A MERRY XMAS TO ALL

HAPPY CHRISTMAS

With the approach of Christmas and the tragedies caused by fires during this season, we bring the following to your careful attention.

A small tree is less hazardous than a large one. Flameproofing solutions are mainly unsatisfactory and tend to give a false sense of security.

Decorative articles should preferably be glass or metal. Cotton, paper or other fast burning materials should never be used.

Carefully inspect wiring, sockets and bulbs, replacing any that appear even slightly damaged.

Discoloration and dryness of needles is the signal to re-locate light bulbs.

Disconnect tree lights when you are away from home or when the family is asleep.

Dispose of your tree as soon as possible; keeping adds to the hazard. Remember fires of this type are fast burning and spread rapidly before successfully controlled.

For the sake of yourself and your loved ones,

PLEASE BE CAREFUL AND HAVE
HAPPY CHRISTMAS
