ANNAPURNA NEXT FILM STUDY SHOW

Annapurna is still one of the magic circle of "Eight Thousanders." These are the handful of earth's mountains which rise to a height of more than eight thousand meters (26,247 feet), and in that spring of 1950 not one of them had been conquered. The attacking phase of the climb was carried off with brilliant success. Herzog and his companions reconnoitered, packed up their loads, established a base camp, reconnoitered still higher. Within a few weeks, blessed by good weather and the continued fitness of both climbers and porters, they had pitched a chain of smaller camps far up the flank of the mountain and were ready for the assault on the summit. This was accomplished by Herzog himself, with a single companion, Louis Lachenal. But while their luck had held thus far, it was now gone for good; and what, for the most expeditions, is the climax was for them barely the beginning of their adventure--and ordeal. The greatest of their achievements, as it turned out, was to be, not the ascent, but the descent of Annapurna.

This actual film record of Maurice Herzog's Himalaya expedition--with its wealth of human interest, its vividly picturesque jungle and mountain settings--is a magnificent visualization of one of the great true stories of our time. Few films of action, even true action, are as hair-raising as ANNAPURNA. Even fewer are capable of lifting the heart and mind of all who view them. The daring ascent and the historic retreat of Herzog and his team become a spiritual adventure.

The program will also include a short film produced in the U.S.S.R. filmed in the mountains of the Tian-Shan Range. The story concerns a little goat who grew to lead the wild herd of nimble mountain goats to safety from enemy wolves and hunters.

This program will be especially enjoyed by older children.

To be shown in the Lecture Hall at 8:30 P.M. on Monday, December 5th Admission 50 cents.

CHRISTMAS CARD MAILERS

Post Office request to our patrons:
Please separate your Christmas Cards so--
Long Island - with string or rubber band
around the bundle
New York, New York - Same
States or City bundles tied separately or
in boxes.

All Post Offices need your cooperation
to expedite the handling and dispatching
of your greeting cards for a safe and
early delivery to your loved ones.

Thanking you in advance and a Merry
Christmas to each of you. Steve Garrett

CAMERA CLUB

The Camera Club will hold its next regular meeting on Tuesday, December 6th in the Research Staff Lounge at 8:30 PM. "Let's Peek Over Their Shoulders", a Photographic Society of America recorded lecture, will be presented. The talk will be illustrated by sixty-five full color slides of flowers, insects, and various other natural subjects. Excellent examples of close-up kodachrome photography are included.

Please note the change in the day of the meeting to Tuesday.

CERAMICS CLUB

Interested in "doing things" with your hands? Ever try ceramics or sculpture?

Come help form the Ceramics Club. A meeting on Wednesday, December 7th, at 12:30 in the Research Staff Lounge Auditorium will be held to get the "kindred souls" together.

Future meetings will be held in the evening but we'd like you to stop in, even for a few minutes, just so we can exchange opinions on a few of the outstanding problems in getting our Club underway.

Remember, Wednesday, December 7th at 12:30.

AMATEUR ASTRONCMERS

A good telescope is often thought to be an instrument which is well beyond the means of the average enthusiast. Actually, however, it requires only moderate skill and very little money to build an instrument of first rate quality. Anyone wishing to join a group of people interested in building their own telescopes is asked to contact Theodore Auerback, Extention 345.

SALE BY BID

Sale of two Sand Spreaders manufactured by Highway Equipment Co. by sealed bid which will be opened in the office of the Purchasing Agent, Brookhaven National Laboratory, 2:30 PM, Dec. 16, 1955. Inspection to start Dec. 5, 1955. For information call Extention 2409.
