## JUILLIARD QUARTET CONCERT - TOMMOROW NIGHT

### LABORATORY NAVAL RESERVE UNIT FORMEL

On Wednesday evening, January 25, U.S. Naval Reserve Volunteer Research Unit 3-9 held its first official meeting here at the Laboratory. The commissioning ceremony was opened when Comdr. Joseph H. Graham, USN, head of the District Office of the Research Reserve for the Commandant 3rd Naval District, read the orders activating the Laboratory unit. Comdr. John S. Medd, USNR, then read his orders appointing him as Commanding Officer of this unit.

Dr. Urner Liddell, head of the Nuclear Physics Branch of the Office of Naval Research in Washington, then gave an interesting talk on the organization of research in the Navy. He outlined briefly the scientific problems facing the forces afloat in modern warfare. The part that can be played by each unit, such as that here at the Laboratory, was of considerable interest to all attending. Capt. John T. Tuthill, Jr., the Commandant's Local Representative for Long Island, was present.

Over twenty applications have been received for this unit, and twenty officers and men were present at the meeting. All of these are members

of the Laboratory staff, with the exception of six, who are coming from the National Dairies Research Laboratory at Oakdale.

The next meeting, which is for purposes of organizing the unit in detail, will be held at the Oakdale Laboratory on Wednesday night, February 1, at 8:00 p.m. The unit is open to personnel of the Naval Reserve, Coast Guard Reserve and the Marine Corps Reserve, as well as the women components of these organizations. Anyone interested should contact Commanding Officer, John S. Medd on Ext. 751. There will be regular meetings twice a month.

IT'S GETTING  
TO BE A HABIT!

George Vassilopoulos and Bernard Byrne again were the winners (North and South) at the bridge session held on Tuesday night, January 24, and the other members have decided to groom a team of players to try to get some one else in the winning column. Either the boys are good or they have developed a system of signals that defies discovery. The East and West winners were Bob Chase and Seymour Bloch. Enough members were present to make up six tables.

The next meeting will be Tuesday, February 7, in the Research Staff Lounge at 8:00 p.m. It is rumored that Culbertson and Jacoby will be there, disguised as scientists, prepared to give George and Bernard a run for their money.

OF INTEREST  
TO BRIDGE PLAYERS

The South Shore Bridge Club holds a duplicate bridge session in the Patchogue Hotel every Friday night at 8:30 p.m. The Tournament Director has issued an invitation to any members of the Laboratory staff to take part in the games. A small entry fee is charged each player.

The Hospital Visiting Committee acknowledges with thanks the books to be added to the Hospital Library that were donated by Richard A. German (Electronics).

JUILLIARD CONCERT  
(Contd. from Page 1)

The New York "Times": "The Juilliard String Quartet's playing of the Beethoven Quartet, which opened the program, was as sensitive and balanced and fused tone as any that we have heard for a long time. They play.....with fine intelligence and sensibility, and the ardor of youth."

"They played Hindemith, too, with enthusiasm and with evident understanding." - Clin Downes

Cincinnati, Ohio - "Times Star": "This quartet has diction, inflection, phrasing, understanding of tempos and a singular oneness of purpose in interpretation."

"The Beethoven Opus 59, No. 2, was performed with consummate taste and the entire performance proved that young American artists have talent, understanding and technical skill which will match the best of any nation." - Howare Hess.

With the above comments and program, how can you afford to miss this concert?

Remember the time: 8:30 p.m.; Tuesday, Jan. 31; Research Staff Lounge.
