The experimental apparatus of the room-2-g (pronounced per-say-test) core — a precise measurement of the anomalous magnetic moment of the muon, a type of subatomic particle:

"...we still do a good experiment, and we come out here any time," Bond said. "We're still very active and we're developing the tools to answer questions that have dominated particle physics for decades."

The first of these tools comes in the form of a 17-circle calorimeter. It is one of the largest and most precise devices ever built. The experiment at BNL has declined since the 1990s, and the probability of starting a new experiment on sitelines is uncertain.

One potential on-site experiment could be an upgrade to theMuon g-2 Experiment. A g-2 experiment on an antiproton beam and a g-2 experiment on an antiproton beam at the Fermilab. Funding for particle physics at the Lab has declined since the 1990s, and the probability of starting a new experiment on sitelines is uncertain.

As the Man of Science, a man with a discerning eye for detail, Bond has a way of seeing the world through a lens. The world is made up of patterns, and patterns are the key to unlocking the secrets of nature. The Man of Science is a detective, and the world is his crime scene.

Bond is a master of the art of observation. He can discern the smallest details, and from these details, he can build a picture of the world. He is a man of the future, and his vision is one of a world where humanity and technology are united in a harmonious whole.

Bond is a visionary, and his work is a testament to the power of science. He is a man of the future, and his vision is one of a world where humanity and technology are united in a harmonious whole.

**Five 2006 Environmental Stewardship Awardees Won Recognition for Pollution Prevention Ideas**

Last year, five international stewardship foci were presented at BN Labs annual Earth Day Ceremonies, attended by over 400 guests. Each focal point was a demonstration of the outstanding contributions our community continues to make to the areas of pollution prevention, recycling, waste minimization, and energy conservation, completion, or measures conservation.

**South Room, free beginners dance Noon-1 p.m., Brookhaven Center, Fridays**

**Five 2006 Environmental Stewardship Awardees Won Recognition for Pollution Prevention Ideas**

The year’s five Environmental Stewardship Awardees were presented at BNLSR Annual Earth Day Ceremonies held on April 20. Leasing and Maintenance Laboratory, for demonstrating outstanding contributions in the areas of pollution prevention, recycling, waste minimization, energy conservation, composting, or measures conservation.

A large turnout of students and parents from local elementary schools also attended the ceremony for a “Youth Environmental Stewardship Contest in which the students design a poster on an environmental theme. The winning posters will be featured on the 2006 BNLSR Environmental Report Summary. In addition, several high school students won door prizes that included a new mountain bike and a two-year supply of ice cream.

**In Memoriam, Jesse Becke**

James Becke, a business operations manager II in the Accelerator Science (AS) Department, died on May 13, 2006. He was 61.

Jesse Becke joined the BNL workforce on March 27, 1972, as a Senior Auditor for Associated Universities, Inc., the company that originally managed BNL. A year later, he became a staff accountant in the Accelerator Development Department, where he advanced through the ranks to become Manager of the Department’s Administrative & Project Systems by 1989. In 1990, he joined the then Alternating Guide System (AGS) Department as Department Administrative Manager, becoming a CCA Associate operations manager when the AGS and the Relativistic Heavy Ion Collider combined to form C-A in 1999.

Jesse Becke was born in 1945, apartment area, 1st floor of BNL’s West Campus. He was married to Mary Becke and had two children, Jennifer and Joel.

Jesse Becke was preceded in death by his parents, James and Dorothy Becke, and his sister, Joan Becke.

Jesse Becke was survived by his wife, Mary Becke; two children, Jennifer Becke and Joel Becke; and two grandchildren.

**One-On-One TIAA-CREF Retirement Counseling**

TIAA-CREF retirement counselors will be available on Wednesday, July 19, from 9 a.m. to 5 p.m., in the Office Swap, in the apartment area.

For information or to register, contact Jennifer Champion, 646-2289 or jchampion@bnl.gov.

**Pianofest at BNL, 7/19**

Pianofest was held at BNL for a second year. The Pianofest is a summer workshop in the Hamptons, sponsored by the BNL Employee Activities Office, for its efforts to reduce waste and make more of a positive impact by recycling paper waste and organizing office swaps.

Jen Roswell and his students from the West Campus Middle School participate in the “Youth in the Environment” art contest.

**Eduard Pozdeyev**

Eduard Pozdeyev, 64, died on May 15, 2006. He was 64.

Eduard Pozdeyev died of oral cancer. His most significant work was developing a program to better secure our valuable and needed laboratory equipment. He was also involved in developing safety, occupational, safety and health management (OHSAS 18001)."}
