MERRY
XMAS
TO
ALL

With the coming of the Christmas season many persons have inquired about the extra precautions that should be taken against the possibility of a fire starting in their Christmas trees. The Fire Chief informs us that this hazard can be minimized by remembering:

A small tree is less hazardous and just as decorative as a large one. Place it in a cool spot away from radiators, registers and heaters.

Spraying will not make a tree flameproof, and so-called "automatic extinguishers" hung on the tree are not recommended. They may even create additional hazards.

Carefully examine and replace light sets showing signs of worn or frayed wiring. Be sure any new sets you purchase carry Underwriter's Laboratory approval.

Turn off tree lights during sleeping hours or when away from home.

Use only those decorations you know are incombustible. So-called slow burning or fire retardant decorations can burn.

Simple care will protect you and your family so that you may indeed have a Joyous Christmas.

MODEL R.R. CLUB

The regular business meeting of the Model R.R. Club will be held on Jan. 4 at the layout site, room 10, Recreation Bldg., T-317, at noon time.

GIRL BOWLERS
