Variety in Material, Technique, Concept At "Sculpture Now"

A large and lively group of art enthusiasts was present Monday evening for the opening of BERA's tenth annual professional art show. The first-nighters were practically unanimous in their praise of the large number of works shown and of the show's installation. This is the first show to be presented in the meeting rooms of the new Conference Center and it would be difficult to imagine a more effective showing of these works. Some of the artists were present and were introduced by Emanuel Benson, director of the Benson Gallery.

Entitled *Sculpture Now*, the exhibition displays very effectively the creative use of non-classical materials by the contemporary sculptor. Some of the most popular works in the show, for example, were the extraordinary glass sculptures by Willie Heesen. This Dutch artist has produced impeccable small abstract sculptures out of blocks of clear and slightly colored crystal. Although the artistic use of glass has a long and eminent history, these works, perhaps more than any of their predecessors, dis-

Donna, plastic by Ezio Martinelli seen through plastic sculpture by David Secombe.

Vinyl Figures in conversational group by William King.

play the unique beauty of glass as an aesthetic material.

The large central room of the show is dominated by a massive stainless steel by David Savage and a group of heroic Vinyl Figures by William King. It was not surprising that the King pieces constituted the center of attraction; these disarmingly witty people, spindly and a bit put-upon by the world, are deft caricatures of the most revealing kind. The Vinyl in which they are created seems the perfect material, the necessary element of their very contemporary existence.

Another very popular element in the show was the plastic nudes by Ezio Martinelli. These are remarkable works; as modern as the bright plastic in which they are produced and yet as old as the earliest Cycladic fertility goddesses of which they are strangely reminiscent. Much of the sculpture in this show, in fact, is strongly rooted in classical sculptural traditions de-

(continued on page 2)

The Fair Share Coffee Break

Can I afford to make a Fair Share contribution to the United Fund of Long Island (UFLI)?*

The answer to that question is a definite "yes." A Fair Share of one hour's pay per month, when pledged through payroll deductions, is considerably less than one per cent of your pay check - 0.6 percent, to be exact - an amount so small you'll hardly know it's missing.

Many Fair Share pledgers set aside a specific hour each month that they think of as their Fair Share Hour - the hour that pays their pledge to UFLI. A favorite time is the first hour of the first Monday of the month. These people claim that the thought of working for the 76 organizations that benefit from UFLI makes this bluest period of the the traditional Blue Monday go much faster.

If you dislike the idea of working for your UFLI pledge, think of it in terms of BNL's ten-minute morning coffee break. During an average work month (about 21½ days), you receive more than 210 minutes in morning coffee-break time. A Fair Share pledge of one hour's pay per month takes less than one-third of that time - only 60 minutes.

If you want to then, you can set every third day aside for a Fair Share coffee break. You and the other Fair Share pledgers will enjoy the break-time more knowing that with it come the sincere thanks of more than 600,000 Long Island neighbors who use the UFLI services each year.

*A Fair Share is one hour's pay per month. Many persons making more than \$8,000 a year make a Fair Share contribution that is proportionately larger.

Lower Price Offered To BNL Car Buyers

The Purchasing Department is currently completing arrangements with local automobile dealers to sell new cars to Brookhaven National Laboratory employees at a price generally lower than usually available.

1969 models of standard, popular makes can be purchased through established dealers in the area for most American manufacturers.

Further information about the procedure for purchasing a new car under this arrangement may be had by calling Ext. 7173 in the Purchasing Department.

75 Days Till Christmas

At 1:00 p.m. on Monday, October 14, a drawing will be held in the Recreation Office to determine the order in which party-group representatives may choose a given facility and date for on-site Christmas parties.

The facilities include the Brookhaven Center, the Recreation Building and the Gymnasium.

To permit the proper scheduling of other activities at the facilities, no reservations will be accepted after December 1.

How Safe Is Your Family

The week of October 6 through 12 has been declared by President Lyndon B. Johnson as National Fire Prevention Week. This week is part of a continuing campaign to reduce fire losses through increased fire education of all citizens.

Because staff members have avoided fire hazards in their everyday work, because of the Fire Marshall's excellent fire prevention and inspection work and the very efficient work of the Fire Chief and his group, and the efforts of many others who maintain a program of testing, checking and inspecting, BNL's fire loss record has been an extremely favorable one.

Each year, in support of National Fire Prevention Week, the Laboratory selects a special theme of the week and maintains a display in the cafeteria. This year the Laboratory turns from its own fire prevention activities to a new theme, "Fire Safety In The Home."

The average home is of wood frame construction and, therefore, combustible. The modern fire-resistant shingle, while an improvement in fire-safe construction, does not make a home fire-resistant.

Most home owners will adequately cover their home by insurance, but will

Fire Marshal William Wisnofski

Fire Chief Thomas Newham

neglect to equip their home with an automatic fire detector and extinguishers. Fire detectors are so sensitive that the heat and smoke of a cigarette placed nearby will set off an alarm. An early alert to a fire can stave off a disaster. A portable fire extinguisher, while rarely considered a life saving device, can control and put out a small fire thus preventing a more destructive conflagration. The BNL exhibit includes information on home fire extinguishers and a display of typical extinguishers which can be purchased for home use.

Another area in which the average home owner is negligent is in the Fire education of family members. The National Fire Protection Association emphasizes family "escape planning." Members of a family should be instructed in what to do in case of fire, how to escape from the various rooms in the event of fire. Children should be instructed of the danger of playing with matches. NFPA booklets concerning the dangers of leaving children unattended, as well as booklets on fire safety instructions for baby-sitters are available at the BNL display. There are also a limited number of comic books aimed at teaching proper Fire precautions to small children also on hand.

It is well to remember the fire-prepared family is the fire-safe family.

Attention Hams

The Middle Island Central School District #12 Adult Education Program will offer a course in Amateur Radio beginning on Wednesday, October 23, 1968. Registration will be on Monday, October 14, 1968 at Longwood High School. For further information, call Bill Tooker, Ext. 7100.

"Sculpture Now" (continued)

spite the novelty of the materials used. A case in point is the beautiful Draped Torso by Calvin Albert, who uses the particular qualities of polyester resin to create a work with strong links to the great sculptural past. This aspect of the exhibition - the important elements of the classical tradition of sculpture being developed through the use of new materials - is one of its great interests, and one of its great strengths.

Sculpture Now will be open to the public every day from 11 a.m. to 5 p.m. through Wednesday, October 16. It will also be open from 7 until 9 on the evenings of October 10 and 17.

Massive stainless steel sculpture by David Savage.

Here and There

Dolores del Castillo

M.E. Smith (Meteorology) participated in a seminar held at the University of Michigan on October 2. His talk was entitled "The Relationship Between Health Physics and Meteorology."

M.E. Smith, J.A. Frizzola and G.S. Raynor (all of Meteorology) gave portions of a course on the theory and applications of air pollution meteorology. The course, sponsored by the U.S. Public Health Service and the Eastern Region of the Weather Bureau, ESSA, was held in Garden City, L.I., during the week of Sept. 30-Oct. 4.

Arnold H. Sparrow (Biology) has accepted an appointment as a member-at-large of the National Research Council in the Division of Biology and Agriculture for the period ending June 30, 1970.

George M. Woodwell (Biology) has accepted the invitation of Charles R. Dominy, Commissioner of Parks, Suffolk County, to serve on the Conservation Advisory Committee.

Lewis J. Greene (Biology) has recently returned from a trip abroad. In Louvain, Belgium he participated in a program of seminars on the pancreas; in Munich,

Germany he conferred with staff members at the University of Munich and the Max-Planck Institute for Biochemistry and presented seminars describing recent studies on pancreatic trypsin inhibitors; in Marseille, France he conferred with Drs. Desneulle and Sarles; in Paris he conferred with staff members of the Laboratoire de Chimie Biologique, University of Paris, and presented a seminar describing recent studies on pancreatic trypsin inhibitors.

Seymour Katcoff (Chemistry) has returned to BNL after a year's leave at the Weizmann Institute of Science.

Alfred Wolf (Chemistry) has recently returned from Austria and Germany where he participated in an IAEA meeting in Vienna as a consultant on short-lived isotopes in organic radiopharmaceuticals and specifications for labeled organic compounds, and attended a meeting in Lindau, sponsored by the German Chemical Society, on new labeling techniques for organic compounds.

Ivan Bernal (Chemistry) was an invited speaker at the XIth International Conference on Coordination Chemistry held in Haifa and Jerusalem. His talk was entitled "Pentacoordination in Transition Metal Ions: The Magnetic and Structural Properties of MCl_5^{2-} and $CuCl_5^{3-}$." He also served as a session chairman.

Understanding "Dividends"

by Frank Bloom

Nowadays, many people hold investments in stocks or mutual fund shares. From these investments they receive income in the form of dividends. There are numerous types of "dividends" one can receive and their treatment for tax purposes varies considerably. Generally, the types of dividends are:

1. Ordinary dividends
2. Capital Gain dividends
3. Stock dividends
4. Dividends representing return of capital
5. Dividends subject to foreign income tax at source.

An understanding of the nature of the different dividends shareholders receive can be of value to both the taxpayer and the investor.

Ordinary Dividends - Ordinary dividends consist of distributions to shareholders of company earnings from either current or prior years. Generally, these dividends qualify for the dividend exclusion (\$100 per individual, \$200 joint ownership) and are taxable at ordinary tax rates.

Capital Gain Dividends - Capital gain dividends usually are received as part of the year's distribution from mutual funds. They represent the stockholders' share of a capital gain realized by the mutual fund and qualify for long term capital gain treatment. This means that for most of us only one-half of the capital gain is taxable at the taxpayer's normal tax rate.

Stock Dividends - Normally, stock dividends represent a distribution by a corporation wishing to conserve its cash position to reinvest in the business. These dividends can be in the stock of the company itself, or in stock of another corporation owned by the distributing corporation (either wholly or partly owned). A stock dividend technically does not represent anything of value to the recipient, since his equity in the company does not increase; it is just represented by a greater number of shares. As a practical matter, however, the share's market value may not adjust downward fully for the stock dividend, and so represent an actual gain to the shareholder if he decides to sell his stock. Generally, stock dividends are non-taxable distributions.

The above are the most common types of distributions. See next weeks *Bulletin Board* for certain less usual types of dividends as listed in 4 and 5 above.

Letters To The Editor

Dear Sir:

I recently participated in the high school equivalency courses held here on site. These courses were offered, free of charge, to any BNL employee. I attended the classes two nights a week, and then took the test given by the State Education Department, and received my High School Equivalency Diploma.

I could not possibly express my full gratitude or tell you how much this means to me personally. I can, however, take this opportunity to thank everyone involved in this project. The persons here on site who originated the program are to be commended for carrying out their idea. The two teachers who gave their time so willingly, had such patience with all of us, and taught us so much in so little time, must be told what a fine job they are doing.

I understand that this course may be offered again, and I would like to tell anyone who has ever regretted the fact that they are without a high school diploma to take the course if it is at all possible. My happiness and personal sense of achievement far outweigh the small amount of time and effort involved. Graduate

Dear Friends:

I want all of you to know how much I appreciate what you have done for me.

Although most of you have never even heard of me, you were more than willing to help me when I needed you most. There are so many of you who had donated blood and many who had tried. Some of you had even written me letters of encouragement before and after my operation.

All of this had helped me go through my ordeal without any doubt in my mind that all would turn out well.

I still have some of the donated blood at the blood bank and would be more than glad to share it with you or yours if you should ever need someone to turn to.

God bless all of you and I shall never forget you. Anna Kiriokas

Dear Sir:

I think that I shall never see . . .
Such a multitude attempt to save a tree . . .
Though it is a stately tannenbaum . . .
Do we cry out as loudly when a man is
chopped down? L. Cox

Dear Sir:

Congratulations on your valiant efforts in the campaign to "Save the Spruce." You are, however, unfortunately, incorrect in referring to this tree as a "Tannenbaum." That word refers to a fir, or sometimes to a pine tree. A Spruce tree in Germany is called a Fichte, or Fichtenbaum. Quibbler

Dear Sir:

The outpouring of sympathy for the Koster Blue Spruce was remarkable and gratifying in this day and age of complacency.

However, there is a time for emotion and a time for logic. What will eliminate the so-called safety hazard? Some possible solutions:

1. Use the existing traffic light at the corner of Upton and Brookhaven to control traffic by: a. Changing the blinker arrangement so that traffic on Upton Road must stop; or, b. Cycling the red and green all day, instead of only during rush hours.

2. Paint a new stop line, closer to the intersection, for west-bound traffic on Brookhaven Ave.

3. Permanently close to west-bound traffic that portion of Brookhaven Avenue between Columbia Street and Upton Road, and detour traffic via Bell Avenue or Cornell Avenue to Upton Road.

4. Make all of Brookhaven Avenue between Upton Road and Center Street one-way, east-bound only.

5. Move the spruce to a better location, preferably in front of the new Conference Center.

If moving the tree is too costly for BNL, I am confident that the thousands employees who signed the many petitions would each be willing to contribute at least one dollar to see the spruce in a new and better location.

blank verse?

by

*bluddybut unboughed
hunter, hunter, call a truce!
stop the action! i deduce
from letters, threats, and much abuse,
all pleading not to harm the spruce,
that it would be a grave misuse
of saws and axes if let loose
to hew the lovely kostar blue
perchance to have a better view.*

*but safety does deserve its due
and we might move the traffic through
the corner like the english do
by using "roundabouts" thus you
could satisfy both points of view
and go around in circles too.*

*so keep the spruce with double crown
and perfect shape its now regrown;
for after all there's no defense
from those who think plant maintenance
is not for buildings but for trees.
for this decision - one thing please
help us have security
from any more finn poetry.*

waf

Three Year Old Needs Your Help

The annual Eastern Suffolk Hemophilia Guild donors drive will be held on Thursday, October 17, from 3:30 to 8:30 p.m., in Patchogue. No special type blood is required, and donations are solicited on an individual basis for each child.

The plasma transfusion, containing the blood clotting agent, is given to a hemophiliac after an injury. The three-year-old son of an employee has had the misfortune of injuring himself and needs these plasma transfusions. If interested in donating on Thursday, call John Dorning of the Nuclear Engineering Department, on Ext. 7412-13, for further information.

BNLers Invited To Sing

The Long Island Symphonic Chorus, under the direction of the distinguished choirmaster Gregg Smith, has begun rehearsal of its Winter Program, which will include works by J.S. Bach and Respighi.

A professional group, the Gregg Smith Singers form the nucleus of the Chorus, which is affiliated with SUNY at Stony Brook. The Chorus was conceived with the aim of familiarizing local singers and audiences with the choral masterworks of all ages.

Voices are required in all parts and a welcome is extended to all interested BNL employees. Rehearsals are held each Tuesday in the Gymnasium of the Stony Brook Boys School (opposite the LIRR station), from 8 to 10 p.m.

BERA Surplus Equipment Sale

The following used equipment is offered for sale, as is, by the Brookhaven Employees' Recreation Association.

Item I - 1 ea. Soft Drink Bottle Vending Machine (with 15¢ coin mechanism, Model C51)

Item II - 1 ea. Soft Drink Bottle Vending Machine (with 15¢ coin mechanism, Model C51)

Item III - 1 ea. Ceramic Kiln (Electric, L&L Model 158L)

Item IV - 1 ea. Ceramic Potter's Wheel (Electric, Variable Speed, Craftools, Inc.)

Bids, addressed "BERA Sale," must be received by 5 p.m., October 16. Bids will be opened at the Recreation Office on October 17. For further information call Recreation Office on Ext. 391.

Autumn Dance News

BERA is very fortunate in being able to get the wonderful Wayne and Marilyn Foster Team to entertain at the Autumn Harvest Dance. Any who have heard them know what a special treat this is. The Fosters fill an evening with song and merriment that will surely delight everyone. So come and join the fun on Friday, November 1 at the Gymnasium.

Slo-Break Basketball

by George Latham

Several years ago we fashioned a special brand of basketball for BNLers who still love the sport, the exercise and the competition, but who can't keep up with the frantic pace of regular basketball.

We call it "Slow-Break," and that's just what it is. Our rules do not permit the fast break practices which require continuous running at top speed. When a team gains possession of the ball in the back court, it must take four seconds before advancing the ball. So you don't have to be a speedster or a youngster to join the league.

Our season this year will start on November 14 and will conclude with refreshments at our Championship Game in March. Teams play on Thursday night each week. We try to schedule all the games on the same day each week to avoid conflict with other BERA leagues.

BERA provides the game equipment, pays our officiating bills and presents awards to the winners. As a result we are able to keep the entry fee to a few dollars per man which pays for things like uniform shirts. Our referees are members of a local basketball officials' association so that the games are conducted in a professional manner.

The games are played in our gymnasium at 3 Center Street, which features a playing court 42 feet wide by 93 feet long. Several additional hoops are available for practice.

Many departments have teams in the league, but if your area does not sponsor a team, arrangements can be made to see that all can enjoy this sport. Any further information can be obtained from the league officers whose names and telephone numbers are available through the Recreation Office.

Applications may be obtained at the Recreation Office. Entry fee is \$25 per team. Deadline date is October 30.

BERA Film Series

Thurs., October 17 - 8:00 p.m. - Lecture Hall
Jules and Jim

Filmed in France in 1961, Jules and Jim effectively combines pre-World War I romantic nostalgia with the development and illumination of a truly modern woman. Kathe, a classically beautiful woman, loves two fraternal friends and must have them both, no matter what. For her the only eternal commitment is death.

Francois Truffaut, who won an award as the director of Jules and Jim, has established himself as the leader of the French New Wave directors through this effort. The movie stars Jeanne Moreau as Kathe, Oskar Werner as Jules, and Henri Serre as Jim. M. Strongson

Movie Tonight: The Horse's Mouth, starring Alec Guinness.

BNL Pistol Team

The BNL Pistol Team opened its fall shooting season with a bang by winning its first match in the Long Island Industrial Rifle & Pistol League shoot offs. Competing against the Sperry Systems team, the BNL pistoleros blasted out a 1022 to 984 score. The next match is scheduled with Republic Aviation at the Long Island Agriculture & Technical Institute in Farmingdale on October 16. P. Buhl

Juilliard Quartet Opens Concert Series

Bowling News

Irma Carl

Red League

This week we find the Spoilers leading the way. Plenty 200s here - A. Jurgens rolled a 214 (giving him a hi-gross of 266), R. Nelson 225, F. Abbatiello 214, J. Ferranti 212, R. Wilson 205, J. Weiss and J. Jenny 203 (each that is), W. Kristiansen 202, and J. Berch and R. Wessel 201.

Purple League

The Twisters are still dominating the league - they've lost only two games in four nights of competition. They really want to win the dust collectors this year. Five rolled over 200 - J. Fedelem 215, J. Scesny 209, P. Borzi 207, A. Benson 203 and C. Mengler 201.

Green League

Exots still leading here and have also lost only two in four nights. Adams 211, W. Austin 210 and Rhodes 206.

Pink League

The Bio Boozers are in first for second week running . . . and why not with Rosy Deering's 162. Say, Pat, are you sure we didn't have any one with a 200?? By the way, the Bookies may again give a demonstration on the fine art of bowling. Heed this warning though - don't stand behind them. Right Madeline!!!

BNL Rifle-Pistol Club

When the smoke cleared, Paul Colsmann emerged as the victor in the first Fall 1968 Large Bore Shoot. The highly successful event was held at the Brookhaven Town Range on Sunday, September 30. Paul shot a 184 out of a possible 200. Al Lukas was second with a 176 and W.R. Kane was third with a 169.

F. German

Men's Volleyball League

It's time to get set to join BNL's 1968 Volleyball action. League plans are to start the season November 18. Games will be scheduled on Monday and Wednesday evenings at 5:30 p.m.

Each team plays one match per week. Matches consist of three games which take about one hour to play. The team entry fee will be \$10. Only eight enthusiasts are necessary to submit a roster. Entry blanks are available at the Recreation Office. The deadline is November 11. If you are not a member of a new or old team and would like to participate, just submit your name to the Recreation Office and we will see that you get to play.

Reserve Wednesday, November 6 for a Volleyball Night, with Olympic films and refreshments. More information next week.

G. Levine

October 22 Is The Date Berkner Hall The Place

Noted for the sheer excitement and glamour of their concerts, the Juilliard Quartet presents programs that range from the classics to the modern, with equal emphasis on, and mastery of, both. The Quartet has premiered many important works, among them Elliott Carter's Second Quartet and the Second Quartet of Alberto Ginastera.

Particular favorites of their fellow artists, they were asked by Leonard Bernstein to perform with him and the New York Philharmonic Martinu's String Quartet with Orchestra in 1963; Bernstein also recorded a Mozart Piano Quartet and Schuman's Piano Quintet with them. Dietrich Fishcer-Dieskau joined the Juilliard Quartet for the American Premiere, and subsequent recording, of Othmar Schoeck's "Notturmo" and other performances.

The performance is scheduled to include Quartet in G Major, Opus 76, No. 1 by Hayden; String Quartet in D Major by Schoenberg; and Quartet in C# Minor, Opus 131 by Beethoven.

The concert will be held in Berkner Hall, starting at 8:30 p.m., Tuesday, October 22.

Season concert tickets are on sale at \$10 for adults and \$5 for children. Single tickets may be purchased for each event at \$3 for adults, \$1.50 for children, and \$3.50 for non-employee guests. All concerts will be presented at Berkner Hall at 8:30 p.m.

Football Notes

by Jack Brennan

The Slow Pokes beat Medical 32-0 to remain undefeated as J. Hooper scored 2 T.D.'s. The October 10th game between the Slow Pokes and Applied Math pit the two undefeated teams in the League and the winner should win all the marbles. The Old Timers remained in contention by shutting out the Mets 24-0. The Kickers pulled an upset by beating AGS 12-6 on A. McNerney's T.D.

	Won	Lost
Slow Pokes	5	0
Applied Math	4	0
Old Timers	3	1
AGS	2	4
Kickers	1	4
Medical	1	4
Mets	1	4

Gym To Be Closed

Starting Monday, October 14, the Gymnasium will be closed to prepare for the coming Annual Visitor's Days and the Fall Dance. Reopening will be Tuesday, November 5 at 5:00 p.m.
