

Going, Going, Gone!

With a blast of an oxy-acetylene torch, the final one in a set of guy cables was cut, and the 420-foot Ace tower slowly toppled over. Earlier in the day, Wednesday of this week, all the base bolts had been cut, leaving the tower held up by just a tripod of guy cable sets. When one set of cables was cut, the tower was pulled down by tension in the remaining two sets. The strategy mapped out by a company specializing in tower erection and removal worked perfectly as the tower fell to the ground exactly where they wanted it. Later that day, King tower (not shown) was taken down in the same manner. The old meteorology towers, BNL landmarks for over 30 years, will be cut up and sold as scrap metal. Climatological data is now being collected by the former FAA tower (left), renovated and erected earlier this year.

—photos by Humphrey

Changing Skyline At The Lab

For over three decades, Ace and King towers stood in the meteorology field as familiar BNL landmarks. They were erected in 1948 to collect climatological information, and now the Atmospheric Sciences Division of DEE has over 30 years of weather records which are used as a data base for scientific research.

The towers, however, have been slowly deteriorating, and the Lab eventually decided to replace them. In April, a third tower was put up. And finally this week, the BNL skyline was changed for perhaps another 30 years, when the original pair was pulled down, leaving a solo tower standing in the field.

Ace was 420 feet high, and King stood about 160 feet. Both were equipped with elevators, making it easier for meteorologists and light bulb changers alike to get up and down. Although meteorology instruments mounted on the towers were wired to data recorders in the Atmospheric Sciences building, people had to go up to install and calibrate equipment. Meteorologist Bob Brown, who ventured aloft regularly, says the view from Ace was a sweeping panorama of Long Island, the Sound and the Atlantic Ocean.

Ace tower became the tallest structure in Suffolk County in December 1977, when the RCA tower in Rocky Point was taken down. Retired BNL employee and long-time sailor, John Binnington, says he used Ace tower to navigate to the entry of the Carmans River from the Great South Bay.

The two towers stood about 900 feet apart. At one time, they were connected with a cable strung taut enough so that instruments could be suspended in mid-air to test variability in weather conditions over a few hundred feet.

Ace and King has been replaced by the former FAA tower, which stood on what is now the ISABELLE site. It was originally erected in the mid-60's for radio communication and later turned over to the Atomic Energy Commission. Before going up in its

new location, it was completely refurbished and equipped with a new ladder and safety climbing device.

The new meteorology tower is 280 feet high. In accordance with FAA regulations for structures taller than 200 feet, it has a flashing beacon on top and two lights mounted at intervals further down. All three are hooked up to a photoelectric cell, which automatically turns them on at dusk and whenever day-light visibility is reduced because of weather conditions like fog. The tower is painted in iridescent orange-red and white stripes, again in accord with FAA regulations.

It's supported on a concrete foundation and tethered to the ground by twenty-four guy cables. Six of the

cables run from the top of the tower, and the rest are attached at 40 and 50-foot increments down its length. Each cable is tightened to a specified tension. BNL's Architectural and Structural Division in Plant Engineering worked out all the engineering for properly mounting the tower. Hal Euler, Assistant Superintendent of the Division, directed the logistics of the switchover, and Tony Scheschowitz was construction inspector for the project.

The new meteorology tower was fully instrumented and operating by the first half of May and took over all data collection on May 14. Meteorologist Bob Brown says the numbers come in just as regularly as they did before. And he remarks, "On a clear day, I can still see both shores."

Name That Tower!

(See page 2)

Samios To Oversee ISABELLE Project

Lab Director George Vineyard announced last week that, effective June 15, management of the ISABELLE project in the Director's Office has been delegated to Deputy Director Nicholas Samios. "He will have a greater role in ISABELLE," said Vineyard, "and will lead presentations of the project to the scientific community and to DOE."

Samios was appointed Deputy Director for High Energy and Nuclear Physics in February of this year, and, besides jurisdiction over other programs in this area, his post included planning for the scientific programs of ISABELLE. Now, the ISABELLE Project Head will also report directly to him.

Benedict To Speak At DNE Seminar

Manson Benedict, professor emeritus at MIT, will give "Some Unsolicited Advice to Washington on Nuclear Energy," at a DNE seminar on Tuesday, June 30, at 1:30 p.m., in the Hamilton Seminar Room (Chemistry).

Dr. Benedict, former head of the Department of Nuclear Engineering at MIT, has also served as president of the American Nuclear Society and director of the Atomic Industrial Forum. He is a member of the National Academy of Sciences and is a recipient of the Academy's Founders Award. For his work in nuclear energy, Benedict has also been honored by the American Chemical Society (Industrial and Engineering Chemistry Award), the Society of Chemical Industry (Perkin Medal), and the American Institute of Chemical Engineers (William H. Walker Award).

Presidential Nominee Visits Brookhaven

Dr. George A. Keyworth, President Reagan's nominee for science advisor, visited BNL on June 19 for a briefing on the Lab's research and a prolonged stay at both ISABELLE and the National Synchrotron Light Source. Here, he talks with Deputy Director Nicholas Samios (right) during a three-hour visit at the ISABELLE project. Dr. Keyworth, whose nomination is awaiting confirmation by the Senate, has been a nuclear physicist at Los Alamos National Laboratory since 1968, and is head of the physics division.

Doug Humphrey

Life In The Ring

Early in their acquaintance, this Canada goose had reservations about George Holohan. Here, she assumes a defensive posture to show him she will fight for the five eggs in her nest. Now that the eggs have hatched, Holohan has a more trusting relationship with the family.

— Photo by Chris Harbach

The woods that stand in the center of the ISABELLE ring offer people a pleasant lunchtime setting. At the same time, the woods are home to many forest creatures. These two worlds came together the day the Canada geese met George Holohan and John Schirmer of the ISABELLE Injection/Extraction Group, which is responsible for getting the proton beam in and out of the ISABELLE ring.

During a midday stroll in early spring, Holohan's knowledge of Canada geese prompted him to say to Schirmer, "This is the time of the year that the Canadas will come and nest - right out in the open." But both men were surprised when they practically stumbled over a nest after rounding the next bend.

Situated under a tree, just off the path on the banks of a stream, the nest contained a Canada goose who was sitting on five eggs. Approaching the nest, Holohan observed, "We might be attacked any minute."

And again, he was right. The gander, emerging from his hideaway, launched an attack, running at the two men with his head down. But, said Holohan, "We turned around and faced him, and tried to show him we were defenseless and didn't want to cause any harm." The gander stopped his charge and warily accepted their presence.

After that, Holohan and Schirmer visited the geese regularly, bearing bread and gaining a certain amount of trust. It's no wonder, then, that they felt like proud uncles when they returned to the nest after the long Memorial Day weekend and saw five newborn goslings.

Over one month later, the geese are thriving. They seem perfectly content as they waddle single file behind their mother, with their father protectively bringing up the rear. Plunging into a pond, thick with the wild rice on which they like to feed, they swim off in the same line. It is obvious that they like their home in the middle of the middle of ISABELLE.

This will probably remain home to the Canadas until late August or early September. By then, the goslings will have learned to fly, their parents will have regrown the wing feathers they lost during their recent molt, and the family will be able to join one the the V-formations of Canada geese as they begin their winter migrations.

Meanwhile, like other wildlife in the ISABELLE woods, this family of Canada geese is oblivious to the hubbub of construction activities that surrounds them. In fact, Holohan said, "We tried to explain to them what's going on here, but they weren't impressed. I think they said something like 'Honk! Honk!'"

CHPS: Annual Enrollment

Under the Federal Health Maintenance Organization Act of 1973, the Laboratory is again offering eligible employees the annual option of enrolling in the Community Health Plan of Suffolk, Inc. (CHPS), as an alternative to coverage under the AUI Group Medical Insurance Plan. This year the deadline for enrollment in CHPS is July 17, with coverage becoming effective August 1.

CHPS: What it is and how it works

The Community Health Plan of Suffolk (CHPS) is a federally qualified, not-for-profit, Health Maintenance Organization serving residents of the five western townships of Suffolk County and the eastern part of Nassau County. The facility is affiliated with two hospitals: St. John's Episcopal Hospital in Smithtown; and, for more specialized services, Long Island Jewish-Hillside Medical Center.

CHPS provides continuity of care under the direction of an internist (or pediatrician, for children), who is in effect the member's private physician. In addition to primary care physicians, specialists in such areas as gynecology, ophthalmology, urology, dermatology and neurology, as well as registered nurses and supporting health care personnel, are on staff.

The CHPS facility is equipped to take X-rays and laboratory tests, immunizations, allergy treatments, eye examinations, well-baby care, and physical examinations. The plan also includes prepaid coverage for prescription drugs when ordered by a CHPS physician and filled at the CHPS Pharmacy. Care is available 24 hours a day, seven days a week.

Cost and Coverage

It is AUI's policy to subsidize the cost of CHPS by paying the same premium amount it currently pays for the AUI medical insurance plan. This year the cost of the AUI medical insurance plan is greater than the cost of the CHPS plan. Therefore,

employees who elect the CHPS option will not be required to pay a premium for either individual or family coverage.

Which Plan for You?

A careful investigation of the benefits offered by both health plans is necessary to determine which one best suits an individual's needs. To help employees make this decision, information on CHPS, plus a detailed comparison of the benefits of AUI Medical Insurance and CHPS, will be available at Personnel Services.

Those who are interested in CHPS are encouraged to visit the facility at 3001 Express Drive North, Hauppauge (intersection of LIE exit 57 and Veterans Memorial Highway). Open house dates for BNL employees have been scheduled for July 8 and 15, at 7 p.m. If you are unable to attend, and have questions regarding CHPS, call (516) 582-9800, Ext. 209.

Employees wishing to enroll, or terminate their membership, in CHPS can obtain the appropriate forms and applications at Personnel Services, Building 185 (Extension 2877).

Some folks get elected because they are well known... others are defeated for the same reason.

Old statisticians never die they just average out.

Inflation is prosperity on the rocks.

Money can't buy love, but it can put you in a strong bargaining position.

A philosopher is a person who says he doesn't care what side his bread is buttered on because he eats both sides anyway.

Experience is what makes you wonder how it got a reputation for being the best teacher.

Paige Retires

When Peter Paige arrived at BNL on February 1, 1947, his office consisted of a metal army desk, and the Lab population numbered less than 100 people. Now, some 34 years later, he is retiring at the end of this month as Assistant Manager of Personnel and Labor Relations, and he has seen the Lab grow into one of the largest employers on Long Island.

Over the years, there have been many important personnel policies, and it would be impossible to mention them all. But one program, in particular, is dear to Paige. It is the Craft Apprenticeship Training Program, and he cites it as a fine example of cooperation between union and management. "We have a continuing supply of well trained craftspeople," he notes, "ready to step in and work on many of the complex programs at the Laboratory." He credits Charlie Geonie, IBEW president, and the Lab's skilled craftsmen for the high quality of training that apprentices receive.

As good safety valves for employees, he considers the Tune-In program and the Employee Relations Committee valuable. Paige has served as Employee Relations Counselor since the office was initiated in March, 1980 and, in this capacity, he has advised many employees. He hopes the function will be continued.

Paige is on the board of Brookhaven Memorial Hospital and will now de-

Peter Paige

vote even more time to hospital affairs. Early in his career he was a photographer in Florida, and as he is anxious to resume this work, he has recently set up a darkroom at his home in Bellport. Paige used to do a lot of competitive sailing, but gave it up some years ago and now gets around on his 42' power boat. As he and his wife, Natalie, maintain their four acres of property and a huge vegetable and flower garden, he does not expect to have much time wondering what to do next.

Diabetes Dialogue

July 1 has been declared "Diabetes Day" at BNL to inform any interested medical personnel of the diagnosis and management of diabetes mellitus.

Ashok Vaswani, assistant scientist in the Medical Department, and the Long Island chapter of the New York Diabetes Association will sponsor the daylong program in Berkner Hall beginning at 8:30 a.m.

Vaswani will deliver a morning lecture on the current status of diabetes diagnosis, followed by Lauri Schlus-sel, nutritionist at Nassau Hospital's Diabetes Education Center, who will speak on diabetes and nutrition. Patricia Porter, also from Nassau Hospital, will address the topic of diabetes and coping with stress.

After a break for lunch there will be a workshop dealing with the medical aspects of diabetes followed by a question and answer period.

Word Game

In response to our request for some off-beat word definitions (Bulletin June 12), Lou Stang (Medical) has sent us some of his creations. Here they are:

maximize - to quote proverbs or maxims frequently.

strumpet - an ancient musical instrument having only a single G-string.

broadcloth - a garment worn by certain women.

euphony - an interjection hurled at those suspected of fraud.

malefactor - the father's influence on inherited traits in offspring.

charity - the manufacture of chairs.

Congress - the antithesis of progress. Lou now heads our honorary subscription list. Let's hear from the rest of you who like to play around with words. Send your creative definitions to the Bulletin, Bldg. 134.

Contest! Contest!

The new meteorology tower now stands alone and unnamed. So that it can have a distinctive identity, we are asking you to give it a name. Its predecessors have been called Ace, King, Queen and Jack, so that vein seems to be exhausted. Put on your thinking caps and send your entries to the Bulletin, Bldg. 134, by July 7. Everyone is eligible. The winning entry will be selected by staff members from the Atmospheric Sciences Division and Public Relations. The winner will have a choice of a tote bag, a baseball cap, or a mini weather station, all popular items from the Science Store.

Tower Contest

To: The Bulletin, Bldg. 134

Name _____ Dept. _____ Bldg.# _____ Ext. _____

I suggest the following name for the meteorology tower:

Blood Drive Pledges Tallied

Held earlier this week, the annual BNL Blood Drive was successful because of the pledges received from more than 840 people representing about 25% of the Lab's population. Here, (from left) Mike Losquadro, Blood Drive Captain, Applied Math; Len Emma, Blood Drive Chairman; Marsha Kipperman, Blood Drive Captain, Personnel; and George Vineyard, Laboratory Director, look over some of the materials used in this year's campaign. The efforts of Losquadro and Kipperman yielded outstanding results. In both their areas, over 51% of the employees pledged to donate blood - approximately double the Lab average!

Ever wonder how to weatherize a mobile home, find the right preschool for your child, or figure your net worth? Do you ever wish you could remove crayon stains, get the most from your air conditioner, or communicate better with your teen? Now that information and more can be at your fingertips in minutes: just call Tele-C.U.E., the comprehensive telephone information system.

A service of the Suffolk County Cooperative Extension, Tele-C.U.E. consists of a consumer oriented library of taped messages. All you do is choose from 600 messages, dial one of four local exchange numbers, and request your message by code number and title. An operator will play the three minute message for you at the cost of one or two message units per call.

Each message attempts to provide a basic, precise answer to a common problem. "Our aim," said Cooperative Extension Agent Robert De Mattina, "is to provide a reliable reference tool, delivering information when requested, and on a level that everyone can understand."

Subject matter varies from home finances to solar energy to pregnancy and birth control. Much of the information comes from the Cornell University Extension (C.U.E.), but experts in each field were also consulted. For instance, it is understood that several BNL scientists were asked about solar energy.

The system was developed by selecting many of the most requested messages from other systems in Wisconsin, Michigan, North Carolina and Colorado. Then a staff of Cooperative Extension employees customized the information to fit the needs of Long Islanders. De Mattina said tapes will be added and updated periodically.

Tele-C.U.E. is the first such system in New York State and has been in operation in Suffolk since June 11. According to De Mattina, things are going very well. "We've been receiving over 100 calls per day," he said.

The key to the Tele-C.U.E. system is having a brochure in your hand. Copies are being distributed at public libraries and other public buildings. You can also obtain your free brochure by calling the Cooperative Extension at 727-7850, or by writing to Robert De Mattina, 246 Griffing Avenue, Riverhead, N.Y., 11901. Tele-C.U.E. will operate weekdays from 9 a.m. to 8 p.m., and Saturday from 9 a.m. to 5 p.m.

— Myra Aronson

Precisely On Time

If you are really an aware person and notice that Tuesday, June 30 is a longer day than usual, it's because a leap second will be added just before 8 p.m. EDT.

The Paris-based International Time Bureau which manages the world's time-keeping system, has ordered this addition to keep clocks in step with the Earth's rotation, or solar time. Atomic clocks, the keepers of Coordinated Universal Time (UTC), are nearly a million times more constant in rate than the Earth's spin. To keep them from getting as much as one second ahead of, or behind, solar time, a single leap second is generally added in December. It is projected by the end of 1981, that UTC and solar time would be more than a second apart, so the leap second is being tacked on six months earlier.

Plants On Vacation

Houseplants may benefit greatly from a summer outdoors, advises Caroline T. Kiang, Cooperative Extension Association of Suffolk County. On Long Island, most houseplants, except African violets and their close relatives, can be set outdoors from June 15 to September 15.

Before setting plants out, check for cramped roots. Repot to give plants room to grow and improve general plant growth. Set pots outdoors in a shady, protected spot because most houseplants get sunburned very easily. Even there, they will get more light than they receive indoors in a sunny window. For the first few days, leave the plants outside only for a couple of hours. Gradually increase the time as they adjust to the outdoor climate.

Plants will grow rapidly outdoors and will need more fertilizer than indoors. Avoid overfertilizing, though, as this can damage plants also. Wash leaves frequently with warm water to discourage insects.

At the end of the summer, check plants for insects and signs of disease. Treat plants with problems at once, and keep problem plants isolated from insects and disease-free plants until you're sure they have been treated.

Taking A Break

Because of the holidays on July 2nd and 3rd, the Bulletin will not be published next week.

Phone Facts

Are you a telephone groupie?

You are if your phone has been programmed to belong to one of the "group" features in the GTE telephone system. Only GTE personnel can program the features into your phone and to do so they require an approved ILR.

Hunt Group — In a hunt group, an incoming call will hunt for the first free extension in a series. If, for example, there are three extensions in one hunt group (1234, 1235 and 1236), an incoming call to the lead number, 1234, will go to 1235 if it is busy. If 1235 is also busy, the call will hunt for 1236. If your office gets a lot of incom-

ing calls, this feature can eliminate many a busy signal.

Dial Call Pickup Group — This group can be a real boon when you are covering several phones. Sitting at your own desk, you can pick up any other phone in your group simply by dialing *8. Not only does this save time, but it also avoids the frustration of running to another phone and picking it up — just in time for the caller to hang up on you! An extension can only belong to one such group; to pick up a phone outside your group, you need the directed call pickup feature and must dial #8 plus the four digit extension number.

On The Spot

Myra Aronson, Reporter

Doug Humphrey, Photographer

Question: If you had the opportunity to travel anywhere, all expenses paid, where would you go and how would you spend your time?

Hywel White, Accelerator Dept.

"I would go to Nepal and go walking in the foothills of the Himalayas. I'd walk and camp and look at the scenery and enjoy the country. I've been dreaming about it for about ten years. I want to go soon, before I'm too old."

Penny Baggett, Applied Math Dept.

"I would probably take a tour of Europe, because it's so interesting and quite different from this country. My husband and I spent several years in Europe so we have already seen some of England and Germany. But since there are lots of areas we haven't been to, I would just go anywhere—not so much to the cities, but out in the country."

John Burdick, Personnel

"I think I'd probably want to sail into the Mediterranean and wander around the Aegean in a sailboat. I haven't been there yet and it looks intriguing."

Michele Rabatin, Nuclear Energy Dept.

"I'd like to go to Vienna. We have an office there where we man somebody for a year at a time. Everybody comes back and tells me all these great things and sends me post cards, so I just want to go there myself. Then I'd travel around by train and sightsee in other countries."

Da Hai Wang, Physics Dept. (Wang is a visitor from the Peking Institute of Atomic Energy)

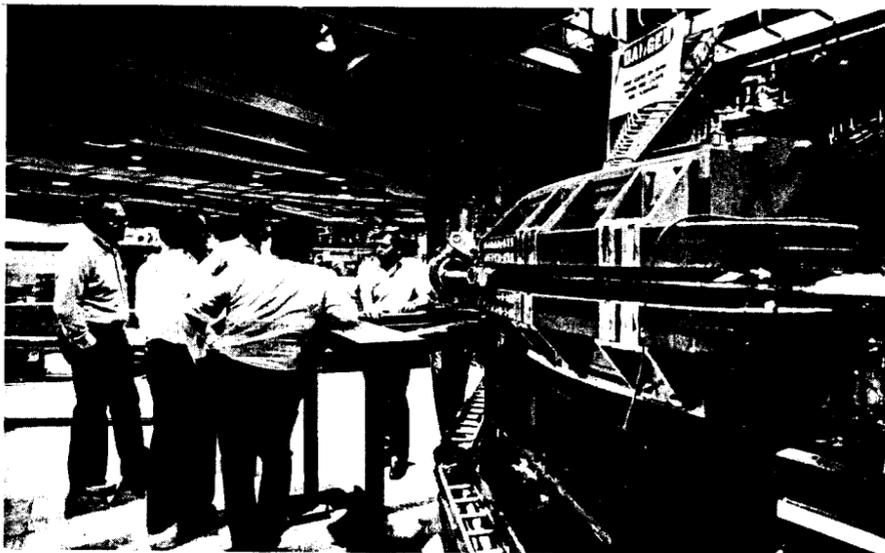

"If I had time, I would go to visit Washington. My colleague told me that it is a beautiful city. I'd visit some museums, see the White House, the Washington Monument and other things."

Cosmore Sylvester, AGS

"I guess I'd go back to England. My immediate family and friends are there, and I went to school there for a while. I haven't been back in seven years. I'd also like to return to the Caribbean where I was born. I'd be almost a total stranger there, but I'd find things to do such as sailing, fishing, swimming and so on."

Other respondents would like to surf in Australia, tour the U.S. by car, and search for ancestors in the Rhineland or Switzerland.

NSLS Users Plan For Research

With the National Synchrotron Light Source on the verge of its initial operation, over 300 researchers met at BNL for the annual meeting of the NSLS Users Association. In his introductory remarks, Martin Blume, Associate Director for Low Energy Physics and Chemistry, voiced the goal of all attendees. "The main thing we want," he said, "is to make this a good place for research and an outstanding intellectual center in the field." At the business meeting, the charter for the NSLS Users Association was approved and Peter Eisenberger of Bell laboratories was reelected Chairman of the organization. According to Arie van Steenberg, NSLS Project Head, the present schedule calls for the VUV ring to begin operation in September. Here, four future NSLS users tour the VUV ring, guided by George Hummer (right), senior technical associate who will have close interaction with users once operations begin. The x-ray ring will start at the end of December. Within six to twelve months of startup, it is expected that about 45 beam lines will be available to users.

- John P. McNeil Energy & Env.
- Daniel N. Slatkin Medical

Fun For Tots

A Children's Fair will be held Saturday, June 27, on the grounds of the Kids R Us day care center. From 10 a.m. to 3 p.m., the fair's activities will include a petting zoo, puppet shows, a rummage sale and entertainment by a banjo-guitar duo. Food may be purchased for those who wish to picnic. Admission is free, and the rain date is July 11. The center is located at the Middle Island Presbyterian Church across from Longwood High School on Longwood Road, near the main entrance to Brookhaven Lab.

Softball

Scores for week of June 15:

- League I**
- Six Pax 19 - Phoubars 9
- Ravens 12 - Source I 6
- League II**
- Big Sticks vs. Cardinals game postponed
- Roga 20 - AMD Bombers 10
- Deegenerates 6 - Moles 5
- League III**
- Nuke Powers 19 - Magnuts 13
- Ice Pops 25 - Binary Bombers 0
- Dirty Sox 20 - Medical 4
- Electric Company 5 - The Forties 4
- Lights Out - bye
- League IV**
- Nads 13 - Thrids 12
- Survivors 11 - E-Z Riders 6
- Balls & Strikes 13 - Turkeys 9
- TNT 14 - Random Sample 9
- Makeup game:
- Turkeys 23 - Thrids 16
- League V**
- Molesters vs. Who Cares game postponed
- No Names 17 - No Feedback 4
- Kevin Cosgrove had a grand slam home run.
- Who's On First 15 - Solar Power 14
- Underalls 19 - Mudville Sluggers 16
- Mike Schaeffer had 4 home runs.
- Makeup game:
- Source III 17 - No Names 16

Note:

The Moles were understandably incensed when the Bulletin reported last week that they had lost to the Cardinals by a score of 99-8. This should have read 9-8. We are pleased that the Moles have agreed not to go on strike.

Golf

The next golf tournament will be held Thursday, July 16, at Pine Hills Golf Course in Manorville. To sign up and reserve a tee-off time, contact Joe DePace, Bldg. 515, Ext. 4120. The usual \$1.00 entry fee will be collected.

Swimming Pool

The pool summer schedule will be in effect beginning Monday, July 6.

Monday through Thursday

- 11 a.m. to 1:30 p.m. employees only
- 1:30 p.m. to 3 p.m. children's lessons
- 3 p.m. to 9:30 p.m. employees/families/guests

Friday

- 11 a.m. to 1:30 p.m. employees
- 1:30 p.m. to 3 p.m. children's lessons
- 3:15 p.m. to 4:30 p.m. children's pool specials
- 4:30 p.m. to 9:30 p.m. employees/families/guests

Saturday and Sunday

- 1 p.m. to 6 p.m. employees/families/guests

Please note: The pool will be closed on Lab holidays Thursday and Friday, July 2 and 3. On Saturday and Sunday, July 4 and 5, the pool will be open from 1 to 6 p.m.

Entrance Fees

- Daily Admissions:
 - \$1.25 employees
 - 1.25 family members
 - 1.75 guests
 - Season Tickets: (valid through September 6)
 - \$20.00 individual membership
 - 30.00 family membership
- Season tickets are sold at the pool during open hours to employees and their immediate family members.

Guest Ruling (Applies to all recreation facilities)

One Guest - An employee is allowed to bring one guest per visit without special permission or prior arrangement. The guest must be accompanied by the employee.

Two to Five Guests - Advance arrangement for two to five guests may be made at the Recreation Office. (No more than five guests per employee is ever permitted.) When such an arrangement is made, the Recreation Office issues an admission card stating the sponsor's name and life number, the number of guests permitted, the date of visit, and facility to be visited. Guests must be accompanied by the employee, who will be requested to show the admission card at the main gate and at the swimming pool ticket desk.

Sponsoring employees are responsible for their guests during the entire time they are on site.

New Pool Entrance

Starting Monday, July 6, the swimming pool entrance will be changed from its present location on Center Street. The new location will be at the west of the building directly facing the Medical Department parking lot.

All pool users are asked to park their cars and bicycles (racks will be provided) in the Medical parking lot.

Please see supplemental page for placement notices and ads.

BOWLING CHAMPS

First place in the Pink League went to the Lickety Splits, represented here by (from left) Marie Grahn, April Donegan, and Helen Keeley. Not shown: Mary Grace Meier. —photos by Humphrey

The championship of the Red League was won by the Sandbaggers which included (from left) Bob Meier, Arthur Dick, Ed Meier, Bob Jones, and Charlie Bohnenblusch. Not shown: Kenneth Riker. The Pinball Wizards, Green League champs, were unavailable for photos, but congratulations to Bob Brown, Rich Eggert, Ed Gill, Mark Israel, George Meinken, Tom Prach, and John Spraggins.

The Gropers captured first place in the Pink & White League. Members of the winning team were (from left) Ken Asselta, Sharon Smith, Gail Schuman, and Gene Hassell.

Cafeteria Menu

Week Ending July 3, 1981

- Monday, June 29**
- Cream of mushroom soup (cup) .55 (bowl) .65
- Turkey chow mein & rice 1.55
- Beef & bean bake 1.55
- Hot Deli: Reuben 1.65
- Tuesday, June 30**
- Mulligatawny soup (cup) .55 (bowl) .65
- Beef stew over noodles 1.65
- Chicken pattie parmesan & 1 veg. 1.55
- Hot Deli: Roasted fresh ham w/barbeque sauce (on bread) 1.65 (on roll) 1.75
- Wednesday, July 1**
- Turkey rice soup (cup) .55 (bowl) .65
- Spaghetti & meatballs with garlic bread 1.55
- Roasted top round of beef w/1 veg. 1.65
- Hot Deli: Pastrami (on bread) 1.65 (on roll) 1.75
- Thursday, July 2**
- Snack Bar Service 9 a.m. — 2 p.m.
- Friday, July 3**
- Snack Bar Service 9 a.m. — 2 p.m.

Diners Note

The Cafeteria will be open only from 9 a.m. until 2 p.m. on Thursday and Friday, July 2-3 due to the holidays. The Vended Food Service in Building 912 will be in operation continuously.

Arrivals & Departures

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position, with consideration given to candidates in the following order of priority: (1) present employees within the department, with preference to those within the immediate work group; (2) present employees within the Laboratory as a whole; and (3) outside applicants.

The determination of the best-qualified candidate for available positions will be based upon education, experience and other job-related criteria. Such factors will be evaluated and measured against the demonstrable requirements of the available vacancy, as well as the Laboratory's Affirmative Action objectives.

The Laboratory is committed to a policy of Equal Opportunity in its selection and placement of personnel. Its objective is equality of opportunity in employment, training, and promotion without regard to race, color, religion, national origin, sex or handicap.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all non-scientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment, as indicated below. Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Personnel Placement Supervisor, Ext. 2882.

LABORATORY RECRUITMENT: Opportunities for present Laboratory employees.

1584. MESSENGER - (Temporary to October 15, 1981) Staff Services Division.
