

## TRANSVAN: The Ride With A Future

How much is gas going to cost you this year? Have you ever figured out all the other expenses involved in driving your car to and from work? One thing is sure, none of these costs will decrease and it now appears that gasoline may again be in short supply.

In order to deal with the future before it deals with us, the Laboratory will undertake a pilot vanpool program in an attempt to conserve energy and your money. Vanpooling is a relatively new concept in private mass transit which is rapidly gaining in popularity throughout the country. Public mass transit in this area is nil. TRANSVAN, as the Laboratory's program will be called, may very well become the best way to commute to work. Here's how it works:

### In Brief

Initially, AUI will purchase one or several 12 passenger van to transport employees between selected areas and the Laboratory, on one round trip per day, five days a week. The number of vans purchased will

depend on employee interest in the program. If the pilot program is successful, more vans will be added to transport employees from other areas. Conversely, if insufficient interest is shown, the program will be dropped.

The driver of each van will be selected from among employees expressing interest. In return for services, she or she will ride free and will have personal use of the van after work and on weekends.

The routes chosen will be from among areas of greatest employee concentration and where the most employees have indicated they wish to participate in the program. Passengers will share fixed and variable expenses through the payment of a monthly charge calculated on the distance from the Laboratory. Pickup points will be determined by the driver and passengers; depending on the time involved. In some cases, door-to-door pickup may be possible and in others, a central location might be more feasible.

### Comparable Driving Costs

DOE has developed a vanpool program for its employees at Washington, D.C. and Germantown, Md. Following are the figures they use to show the expenses involved in driving various size cars, in driving alone, carpooling and vanpooling:

"Fixed" costs such as insurance, auto loans, registration, license fees and inspection, must be paid even if the car is idle. The remaining expenses are "variable" - gas, oil, tires, maintenance, parts, accessories and parking. These will depend upon the number of miles driven, the type of vehicle and the way it is operated. The table below shows the approximate average cost-per-mile of operating various size cars. The figures are based on 1976 U.S. Department of Transportation (DOT) statistics adjusted to 1978 values.

Car Size	Fixed Cost	Variable Cost	Total Cost
Standard	7.7¢/mile	13.2¢/mile	20.9¢/mile
Compact	6.3	10.7	17.0
Sub Compact	5.5	9.2	14.7

The following table, also using DOT figures, compares the average costs of driving alone, carpooling and vanpooling. The vanpool figures are based on a \$9,000 van, including all fixed and operating costs.

Daily Commuting Distance (Miles)	Drive Alone (1)	Carpool with:			Vanpool with:		
		(2)	(3)	(4)	(9)	(12)	(15)
20					8.5¢	6.4¢	5.1¢
40					4.9	3.7	3.0
60	20.9¢	10.5¢	7.0¢	5.2¢	3.7	2.8	2.2
80					3.1	2.3	1.9
100					2.8	2.1	1.7

### The Driver

The driver of a TRANSVAN is the pivotal person in the success of the program and his or her selection will be carefully considered. The Personnel Office will select the drivers according to the following criteria.

The driver

- has to live in the area selected for the vanpool
- must have a good driving record
- have a good work attendance record
- must be recommended by supervisor
- must work regular hours with little overtime required
- have mechanical aptitude
- must be able to provide safe parking space at home for van.

In addition to driving and picking up the passengers, the driver will be responsible for keeping the vehicle clean, fueled and maintained. In essence, it will be the driver's van and he or she will be responsible for it.

Vanpooling not only lowers wear and tear on your own car, but if you are a two-car family, the savings are really big if you no longer need the second car. Unlike carpools, schedules don't vary according to family obligations, so you are assured of a ride every day. The van is airconditioned, has FM/AM radio and comfortable seats - it is not a truck or a school bus. The ride is tension free and companionable -

### So Ride The TRANSVAN

In order to proceed with the establishment of a vanpooling program, it will be necessary to know the number of employees who are interested in participating. Van purchases cannot be made until sufficient interest is indicated. It should be noted that the lead time required for the delivery of a van is eight to twelve weeks.

To get the program under way, please complete and return the form below. This is not a commitment, but indicates that you will consider the plan. In case anyone misses this announcement, a survey form will also be mailed to all employees. Only one form should be returned.

Any further questions can be referred to Barney McAlary on Ext. 2494. As we roll along, additional information will appear in the *Bulletin* to fill in any gaps that may currently exist.

The vans to be purchased for the TRANSVAN program would be similar to the above vehicle now used at the Laboratory to transport conference visitors.

—photo by Reben

# TRANSVAN

### Estimated TRANSVAN Costs From Certain Areas

The following figures have been developed to indicate the cost of vanpooling from the four areas of greatest employee concentration. Payment of the monthly charges may be handled by payroll deduction. Passengers will sign up on a monthly basis, and are not obligated to along term commitment.

#### Estimated Cost Per Passenger Per Month Twelve Passenger Van

Between BNL and	Miles/Day/RT*	Per Month, Per Passenger			
		8 pass.	9 pass.	10 pass.	11 pass.
Port Jefferson	37	\$32.70	\$29.07	\$26.16	\$23.78
Riverhead	35	32.15	28.58	25.72	23.38
Patchogue	33	31.60	28.09	25.29	22.99
Bellport	26	29.69	26.39	23.75	21.59

\*Four miles added for pickup & drop at community & BNL. Costs have been calculated according to mileage, variable costs (gas, oil, maintenance) and fixed costs (purchase price, insurance, registration). It is intended that there will be a minimum of 10 passengers per van. The fares have been based on today's prices of gas, oil and other items. By the time the TRANSVAN goes into operation, it may be necessary to adjust the charges.

### TRANSVAN Interest Survey

I am interested in becoming a member of a commuter van pool.

I would like to be a

## Apprentice Openings Announced

Applications are now being accepted for the 1979 Craft Apprenticeship Program. There are two openings in refrigeration and air conditioning, one in the electrical trade, and one in cabinetmaking, a new apprenticeship trade. Applications must be received in the Personnel Office no later than May 25.

To be eligible, employees must have completed at least three months of service at the Laboratory on May 25, 1979, and be no more than 30 years of age on that date. Those who have served in the Armed Forces may be age 30, plus length of military service, to a maximum of two years. High school graduates are preferred, but applicants will be accepted who possess sufficient education to master the fundamentals of a trade. Only those employees who are in the 6th labor grade or below (IBEW bargaining unit), or at Level III or below (weekly nonbargaining unit), may apply. Employees who have submitted applications to previous programs must reapply to be considered for the current openings.

Beginning on June 6, all applicants will be interviewed by the Joint Apprenticeship Committee. The Committee is composed of three representatives of Laboratory management and three IBEW members employed by the Laboratory. Applicants will be notified of the Committee's selection by June 15. On July 2, the new apprentices will embark on a four-year program, encompassing both on-the-job training and a course of study.

Full details of the program are available at the Personnel Office, 58 Brookhaven Avenue, and Peter Paige on Ext. 2885 will be glad to answer any questions.

## Wildlife Film Lecture

"Wildlife Safari to Ethiopia" a film produced, directed and narrated by John Boswall, will be presented at Berkner Hall on Tuesday, March 6 at 8:30 p.m. The program is sponsored by the BERA Mountain and Canoe Club in cooperation with the National Audubon Society.

Admission: \$2.00 for adults and \$1.00 for senior citizens and those under 18 years of age. Tickets will be sold at the door. Light refreshments will be served immediately after the performance.

## Speakers Bureau February

**William Casey (S&EP)**, Center Moriches Audubon Society, "Radioactive Wastes," February 5.

**Gail Thompson (Med)**, BOCES/Half Hollow Hills High School Career Day, "Careers in Physics," February 8.

**Joanna Fowler (Chem)**, St. Joseph's Academy for Girls, "Careers in Chemistry," February 8.

**Gail Waite (DNE)** Smithtown High School, "Non-Traditional Careers for Women," February 9.

**Scientific & Professional Women's Panel:** Karen Blumer (DEE), Jean Burt (DNE), Harriet Fadem (Accel), Sandra Garber (DNE), Jill Kaufman (DNE), Judy Miele (Med), Gail Thompson (Med), Gail Waite (DNE); Susan B. Anthony Day at Ward Melville High School, "Career Opportunities for Women in Non-Traditional Professions," February 15.

**Bruce Martin (Math)**, Suffolk County Community College, "Fortran 77 Language," February 20.

## COOL IT!

65° by Light; 55° by Night.

## BNL Critic Refuted

In the Sunday, February 18 issue of the Long Island section of The New York Times, an article appeared under Long Island Opinion with the title "In a Throwaway Age, A Throwaway County?" by Simon Perchik, a lawyer who lives in East Hampton.

Two paragraphs directly referred to Brookhaven and are clearly erroneous. One is that "the Peconic River, used to cool the core of Brookhaven's nuclear reactor, has high levels of radiation. Fishing and clamming are forbidden at the mouth of the river. The fish in the Peconic, according to Department of Environmental Conservation monitoring reports, have radiation contamination, as do the clams." Mr. Perchik also stated that "The Environmental Protection Agency made public the testing done on Suffolk's first and only operating nuclear plant, saying: 'In 1972 the milk from dairies adjoining Brookhaven National Laboratory had the highest strontium-90 count in New York State.' That record continues to date."

Assistant Director R.C. Anderson has sent a letter to the Times in rebuttal. The paragraphs from Dr. Anderson's letter replying to the above statements are quoted below as information for all employees:

Mr. Perchik's zeal about the maintenance and improvement of the quality of Suffolk County's air and water is noteworthy, but his viewpoint would be more credible if he had his facts straight - in particular, his references to radiation contamination originating from Brookhaven National Laboratory. Contrary to his assertion, the Peconic River has never been used

to cool the core of a nuclear research reactor at Brookhaven, nor has the Peconic ever contained high levels of radiation as a result of Brookhaven's operation. In fact, at the Laboratory boundary, our additions to the radioactivity naturally present in the river are less than 1% of the permissible federal and state guidelines and are detectable only by very sensitive radiation monitoring techniques. The same applies to fish taken in the same location. Downstream, the levels in water and fish are indistinguishable from those which would be present if the Laboratory did not exist. Fishing and clamming are indeed forbidden at the mouth of the river. But this is due to sewage pollution, and has nothing whatsoever to do with the Laboratory.

Similarly, EPA, the State Department of Conservation, and almost everyone but Mr. Perchik has agreed that the seasonally high levels of strontium-90 in a farm near (but not adjoining) Brookhaven National Laboratory are completely unrelated to our operations, past or present. Rather they are related to soil characteristics, farming practices and the local variations of fallout from past nuclear weapons tests by the USSR, China and the U.S. Incidentally, these "high" levels are comparable to those found at several upstate N.Y. locations, not associated with institutions using radiation, and trivial compared to the radioactivity present in milk due to naturally occurring potassium-40.

## Bluegrass — Sykes Style

Dedication and enthusiasm are a major part of Ernie Sykes' success as a bluegrass musician. Sykes, a computer repair technician in Instrumentation, and tenor for "The Sykes Boys" bluegrass band, has been performing longer than he cares to remember: he first sang in public at age five with his older brother at a church function. As children growing up in West Virginia, Sykes and his brothers and sisters were taught to sing mountain songs in harmony by their father. He didn't choose bluegrass as the type of music he wanted to perform, Sykes said, it chose him.

Sykes received no formal music training except as a member of choral groups in high school. He taught himself both banjo and guitar but plays only guitar with his band. "The Sykes Boys," like other traditional bluegrass bands, use a guitar, a five string banjo, a mandolin, a fiddle, and a bass. "Anything electric (except a bass for ease)," said Sykes, "is not in the traditional style."

In Sykes' opinion, the terms "bluegrass" and "Country and Western" are not interchangeable. He feels that today's bluegrass music is a more traditional form of country music while what's currently played as "country" music, replete with electric instruments, is more closely patterned after "pop" music.

To the undiscerning ear, Country and Western and bluegrass music sound quite similar, especially due to the recurring theme in each of home and the songwriter's desire to return there. Sykes explained: bluegrass music has its origins in the music of the rural South. In the 1930's, however, many residents left these impoverished areas to find higher paying jobs in northern industrial cities. Homesickness was quite common among the "displaced" mountain people, Sykes said, and later, it figured prominently in much of the music they wrote.

When asked if bluegrass music begins to sound the same after awhile because of the similar themes of the songs, Sykes replied no. "The freshness of the music depends upon who you're singing with and for whom," he said. "An old, familiar tune can seem new if it's new to the audience. They really make the difference."

In fact, Sykes makes his part-time job seem like fun. "That's because it is!" he said. Sykes finds there's enjoyment simply in hearing the sounds he and his band can make; there's enjoyment, he said, "just in doing it. But any performer - any honest performer - always has the audience in mind, even when practicing alone."

Almost 15 years ago, Sykes organized

Bluegrass singer and musician Ernie Sykes (Instrumentation) waves from the stage of the Third Annual Long Island Bluegrass and Old Time Country Music Contest held last April. "The Sykes Boys" took second place in the competition.

one of the first bluegrass bands on Long Island. Then, it was difficult to find an audience for his music without traveling in to New York City, where, he adds, his band played as the opening or "front" band for well-known bluegrass singers such as Ralph Stanley and Bill Monroe. Today, a lack of fans is no longer a problem. "The Sykes Boys" play locally on weekends in addition to festivals in warmer weather. Bluegrass gained considerable exposure and popularity due in part to the success of movies such as "Bonnie and Clyde" and "Deliverance" which relied heavily on bluegrass for backup music.

In fact, "The Sykes Boys" played last summer at an inn on eastern Long Island which attracts younger, rock fans. "It was pandemonium," recalled Sykes, "they were one of the loudest and largest crowds we played to, but there wasn't a hostile face in the group. They couldn't have heard the finer points of our music, but it was hard to be negative about a crowd who so obviously enjoyed the music."

As he performs, there's always the thought in the back of Sykes' mind that he might make it big, that he might someday for instance, play the Grand Ole Opry. "That," Sykes said smiling, "would be nice."

"I invest a lot of energy and time," concluded Sykes, referring to the management of his bluegrass band, "but when the return is so satisfying, it doesn't seem like work at all."

## Stoltzman Performs March 8

Richard Stoltzman, the sensational young American clarinetist, and Bill Douglas will present a program of music by Saint-Saens, Douglas, Schumann, Bach, McKinley and Poulenc in Berkner Hall at 8:30 p.m. on Thursday, March 8. The program is the one Stoltzman will perform in Alice Tully Hall where he has been invited to play in the "Great Performers in Lincoln Center" series.

Tickets are \$4 general admission, \$2 for students and those over 65 and \$1 for persons under 18. **Please note:** since the original publicity and tickets were printed, the Stoltzman concert date has been changed to Thursday, March 8.

## How Standard Are Your Practices?

While SPIs are not the kind of literature one might read for fun, they do express Instructions for Standard Practices at BNL to implement policies of the Director.

For example, SPI 5-05 on the subject of Government Vehicles says in part, "Drivers are responsible for operating vehicles conservatively and reasonably to minimize operating, maintenance and repair expense." That seems to be entirely reasonable, not beyond the capability of any BNL employee and in our own best interests since we are all taxpayers, i.e. operating our own vehicles at our own expense. Damaging property while backing because the driver "can't see" (a common excuse) is not responsible, nor is it reasonable.

SPI 5-05 also states a driver should not leave keys in a parked vehicle. That seems to be a reasonable practice, in conformance with private practice. And it has the added benefit of insuring that gasoline is *not* being wasted, a particularly desirable aspect since the day may not be far off when you can't get gas even if you have money. Do not leave a vehicle with the engine running.

SPI 5-05 also states the "Government vehicles may not be used for personal errands of any kind on or off-site;" another reasonable practice that should be and is a Standard Practice.

The Laboratory is growing. The requirement for vehicles to conduct official business is increasing commensurately. The capital and operating cost increases are not news to anyone who owns and operates a vehicle. BNL owns and operates 320 vehicles. The cost of doing that without abuses is significant. Abuses that may seem to be minor or inconsequential on an individual basis can have staggering accumulative effects. One example demonstrates the logic involved:

One BNL Datsun is getting 18.8 miles per gallon at a direct operating cost of 4.7¢ per mile, another is getting 12.2 miles per gallon at a direct operating cost of 9.8¢ per mile. The difference has to be the practices adhered to by drivers or at least largely so. Please don't say "So what, the difference is only a nickel;" the difference could be 1,600,000 nickels per year, which is \$80,000 worth of nickels.

## BERA Board Candidates

The BERA Nominating Committee has selected the following slate of candidates for the 1979 BERA election:

Donald David, technical associate, Accel;  
Georgia Irving, executive secretary, DEE;  
William Kollmer, technical supervisor, Accel;  
Patricia Oster, accountant, Accel.

During the week of March 26 through 30, eligible BERA voting members including employees of BNL, AUI, DOE, and all other permanent on-site employers, will be invited to cast their ballots to elect two of the four candidates to serve on the BERA Executive Board.

More information on the candidates and a listing of designated polling stations will be published in the *Bulletin* on March 16 and March 23.

## Gym Weekend Closing

The gymnasium will be closed on Saturday and Sunday, March 3rd and 4th. The purpose of this closing is to have the floor cleaned and oiled. Because it is important to allow the floor to dry thoroughly after the oil is applied, no admission, under any circumstances, will be allowed on these two days.

## Bowling

### Red League

The 76'ers had a great night (3145 pins) and took all 11 from the Dynamites. J. Morris (221) had a 612/660 series, M. McKenna a 559/682, J. Petro (225) grossed 631 pins and J. Connelly (202) grossed 606. The Old Timers won 11-0 over the Sparks. They had a 1043 game. R. Adams had a 201 and grossed 616, H. Frei a 200 game and 610 gross pins.

The Designers took only 3 in a match with the Blue Jays. E. Sperry (210) came in with a 547/643, and C. Zavesky 619 gross. The Sandbaggers only took 3 from the Trouble Shooters. R. Meier grossed 626 pins and R. Jones 610. The Freon Loaders also managed only 3 from the Pinball Wizards. F. Stahman grossed 613 and J. Fortunato 610.

The Anachems tied one game with the Cosmos and received 1½ points. T. Prach threw a 200. In the final match-up, This Isa Team was skunked by the Old Timers II.

### Gold League

The Question Marks are in first place. High games for the evening were bowled by Alice Alberico 207/476 series, Bea Pyatt 152, Marie Susa 170/154/129-453 series, Marsha Kipperman 160/178/184-522 series, Gerry Callister 155, Elaine Liquori 160, Ginny Walker 148/142/148-438 series, and Fran Brown 149. Congrats to Bella White for converting the 4-5-10 split!

## Opening Tonight

It's opening night of the BERA Theatre Group's presentation of Neil Simon's, "The Gingerbread Lady," produced and directed by Bob Kinsey. Tonight, Jimmy ("I'm such a good actor I can't stand it"), Toby ("I love my looks, don't you?") and daughter Polly ("I'm a terrific swimmer") try to cheer up our Evy. The trouble is, Evy ("Jesus, I got along better with the nuts on Long Island") would rather be cheered up by Lou ("No problems, Ev. Nothing that can't be worked out.") The birthday party is a disaster, but we can really look forward to that lunch at Rumpelmayer's. Above, Jane Love as Evy is reunited with Polly, played by Lori Eagle-Pearsall. The party starts at 8:30 tonight in Berkner Hall. Be there!

## Choral Meeting

A meeting of the BNL Singers will be held at Berkner Hall on Wednesday, March 7, at noon. All those interested in keeping this group active are urged to attend.

### Green League

The Sparks were dethroned as they lost 11 to the Old Timers. Taking advantage of the Sparks loss, the Old Timers II moved into first place as they took 11 from This Isa Team. B. Galen had a 212. The Pinball Wizards moved into second place by taking 8 from the Freon Loaders. C. Dodge had a 217. The Blue Jays took 8 from the Designers and the Trouble Shooters took 8 from the Sandbaggers. Even though the Dyno-Mites lost 11, B. Sells managed a 214/219-575 scratch series. The Cosmos took 9½ from the Anachems. W. Rasmussen had a 210. Other good games from past weeks were bowled by N. Parrinello 202, H. Arnesen 203/234, J. Cochrane 233, D. Lingg 224, J. Sheehan 207, B. Galen 203.

### Purple & White League

The Draftacs rolled a 747 scratch game (904 gross) Irene Sperry 177, Al Pinelli 175, and Ed Sperry 187. Ben Belligan had a 569 series with 213/204 games. Other good games were bowled by Len Kalmar 208, Dick Murgatroyd 204 and Sharon Smith 172.

### Pink League

The ladies of the Pink League again had a great night. Mary Grace Meier took all-around high with 201/172/171 for a 544 scratch and 685 gross. Millie Connelly had two good games, 194/190 for a 498 scratch and 594 gross. Other good single games were by Ellie Adams 181, Carol Beckner 177, Barbara Cochrane 173, Pat Lebitski 166, Marie Grahn 162, Helen Keeley 161 and Renie Rosati 160.

## Adult Swimming Lessons

A series of adult swimming lessons will begin on Wednesday, March 7, at 5:15 p.m. The series will consist of one lesson per week on ten consecutive Wednesdays. There will be two classes; one for non-swimmers, and one for those who can swim but would like to improve their skills.

Those interested may register at the pool the night of the first class. A fee of \$15 for the entire series will be accepted at that time. (Make checks payable to BERA, please.)

## Hospitality News

A morning coffee will be held Monday, March 5, from 9:30 to 11:30 a.m., in the Brookhaven Center.

All wives of Laboratory employees are welcome. Please come and bring the children. Babysitting will be provided free of charge. It is suggested that you bring along a toy or two for your child to play with.

## Cafeteria Menu

### Week Ending March 9, 1979

<b>Monday, March 5</b>	
Onion soup	(cup) .30
	(bowl) .40
Batter fried steak w/1 veg.	1.45
Franks and beans	1.10
Hot Deli - Pastrami	(on bread) 1.20
	(on roll) 1.30
<b>Tuesday, March 6</b>	
Cheese chowder	(cup) .40
	(bowl) .50
Chopped steak w/1 veg.	1.25
Turkey tetrazzini	1.30
Hot Deli - Grilled Reuben	1.30
<b>Wednesday, March 7</b>	
Minestrone soup	(cup) .40
	(bowl) .50
Homemade lasagna w/1 veg.	1.40
Fried rice and pork w/Chinese noodles	1.30
Hot Deli - Italian sausage and peppers hero	1.30
<b>Thursday, March 8</b>	
Chicken rice soup	(cup) .30
	(bowl) .40
Irish lamb stew	1.45
Beef liver and onions w/1 veg.	1.15
Hot Deli - Barbequed beef	(on bread) 1.20
	(on roll) 1.30
<b>Friday, March 9</b>	
Clam and celery soup	(cup) .40
	(bowl) .50
Pot roast w/1 veg.	1.45
Seafood cakes and spaghetti	1.10
Hot Deli - Smoked tongue	(on bread) 1.20
	(on roll) 1.30

## Correction

The photo credit on page 3 of last week's Bulletin was incorrect; it should have read "by Alex Reben."

### Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position, with consideration given to candidates in the following order of priority: (1) present employees within the department, with preference to those within the immediate work group; (2) present employees within the Laboratory as a whole; and (3) outside applicants.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all nonscientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment, as indicated below. Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Personnel Placement Supervisor, Ext. 2882.

**OPEN RECRUITMENT:** Opportunity for present Laboratory employees and outside applicants.

930. SENIOR MECHANICAL DESIGNER - Requires AAS or equivalent capabilities and experience in machine, pressure vessel, cryogenic and/or process piping design. Must understand welding and machine shop practices. Accelerator Department, ISABELLE Project.

## Tax Note

In the *Bulletin* story on February 9 in "Tax Alert" it was stated that a PASS account for college students (Parents and Students Savings) must have been set up by December 31, 1978, in order to be claimed on the 1978 New York State tax form. The State has now changed the regulations so that parents may establish this account any time up to April 1, 1979 to be eligible for 1978. If a return has already been mailed, an amended return can be filed.

## Women's Panel To Meet

Scientific and professional women are invited to attend a meeting at noon, on Monday, March 5, Room A, Berkner Hall. It will be an information and organizational meeting for women who are interested in responding to requests from schools to speak about women in the sciences and professions. Bring your own lunch. Coffee and cake will be served.

## Spring Planting Now

Several types of annuals can be started now in indoor boxes so that plants will be ready for mid-April planting. Annual flowers such as alyssum, aster, globe amaranth, nicotiana, bedding petunias, annual phlox, snapdragon, stocks and scabiosa can be started from seed and grown indoors. Cool weather annual vegetables such as celery, broccoli, cauliflower, early tomatoes, eggplant and peppers can also be started from seed indoors. In early- and mid-March, planters may begin snow peas and cabbage outdoors.

Planted seeds which have not germinated require indirect, bright light. After germination, plants may be moved closer to a window or placed beneath controlled lighting. Seedlings which have thrived indoors for about four to five weeks are ready for outdoor planting. And certain cool weather crops may be planted in early April while tomatoes, eggplant and cucumbers should be planted in early June.

Although the last frost on Long Island usually occurs about the third week of April, it is safest to wait until mid-May to plant flowering annuals outdoors. While still in the indoor box, however, flowering annuals like bright sunlight - about six to eight hours of it each day.

A vermiculite and peat moss mixture is a recommended growing media for seeds begun indoors so as to provide as sterile a growing environment as possible. The use of this type of media reduces the chance of "damping-off," a fungus disease which especially affects young plants. The "peat-lite" mixture is one propagation media which must be kept moist. Some indoor gardeners find that they may let a longer time pass between waterings of such a mixture if plastic is kept over the indoor box so that a greenhouse environment is achieved. Finally, it is important to read the seed package to see if the contents have been treated for disease.

For additional information regarding indoor gardening or a fact sheet describing how to prepare the "peat-lite" mixture, contact the Cooperative Extension of Suffolk County, at 727-7850 or write to them at 246 Griffing Avenue, Riverhead, NY 11901.

**Autos & Auto Supplies**

SIDE PIPES W/HEADERS - 63-64 Chevy Impala 327, will separate. Larry, 751-2149.

72 MERCURY STATION WAGON - Montego Villager, ps, p/disc brakes, a/c, 9 psgr, new tires, roof rack, towing pkg, snows. \$1300. 821-0695 after 3.
