

Ceremony Marks Start of RHIC Construction; President's Science Advisor Gives Keynote Address

Under bright blue skies on a crisp April 12, almost 500 BNLers and visitors gathered last Friday morning to celebrate the start of construction of BNL's Relativistic Heavy Ion Collider (RHIC).

Hosting the ceremony, which was held atop the RHIC ring, was BNL Director Nicholas Samios, who said, "We thought this would be an appropriate time to express our thanks and gratitude to the many individuals who have made RHIC possible, and, further, to acknowledge the efforts and dedication of those who are bringing RHIC into operation and fruition."

One person acknowledged as instrumental in helping the RHIC Project to become a reality was the keynote speaker: D. Allan Bromley, Science Advisor to President George Bush. A nuclear physicist formerly with Yale University, Bromley was a long-time summer visitor to BNL and headed the Lab's RHIC Policy Committee until he assumed his present post.

"I take enormous satisfaction out of seeing the next phase of construction of this marvelous facility beginning," Bromley commenced. "It's going to assure Brookhaven a pioneering role in world nuclear physics for a great many years to come. And it is going to — as a truly unique facility, world-class, unique within the world — keep American nuclear science at the very frontiers for a great many years. . . ."

Message From the President

Bromley ended his talk "by extending to everyone here not only my personal congratulations, but also those of President Bush, who, when I talked to him just before leaving Washington . . . asked me to express to you not only his congratulations, but also his thanks for the leadership that this facility provides to the international scientific community. And he added his hopes that RHIC will provide all of us with total surprises, the hallmark of truly fundamental research."

In RHIC, the "total surprises" will arise when two beams of subatomic particles called heavy ions slam into each other with an extremely high energy of 100 billion electron volts per nucleon in each of the colliding beams.

These collisions are expected to

Cutting the ribbon to mark the start of construction of the Relativistic Heavy Ion Collider (RHIC) are: (from left) Suffolk County Executive Patrick Halpin, Presidential Science Advisor D. Allan Bromley, Senator Alfonse D'Amato, BNL Director Nicholas Samios and Congressman George Hochbrueckner. On the flatbed truck behind them is a full-length RHIC dipole magnet, about to be ceremonially delivered to the RHIC tunnel.

Speaking at the RHIC ceremony was Wilmot Hess, Associate Director of the U.S. Department of Energy's Office of High Energy & Nuclear Physics.

raise matter to a temperature roughly one hundred thousand times hotter than the temperature at the center of the sun. Under these conditions, a new form of subatomic matter — a quark-gluon plasma — is expected to be created, duplicating conditions that may have existed in the early universe immediately after the Big Bang.

In his remarks, Bromley also congratulated fellow speaker Senator Alfonse D'Amato, for his "strong and effective support."

Bromley further acknowledged the key roles played by the U.S. Department of Energy (DOE), which "has, from the very beginning, supported this very important program," and the scientific community, which "has demonstrated beyond question that this field of science that we [will] examine with this new facility is one that is rich in promise. . . ."

International Anticipation

Bromley also credited the Nuclear Science Advisory Committee (NSAC), which developed the "community support that has been of enormous help to this administration and the last, and to the Congress in understanding the true wishes of the community and making it possible for us to move forward and look forward to first collisions right here, six years away." Finally, he credited BNL itself, which "has demonstrated over a great many years its ability to make things happen and its ability to take care of an international user community in exemplary fashion."

An international community of physicists is anticipating the start-up of RHIC in 1997. Researchers have already begun drawing up preliminary designs for RHIC experiments requiring large-scale particle detectors, which will be among the most complex ever built and may boast such acronymic names as TALES, OASIS and MARS.

In a letter that Samios read at the ceremony, James Decker, Acting Director of DOE's Office of Energy Research, also looked ahead. "BNL has an outstanding heritage of expanding the frontiers of scientific knowledge. RHIC provides the expectation that this tradition will continue in the future. We have full confidence that you and Satoshi [Ozaki, RHIC Project Head], along with the entire RHIC team, will go from this auspicious beginning and create an outstanding facility, and

RHIC Ceremony (cont'd)

the ensuing scientific benefits will be enormous."

A Stronger Position Than Ever

Acknowledgement of "the dedication of the people here at the Brookhaven National Laboratory," also came from D'Amato, U.S. Senator from New York. "Let me congratulate you for your work, for your skill, for your efforts and for your dedication and for the leadership of Dr. Nicholas Samios. He has been second to none.

When things looked bleak, and when it was tough going he never gave up. . . . It took people of intellect and of skill and of knowledge to be able to make the choices that today put Brookhaven National Lab not only in a stronger position than it has ever been in, particularly during these times of budgetary constraints, but on the cutting edge of science.

"... In the final analysis," D'Amato continued, "it came down to the strong support of the scientific community and the strong endorsement by Dr. Bromley. That's why we have \$49.4 million in the budget for fiscal

year 1992, placed in there by the President." Construction funding for RHIC began in this fiscal year, with the first installment of the \$397 million total.

During the ceremony, Samios, Bromley, D'Amato, Ozaki and the other speakers and honored guests sat upon a dais, erected for the occasion atop the RHIC tunnel, overlooking the collider site.

"What you see from here, Parke Rohrer and his associates have built," observed Samios, in introducing Rohrer, BNL's Associate Director for Management & Physical Plant,

who was also seated on the platform.

The conventional facilities for RHIC, primarily the 2.5-mile-in-circumference tunnel and the giant helium refrigerator for cooling the 1,600 superconducting magnets to be built for RHIC, are, in fact, nearly completed. They were originally constructed for the Colliding Beam Accelerator (CBA) Project, which was canceled in 1983.

Ceremonial Delivery of Magnet

Magnet research and development is also well advanced: To mark the start of construction, a full-size, 15-

the start of construction of RHIC."
 — BNL Director Nicholas Samios, April 12, 1990

meter-long RHIC dipole magnet was ceremonially delivered to the experimental hall at the eight o'clock position of the RHIC ring after a ribbon-cutting that followed the formal ceremony.

The transition from CBA to RHIC was recounted by Robert Hughes, President of Associated Universities, Inc., which manages BNL for DOE.

As he recalled, "About nine years ago, the high energy physics community in this country made a fateful decision. Convinced that there were imminent discoveries to be made at CERN in Europe, they decided to forgo

the then thoroughly viable CBA project and leapfrog to what is now known as the SSC.

"Al Trivelpiece was director of energy research at DOE at the time," Hughes continued, "and he had to come to Brookhaven a few months after that . . . He was astonished to discover . . . a vibrant, active planning group laying the groundwork . . . of what is now the RHIC project. For the next several years, hundreds of physicists the world over were brought in on workshops and study groups, and the design and science behind the projected project

was worked out."

Entering Terra Incognita

The excitement of the upcoming quest for quark-gluon plasma was summed up by Wilmot Hess, Associate Director of High Energy and Nuclear Physics in DOE's Office of Energy Research. "[This] is a little like explorers in the 16th and 17th century who looked at a map and saw a large area labeled *terra incognita*, unknown land," said Hess. "You venture into unknown land and you're going to find something interesting and startling, no mermaids

probably, but something new and exciting, and we will look forward to sharing that with you and we wish all of you well. Good luck!"

Other speakers were U.S. Congressman George Hochbrueckner, who represents New York's first district, and Suffolk County Executive Patrick Halpin.

Hochbrueckner addressed the question, "What will RHIC do? . . . When you talk about basic science, you can't say 'Well, it will produce x, y or z' or there will be certain scientific

(continued on page 4)

Fifteen High Schoolers Awarded AUI Scholarships

This year, 15 daughters and sons of BNL employees have been selected to receive AUI Trustee Scholarships. Each 1991 scholarship winner will receive \$2,500 per year for up to four years of study at the college or university of his or her choice. In addition, winners from previous years still in school will also receive \$2,500, up from \$2,000,

Christine Anderson is the daughter of Carl Anderson, Biology Department. She lives in Stony Brook and attends Ward Melville High School. She has been accepted to Oberlin College, where she plans to pursue music and environmental studies.

for their remaining undergraduate years.

The fifteen 1991 AUI Scholars were selected from 67 applicants by an independent committee appointed by the College Scholarship Service, Princeton, New Jersey, which administers the program for Associated Universities, Inc. (AUI).

Christian Muller, son of Thomas Muller, Accelerator Development Department, is a senior at Center Moriches High School and a resident of Manorville. To study biology, he will attend either the University of Rochester, the College of William and Mary, or the University of Virginia.

Tine Bak, daughter of Per Bak, Physics Department, resides in Shoreham and goes to Shoreham-Wading River High School. Accepted by the Massachusetts Institute of Technology, she will major in biology.

Raquel Ponce is the daughter of Celso Ponce, Plant Engineering Division. A Medford resident, she will graduate Patchogue-Medford High School. To pursue secretarial science, she will matriculate at Briarcliffe College.

Edward Baltz is the son of Anthony Baltz, Physics Department. An East Setauket resident, he will graduate Ward Melville High School. To major in engineering or physics, he will matriculate at the Massachusetts Institute of Technology.

Neesha Singh, daughter of Om Singh, National Synchrotron Light Source Department, is deciding between Tufts University and Wellesley College, where she will study biology. Living in Coram, she attends Longwood High School.

Alysa Barancik, daughter of Jerome Barancik, Department of Applied Science, has been accepted by Cornell University's School of Industrial and Labor Relations. Attending Earl L. Vandermeulen High School, she lives in Port Jefferson.

Alexander Soukas is the son of Anastasios Soukas, Alternating Gradient Synchrotron Department. A senior at Earl L. Vandermeulen High School, he lives in Port Jefferson. Deciding between Brown University and the State University of New York at Buffalo, he will combine studies in biology, engineering and physics.

Rachel Barton is the daughter of Donald Barton, Alternating Gradient Synchrotron Department, and resides in Bellport. A senior at Bellport High School, she will go to either the Massachusetts Institute of Technology or Carleton College to major in biology.

Diana Zantopp is the daughter of Rudolf Zantopp, Safety & Environmental Protection Division. She lives in Yaphank and is a Longwood High School senior. To study communication design, she will matriculate at the State University of New York at Buffalo.

David Blick, stepson of Stephen Schwartz, Department of Applied Science, will study medieval history at either Brandeis, Brown or Harvard University. Living in Center Moriches, he will be graduated from Center Moriches High School.

RHIC Ceremony

(cont'd)

or commercial spinoffs. . . . So you can't say to people 'RHIC will do thus and so.' All you can do is remind people that it is imperative and important to this nation that we invest in basic science and let the chips fall where they may."

To Inspire and Encourage

In addition to RHIC's scientific merits, Halpin said, "This investment is going to benefit us in Suffolk County in some very fundamental and important ways. The tens of millions of dollars that are being spent here will be an enormous contribution to our economy, and it comes at a very important time. . . . And perhaps most of all, will continue to serve to inspire and encourage future scientists of our nation, to ensure that the United States of America continues to remain strong and competitive for future generations."

Joining the speakers on the platform were two Nobel laureates: T.D. Lee, who is Enrico Fermi Professor of Physics at Columbia, and Melvin Schwartz, BNL's Associate Director for High Energy & Nuclear Physics. A long-time friend and advisor to BNL, Lee shared the 1957 Nobel Prize in physics with C.N. Yang for their realization, made while they were summer visitors at Brookhaven in 1956, that parity is not conserved in weak interactions. For discovering the muon-neutrino in 1962 using BNL's Alternating Gradient Synchrotron, Schwarz shared the 1988 Nobel Prize in physics with Leon Lederman and Jack Steinberger.

Others on the dais were: Herman Feshbach, Massachusetts Institute of Technology, former NSAC chairman, current Chairman of the RHIC Policy Committee, and member of the AUI Board of Trustees; Richard Flynn, Chairman of the New York Power Authority, which has supplied much of the Lab's electric power since 1981; David Goldman, Acting Manager of DOE's Chicago Operations Office; and Peter Paul, Professor of Physics, State University of New York at Stony Brook and former NSAC Chairman.

After the ceremony, those on the platform joined some 180 guests for luncheon in the Brookhaven Center. And

Coming Up

Students from high schools all over Long Island will come to the Lab on Saturday, April 20, to participate in the BNL-sponsored Women in Science and Engineering (WISE) Career Day. High school science teachers and counselors, and interested BNLers are also encouraged to attend.

Registration begins at 9 a.m. in Berkner Hall. For more information, call Victoria McLane, Ext. 5205.

Harvey Brooks, Benjamin Pierce Professor of Technology and Public Policy emeritus and Gordon McKay Professor of Applied Physics emeritus at Harvard University, will return to spend another week at BNL as a Haworth Distinguished Scientist appointed to the Department of Applied Science. From April 29 to May 3, Brooks will be available for informal seminars and discussions. To meet with him, contact Allen Goland, Ext. 3819.

In Memoriam

Henry Schwicardi, who retired from the Plant Engineering Division (PE) in 1987, died on April 9. He was 66 years old.

Schwicardi came to BNL in October 1975, as an electrician in PE. In January 1978, he was named Electrical Supervisor, and, in February 1989, he became Staff Assistant. He resumed his supervisory duties in October 1980, remaining in that position until going on long-term disability in March 1986.

Formerly a resident of Calverton, Schwicardi and his wife Martha moved to Port Orange, Florida, in 1989. In addition to his wife, he is survived by his sons Andrew and Kevin.

some of them later joined the busloads of employees who came back to the RHIC site in the afternoon to tour the eight o'clock hall and part of the tunnel.

Looking Forward to 1997

Speaking at the luncheon, Ozaki said, "I'd like to take this opportunity to thank again those people who brought the RHIC design to the present state of readiness for the construction. . . . We are in good shape. Now. . . our job is to build a first-rate, world-class facility within budget and on schedule. I know I can do it with your continuing help, and indeed, I am looking forward to gathering here again in 1997 to celebrate the first RHIC experiment and the dedication of RHIC."

— Anita Cohen

Tatyana Korostyshevsky is the daughter of Aron Korostyshevsky, Physics Department. To undertake a chemistry major, she will attend Yale University. Residing in Old Bethpage, she is a senior at Bethpage High School.

Karin Ludewig, daughter of Hans Ludewig, Department of Nuclear Energy, will go to Yale University to study either molecular biophysics and biochemistry or music. She lives in Brookhaven Hamlet and will graduate from Bellport High School.

Atlantic Brass Quintet to Give BERA Concert

The Atlantic Brass Quintet, recognized as North America's foremost young brass ensemble, is quickly gaining popularity for its stimulating performances of both traditional and contemporary repertoire. On Tuesday, April 23, at 8 p.m., the ensemble will be featured in the final BERA concert of the 1990-91 season at Berkner Hall.

Formed in 1985 at Boston University, the quintet soon gained critical recognition by capturing many honors, including two grand prizes in 1987 — the Shoreline Alliance Chamber Music Competition and the Carmel Chamber Music Society Competition. A year later, the quintet won three more prestigious awards — the grand prizes at the Coleman Chamber Music Competition, the Summit Brass First International Brass Ensemble Competition and the Second Annual Rafael Mendez International Brass Quintet Competition.

Also active in music education, the Atlantic Brass Quintet teaches at Boston University Tanglewood Institute, and gives youth concerts and master classes across the nation.

The program for the BNL concert

Atlantic Brass Quintet

will consist of Telemann's Allegro, from *Concerto in B-flat major*; selections from Bach's *Art of the Fugue*; selections from Mussorgsky's *Pictures at an Exhibition*; Military Suite No. 2 in F major (1911) by Gustav Holst; dances from *Terpsichore* by Michael Praetorius; Witold Lutos-

lavsky's Mini Overture; Victor Ewald's Brass Quintet No. 2, Op. 6; Gershwin's *An American in Paris*; and selections from Bizet's *Carmen*.

Tickets can be purchased at the door for \$12 general admission, \$9 for students and people over age 65, and \$5 for youths under 18.

Amateur Radio Club

The Amateur Radio Club will meet in Berkner Hall, Room D, on Thursday, April 25, at noon to discuss the upcoming Field Day on the weekend of June 22-23. Members should make every effort to attend.

Lab employees and guests who are licensed radio amateurs or who wish to obtain amateur radio licenses are invited. For more information, contact Andy Feldman, Ext. 3264, or Gary Utz, Ext. 3580.

TFCU Info Table

The Teacher's Federal Credit Union (TFCU) is now hosting an information table near the Cafeteria, on Tuesdays or Wednesdays, from 11 a.m. to 1 p.m. A TFCU representative is on hand to provide information on all products and services. New account kits and loan applications are available. For your convenience, the automated teller machine in the Berkner Hall foyer is in operation 24 hours every day.

Equipment Demo

On Thursday, April 25, from 10 a.m. to 3 p.m., Dennis Peeling and John Koenig of POWER UP SUFFOLK will demonstrate POWER UP lubricants and cutting fluid in Berkner Hall. Demonstrations take 15 to 20 minutes. Technical data, material safety data sheets and other literature will be available. For information, contact Peeling, 584-8000.

Cafeteria Menu

Monday, April 22	
Soup: Beef barley	.75/.95

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position. Consideration is given to candidates in the following order: (1) present employees within the department/division and/or appropriate bargaining unit, with preference for those within the immediate work group; (2) present employees within the Laboratory; and (3) outside applicants. In keeping with the Affirmative Action plan, selections are made without regard to age, race, color, religion, national origin, sex, handicap or veteran status.

Each week, the Personnel Division lists new placement notices. The purpose of these listings is, first, to give employees an opportunity to request consideration for themselves through Personnel, and, second, for general recruiting under open recruitment. Because of the priority policy stated above, each listing does not necessarily represent an opportunity for all people.

Except when operational needs require otherwise, positions will be open for one week after publication.

For more information, contact the Employment Manager, Ext. 2882, or call the JOBLINE, Ext. 7744 (282-7744), for a complete listing of all openings.

Camera Club

The Camera Club will hold its monthly meeting at the Recreation Building on Thursday, April 25, at 5:15 p.m. As always, interested non-members are invited to attend.

Photo composition will be the main topic. After viewing an instructional videotape, there will be a group critique of members' works. All those attending are encouraged to bring any of their own photos that illustrate unusual compositional challenges or solutions. Be prepared for constructive criticism!

For information, contact Lew Jacobson, Bldg. 134C, Ext. 5193; Ripp Bowman, Bldg. 911B, Ext. 4672; or Anne Baittinger, Bldg. 134, Ext. 5055.

Nursery School To Reopen in Fall

Registration is now going on for classes at the Upton Nursery School, a nonprofit, parent-cooperative school for three- and four-year-old children that is held three mornings a week, from September through mid-June. Teachers Renée Bloch and Judith Van Asselt will be at Berkner Hall from 11:30 a.m. to 1 p.m., Tuesday and Wednesday, April 23 & 24, to meet parents, answer questions and accept registration forms.

Classes fill quickly, so sign up as soon as possible. For more information, call Elaine Gerhardstein-Wong, enrollment chair, 474-4525, or Cathy Lombardo, president, 924-2205.

The vacancies listed below have been exempted by the Director's Office from the current freeze on open requisitions.

LABORATORY RECRUITMENT - Opportunities for Laboratory employees only.

MK 108. HEAVY EQUIPMENT MECHANIC OPERATOR, GROUP LEADER - Plant Engineering Division.

DD 0666. SECRETARIAL POSITION - Requires AAS in secretarial science or equivalent experience, and excellent written and oral communication skills. WordPerfect experience is also required; IPAP experience helpful. Responsibilities will include processing DOE and NRC proposals, daily distribution of computer runs and general secretarial duties. Budget Office.

DD 8674. SECRETARIAL POSITION - Requires AAS in secretarial science or equivalent, and a thorough knowledge of Laboratory policies and procedures. Excellent communication skills and previous IBM PC experience also required. WordPerfect experience desired. Will provide secretarial support to the Incident Investigation, Tracking & Analysis Group. Safety & Environmental Protection Division.

OPEN RECRUITMENT - Opportunities for Laboratory employees and outside applicants.

MK 9624. DEPUTY MANAGER, TECHNICAL INFORMATION DIVISION - Requires an MLS degree, significant management experience, including budget and personnel management, and the management of a professional and support staff of a library. In addition, must have a successful track record in the implementation and maintenance of automated information systems. Will assist Manager in the administration, coordination, and supervision of all Division activities; oversee project management and strategic planning; develop and implement measures to enhance user satisfaction; and help develop policies and procedures to ensure high-quality editorial, publication and library support for the Laboratory. Technical Information Division.
