AEC Technician Scholarships Awarded to Easler, Greenlaw

BNL Technicians Norwood Greenlaw of Wading River, and Dean Easler of Yaphank were awarded scholarships valued at an estimated \$20,000. They will attend college as full-time students with all tuition and fees paid, while remaining on a full-time salary basis at BNL with all fringe benefits for themselves and their families.

The scholarships, which are awarded by the AEC each year, are available to those technicians who can complete their bachelor's degree requirements in two or less calendar years.

Greenlaw has been at BNL since April 1959. He is currently a senior technician in the Instrumentation and Health Physics Department. Since 1960 he has attended evening classes at C.W. Post, where he will have 104 credits towards his degree at the end of the current semester. He plans to

continue at Post and obtain his degree in Electronics with a minor in physics. Greenlaw, 31 years old, and his wife Mary, have two children, John David, 9, and Joseph Daniel, 7.

Easler, who has been at BNL since November 1960, is a senior technician at the AGS. Prior to joining BNL, he earned an Associate of Applied Science degree from DeVry Technical Institute. In 1962 he started part-time studies at Columbia, and is currently attending Suffolk Community College. He has accumulated 60 degree credits.

Easler, 28 years old, plans to use his scholarship to attend the University of Illinois and get his degree in electrical engineering with a minor in mathematics. His wife Daryl, and their three children, Bradley, 8, Craig, 4, and Tracy, 4 months will go to Illinois with Easler, and live in a house near the university.

Students Selected For Summer Program

One hundred twenty students have been chosen from over 500 applicants to participate in the 16th Annual Summer Student Program at BNL.

The applications, which were received before February 1, came from juniors, seniors and graduate students from 160 colleges and universities in the United States. The final 120 all have a B or better average, and are in the top 20% of their class. This year for the first time, no foreign students will be participating in the program which is sponsored by the AEC Division of Nuclear Education and Training.

Most of the successful applicants will arrive on Sunday, June 11, and will be checked in at a field office set up in the Exhibit Hall at 26 Brookhaven Avenue.

William L. Knapp, Office of Scientific Personnel, will act as Dean, Chaplain, Host, and occasionally as Finance Officer to the new arrivals. Many of the students, who must travel at their own expense, will be brought by their parents and will spend the first day in touring the site and inspecting quarters.

The selection of those students chosen to participate in this program is based on the aptitude of the student, his field of research, recommendation from faculty, and final screening by the staff at BNL. No student may be in the program for more than two years.

DALU Votes to Affiliate With IBEW

By a margin of 255 votes, the 639 members of DALU voted on April 5 to affiliate with the International Brotherhood of Electrical Workers.

Of the 329 members casting a ballot, 37 voted against the International and 292 voted for affiliation.

This was the second election held recently in conjunction with this question. Earlier in the year the membership chose the IBEW over the United Auto Workers and the International Association of Machinists. According to Charles Geonie, newly elected president of DALU, the IBEW was preferred because "The similar dues structure requires very little change in current procedure, and the members identified more with the electrical workers than with the machinists or the auto workers."

Geonie pointed out that the IBEW has recorded the lowest man-hours of strikes of the three unions in question, and in fact has just started a union strike fund for the first time this year. Gordon Freeman, president of the IBEW, is also a member of the Atomic Energy Labor-Management Advisory Committee of the AEC.

The charter for the new union will be issued in about two weeks, and will not change any of the provisions of the present contract which expires in December of 1968. As in the past, the contract will be re-opened only with the approval of both the Lab and the Union.

The new affiliation, according to Geonie, will lead to many advantages. There will be help from the parent union with negotiations and backing in the event of strikes. "We will be in a better position for collective bargaining with a large union to back us up," said Geonie. The other two unions at the Lab are already affiliated with Internationals.

The last time the contract was re-opened was to hold a vote on the matter of a 56-hour work week for the firemen. This proposal was defeated by a vote of 81 against and 28 in favor of changing the work schedule to 24 hours on-duty followed by 48 hours off-duty.

The most recent of the four votes taken was that for officers of the local union for the coming year. Charles Geonie, Jr. of Plant Maintenance was elected president; Paul Kelly, vice-president; Charles Brockner, secretary; George Betz, financial secretary; John Scandizzo, treasurer; and Ray Gawlowski, sergeant at arms.

Also elected was William Patajano, trustee, for a three year term.

This was the first election to be held using the "Ballot by Mail" system, and brought out about 120 more votes than had been cast last year.

According to Geonie, the executive board will have a busy year ahead. "We will be starting from scratch," he said, "because the bylaws will have

(continued on page 2)

Brookhaven Spectrum Available for Local, Community, Showings

Twelve prints of the "Brookhaven Spectrum" are now available from the Laboratory film library, and may be borrowed for showing at various community functions. Churches, schools, and clubs of all sorts will find this film a worth-while addition to their program.

In cases where the borrower is not available, or does not feel competent, to introduce the film or to answer questions after the close of the program, the Laboratory will supply a speaker.

This 25 minute color movie is being entered in several Foreign Film Festivals, and will probably be distributed by the U.S. Information Service to many countries. Demand for it will be quite high, and it is important that reservations and arrangements be made well in advance of the desired program date.

4-396-67

Mrs. Maria Tasso, of the Information Division, who will take care of all arrangements for showing the film, can be contacted by calling Ext. 2327.

DALU . . . (continued)

to be changed, and the whole set-up will be changed. The board will try to make some progress towards a new headquarters, and remove the need for renting a hall whenever a meeting is to be held." An increase in the union's social activities is planned. For example, it is hoped that there might be two dances this year instead of just one as in previous years.

Friedlander Receives Chemical Society Award

The American Chemical Society's \$1,000 award for Nuclear Applications in Chemistry, sponsored by Nuclear-Chicago Corporation, was presented to Gerhart Friedlander of the Chemistry Department, at the 153rd annual meeting of the ACS in Miami Beach. 4-665-66

The award is in recognition for Dr. Friedlander's research in experimental and theoretical studies of the interactions between complex nuclei and high energy bombarding particles. His work led to the discovery of five radioactive nuclides, the products of high-energy nuclear reactions.

In addition to membership in the American Nuclear Society, he is a Fellow of the American Physical Society, and a member of the American Association for the Advancement of Science. In 1966, he was appointed a member of the Advisory Committee for Oak Ridge National Laboratory's Chemistry Division. Dr. Friedlander and his two daughters reside in Blue Point.

Army Chaplains Tour BNL Research Labs

Fifty chaplains from the US Army Chaplain School at Fort Hamilton toured the Lab last week as part of their advanced training program.

The men, under the leadership of Lt. Col. C. J. Lively and Lt. Col. T. S. Johnson were greeted by Dennis Puleston of the Information Division who gave an introductory talk before they left to tour the Research Reactor, the AGS, and HIRDL.

Research At Lab Leads To Patents

The fundamental type of research at BNL, while not aimed at the solution of practical problems, very often leads to that end.

During 1966, members of the Laboratory staff reported 46 inventions; about half of these were of sufficient importance to warrant patenting.

Bob Chase and Veljko Radeka of Instrumentation developed a new low-noise amplifying circuit which is needed to get the best performance from the recently developed solid-state radiation detectors now becoming the preferred device in many fields of research.

Bill Hartin of Health Physics invented a new way to make a radiation dosimeter using powdered lithium fluoride imbedded in a plastic. The dosimeter is heated in a special oven causing the production of light proportional to the amount of radiation observed by the dosimeter.

Gil Raynor of Meteorology invented a machine for sampling solid airborne contaminants. Ultimately hay fever sufferers may have more information on why they suffer more at certain times.

Sal Giordano of the Accelerator Department invented a new device for getting better performance out of a linear accelerator. His invention will probably be used when the new 200 MeV Linac is built as part of the 48 million dollar AGS modernization.

Dick Wiswall and Jim Reilly of Nuclear Engineering invented a way of storing hydrogen in a solid material. This invention may be needed to make a practical automobile which will operate on hydrogen and air instead of gasoline.

Lew Friedman, Tom Moran, and Jacob Leventhal of Chemistry invented a device using low energy excitation of atoms for improved mass-spectral analysis to reveal the structure of organic compounds.

Ron Withnell of Chemistry developed a new device to measure the extremely low gas flow rates used in gas chromatography.

Bob Blesch, Charles Porter, and Oliver Reading of the Survey Group, Accelerator Department, invented a device which will permit them to know when any of the 240 magnets in the AGS is not level without going into the tunnel to make a direct measurement. After the AGS conversion, the radiation levels will be too high for the direct measurement methods now in use.

Panayotis Katsoyannis and Andrew Tometsko invented a new method for getting a higher yield of synthetic human insulin. Great advances in the treatment of diabetes should result from this invention.

Close Collisions Studied By Collins and Anderson

Two BNL physicists, George B. Collins and Walter Anderson, presented papers on a recent significant experiment in high energy physics. This experiment, done in collaboration with faculty members from the Carnegie Institute of Technology, used a new approach to investigate the structure of the proton.

Liquid hydrogen was bombarded with 30 GeV protons at the Alternating Gradient Synchrotron to give the close collisions which produce many new particles. Analysis of the experimental results suggests that there is a force responsible for multi-particle production which is located near the center of the proton. This force appears to be different from the force distributed on the outside of the proton.

Dr. Walter E. Anderson presented a paper on this experiment at a conference on Nucleon-Nucleon Interactions at the University of Florida on March 25, 1967.

Dr. George B. Collins read a similar paper at Argonne National Laboratory on March 30, 1967, and has been invited to present a paper at Harvard University on April 17, 1967.

Physicist Victor W. Cohen To Lecture at Denison U.

Dr. Victor W. Cohen, of the Physics Department, will serve as a visiting lecturer at Denison University, Granville, Ohio, Monday and Tuesday, April 17 and 18.

BNL Chemist to Lecture in Germany

Norman Sutin, Chemistry Department, is giving an invited paper at the 18th meeting of the International Committee of Electro-Chemical Thermodynamics and Kinetics at Schloss Elmau, Germany, late in April.

Letters To The Editor

Sir:

Since publication of my letter to the *Bulletin Board* in which I confessed my inability to understand the mystique of building numbers, I have been stopped by a number of people with pats on the back or offers to knock my block off. Apparently the subject of building numbers is fraught with emotion. I had hoped for less smoke and more fire and more reason.

Will someone please write a letter to the editor to explain the how, why, when, and where of building numbers. If there are good reasons, let us all know.

Daniel M. Schaeffer
40 Brookhaven Avenue

Gentlemen:

While marches and protests have become the rule, I have contained myself. I have suffered silently, and endured, my disagreements with Ronald Reagen, Harvey Maddox, RFK, Jack Javits, Rocky, Mr. and Mrs. Wallace and others too numerous to mention.

I have stood by, silently, while my beloved BNL has been subjected to a budget cut, surrounded by a national cemetery, encompassed by a jetport, and passed over for Weston, Ill.

Now, however, I must protest. An injustice of the gravest nature threatens, and abuses, the employees of BNL. I speak of the condition of the vending machines located on site. They are full only on the last day of February during Leap Year, and worse, they work only on the day they are filled. An informal survey reveals that the refunds from these machines, if paid, would have the same result as granting each employe a 2 1/4% tax free wage increase.

Something must be done and I have a brilliant solution to this overwhelming problem. Let's remove the machines and replace them with suitably (i.e.-briefly) attired young ladies who would push handcarts from room-to-room, building-to-building, hawking their wares.

This, then, is my protest. Something must be done to correct this abuse, if not I shall march and all else failing, I may have to issue buttons.
Yours for reform,
Robert M. Brown

Stony Brook U. Presents International Club Show

Chinese Cooks, Lebanese Bakers, Indonesian Dancers, and Barbershop Quartets are all on the program for an International Weekend at the State University at Stony Brook Saturday, April 15.

From 2 to 7 p.m. there will be a free exhibit of handicrafts, music and food by the foreign students. At 8 p.m. a variety show will begin for which an admission charge of one dollar will be levied. After the show, there will be an informal reception and dance, free of charge and open to all.

Drummer Joe Morello Featured With Brubeck

Joe Morello, who will be appearing with the Dave Brubeck Quartet at the BNL Theatre on May 6th, is one of the great drummers of all time. Among many other awards, Joe has recently won the Down Beat Critics' Poll.

As his fans and admirers around the world will verify, Joe has brought more than one audience to its feet in wild enthusiasm, paying tribute to his amazing speed and ability musically as a drummer. Critics and audiences alike agree that he is perhaps the most exciting drummer in the country, with a pair of the fastest hands ever to hold drum sticks.

Joe Morello was born in Springfield, Massachusetts, and first studied violin at the age of 8. When he was sixteen, he began taking drum lessons from George L. Stone of Boston. After struggling in New York trying to land his first important professional job, he auditioned for Johnny Smith, who quickly hired him for his Quintet. He soon came to the attention of Stan Kenton, and after a successful term with Kenton, joined the Marion McPartland Trio.

Joe became a featured member of the Brubeck organization in 1956 and since has been recognized as one of the outstanding drummers of our time.

Tickets are available for the Brubeck concert at the BNL Recreation Office.

The curtain is at 9 p.m. sharp.

Free Brubeck Ticket Drawn

The drawing of a purchased "Greasepaint" ticket for two seats to the Brubeck Concert was held on April 7. The winning ticket is **Row M, Seat 3** for the **April 29** performance. The holder of this ticket has until **5:00 p.m. on Tuesday, April 18**, to claim his winnings. If the seats remain unclaimed at that time, another drawing will be held on Friday, April 21.

Family Camp Club to Meet

The regular monthly meeting of the Brookhaven Family Camping Club will be held on Thursday, April 20. This meeting, which will be held in the Recreation Hall, at 8 p.m., is open to all employees of the Laboratory.

BERA Film Series

Thurs. April 30, 8 p.m. - Lecture Hall
The Guns of August

Based on Barbara Tuchman's best-selling Pulitzer Prize winner, this powerful historical film documents the authentic and intimate lives of the great world leaders prior to World War I, and the momentous highlights of the war. The invasion of neutral Belgium and the failure of the famous German Schlieffen Plan.

The stand of the French on the Marne reinforced by troops brought by the taxis of Paris, and the brutal trench warfare are shown with films taken from various sources of the time. This is probably the best documentary film about World War I. (99 minutes)

Short: Colorado, Wild River

A cinematic evocation of this wildest of American rivers.

Movie Tonight

The Kitchen. Short, Bowl of Cherries.

Romance - Greasepaint Style!

The "Roar of the Greasepaint, The Smell of the Crowd" has been acclaimed as one of the most unusual and imaginative musicals to happen in years. But, needless to say, it has lots in common with all of the long-running Broadway musicals: the energetic chorus, the convulsive dance routines, the exciting musical score, the conflict of character and plot, and last, but by no means least, the inevitable romantic interest.

But "Greasepaint" being the musical it is, presents romance in its own uncommon way. As the hero's "dream" goddess, Sheila Buck etches a lovely characterization of The Girl. Sheila is the wife of Brian Buck of the Theoretical Physics Group and mother of their four children. In "Greasepaint" she is required to dance the "This

Dream" ballet and later sing the show's throbbing ballad, "My First Love Song." As a former performer with the University of London Opera Group, she brings eminent qualifications to her demanding role.

Romance also enters the life of our hero in the form of The Bully, played by Ernie Speiss of the Design Engineering Group. Although Ernie is the proud possessor of a big baritone voice reminiscent of Pinza, his work in "Greasepaint" is exclusively dramatic. He is making his first BNL appearance in a role we know you will never forget.

Plan ahead and get your seats early for "Greasepaint." Show dates are April 21, 22, 28, and 29. Laugh and cry your way through romance - "Greasepaint" style.

Leo Smit to Perform at BNL for Season Finale

The pianist, Leo Smit, will give the final concert in the Brookhaven Series on April 18th at the Brookhaven Center at 8:30 p.m.

Leo Smit was born in Philadelphia, Pennsylvania. At the age of eight, during a trip to the Soviet Union, he played for the Director of the Moscow Conservatory and was awarded a scholarship for piano studies with Dmitri Kabalevsky. From 1936-37 he was pianist for the American Ballet under the direction of George Balanchine and then at the age of sixteen, he served as pianist and assistant conductor to Igor Stravinsky in the American Ballet's production of three Stravinsky ballets at the Metropolitan Opera House.

February 1939 marked Leo Smit's piano debut at Carnegie Hall. In 1947 he accepted the post of pianist with the New York City Symphony under the direction of Leonard Bernstein. At the same time, he was a member of the faculty of Sarah Lawrence College.

In 1950, Mr. Smit was the recipient of two awards: a Fulbright Fellowship in piano, and a Guggenheim Fellowship in composition. The following two years were spent at the American Academy in Rome and performing in various European cities.

At the present time, Mr. Smit holds the position of Slee Professor in Composition

at the State University of New York at Buffalo, a position formerly held by such eminent composers as Aaron Copeland, Carlos Chavez, Leon Kirchner, and Alexei Haieff.

Mr. Smit's program at Brookhaven will include:

Partita No. 4 in D Major.....J.S. Bach
"The Alcotts," from the
Concord Sonata.....Charles Ives
Sonata in One Movement.....Leo Smit
Sonata No. 3 in F Minor, Op. 5.....J. Brahms
Admission: Adults, \$3.00; Children,
\$1.50; and, Non-Employee Guests, \$3.50.
Coffee will be served following the Concert.

Kegler's Korner

by Pat Towey

Black and Blue - Geo. Barton's 203 game was high. King Pins clinched second half and will go against Playmates for league leader on April 16.

Green - Ray Marlowe had a good night of 241 high game and 609 scratch.

Rose - Nightingales have first place taken care of. How are these figures for an evening's work. Betty Gillette 644 gross (94 avg) and Joyce Vail 635 gross (105 avg).

Pink - This league has turned upside-down but the position night is yet to come. All Toes by 3 very small points.

Red - Pinboys lead 1/2 point with 5 Excuses breathing down their neck. The Ah So's are sitting by just waiting for roll-offs. High games R. Larsen 237, G. Warner 215, J. Richter 215, R. DeGregorio 213, J. Allinger 212 and D. Klein 206.

Sweep nights will be the week of April 16 - bowling will start at 5:30 on your individual night.

Dates to Remember

Season ends week of April 9
Roll-offs week of April 16
BNL Championships on April 29 - Patchogue Bowling Center
Bowling Dance - May 13

To date 60 questionnaires have been returned - please get yours back as soon as possible.

Applied Math Team Downs Old Timers

In the most exciting championship game possible, Applied Math won the slo-break basketball championship game with the Old Timers 43-41 last Thursday night. A crowd of about 100 spectators sat back in disbelief as Les Lawrence did the impossible; he sank an off-balance shot from the corner at the buzzer. Carl Klamut had scored a long two-hander at the buzzer ending the first half to help keep the Old Timers in the game.

After the Old Timers went ahead briefly at the start of the game, Applied Math found the range and through a good bit of the game held as much as a 10 point lead. However, Herm Haller hit on two quick jumpers and George Leverock made a three-point play to knot the score at 40 all. Then Lucky Les took over. Jake Leventhal of Applied Math led all scorers with 17 points. Les Lawrence finished with 14 and Dallas Thompson with 8 for Applied Math. For the Old Timers Herm Haller had 12 and George Leverock 9 points.

Blind Bogey Planned For First 1967 Golf Tournament

The Brookhaven Golf Program is being formulated and a full tournament program is being planned.

The first tournament is scheduled to start on May 1 and runs until May 14. The tournament will be a Blind Bogey 18 hole event; no handicap is required so every member can enter.

The second event is scheduled for May 16. This is planned to be a gala event. There will be a 9 hole tournament after work (handicap required - last year's handicap will be used if a new one has not been established). Following the tournament there will be a Get-together and membership meeting starting about 7:30 p.m. Details of the Get-together will be published in a few weeks. All members are urged to attend whether they enter the tournament or not, since important announcements will be made.

The entire tournament schedule will be sent to last year's membership in the near future.

Membership applications are available at the Recreation Office, 3 Center Street, or call Dick Hildenbrand, Ext. 7777.

Softball Rosters Filling

Entry applications are at the Recreation Office for your group to join our Slo-Ball Leagues this year. We have plenty of room for new teams or players.

The season is scheduled to begin the first week in May. Rosters with the proper fee must be submitted by April 14 for last years teams, and by April 19 for new additions.

BERA supplies the bats, balls, gloves and umpires and also provides trophies to the winning teams. Each team plays once a week at 5:30 p.m. The games are 7 innings long and generally take about 90 minutes to complete.

Beg Pardon . . .

Due to a typographical error, the name of Ed Hart was omitted from the caption of the picture of Fishing Contest Winners on page three of last week's Bulletin Board.

Paul Desmond With Brubeck at BNL May 6

Classified Ad Policy:

1. The Bulletin Board's classified section may be used only by active and retired Laboratory employees.
2. All items for sale or rent must be the advertiser's property.
3. Persons listing houses, apartments, or rooms for sale or rent, do so with the understanding that these must be available without regard to race, creed, color, or national origin.
4. Ads associated with a full- or part-time business cannot be accepted.
5. Ads should be restricted to 20 words or less and typed or printed on the form provided. (Additional copies of the form are available at the Bulletin Board office.) Twelve noon on Friday is the deadline for inclusion in the following week's issue.
6. Ads are run on a space-available basis; those not carried because of space restrictions will be held for inclusion in the next issue.
7. Ads are run only once and must be resubmitted if they are to be repeated.
