BERA FILM SERIES

"THE YOUNG AND THE PASSIONATE"
(*"Vitelloni"*)

Directed by **FEDERICO FELLINI**

Thursday, Nov. 29, 8:30 p.m., Lecture Hall

Five young men, overgrown calves, as the Italian title suggests, live in a provincial town, getting into minor scrapes, annoying people, avoiding steady work, sponging off their families, and trying to stave off boredom in each other's company. One of them manages to find real trouble by getting involved with a nice girl. Forced to marry her and take a job, he almost immediately reverts to his old ways, chasing women and contriving to lose his job, taking up again with the other vitelloni. There are many amusing interludes with the group poet and a scene at a wild Mardi Gras ball, and eventually the straying husband gets the caning he deserves. One of the group makes the break for the big city and a possible use in life. With Franco Fabrizi as the erring one, Franco Interlenghi as the thoughtful one, Leopoldo Trieste as the poet, and Alberto Sordi as another member of the group, "The Young and the Passionate" won the Silver Lion of St. Mark at the Venice Film Festival.

The short subject will be "Songs of the Auvergne."

CHESS CONTEST

The first three people to have the correct answer to this week's problem will be awarded a Chess Set by the BERA Chess Club. Answers should be mailed before Monday, December 3, to Martin Van Lith, 2 Center Street. The solution will be published in next week's BULLETIN BOARD.

This problem was worked out by the Blindfold Champion, George Koltanowski. It is White's move and win.

BERA CONCERT SERIES

GARY TOWLEN

The young Blue Point pianist Gary Towlen will give the second Concert of the series on Wednesday, December 5, at 8:30 p.m. at the Brookhaven Center. He will appear in a program including works by Mendelssohn, Schumann, Clementi, Debussy and Kabalevsky.

Gary Towlen played his first formal recital at the age of twelve in the Carnegie Recital Hall, New York. At the age of fifteen, he played there again and also in Chicago, London, Paris, Geneva and Madrid. Everywhere he was hailed as a "major talent", one who "played with an interpretive force and maturity which made one forget his years" . . . "a musical intellect" . . . "a great piano artist of tomorrow."

When nineteen, Gary Towlen played his second London Wigmore Hall recital and his third New York recital. The Daily Mail remarked "Gary Towlen has a bias toward the 'grand manner' remarkable in a youth of this time. Few players of today can array such majestic tonal masses. . . . He can always control the power he has assembled. He can also stir the pulses with his fleetness and deal in the most delicate shades . . . he possesses the gift of intimate interpretation".

The New York reviewers were even more enthusiastic. Eric Salzman closed his New York Times review with this statement, "This is, no question, a major talent."

Season tickets (\$10.00 for adults, \$5.00 for persons under 18) will still be a bargain. Call C. Auerbach, Ext. 753. They will also be available at the door, along with single admissions at \$3.00 for employees and their families and at \$3.50 for guests.

SHUTTLE BUS SERVICE

Neither snow nor rain nor heat nor gloom of night stays these carriers from the swift completion of their appointed rounds. —HERODOTUS

With winter coming on everyone should take advantage of the BNL shuttle busses which are provided for the convenience of the people on-site. Over two hundred employees ride the shuttle busses every day and there's always room for another passenger; just wave to the driver (don't be bashful, girls - no tokens required) and he will stop for you.

The route, which covers most of the major facilities, takes about 14 minutes to traverse. Between 11:30 a.m. and 1:30 p.m., the Cafeteria is included. Busses will pick up or discharge passengers on signal at any point along the route.

Greater use of the shuttle busses, instead of private or government vehicles, will also help to reduce traffic congestion and parking problems and will increase the availability of government vehicles for necessary trips to areas not served by the busses.

NEWCOMERS' GET-TOGETHER

The Welcoming Committee is sending invitations for a Newcomers' Christmas Cheer Get-together to women who have recently joined the professional and scientific staffs and to wives of professional and scientific staff members. For secretarial comfort, we have made our lists from July 1st, but anyone who joined the Laboratory staff before then and still feels "new" is more than welcome.

Alphabetical and geographical selections have been made among the "old timers" since we can't ask everybody to everything. Those not asked this time will, we hope, come to another welcoming party.

At present, the members of the Welcoming Committee are: Bellport area, Mrs. Clarke Williams; Brookhaven area, Mrs. R. Christian Anderson; Huntington area, Mrs. Leonard Baker; Medford area, Mrs. Karl Walther; Yaphank area, Mrs. Walter R. Kane; Port Jefferson and east, Mrs. Howard Curtis; Blue Point area, Mrs. Gerhart Friedlander; Port Jefferson and west, Mrs. Gerald Tape; Patchogue area, Mrs. Vance Sailor; Shirley and east, Mrs. Gerald S. Levine.

If transportation is a problem in your case, will you please call extension 493 and ask for Mrs. Joan Victoria.

BRIDGE

The declarers who exercised care playing this 4H contract in the last game were justly rewarded.

N	S
x x x	x x
A x x x	K Q 9 x x
A x	K x
A K x x	J 9 x x

Three rounds of spades are led, the last ruffed by declarer. A trump is led to the ace (to guard against East having all four). Two more rounds are played when West shows out on the second round. How do you play? Plan before reading on.

The only distribution to be guarded against is Q-10-x-x of clubs with West. A club is led to the ace. If no honor falls from East, the ace and king of diamonds are cashed in that order. Now a small club is led and ducked in dummy. If East follows suit, the clubs have broken, and there is no problem. If East shows out, his partner is endplayed.

Arranging to lead the second round of clubs toward dummy is superior to leading toward the J-9, because if West started with the doubleton queen, you will catch it and make an overtrick.

Last week's winners were Skelly Frei and Sandy Wagner (N-S) and Jack Cockrill and Lou Shotkin (E-W).

The next game will be held Thursday, November 29 at 7:45 p.m. in the Recreation Hall. The game will be over by 11. In order to give out bigger master point awards, a Howell movement will be used.

CHRISTMAS TREES AND DECORATIONS

The Yule Tide Season is almost here again. This is the time that we introduce into our homes one of the greatest fire hazards possible - the Christmas tree. The following is a short review of some precautions we should take to prevent fire during the Christmas season.

Natural trees must be cut well in advance so that they are here in time for Christmas. For this reason they are quite dry. To reduce this hazard somewhat, cut off the trunk at an angle at least one inch above the original cut and then set it in water. Water must be added at intervals as long as the tree is in the house. If you buy the tree prior to decorating it, store it outside with the trunk in either water or snow since trees dry out much faster in the house. It is further suggested that the tree be brought into the house to be decorated as close to Christmas as possible and removed soon after Christmas.

There are several flame retardant materials, that may be put on Christmas trees at home, on the market, but none are very practical. It is necessary to coat every branch and every needle on the tree for these materials to be effective. Some of these solutions will also cause discoloration and premature falling of the needles.

Metal trees are very good from a fire standpoint in that they are completely non-combustible. However, they will conduct electricity and the sharp edges may come in contact with cords or sockets and cause the entire tree to become electrically charged. It is best to light this type of tree with spots. If properly done, this can make a very beautiful tree.

There is an increasing tendency around the country to use flock to simulate snow on Christmas trees. Most flock consists of tiny lengths of sharply cut rayon fibers to which flame retardant chemicals and dry adhesives plus materials to give color and glitter have been added. If this flame retardant material has not been added, flock is extremely combustible. This should be carefully checked when purchasing this material.

"Angel hair" (normally made of glass wool and labeled "non-combustible") and spray-on "snows" (usually sold in aerosol cans and also labeled non-combustible) do not, **when used individually** introduce any additional fire hazard. **However**, "angel hair" with a "snow" application can burn. Caution should, therefore, be exercised, and when it is desired to spray a tree with "snow", this should be done **first** and any "angel hair" applied subsequently.

The following are some general precautions to be observed:

1. Do not use wax candles around trees, greenery, or any other combustible decorations.
2. Before using, check all electric lighting sets for frayed cords, loose connections, or broken sockets.
3. Buy only UL labeled lighting sets.
4. Be sure there is a 15 amp fuse (no larger) in the electric circuit that you will use for the lighting.
5. Turn off all tree lighting before leaving the house or retiring for the night.
6. Use non-combustible materials to decorate your house whenever possible.
7. Polystyrene foam, a material sometime used in Christmas decorations, is combustible and melts as it burns. Do not use foamed plastics near candles or other ignition sources.
8. Be careful when buying toys for your children. Pyroxylin plastic dolls or toys burn easily. Toys operated by alcohol, gasoline, or kerosene are especially dangerous. When buying electric toys, be sure they are listed by Underwriters' Laboratories, Inc.
