DR. TAPE ASSUMES A.U.I. POST

Effective May 1, Dr. Gerald F. Tape assumed the duties of Vice President of Associated Universities, Inc. The announcement of his new position was made on January 18 by I.I. Rabi, President of A.U.I. Dr. Tape will maintain his office at Brookhaven.

VISITORS

The International Conference on Neutron Thermalization will be held at Brookhaven from April 30 to May 2.

The American Ceramics Society will visit BNL on May 3.

TIAA - CREF

Participants in the Laboratory Retirement Plan may elect to have all premiums applied to TIAA, the fixed annuity, or may elect to have a percentage of premiums applied to TIAA and the remainder (up to 50%) to CREF, the variable annuity.

These percentages may be changed once a year, effective July 1. All participants who wish to change current percentages must make application at the Personnel Office **prior to June 1, 1962.**

OPEN HOUSE FOR EMPLOYEES AND THEIR FAMILIES TO BE HELD MAY 10

Brookhaven's facilities and programs have expanded during recent years. Because of this, it has become increasingly difficult for an individual - no matter what his affiliation - to keep abreast of its many aspects. BNL employees and their families have, of course, had the opportunity to participate in the Visitors' Days held each year in October. However, these programs, designed for the general public, do not give them the leisurely and comprehensive visit to the site that they might like. Therefore, it has been planned to open the Laboratory, in its ordinary workday attire, to BNL employees and their immediate families exclusively. An Open House will be held between the hours of 3:00 and 7:00 p.m. on Thursday, May 10. Employees will be able to plot their own course, sail under their own power, and visit those ports of call which are of most interest to them. The major research facilities which will be open for visitors are listed below:

Research Reactor (701)	Volatility Studies (527)
Parts of the Cosmotron (902)	Reactor Physics (135)
Metallurgy Building (480)	Critical Assembly Facility (525-526)
Beam Research Reactor (120)	The Instrumentation Laboratory (194-426)
Radiation Devel. Laboratory (528)	The Calibration Laboratory (348)
The Hot Laboratory (801)	Meteorology Laboratory (51)
New Nuclear Engineering Bldg. (815)	Health Physics Laboratory (144-145)
The new Computing Facility (459)	Parts of the Medical Res. Center (490)
New Target Building of the AGS (912)	The old Nuclear Engineering Bldg. (197)
The Biology Department with a special exhibit set up in the greenhouse (463).	

Many places which are not listed above will be open so that most employees will have the opportunity to show their families their own place of work. Personnel will be on duty in each of the places to answer questions and direct visitors. However, employees are asked to exercise caution and restraint, especially with respect to their children. Please keep them close at hand to prevent their accidentally tampering with fascinating buttons, controls or gadgets that should not be touched. All "no smoking" signs should be carefully observed. Maps and further information will be available at the Brookhaven Center starting at 3:00 on the 10th.

Efforts will be made to schedule work to permit employees to personally show their families around the site. In the case of employees having essential duties, supervisors will arrange such employee's work schedules to the extent that it is consistent with minimum work interruption and maximum safety standards. Employees not participating in the Open House will, of course, be expected to complete their normal work schedule as assigned.

LAWN BOOKLET

In Spring, a homeowner's fancy turns to his lawn. Copies of the booklet "Planting and Maintaining a Lawn" by Ed Hunter of Plant Maintenance are available at the Personnel Office, 58 Brookhaven Avenue.

CAMERA CLUB

The Camera Club will meet on May 9 at 8:30 p.m. in the Recreation Building. A representative of the FR Corporation will be on hand to demonstrate a new 3-step color printing process. Non-members are invited to attend.

DR. DEMEREC HONORED

The National Academy of Science has awarded the Kimber Genetics Medal to Dr. Milislav Demerec of the Biology Department for his achievements in the science of genetics, the branch of biology that deals with heredity. The Academy, an honorary body of about 600 scientists from all fields, presented Dr. Demerec with the medal at a ceremony on April 23 in Washington, D.C.

Dr. Demerec compiled his extraordinary record of scientific contributions to the understanding of the heredity of corn, flowers, fruit flies, bacteria and viruses while working at Cold Spring Harbor. A native of Yugoslavia, he immigrated to the United States in 1919 and became a citizen in 1931. In 1923, immediately after receiving his doctorate from Cornell, he joined the Carnegie Institution of Washington and the Long Island Biological Association. He became director of the Long Island Biological Association in 1941 and, in 1943, director of the Carnegie Institution of Washington. Dr. Demerec came to Brookhaven in 1960 as Senior Geneticist in the Biology Department.

UPTON RIFLE-PISTOL CLUB

Members of the Upton Rifle-Pistol Club have just completed a pistol match sponsored by the National Industrial Recreation Association, of which BERA is a member. Individual and team events in both small bore pistol and small bore rifle were fired. The targets have been sent in for scoring.

Top honors went to C. McClelland when he shot 151 out of a possible 160 in the large bore competition. J. Diener was second with a 150 and A. Lucas was third with 148. Next Sunday the entire match will be shot in one relay. Extra targets will be set up. All shooters should be ready to start at 2:00 p.m.

The small bore rifle matches will get underway on Thursday, May 10, and will be held every Thursday, weather permitting, through June 21. Matches start at 5:30 p.m. at the range on site. An entrance fee of \$1.00 will be charged each shooter before the first match starts. Ammunition and targets will be supplied free for the matches only. Anyone interested in competing should call B. Lorenz, Ext. 301-116.

The regular monthly meeting will be held Thursday, May 3, at 8:00 p.m. at the Recreation Center.

NEW MOWERS — NEW HAZARD

That time of year is here again — the grass is growing and the sound of lawn mowers breaks the weekend silence.

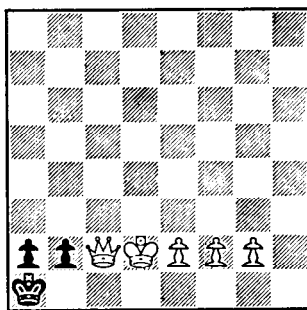

Besides being pelted by flying bits of stone (wear safety glasses), pulling the mower back over your toe (wear safety shoes), a new possibility of injury has come with the advancement of power lawn mower design.

There have already been several injuries resulting from the new spring-wound starters. At least one occurred when a home owner attempted to dismantle a "cocked" spring.

The more common possibility, of which all owners of this type mower should be aware, is the experience of having a mower stall in heavy grass, wind the spring starter, push the starter handle down and have nothing happen. Examination of the undercarriage shows that a heavy deposit of grass has wedged the blade from moving. Don't put your fingers underneath and attempt to pull the grass out — you may get the grass but may also leave your fingers. Take the mower to an already mowed area and gently bounce the mower on its rear wheels — the mower should start and clean itself of grass.

CHESS PROBLEM

This week's problem is an end game. It is White's move. Black is close, but still so far away from Queening its Pawn. How can White win? Answer elsewhere in this week's BULLETIN BOARD.

**SOFTBALL'S FIRST WEEK**

Here we go! Games this week are:

MONDAY — Metallurgy vs. Electronics
TUESDAY — Cosmos vs. Old Timers and Biology vs. Upton Downers
WEDNESDAY — Phoubars vs. Blue Jays and Bubble Boys vs. E.A.O.
THURSDAY — Untouchables vs. Dirty Sox and Health Physics vs. Medical

BRIDGE CLUB

The winners of last Thursday's duplicate game were Jean Kuo and Sandy Wagner (NS) and Paul Reilly and Max Schmaeler (EW). The gambling 3NT opening bid based on a long solid minor suit won a top-on-the-board for the NS winners.

Bidding

S	W	N	E
3NT	P	P	P

Although a defender should always lead an ace against a gambling 3NT opening, W led the spade king and declarer took the first 9 tricks for a score of 400. At the other tables where this bid was not used by South, the final contract was a sacrifice bid of 5 or 6 clubs against the opponents' makeable vulnerable game.

Dr. Clarke Williams presents trophies to members of
BNL 1962 Champions - The Technicians.

John Pontieri, president of the Old Timers shows off
his award winning table decoration.

BOWLING BALL?

Definition: A black, round object with holes used to knock down wooden sticks.

Definition: A party at the season's end where over 300 enthusiasts had a great time.

As usual the ingenious table decorations invented and displayed by each team were out of this world. The judges had a difficult time picking one over the other and wanted to award prizes to everyone. Runner-up awards went to the Nightingales, Alleygators, Bubble Finks and the Phoubars (as usual). The first prize went unquestionably to the Hawaiian Old Timers who arrived with their own palm tree, waiter, hula

dancer complete with grass skirt, and a 25 lb. roast suckling pig. It is interesting to note that 37 out of 40 teams decorated their tables.

The evening began with the presentation of awards by Dr. Clarke Williams to the team captains and individual high winners. Larry Fuller, BERA President, and George Sabine presented trophies to team members.

Bob Isler handled the M.C. chores without difficulty and deserves a round of applause. Thanks also to D. Ripperger, J. Kampe, L. Schairer, J. Reidl, R. Watson, G. Searles, W. Ruppert, J. Ruscica and Chairman E. Fales.

SOFTBALL FIELDS

The Softball Fields at Princeton and Brookhaven Avenues are to be used only for scheduled games or practices.

A schedule for both fields is maintained at the Recreation Office, 3 Center Street.

MICROMET SALES

Orders for Micromet, accompanied by full payment, are now being taken at the Personnel Office, 58 Brookhaven Avenue. No orders will be accepted after Friday, May 25.

FENCING CLUB

The Fencing Club will meet, as usual, on Wednesday, May 2, from 5:00 to 7:00 p.m. at the Gymnasium.
