## Three From Accelerator Get Pinned 7-119-67

At a ceremony held in the conference room at the AGS, on June 30, the above employees were awarded twenty-year pins by Dr. G.K. Green, Chairman of the Accelerator Department. Left to right are: Ernest W. Hoyle, Supervisor of the Accelerator Department machine shop; Angela M. Iacovelli, Senior Accounting Clerk; and Louis K. Potter, Senior Technician. Walter W. Merkle, Electrical Engineer was unable to attend.

## Get in the Swim . . . But Come Home Safe

The first swim in the ocean can be a harrowing experience for those who have previously been only to lakes and pools. Ocean swimming can be a lot of fun if some basic safety rules are followed. At Smith Point Park, the nearest ocean beach to BNL, the sun, the sand, and the waves make possible a complete day of sport.

Ocean waves are a joy to the surfer, a challenge to the bather, and a haven for the fish that feed on the churned-up bottom. Waves fascinate children and adults alike, and are always good for the background for a summer TV commercial. In a storm, the breakers terrorize beachfront cottage owners, and cause boatmen anguish and fear.

Is the seventh wave of a series larger? According to investigators this is one of the myths of the sea. The average wave in the Atlantic ocean has a period of ten seconds between waves, and travels at a speed of about 35 miles per hour.

The height of waves, and the consequent depth of water can be estimated quite easily. Walk towards the water until the crest of the breaking wave is seen aligned with the horizon. The vertical distance between the eye and the lowest point to which the water retreats on the face of the beach is then equal to the height of the wave. The depth of the water at the breaking point is 1.3 times the height of the wave.

Never let a wave break over your head. Serious injury can result due to the churning action of the water, and the crushing weight as it falls. Always dive into a large breaker so that you come to the surface on the calm side to seaward.

An undertow, a sea puss, or a backwash, is created as the water washed up on the beach shelf by a breaker runs back to the sea. If caught in an undertow, swim parallel to the shore before trying to turn in to

## Old Guest House To Be Replaced

The old Guest House on Upton Road, adjacent to the Brookhaven Center is to be torn down in the near future. The building next to Personnel, which is also scheduled for demolition, and the old Guest house are the last two CCC buildings remaining on site.

The facilities of the old Guest House will be replaced by the conversion and modernization of half of the H-shaped concrete block residence on Upton Road. Work on this project will start as soon as the building is vacated by the summer students who are housed there now.

This alteration of Fermi House, will be under the general direction of Don Mal-lory, who has been responsible for the design and the alteration of other dormitories on site.

The Civilian Conservation Corps, which built these structures and many others more than thirty years ago, was also responsible for planting groves of Red pines on site as part of a youth employment project. Between World War I when Camp Upton was founded, and World War II, the site was used as a game preserve and a wildlife refuge.

the beach again. If you find that you are tired, relax by floating on your back for a while or slowly treading water before swimming back to shore. Floating in salt water, incidentally, is much easier than in fresh water.

The prime rule for ocean swimming is to never swim alone, and never at a beach without lifeguard protection. Speaking of protection, don't forget the sun-tan oil even though the day is cloudy or overcast. The ultraviolet rays of the sun penetrate the haze on a chilly day, and a serious burn can result if proper precautions are not taken.

## Insurance Folder Mailed to Homes

The new "Insurance Highlights" folder which was designed for easy reference to benefits at BNL, has now been mailed to the homes of all employees. This new, simplified brochure will enable employees to find key benefits in a quick and easy manner through use of the color coding system.

Extra copies of the folder may be obtained from Personnel Services, 58 Brookhaven Ave.

## Q & A . . .

The following questions were received for this week's benefit column.

Q. Can the *Bulletin Board* explain the automatic increases included in the new wage system?

A. The purpose of automatic increases is the same under the new system as it was under the old one, that is, to provide a guaranteed rate of progression for newly hired or newly promoted employees who are satisfactorily progressing toward the proficiency (or standard) rate of their wage level.

The increases may be accelerated for an exceptional employee, and for the employee who has not yet measured up to expected performance, they may be decelerated. However, any action of this type would be taken only if recommended by the supervisor or supervisors most directly acquainted with the work of the employee involved. If no such action is taken, the increases are processed automatically.

The automatic increases occur at six month intervals based on the entry date into the particular wage level. In the past, the increases were always given in January or July and it could take anywhere up to nine months to get the first increase.

Q. I am a veteran and your BNL tuition refund article in the June 29 *Bulletin Board* did not mention the G.I. Bill. Can I obtain tuition benefits from both?

A. It depends upon what you mean by the word "both." According to a communication received from the Veterans Administration, they will disqualify you from receiving any G.I. Bill educational benefits concurrently with BNL tuition refunds. In other words, you can't collect from both for the same course. However, there is no reason why you can't use the BNL and the G.I. Bill benefits *one at a time*. Since the G.I. Bill may provide varying benefits at different times, you should look into both benefit programs and pick the one most beneficial to your current needs. For those veterans at BNL who have not used their G.I. Bill education benefits and are not sure whether or not they qualify, here are the current eligibility requirements: *an honorable discharge or release, and active duty for more than 180 days, any part of which occurred after January 31, 1955, or if less than 181 days, the discharge after January 31, 1955, was for a service connected disability.*

The service period of 181 days does not include periods when the veteran was assigned to a civilian school by the Armed

## Now Hear This! . . .

### Summer Students Only

Brookhaven National Laboratory needs your help.

On August 12, the town of Riverhead (BNL's neighbor to the east, on the shores of Peconic Bay) is celebrating its 175th anniversary with a parade, and Brookhaven National Laboratory has been invited to sponsor a float.

Sounds great, doesn't it? There's one little problem, however. We have three reactors, the world's largest accelerator plus a few smaller ones, outstanding medical, biology and chemistry departments, several hot cells, a fabulous data processing center, some great nuclear engineering facilities, but alas, we have no float.

For most of us older fogies at the Lab, college days are but a fond memory, with an occasional visit back to the campus for homecoming day. And homecoming reminds us that there is almost always a parade, with every fraternity, sorority, and other organized group on campus entering a float.

The ingenuity displayed in the floats never ceased to be a source of amazement, and from this writer's own experience, one heck of a lot of fun, whether or not our float won the trophy. Come to think of it, our football team won about as often as our float did.

Be that as it may, the Laboratory for the first time in its history is turning this project over to the summer students. We think you can come up with a really great float to represent BNL in Riverhead's 175th birthday parade, and have a lot of fun in the process.

Brookhaven Lab will provide you with a truck for the float and help out wherever possible with materials and counsel. A committee for this purpose has been formed, and it consists of: Paul Kelly, Plant Maintenance; Alf Christoffersen, Technical Photography; George Sabine, Personnel; George Cox, Technical Photography; Mariette Kuper, Director's Office, and the entire staff of BNL's Public Relations Office.

An organization meeting will be held at the Brookhaven Center next Monday, July 17, at 5:15 pm, and all of you guys and gals are invited. Let's have a good turnout. P.S. *Even before this article was completed, a few grumbings were heard from some staff members. Loosely translated, the remarks were generally along the lines of "that sounds great and why can't we get in on it?" So, we will make a slight concession. Any BNL personnel (non-summer student) interested in helping out, are invited to come to the meeting Monday and join the committee. However, the project itself remains strictly for the summer students.*

## Hospitality News

Mrs. Mutuko Hitotumatu will give a demonstration of origami on Wednesday, July 19. Origami is the Japanese art of paper folding to represent birds, insects and flowers.

The demonstration will be at the Recreation Hall from 10 to 11:30 am. Refreshments will be served. If anyone has a question regarding this demonstration, please contact Mrs. Jacqueline Newman, Andrew 5-7183.

Forces for a full-time course, or service at one of the service academies, or any period of reserve active duty for training. Persons in this category are not eligible for participation.

A word of caution. Don't jump at one or the other, but look into both possibilities. Be sure to consult the BNL Personnel Office for additional details before deciding.

## BERA Film Series

Thursday, July 20 - 8 p.m. Lecture Hall

### The Servant

Directed by Joseph Losey, this macabre film, an account of patrician degradation, is presented so skillfully that the impact bears a startling truthfulness. An indolent, spoiled young man (James Fox) is corrupted by the machinations of his vicious hired man-servant played by Dirk Bogarde, in the finest performance of his career. The careful take-over of the young man and his palatial Georgian style home by the servant and his mistress (Vera Miles) is developed by Mr. Losey in brilliant scenes of erotic perversity, delicate satire, and hints of mystery.

### Short: House of Cards

A controversial experimental film not previously available to the public.

## Thespians Present '67 Showstoppers

The BERA Theatre Group will present an evening of cabaret-style entertainment on Thursday, July 27, and August 3, and Friday, July 28, and August 4. A bar in the North Room of the Brookhaven Center will be open during this free show that starts at 8 p.m.

"Cabaret," "Show Boat," "Gypsy," "West Side Story," "Sweet Charity," "Funny Girl" - any favorites of yours listed above? Fine, and we have more!! Come and spend a pleasant evening with our "showstopping" selections from these and many more shows - both old and new. We aim to entertain you and we think you will have a great evening. Come once, maybe twice - it's free admission.

Tables for the performance may be reserved in advance by calling Ext. 2808. Reservations will be held until 8:15. Show begins at 8:30 p.m. sharp. No children, please, as we are expecting a full house.

## Mermaid's Purse Opened

A Mermaid's purse, or a Sea purse, or a skate egg, call it what you will, has been photographed by Bob Walton of Photography. While the egg case is a familiar sight along Long Island's shores, the baby skate shown next to the case is rarely seen. Some sharks also lay this type of egg.

## Jets Football Tix Are Ready Monday

Beginning Monday, July 17, ticket reservations will be accepted for the BERA reserved seats at Shea Stadium for the 1967 New York Jets Football Games. The seats are located in the Reserved Section 23, rows P and Q, and are priced at \$5.00 each. We have 20 reserved seats for seven home games.

October	November
1 Miami, Sun.	12 Buffalo, Sun.
7 Oakland, Sat.	<b>December</b>
15 Houston, Sun.	3 Denver, Sun.
29 Boston, Sun.	10 Kansas, Sun.

In an effort to make tickets available to as many interested employees as possible the following sales procedures will be observed:

The Recreation Office will be open for ticket sales and information daily from 9:00 a.m. to 1:00 p.m.

Tickets are intended for the employee and members of his immediate family. It is understood that a single employee might wish to purchase an additional ticket for his or her escort. Employees are entitled to purchase 2 tickets for one or two games. Tickets will not be returnable or acceptable for refund or exchange at the Recreation Office. Refunds or exchanges should be made at the Ticket Office of Shea Stadium.

## Bowling Clinic and Exhibition at Port

A gala bowling exhibition and clinic will be held at the Port Jeff Bowl on Saturday, July 22 from 2 to 5 p.m.

This bowling party will feature Andy Varipapa with his dazzling bag of trick shots. As an extra added attraction, Bill Bunetta, of AMF's Staff of Champions and member of PBA, will put on a "score high" bowling clinic. Bunetta is one of the best bowling instructors in America and his clinic is guaranteed to help beginners and high scorers alike. And to top it all, there will be an hour of free bowling for everyone who attends.

The "Score High" Bowling Party is open exclusively to employees of BNL, and each employee is welcome to bring one guest (wife, husband, friend). There will be a registration fee of \$.50 for each person attending, (just to know how many will be attending) and this fee will be distributed in the form of various door prizes.

**Deadline date - July 14 - Sign up now at the Recreation Office.**

## Tennis Tournament Begins Monday

### The Tournament

The draw has been completed and the schedule posted in the Gymnasium for the 1967 tennis competition which gets underway this week.

The contests have 32 entrants in the men's singles, 9 in the men's doubles, 11 in the mixed doubles and 10 in the ladies singles.

Trophies will be awarded to the winners of the men's doubles and ladies singles. First and second place awards will be presented in the men's singles and mixed doubles.

A consolation round will be held in the men's singles.

Contestants are required to familiarize themselves with the posted tournament regulations and to report game results to the Recreation Office as soon as possible.

Preliminary matches are to be played during the scheduled week under conditions mutually agreeable to contestants. The finals will be scheduled and announced by the Recreation Office. Balls and volunteer officials will be provided for the finals only.

Players using the courts are asked to conclude their match as soon as possible and relinquish their court if tournament competitors are waiting to complete a scheduled match.

### Court Procedures

To assist in the supervision of the proper use of the courts, a committee of the more active tennis players has been appointed. At a meeting last week they reviewed and updated some necessary "Court Procedures." To bring oldtimers up-to-date and to acquaint newcomers, a complete list of procedures has been posted on the courts.

The courts are not specifically scheduled or reserved and can be used on a first come - first served basis. However, when all courts are in use and others are waiting to play, matches should be limited and doubles played when possible.

The courts are specifically designed for tennis and should not be used for other physical activities except handball. Handball can be played, but only when the court is not being used and when people are not waiting to play tennis.

**Positively No Street Shoes:** The surface material is soft and easily damaged.

**Net Care:** Three-feet high at the center is the correct measurement. Please do not overtighten. Loosen net when not in use, and raise center of net off the ground.

Squeegees are provided to sweep water off the courts.

## Bookmobile Schedule

The Bookmobile, run by the Suffolk County Cooperative Library System, has announced a new schedule for stops at BNL. The mobile library will park north of the intersection of Brookhaven Ave. on Technology St., every two weeks starting on July 14. Books may be borrowed for a two-week period, and there is no charge for a card if you live in an area not having regular Library service.

## Movie Tonight: Red Desert

Antonioni directs this film which conforms to the tradition that many situations have neither a beginning nor a resolution. It is his medium for conveying the beauty of lines of factories and their chimneys.

## Short: Jamin' the Blues

## Letters To The Editor

Dear Sir:

On the occasion of my twentieth year at the Lab, I want to express my thanks to my many friends at Brookhaven, and particularly my associates in the Nuclear Engineering Department for the party and the many good wishes.

Jean Reynolds

Dear Sir:

Perhaps the Chairman or a member of the BERA Film Committee can give us a reason why we are continually being subjected to films on the horrors and trials of war. I believe that there are some very excellent movies that do not deal with Nazis and persecuted people.

## Fish Tales

by John Tagliavia

According to all the signs, the bluefish should be moving in strong, and should pretty well dominate the trolling scene until mid October. We deduce this from the fact that the Moriches Inlet fishing has become spotty, and that blues ranging from 2 to 5 lbs. have taken hold on the North Shore.

This may be "seat of the pants" calculating, but whenever these phenomena occur along with the presence of certain baitfish, an upsurge migration period is over. Blues, by virtue of the size have located in waters best suited to insure their chances of survival. If this theory is correct, Montauk, Middle Ground, and the water outside Moriches and Shinnecock Inlets should produce blues in the 6 to 12 lb. class this weekend.

Last week Paul Pion did very well between the hours of 5:30 and 7:30 a.m. using a 6" long surgical tube at the end of 200 ft. of wire. Paul fishes before coming to work, and sometimes if the level of the tide works in with his plans, he adds a pail of hard-shell clams to his catch. I can't think of a better way to start the work day.
