spectroscopy in the Physics Department there. Next year she will launch an independent research project using fluorescence to study protein structures. Although she attends school in Roanoke, Virginia, Nina grew up in Haddonfield, New Jersey. She plans to go to graduate school in chemistry and pursue a research career. She also plans to stick with the computer which she feels is an important tool for chemistry.

**An International Feast**

Marvelous gourmet dishes (above left) including bouef bourguignon, coq au vin, Chinese spare-ribs, lobster and chicken salad, Swedish meatballs, arroz con pollo, curried chicken, chili, beef roulades and much much more were all too tempting for the diners to resist. "Diet" was an unheard word at the 12th International Cooking Exchange Dinner. Henry Boyd (above right), wine steward for the evening, looks over the supply of dinner wines. Cooking Exchange Chairperson Jane Love (far right) shares a taste of an international delicacy with the committee members (left to right) Rosemary Jewett, Ruth Dimmler, Lela Radeka and Judy Mills.

**Bicentennial Stamps & Medal On Sale**

The American Revolution Bicentennial Administration has announced the availability of the 1975 official Bicentennial medal and commemorative stamps to be on sale through July 31, 1975.

The medal is part of a series of official Bicentennial medals issued under the authority given by the Congress of the United States. The price of the medal and stamps is \$5.00 for each set ordered. Orders are limited to 4 sets per order form.

The medal is in bronze and honors Paul Revere and his famous midnight ride of April 18, 1775. The reverse of the medal honors the famous Minutemen who fought at Lexington. The stamps commemorate the anniversary of the formation of the Armed Forces in the U.S. 200 years ago.

Orders should be sent to the American Revolution Bicentennial Administration, Post Office Box 1976S, San Francisco, California 94101.

**Film Service July 4th Special**

A special sale day is being planned for Wednesday, July 2 at the BERA Sales & Services Office in the Cafeteria.

On that day only you will be able to buy at cost the film you will need for all your holiday picture taking. For example, pick up a roll of C 126.12 for \$1.05, or a roll of C 126.20 for \$1.30, or a roll of K 135.20 for \$1.45, or a roll of K 135.36 for \$2.10. Because of these low prices, the number of rolls that can be purchased by an individual employee may be limited.

Make it a point to take advantage of the sale prices being offered.

**Upton Nursery School**

The Upton Nursery School is now accepting applications for enrollment for September classes.

The school is a cooperative nursery school for 3 and 4 year old children of all Laboratory employees. Those residing on or off site are welcome.

The children attend school 2 or 3 mornings a week and participate in a varied program including art, music, outdoor activities and field trips.

Our teachers are professionals, and our classes are small enough to give each child individual attention. Parents cooperate in running the school and assist the teachers at each session. This enables us to keep the tuition fees low.

For further information regarding our school please call our enrollment chairman, Linda Lynn at 924-8329.

**Reminder For Parents**

This is a reminder that June 27 is the deadline date to register your child or children in the Children's Summer Program.

Applications are available at the BERA Sales & Services Office in the Cafeteria or at the Personnel Office.

Call Ext. 2873 for information.

**Call For Bottles Is Off**

The Department of Applied Science no longer needs those brown bottles you've been cleaning and dropping off in the dumpster at the corner of 6th Street and Brookhaven Avenue.

The supply they have is large enough for the new project, and many thanks to all those who helped with their vitreous contributions.

**Softball**

Dick Ruffing

**Brookhaven League**

Metallurgy put together a long string of singles, aided by several walks, to score all of its 14 runs in the fifth inning for a surprising 14-9 win over the Old Timers. The accuracy of Bob Jones' pitching held the Old Timers to 7 runs through the fifth inning and relief pitcher Jim Rutherford allowed only 2 runs in the seventh inning to hang on for the win.

Harold Marshall and Frank Strelecki accounted for all the runs batted in as the Blue Jays defeated the Ravens 5 to 1. Very little hitting by both teams and good defense by the Blue Jays helped them to their fifth straight win of the season.

**National League**

Ken Asselta hit a home run and made some outstanding plays at shortstop to help the Six Pax to an 11 to 5 win over the Dirty Sox. Walt Brooks had a home run for the Sox.

The Hawks scored 15 runs in the first inning and went on to defeat the Medical team 24 to 6.

The third game of the evening went to the Bubble Boys by a score of 12 to 1 over the Circuits. The Bubble Boys gave up first one run and three hits to the Circuits.

**Laboratory League**

The Dags put together good hitting by Bob Place, Joe Klemish and Glen Snate to defeat the Streakers 17 to 14.

In the other game of the evening the Phoubars squeaked past the Charlie Browns 19 to 18. Rich Chester had a home run and Tom Jesaitis hit his second grand slam of the season.

**University League**

The Oh Kays, behind the pitching and hitting of Kay Hunt, defeated the Diamonds 9 to 4 to remain undefeated with a 5 and 0 record. Ken Sutter made a great catch in center field for the winners.

George Morgan and Danny Collinson both hit home runs as the RBI's defeated Our Gang 10 to 5.

**REMEMBER  
BNL BLOOD DRIVE  
JUNE 26 - 27  
HAVE YOU PLEDGED?**

**June Retirees**

Howard F. Downs, a Technician in the Accelerator Department, came to the Lab on July 9, 1962. He will retire on June 27, 1975.

Charles A. Mignerey, an Electrician in Plant Engineering, will retire on June 30. He has been a Lab employee since December 1, 1954.

John M. Kenny, who came to the Lab on September 23, 1957, will retire from the Lab on June 30. He has been a Firefighter in the Health Physics & Safety Division.

Mrs. Shizuko Yagi, an Associate in the Biology Department, will retire on June 30. Mrs. Yagi has been with the Lab since October 5, 1964.

**Placement Notices**

Each week the Personnel Office lists personnel placement requisitions, currently being processed. The purpose of these listings is, first, to give notice of all non-scientific staff positions being filled and, second, to give employees an opportunity to request consideration for themselves through the Personnel Office. In filling vacancies, the Laboratory's objective is to give first consideration to present employees, as follows: employees within the immediate group having the vacancy, employees within the department or division, employees within the Laboratory as a whole.

For further information regarding a placement notice, or to request consideration for an available position, contact Supervisor, Personnel Placement & Development, extension 2874 or 2882.

134. TECHNICIAN - Minimum A.A.S. degree or equivalent in electronics with strong background in design and construction of printed circuits used in electronic detector systems. Experience in wire chamber technology and computer interfacing very desirable. Physics Department.
