

Bringing The Best Out of People

What images come to mind when you think of communicating or communications? The telephone, the memorandum, satellites beaming television programs around the world? They are significant communication tools, but the most important form of communication is how people deal directly with each other.

Awareness is the thread that runs through several new training programs being offered by the Personnel Division. The goal is to achieve a heightened awareness of oneself and one's professional skills and then to put that awareness into practice.

Robert D'Angio, who is in charge of training and development programs, has started several such programs this past year which are relevant to a broad cross section of employees.

Probably the best known is assertiveness training. To date, about 175 employees have found this training to be a unique ex-

perience. They have been invited to find out how well they listen, what their words are really saying and what their body language is telling others. With the guidance of an experienced consultant, they discover this by speaking up.

Robert D'Angio

perience. They have been invited to find out how well they listen, what their words are really saying and what their body language is telling others. With the guidance of an experienced consultant, they discover this by speaking up.

Problems arise when people don't say what they really mean. Aside from the obvious misunderstandings, D'Angio says an employee's unexpressed dissatisfaction, for instance, can be expressed by coming in late, or just wasting time on the job. Getting people to say what's on their minds often leads to an improved employee and improved performance on the job.

Of course, the workshops are not intended to be long-term solutions to communication problems. They are designed to

identify some problems and to offer techniques to deal with them.

When the program started last spring and for the first seven sessions, all the participants, but two, were women. In the latest session, which concluded about two weeks ago, half the participants were men. Although the programs were initially founded to help women who are traditionally less outspoken than men, experience has indicated that many men can also benefit from this training. As Francine Berger, the consultant who is conducting the course, says, "Women don't have to be passive and men don't have to be aggressive. Both should be allowed options in behavior."

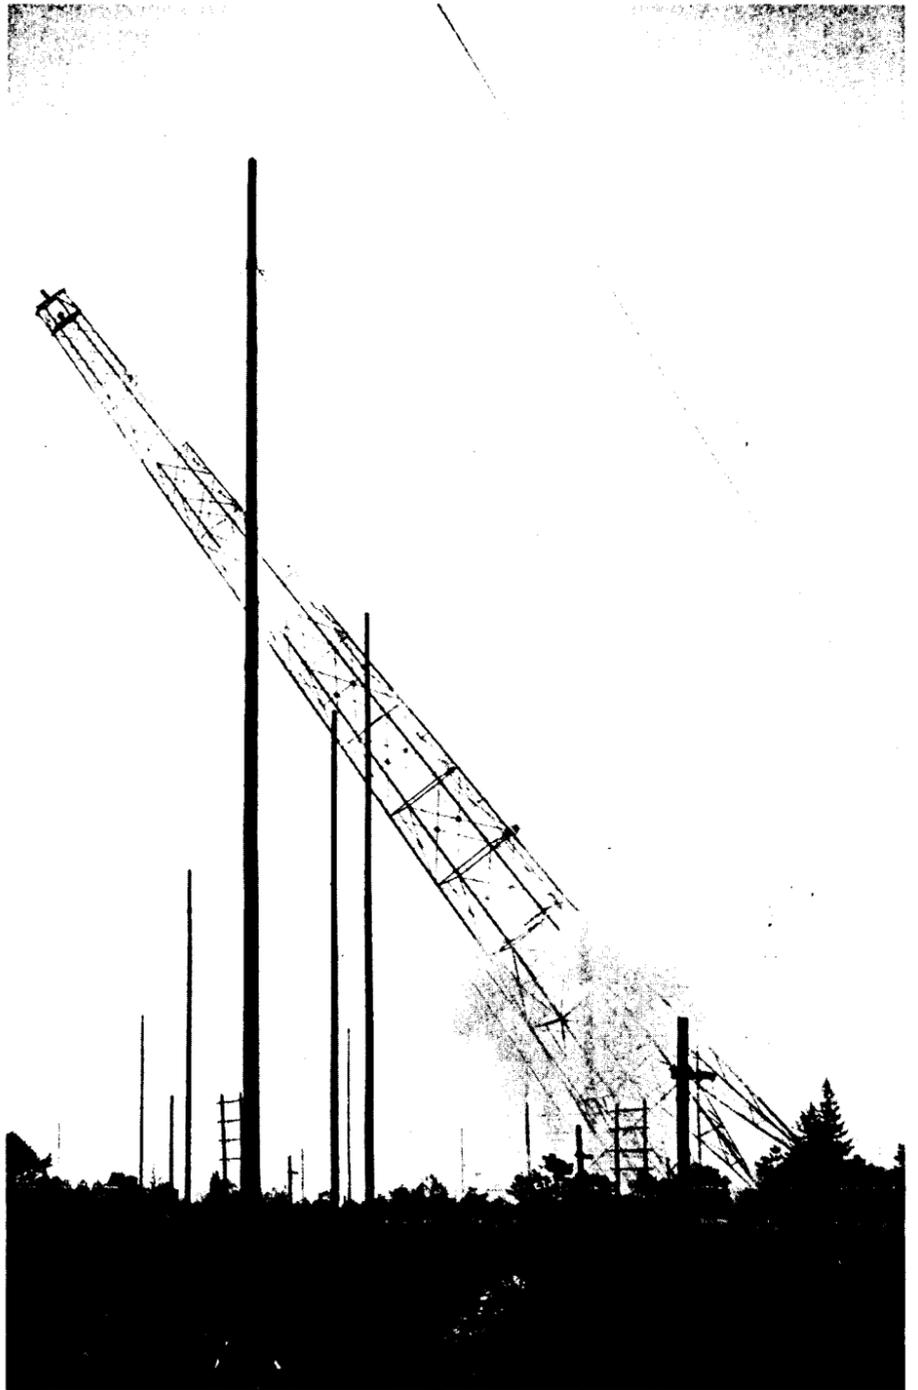

Speaking up, but on a more structured basis, is the objective of another new program - making effective presentations. Also under the tutelage of Ms. Berger, the five-session course instructs selected employees in the art of constructing and giving a speech. Participants are guided through intensive training in speaking before an audience, from an impromptu two-minute talk to a more formal 10-minute presentation. Each talk is videotaped and reviewed not only by the instructor, but by the other participants. Again, any program that helps employees present themselves and their work more effectively, can only be helpful to the Laboratory. The effective presentation courses are expected to continue on a permanent basis.

D'Angio, who did his undergraduate work at St. Johns University and postgrad at Hofstra, was training director at Irving Trust Company in New York for eight years before coming to Brookhaven last January. He has personally conducted management training programs in several departments since his arrival. These programs are designed to help supervisors deal more effectively with employees; in short, to accept the responsibility of being supervisors. Because of the nature of the Laboratory's work, many supervisors must continue their technical activities after assuming supervisory responsibilities. Therefore, any assistance that a management training program can provide is well received.

D'Angio does not work with a set formula that applies across the board. He works by department. And to help him deal realistically with problems that may be peculiar to a department, he consults closely with the people in the area before setting up the program.

Also under way is a seminar for scientific, professional and administrative personnel to improve their technical reading skills. These seminars are geared not only to increasing reading speed, but to getting the

Zero Hour

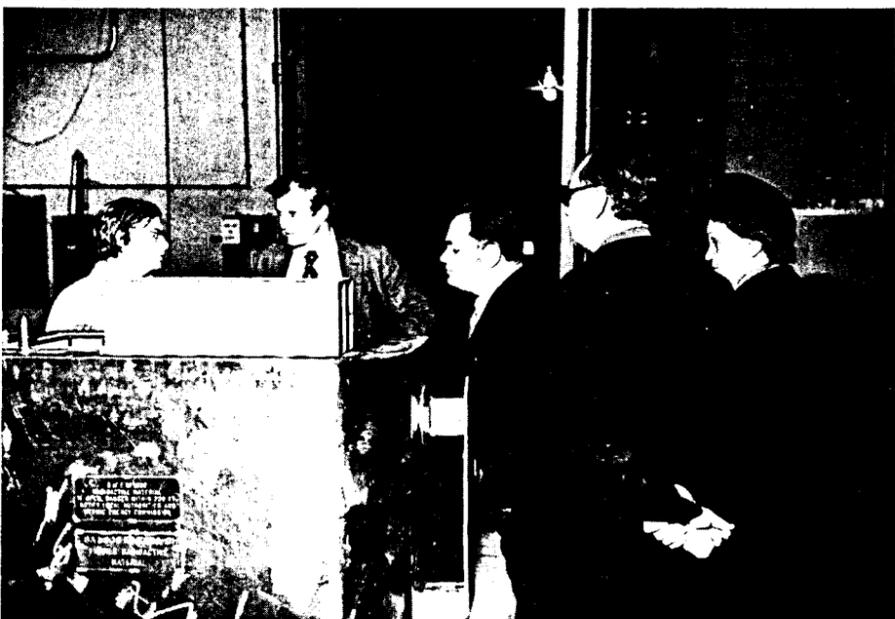

On Tuesday we went to Rocky Point to visit an old neighbor for the last time. Shortly after 2:30 p.m., the one remaining tower of the twelve giant RCA transmitter antenna towers fell to earth with a mighty bang. It just didn't fall down, it was helped with plastic explosives because its days of usefulness were over. The tower which took two months to build became a heap of scrap metal in just a few seconds.

Fifty-six years ago the twelve towers were built to form the first major communication center linking the United States with Europe, Central and South America. President Harding threw the switch that put "Radio Central" into operation on November 5, 1921.

In those days "long waves" were needed for long distance communication. With the advent of the vacuum tube and short wave transmission, and then satellites, the forest of towers at Rocky Point gradually became obsolete. In the 1950's and early 1960's, 11 of the towers were demolished.

Since the days when such famous scientists as Marconi, DeForest, Steinmetz and Tesla were regular visitors to the Rocky Point site, science and technology have expanded on all fronts to a degree unthought of in 1921. The Laboratory is representative of this vast expansion. When Brookhaven was founded 30 years ago the Rocky Point station was already fading into history. With the toppling of the last RCA tower, the Laboratory's meteorology tower, at 420 feet, is unchallenged as the tallest such structure on Long Island.

Energy Is Problem Of Mutual Concern

At left, David Rorer (Reactor Division) shows some members of a Russian scientific delegation shipping casks used to transport spent fuel from the HFBR. During the course of a day-long visit to the Laboratory on December 12, the Russian scientists also toured the AGS and held discussions with staff members of the Department of Energy and Environment. The visitors were the Working Group on Energy Information and Forecast under a US-USSR exchange agreement.

Christmas Concert

The Town of Brookhaven and the BERA Concert Group will sponsor a free concert by the Long Island Symphony Chamber Orchestra and the National Chorale in Berkner Hall at 8:30 p.m. on Wednesday, December 28. The program will include Mozart's Coronation Mass, excerpts from Handel's Semele, and traditional Christmas music.

The Long Island Symphony Chamber Orchestra is an ensemble of seventeen outstanding musicians from the parent Long Island Symphony. The National Chorale is a well known group which performs in Lincoln Center in the course of its annual tour.

As usual, there will be refreshments for the audience and performers following the concert. Admission is free and no tickets are required.

Nominating Committee

The BERA Executive Board has appointed a Nominating Committee to select the slate of candidates for the 1978 BERA election. Members include:

- David Cox - Physics
- Maurice DuBois - Fiscal
- Richard Eggert - AUI
- Stephen Gracia - Central Shops
- Colleen Holland - Personnel
- Georgia Irving - Energy & Environment
- Harold Marshall - Biology
- Marion Newton - Accelerator
- Rita Straub - Medical
- Madeline Windsor - Tech. Information

The committee is now considering possible candidates and will meet on Tuesday, December 27, to present the selections. Any employee wishing to make suggestions for candidates may do so by contacting one of the committee members.

Speakers Bureau November

Max Small (DEE) - November 3, Public Water Quality Conference, Montpelier, Vermont, *BNL's Water Recharge Program*.

Marty Plotkin (Accel.) - November 15, Jewish Temple, Merrick-Bellmore, *Careers in Science*.

Ed MacDougall (DNE) - November 20, Marlboro College, Marlboro, Vermont, *Home Built, Low Technology Solar Greenhouse*.

December

Lew Jacobson (Pl. Engr.) - December 1, School Board & Administrators of Brookhaven Township, *Energy Conservation in Existing & New Buildings*.

R.C. Anderson (DO) - December 2, Temple Sinai, Lawrence, N.Y., *Energy Choices for the Future*.

R.C. Anderson (DO) - December 14, Parent Teacher's Association, Lakewood, New Jersey, *Energy Opinions*.

Training Programs (Cont'd.)

"meat" out of what one is reading and then retaining it. For those who must plough through quantities of technical material every day, this special training is of considerable assistance. Because of the overwhelming response to the first announcement of this program, it is expected that additional sessions will be scheduled.

Also under consideration in Personnel is a program to improve technical writing competence, and a seminar for secretaries.

In addition, D'Angio is available to set up "spot" training programs. Such programs can be developed to meet the specific needs of a department or division.

Participants who have replied to questionnaires about the value of the training programs have been enthusiastic in their response. They have been stimulated to try things they formerly shield away from, to think about what they are doing and saying, and to develop closer relationships with fellow employees.

Reports Available

The following reports are now available to the Laboratory Staff and to Affiliates of the DOE, AUI, and NRC. Others may purchase the reports from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. Staff members should call Ext. 3484:

Annual Report for Fiscal Year 1976. (July 1975 - September 1976). Brookhaven National Laboratory Regional Energy Studies Program. P.M. Meier

BNL 50694 \$6.00
Waste Management and Proliferation: An Assessment of Technologies and Policies Relevant to Nuclear Power. Final Report. June 1975 - March 1977. M.K. Goldstein, et al

Call For Talent

Our theatre group will be presenting two one-act plays over the last weekend in January. We really would like to get some new people involved. Any talent in set design, construction, make-up, lighting, stage managing, etc. would be very welcome. We also need a producer for these plays, so if your talents lie in that direction, please give us a call. Call any of the following people to volunteer your services; Bill Love (Ext. 3996), Rita Straub (Ext. 3618), or David Dew-Hughes (Ext. 3501). Keep the post holiday blahs away and join our group.

Tune In!

Question:

I would like to ask whether it is really necessary to close the swimming pool for the entire month. For those of us for whom swimming is an important part of their physical fitness programs, it would be very advantageous if this period could be shortened.

I would also like to suggest that, during the shutdown, provisions be made to make it possible to rope off a longitudinal section of the pool. This would make the use of the pool more convenient and more pleasant for those who want to swim as well as for those who want to play by avoiding interference between both groups.

Answer:

We agree that a one-month loss in any of our physical exercise facilities is a major inconvenience to many employees. However, there is an accumulation of maintenance jobs that must be done in the shortest time possible considering the fact that recreational facilities should not and do not always have top priority. When it is practical for us to open the facility before the announced opening time, we always try to do so.

Regarding your suggestion that we establish longitudinal swimming lanes in part of the swimming pool, we are advised by our pool experts that this would be contrary to good pool practice in a facility of its size and use.

We regret the inconvenience necessitated by maintenance and hope that you continue to enjoy the use of this facility while it is available.

—J.S. Washburne

Cafeteria Menu

Week Ending Dec. 23, 1977

Monday, December 19

Tomato bouillon	
Franks & beans	1.10
Barbequed fresh ham & 1 veg.	1.35
Hot deli - Pastrami	

Tuesday, December 20

Cream of chicken soup	
Chicken croquettes & 1 veg.	1.15
Chinese pepper steak on rice	1.30
Hot deli - Knockwurst	

Wednesday, December 21

Christmas Special

Choice of:
Small juice or cup of Vegetable Beef Soup
Standing Steamship Round
or:
¼ Roast L.I. Duck w/Stuffing

Choice of:
Baked potato w/Sour Treat
& Stringbeans Almondine
or:
Buttered Noodles & Glazed Carrots

Plain Jello or Pie
Small Beverage
\$2.35 Tax Included

Thursday, December 22

Split pea soup	
Corned beef & cabbage	1.35
Beef liver & onions w/1 veg.	1.15
Hot deli - Roast Beef	

Friday, December 23

Pot luck

Teaching Positions

A few part-time teaching positions are open in the coming semester, starting about January 20, in the Physics Department at Suffolk Community College. The courses involved are mechanics, electromagnetism and waves at the first or second year college level. Most of the positions are available during the day, although there is the possibility of one evening assignment. Applicants must have at least a master's degree in physics. Interested persons should send a resume and a letter describing their current position to:

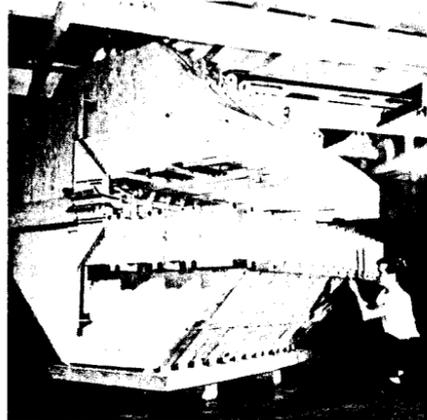

Dr. Mehdi Habibi
Physics Department
Smithtown Science Building
Suffolk County Community College
533 College Road
Selden, N.Y. 11784

For further information, Dr. Habibi may also be reached at 233-5281.

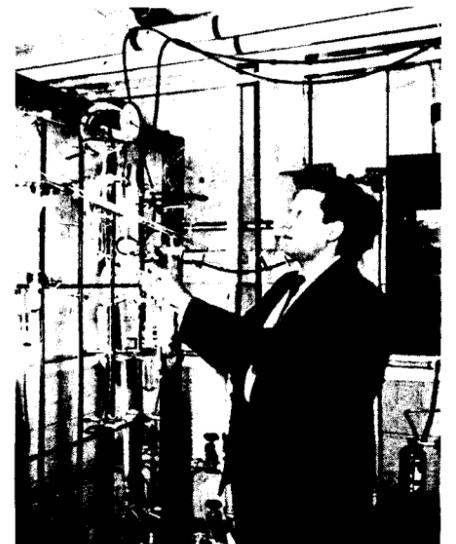

A Chorus Of Angels

On Wednesday, December 21, at 12:15 p.m., the BERA Christmas carolers, under the direction of John Weeks, will be singing a selection of old favorites at the Cafeteria. As is their custom, they will again present their program later in the day at the Medical Research Center and at the Director's Office.

The Way We Were (from the BNL scrapbook)

James Rebman, Accelerator, 1949

Lewis Friedman, Chemistry, 1948

Alan Thorndike (right), Physics, with former staff member, R. Safford, 1948.

Frank German, Biology, 1948

Holiday Food Service

The Vended Food Service in Building 912 will be open at all times, and will be serviced regularly throughout the Christmas and New Year's Holidays.

The Center Club Snack and Beverage Bar will be closed on Friday, Saturday and Sunday, December 23rd, 24th and 25th, reopening at 5:00 p.m. on Monday, December 26th. The Center Club will also be closed on Saturday and Sunday, December 31st and January 1st, reopening at 5:00 p.m. on Monday, January 2nd.

The Cafeteria will close at 2:00 p.m. on Friday, December 23rd. On Saturday and Monday, December 24th and 26th, and Saturday and Monday, December 31st and January 2nd, Snack Bar Service will be available from 9:00 a.m. until 2:00 p.m. The Cafeteria will be closed on Sunday, December 25th and Sunday, January 1st.

The Coffee Truck will not make its rounds on Friday, December 23rd, due to the half holiday.

Christmas Hams

Smoked hams (bone-in) are now available from the Cafeteria. Give yourself a holiday and leave the cooking to them. Call extension 3541. Price: \$1.59 per pound.

In Memoriam

Anthony Semplicino, a Design Engineer at the AGS for 17 years, died on December 8, 1977, after a long illness. He joined the Mechanical Engineering Division on February 26, 1957 and left the Laboratory in April 1974 because of a physical disability. He is survived by his wife, Betty, who is employed in the Contracts and Procurement Division, and a daughter, Valerie. They reside in Wading River.

Christmas Tree Tips

•When you bring your tree home, place it in a bucket of water outdoors or in a cool place until you are ready to decorate it. Exposure to snow or rain won't hurt it, but heat will dry it out and cause the needles to drop early.

• When you're ready to bring it indoors, make a fresh cut across the trunk about an inch above the original one. The tree will absorb more water.

• Place the tree in a container or tree holder filled with water. Never place the tree near a fireplace.

• Keep the cut surface covered with water at all times. A tree in a warm room may use a pint of water a day. The larger the container the fewer times you have to fill it.

Stony Brook Events

Community Art Exhibit: Oils, graphics, sculpture and other art work at Informal Studies Community Art Gallery, room 118, Old Chemistry Bldg., through December 23. Hours are Tuesday - Saturday, 12:15 p.m. to 5:15 p.m.

Play: George Buechner's "Woyzeck" tonight and Saturday, 8 p.m., Calderone Theatre, Bldg. B on South Campus. Tickets \$4, senior citizens with I.D. \$2. Reservations call 246-5681.

Concert: Dorian Schwartz, oboe, tenor Sigmund Seigel, December 16, 8:30 p.m., Lecture Hall 105.

Concert: Stony Brook Chamber Singers and Chamber Orchestra will perform music by Wagner, Verdi, Monteverdi, Haydn, December 18, at 3 p.m., Administration Bldg., 2nd floor lobby.

Craft Fair: Such handmade crafts as pottery, jewelry, handblown glass, leatherwork, exhibit and sale, Dec. 19 - 21, 9 a.m. to 6 p.m., Stony Brook Union Main Lounge.

Messiah Sing-In: Six conductors and a chamber orchestra, will lead a community Sing-In of Handel's Messiah (Christmas portion) December 20 at 8 p.m., Chorus Room, basement of Fine Arts Center phase I.

Letters To The Editor

To the Editor:

I wish to say "thank you" to those who attended and contributed to the gift at my retirement party some time ago and especially to those who made it possible. It was an event I shall always remember.

My wife and I also wish to extend to all our best wishes for a Merry Christmas and a Happy New Year.

Sincerely,
Ed Hagelberg

To the Editor:

On Tuesday, December 6, 1977 my car, a 2-tone green with a blue stripe VW bus, was struck, while it was parked in front of the cafeteria building. I would appreciate any information as to the identity of the other vehicle and/or the driver. Please give the information to Rae Stelts, BERA Film Service, in the cafeteria building, Ext. 3347.

Rae Stelts

Rambling Around

These are bits and pieces picked up from here and there with occasional observations by the Editor:

● In the November issue of *Physics Today*, R.P. Boas, Editor of *The American Mathematical Monthly*, submitted the following verses, which have been making the rounds in mathematics circles, about the pitfalls present in correctly spelling the names of many prominent scientists:

Wep for the mathematicians
Posterity acclaim:
Although we know their theorems
We cannot spell their names.
Forget the things you though you knew —
Henri Lebesgue has got no Q
The Schwarz of inequality
and lemma too, he has no T
The "distribution" Schwartz, you see
Is French, and so he has a T
Hermann Grassmann—please try to
Spell his names with 2 N's, too
Although it almost rhymes with Birkhoff
Two H's grace the name of Kirchhoff
Fejér, Turán, Cesàro, Fréchet—
Let's make the accents go that way,
And as for (Radon-) Nikodým,
Let's give his accent back to him.
But there is one I leave to you,
Whatever you may choose to do:
Put letters in or leave them out,
Dress them with accents round about,
Finish the name with -eff or -off,
There is no way to spell ϕεόρμινεβ

● Per Dahl came across this illuminating sentence in *The Civic Culture*, by Gabriel A. Almond and Sidney Verba, p. 20;

"A parochial political culture that was congruent with its structure would have a high rate of cognitive orientations and high rates of positive affective and evaluative orientations to the diffuse structures of the tribal village or community."

Placement Notices

The Laboratory's placement policy is to select the best qualified candidate for an available position, with consideration given to candidates in the following order of priority: (1) present employees within the department, with preference to those within the immediate work group; (2) present employees within the Laboratory as a whole; and (3) outside applicants.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all nonscientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment, as indicated below. Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Personnel Placement Supervisor, Ext. 2874 or 2882.

OPEN RECRUITMENT: Opportunity for present Laboratory employees and outside applicants.

437. **TECHNICIAN (WEEKLY OR MONTHLY)** - Requires an AAS or its equivalent in electronic technology and background in the assembly of integrated and solid state circuit systems and their maintenance. Physics Department.

438. **TECHNICIAN** - Requires background in vacuum hardware, simple electrical work and the use of machine tools. Background in electronics and the use of a mass spectrometer is desirable. Chemistry Department.

439. **OFFICE SERVICES ASSISTANT** - Requires excellent communication skills. Background in personnel records processing and maintenance would be desirable. Personnel Division.

440. **KEYPUNCH OPERATOR** - Part-time position. Administrative Systems and Data Processing Division.

441. **STATIONARY ENGINEER, SENIOR** - Plant Engineering Division.

442. **CABINETMAKER A** - Plant Engineering Division.

- 68 FORD - ¾ ton pickup, 8' bed, 71 motor & trans, new brakes, starter, alternator & 8 trk fm stereo, runs gd. \$450. 929-4133.
- 69 FORD FALCON - Wagon, 72-6 cyl eng, auto trans, p/s, am, cb radio. \$800. 281-4140.
- 69 BUICK SKYLARK - 2D HT, V8, auto, ps/pb/ac, gd cond. \$450. C. Barrett, Ext. 4551, 325-0013.
- 69 FORD - Galaxie, 4 dr, ps/pb/ac, must sell. \$300. Steve, Ext. 3822, 929-6527.

Gym/Pool Lockers

The locker rooms in the gym/pool complex are again scheduled to be fumigated on Wednesday, December 28 at 8:30 a.m.

All users are requested to clear out all lockers and leave the doors wide open.

Please note that access to the gym is during the hours of 11:30 a.m. to 1:30 p.m. and 5:00 p.m. to 9:30 p.m. Therefore, we urge you to open your lockers before 9:30 p.m. on Tuesday the 27th. The cooperation of all concerned would be appreciated.

Bowling

Red League

Only three more nights left in the first half and it is still a very close race. The Sandbaggers jumped into first by taking the Pick-Ups 11-0. K. Riker had a 568 scratch and now has a 182 average. R. Meier had a 201/560 scratch. The 76'ers lost to the Old Timers II 8-3. J. Connelly had a 215. The Designers came out on top of the Old Timers 7-4. C. Zavesky had a 207 and W. Reams a 204. The Bubble Boys took the Sparks 8-3 in their match. The Anachems won over the Dyno-Mites 8-3. T. Prach bowled 210 and E. Gill 207. The Cosmos split 6-5 with the Pinball Wizards and the Freon Loaders lost their match with the Trouble Shooters 7-4. The sixth place team in the Red is still only 11 points out of first and anything can happen by position night.

Pink League

Coming into position night soon and the race is very interesting. The Pinsplitters are in the lead by one point, second are the Odd Balls and the remaining teams stayed in last week's positions.

Some ladies had a good night. . . Lindora Boyd 175, Jean Matkovich 166/161, Grace Fales 164, Colleen Holland 163, Marie Grahn 162, Marge Stoeckel 162 and Sue Vander Kolk 162.

Purple & White League

The Sea Gulls remain in first place by one point with the Jokers right behind and The Good Guys in third trailing by three points.

Dick Murgatroyd had high game for the men with a 204 and Ben Belligan high series with a 578. Freddie Gileta had the high game for the ladies with a 189. Other high games were Ben Belligan 201, Charlotte Schutte 188, Gail Thompson 169, Sharon Smith 160.

Green League

The Blue Jays still seem to hang on to first place even though they could only manage to take four points from the Got-A-Hit-Ums who took seven. For the Blue Jays, Herm Haller bowled a 221. The Dyno-Mites are clinging to second place as they took three points. The Old Times II took eight while the Sparks took three points. The Trouble Shooters took seven from the Freon Loaders while the Pinball Wizards took five from the Cosmos. The Pick Ups got dumped for eleven with Frank Short rolling a nice 213.

Gymnastic Lessons

Plans are being made to hold gymnastic lessons each week at the Recreation Building. If enough interest is shown, classes for children, ages four through six, will be held in the afternoon, and classes for adults in the evening.

If you are interested or would like more information, call Claudia Meyer, 345-3134.

Gift Suggestion

For a practical and welcome Christmas gift, why not consider giving a fire and smoke detector?

BERA has them on sale at the Sales Office in the cafeteria building priced at \$30 each.

Participation Awards

Effective Thursday, December 15, from noon to 12:30 p.m., and continuing the third Thursday of each month thereafter, the BERA participation awards will be distributed at the Recreation Summer Office in the east end of the gymnasium building.

Volleyball

Employees' League

On December 7, Phoenix swept Biology: 21-1, 21-11, 21-9. The Bumps edged out the Cool Tools: 21-11, 3-21, 21-15. The Atom Spikers beat the Easy Aces: 21-12, 9-21, 21-19.
