

BROOKHAVEN BULLETIN

Volume 31 - Number 7 / February 18, 1977
BROOKHAVEN NATIONAL LABORATORY

For Outstanding Achievement

John P. Blewett received the Merit Award for 1976 of the Nuclear and Plasma Science Society. The plaque commemorating the award for outstanding service arrived last week, and was presented to him by Martin Plotkin, President of the Society. Also on hand to congratulate Blewett were: (from left) Mark Barton, Ken Green and Laboratory Director George Vineyard.

Gertrude Goldhaber On President's Committee

Gertrude Scharff-Goldhaber, Physics Department, has been appointed to the President's Committee on the National Medal of Science.

Dr. Goldhaber is one of seven new appointees to the Committee and joins a distinguished group of scientists, among others, Professor John R. Schrieffer, Nobel Laureate in Physics, Dr. Frank Press of MIT, famous for his work on earthquakes and Edward David, Jr., former Presidential Science Advisor.

The National Medal of Science was authorized by Congress in 1959 and the first committee to make the awards was appointed by President Kennedy in 1962.

Craft Deadline Nears

Next Friday, February 25, is the deadline for receipt of applications to the Craft Apprenticeship Training Program. So far, 43 employees have applied for the two openings in the electrical trade, two in the machinist, one in the refrigeration and air-conditioning and one in carpentry.

The applicants will be interviewed by the Joint Apprenticeship Committee starting on March 14. The Committee is composed of three representatives of Laboratory management and three IBEW members employed at the Laboratory. The prospective apprentices will be evaluated and scored. The six persons receiving the highest scores will be offered apprenticeships and will be so notified on March 25.

The program is under the supervision of Peter Paige, extension 2885.

Seamans Issues Departure Statement

After two years as ERDA Administrator, I submitted my resignation on January 20. Robert Fri is serving as Acting Administrator until a new Administrator is appointed. During this period of transition I am continuing to serve the agency on a consulting basis.

The two years that I served as Administrator were extremely active and exciting. We put together a well-staffed organization at headquarters and in the field and were particularly fortunate to have such high-caliber management and scientific talent in the large complex of laboratories and energy research centers.

Although two years is not a long time in any research and development endeavor, ERDA has made significant progress in several program areas. There have been some problems and some disappointments, but we have moved forward with numerous pilot plants and demonstrations

of new or revived energy technologies. I enumerated the accomplishments in each program area at the ERDA Awards Ceremony on January 14.

In the long and difficult search for solutions to our energy problem, this is only a beginning; but it is a solid foundation to build on. There is an urgent need to move forward with a stronger emphasis on Conservation to increase our use of *existing* fuels other than oil and gas, and to begin to use *new* fuels. It is mandatory that we reduce our dangerous dependence on imported oil and gas.

ERDA has a very important mission. I have enjoyed the challenge, I have appreciated the cooperation and support of many talented and hard working employees. I wish you all good fortune in the future.

Robert C. Seamans, Jr.
— ERDA News

Last year about 5,000 people visited the Lab on 12 consecutive Saturdays during the summer, the pilot project for this year's expanded tours. A stop at the Graphite Reactor where the exhibits are housed, is a highlight of the tour.

Around The BNL Summer Circuit

The popular Saturday Tours, launched last summer as an experiment, will be presented again this year in an expanded schedule. The public will be invited to visit the Laboratory every Saturday from May through October and, during July and August, on Sundays also. The hours will be from 10 a.m. to 4 p.m.

The program will include a showing of the 15-minute slide presentation, *Quest/77*, which gives an overall view of the Laboratory, a guided bus tour of the Laboratory site and a stop to view the exhibits and ask questions at the Science Center (formerly the Graphite Reactor).

Plans are in the works for exciting new exhibits at the Graphite Reactor and for the gradual transformation of this facility into a Science Center. A small staff is now being recruited to develop these initial plans and to administer the exhibition hall.

The traditional two-day Open House will not be held this year. It was felt that the weekly tours allowed a more flexible schedule for people to become acquainted with Brookhaven's research, rather than the somewhat overwhelming experience of trying to absorb a great deal of information in one day.

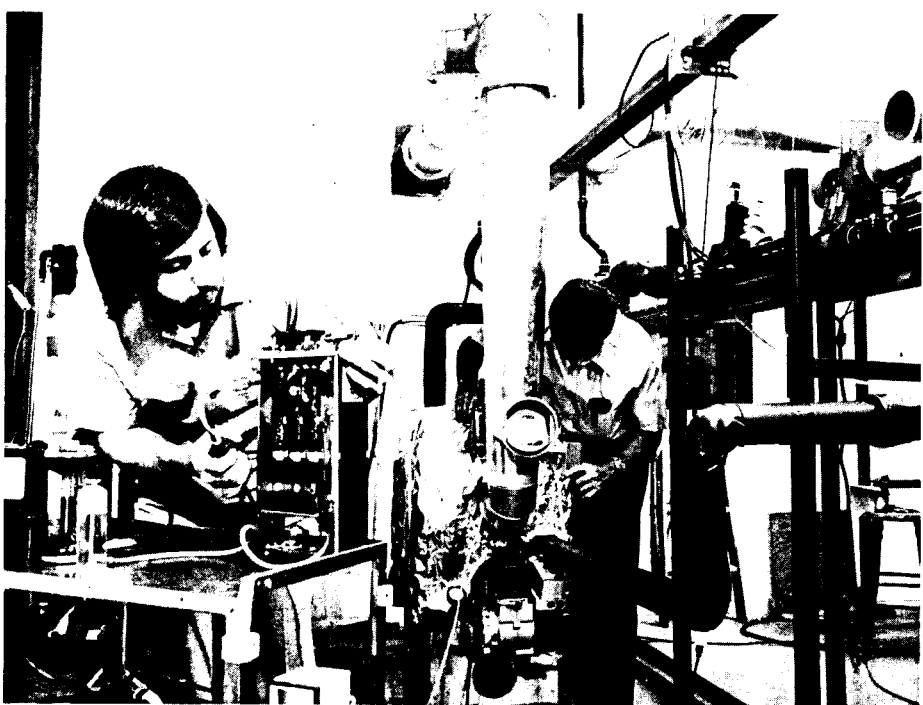

Weather is also a factor. If the weather is bad on a weekend planned for an Open House, attendance is poor and a great deal of preparation and disruption of research laboratories, has been for nought.

No reservations are required for general public tours. School groups, however, will be asked to contact the Public Relations Office for appointments.

Safety First

The magazine, *Family Safety*, has been distributed to all employees by the Safety and Environmental Protection Division. Charles Meinhold, Head of the Division, says that "family safety is as important to us as individual safety. You are home a lot more than you are here, and the possibility of an accident at home is much higher."

This publication is issued four times a year by the National Safety Council and employees are urged to take it home. The whole family should be aware of the safety information contained in the magazine.

Heating Units Tested At BNL

The space conditioning of residential and commercial buildings currently accounts for about one-sixth of the nation's oil consumption, one-fourth, of the natural gas usage, and a large fraction of costly peak electric demands. It appears that a considerable amount of equipment installed in past construction is utilizing fuel inefficiency and that some of the currently marketed equipment falls into the same category.

ERDA has determined that a search for and evaluation of high efficiency equipment, combinations of equipment, devices and control strategies should be conducted by means of a program of selective testing. Brookhaven has been selected for this project and it is currently being carried out by the Energy Storage and Conversion Division of DAS.

Conventional home heating equipment, such as this oil-fired boiler hooked up for computer measurement, is being tested by Tom Allen (at left) and Tony Kokinelis at DAS for energy efficiency, free of charge. Manufacturers and developers of residential and light commercial space and water heaters have been invited to participate in this voluntary testing program to encourage efficiency and conserve oil. Bob Hoppe is the test project manager.

This project was one of Brookhaven's energy conservation programs discussed at a press briefing yesterday in New York.

Highlights Are In

The following report is now available to the Laboratory Staff and to affiliates of the ERDA, AUI and BNL. Others may purchase it from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. Staff members should call Ext. 3484:

BNL-50525 Brookhaven Highlights
\$5.50 July 1974 - June 1976

Nice Ice

Max Small's Upland Recharge Project operates all year round. In the winter it resembles a fairyland with ice castles eight feet high. At one end of Marsh #1, the perforated pipe was rotated into the air instead of along the ground. During the continuing cold weather, the spray formed these hollow ice sculptures.

IBEW Meeting

Local 2230, IBEW, will hold its regular monthly meeting on February 24, 1977, at 8:00 p.m. in the Knights of Columbus Hall, Railroad Ave., Patchogue. There will also be an afternoon meeting at 2 p.m. for shift workers in the Union Office at 31 Oak Street, Patchogue. On the agenda will be regular business, committee reports and the President's report.

Pick A Student

Applications to the Brookhaven Summer Student Program are now available for review in the Office of Scientific Personnel, Bldg. 460.

Each department has appointed a co-ordinator to keep track of the student selections. Requests for students from staff members must be channeled through the department coordinator to the Office of Scientific Personnel by March 4.

Cafeteria Menu

Week Ending February 25, 1977

Monday, February 21	
Snack Bar Service 9 a.m. - 2 p.m.	
Tuesday, February 22	
Cream of potato soup	
Southern fried chicken & 1 veg.	1.10
Macaroni & cheese & 1 veg.	1.05
Hot deli - veal & peppers	
Wednesday, February 23	
Beef barley soup	
Tuna noodle casserole	1.10
Hot deli - corned beef	

Special

cup of soup, tacos & refried beans
pie or ice cream, small beverage
\$1.68 plus tax

Thursday, February 24	
Chicken noodle soup	
Chili dogs & rice	1.00
Salisbury steak & 1 veg.	1.25
Hot deli - baked Virginia ham	
Friday, February 25	
New England clam chowder	
Broiled filet & 1 veg.	1.15
Roast sirloin of beef & 1 veg.	1.30
Hot deli - meatballs & peppers	

Retiring In February

Veronica G. Miko, a Custodian Group Leader in Staff Services since May 19, 1958, retired on February 9.

Irving Groobert, Clerk in Supply & Materiel since October 1, 1957, will retire on February 25.

Rifle & Pistol Club

Our winter league ended in February with the Eastern L.I. Pistol League. We won 4/12 - raw scores, and 6/10 - handicap scores.

Highest shooters for the League were:

Len Chemienti	261, 262
Dale Norden	261, 257
Otto Jacobi	271, 262
John Mazzeo (Instructor)	262, 271, 261, 260
Vin Lettieri	257

The summer Round Robin will start with the first Tuesday and the third Tuesday in April and will continue into September. There will be 10 matches in all starting at 5:15 p.m. at our outdoor target range. For further information contact League Chairman, J. Zahra, Ext. 4667, 4634.

Emergency Closings

Here is the list of radio stations that carry news of closing or late opening of the Lab on snowy days:

Station	Area	AM	FM
WALK	Patchogue	1370	97.5
WBAB	Babylon	1440	102.3
WGLI	Babylon	1290	—
WGSM	Huntington	740	—
WHLI	Hempstead	1100	98.3
WHRF	Riverhead	1570	—
WLIX	Islip	540	—
WLNG	Sag Harbor	1600	—
WRIV	Riverhead	1390	—
WWRJ	Southampton	—	95.3
WBLI	Patchogue	—	106.1
WRCM	Riverhead	—	103.9

On The Aisle

With a full house across the footlights, the company of BERA Theater Group players under the capable direction of Roscoe Mack provided last Saturday's audience with a well balanced and engrossing performance of "A Man For All Seasons." Tony Fainberg played the demanding role of Sir Thomas More with such ease, assurance and understanding that More as a superior man, husband and father quickly came to life on the stage.

Jane Love acted a somewhat untraditional Lady Alice so well that it was obvious that More's patience was tried in the household as well as out. Denise Dew-Hughes' suppleness and grace brought a feminine charm badly needed as a relief to a cast so dominated by males.

The major supporting characters were all strong and gave to the play that degree of fine acting required to supplement the major performances. Particular credit for the success of the show should go to Bill Love, Ed Beardsworth, Richard Perry, Bob Kinsey, Ray Reuger, Joseph Indusi, Kurt Fuchel and David Dew-Hughes.

Let neither rimes nor reasons deter you from seeing "A Man For All Seasons." It is suggested that theatergoers with lean buttocks bring a cushion - the seats are hard.

Tickets for Friday and Saturday evening, February 18 and 19 are still available at \$3.00 for adults, \$2.00 for those under 18 and 65 and over. Curtain promptly at 8:00 p.m.
— John Binnington

Trip To New York City

The Hospitality Committee is planning a group railroad trip to the city on Wednesday, March 2. Departure will be at 8:32 a.m. from the Patchogue LIRR Station. The round trip fare for adults is \$2.45, children under six years ride free.

Reserve a ticket by sending your fare through the U.S. mail to P.O. Box 322, Upton, New York, no later than February 24. Make checks payable to "Cash." Refunds will be made only if cancellations are received before noon on Friday, February 25.

Monday Is A Holiday

CARL R. THIEN, Public Relations Officer

Letters To The Editor

To all my friends at Brookhaven,

Thank you very much for all your cards, calls and thoughtfulness during my recent illness.

Sincerely,
Joan Redzinak

To the Editor,

In your January 28th issue of the *Bulletin*, I read with great interest the letter you published from a non-smoker.

May I add that, not only are secretaries subjected to this condition, but many more persons as well around the Lab are victims of very inconsiderate coworkers.

Those who smoke defy us day after day by smoking not only cigarettes but odorous green cigars and smelly pipes. The offensive odor just lingers around, impregnating all materials and air in the working areas. If you voice your feelings they grin at you and linger around, puffing away. It may be a joke for them but it is no joke to us non-smokers. It is anyone's privilege to breathe fresh air and it is wrong to be forced to inhale polluted air.

As a first step, it would be interesting to canvass the different buildings on site and find out how many people do not smoke and how many do. This might incite the timid souls to speak up. Remember that smokers feel pretty strong about their habits because they very seldom meet opposition.

Second, if the Lab can force us to lower thermostats to conserve energy, it certainly can compel smokers to refrain from polluting the air in general working areas. Designated spaces could be assigned to smokers. This regulation could be enforced by the Fire Department with unannounced inspections.

The Lab is one of the few employers on Long Island that cares enough to give us a free yearly medical examination to let us know whether we are in good health and, at times, to bring our health back through their medical department's expertise. Why, then, spoil such a privilege (to us non-smokers) by exposing us to unnecessary man-made pollution?

Hoping you will pursue this matter until solved.

I am sincerely yours,
Jack Gandrey, Bldg. 930

Rambling Around

These are bits and pieces picked up from here and there with occasional observations by the Editor:

The following is another aspect of the smoking problem reprinted from the *University of Utah Review*:

Smokers who quit "cold turkey" have a better chance of kicking the cigarette habit than those who taper off gradually. Their chances are further enhanced if they stay away from coffee while making the break and if their families reinforce and do not belittle efforts to quit.

These findings emerged from a study of 139 Salt Lake residents who participated in smoke-stop programs during the past five years.

College of Health graduate student Ray Johnson, who conducted the study for his doctoral dissertation, said only 30 of the men and women interviewed had not returned to smoking. Among those who hadn't restarted, 24 of them stopped abruptly or "cold turkey," while the other six quit gradually.

The survey indicated that a person is less likely to succeed if the consumption of coffee continues during the critical weeks of transition. Johnson suggests a switch to tea or another beverage for at least a month. Among the failures (those who had re-

sumed smoking), 88 percent continued to drink coffee daily after attempting the break, compared with 74 percent of those who succeeded.

"We found a natural association between drinking coffee and smoking," Johnson says.

It was the unanimous feeling of the 30 who succeeded in quitting that they would die an early death if they continued to smoke, Johnson says, also noting that 75 percent of those who returned to smoking felt the same way.

He says none of the successful 30 reported receiving any strong negative reaction from family members or close friends during their struggle to stop. On the other hand, 85 percent of the failures did.

"Pressure, tension, emotion . . . were the reasons most often given for the resumption of smoking," Johnson says. Many people need cigarettes in order to cope with anxieties."

Teaching people to relax might be another part of the solution, he says.

• This year, one reactor supervisor and several reactor operators will reach or pass the 25 year mark: Supervisor Hugh Campbell 30 years; Operators William Keating 30 years; Edward Hein 27 years; Martin Sautter 26 years and Stan Sajnicki 25 years. Normally it takes one supervisor and two operators to operate the reactor. Now they will be able to put together a crew with over 85 years reactor experience.

• In December, the Laboratory used 75 gallons of fuel less per degree day than in December 1975. And, in January, the coldest month in a long time, usage was still 30.5 gallons less per degree day than in January of the previous year. On another winter note, large quantities of rock salt were bought last summer at good prices so the current shortages will not affect us. The rock salt has been mixed with sand to make sure it lasts, if and when the snow returns.

• Headline in *Science*: "Alcohol: A Brazilian Answer to the Energy Crisis." - we'll drink to that!

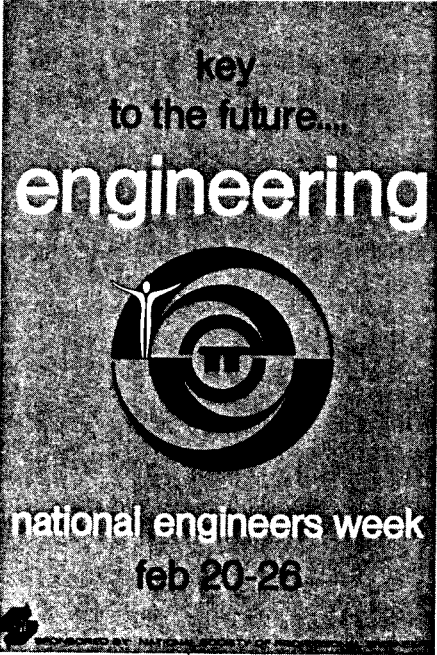

• Also from *Science*: *Erratum*: As several readers have pointed out, in an article on penicillin-resistant gonorrhea (*Science*, 24 December), it stated "In the hopes of making patients feel guilty, scientists . . . recently agreed to give them [venereal diseases] another name . . . The sentence should have read, "In the hope of making patients feel less guilty . . ." — B.J.C.

Cooking Exchange

What's your favorite fish? Shrimp, flounder or cod? Bass, blues or oysters? Come to the Cooking Exchange on February 23rd and find a new way to serve an old favorite, and perhaps even a new way for a new favorite.

That's Wednesday, February 23rd at 12:30 p.m. in the Recreation Center. Only 75¢/child for babysitting.

Coming up next: French Cuisine. Would all Frenchmen, Frenchwomen and Cordon Bleu chefs please call Judy Mills at 281-4472 to volunteer your masterpieces!

Any registered P.E. interested in joining the Suffolk County chapter of the National Society of Professional Engineers should contact Joe Curtiss, extension 4608.

Come To The Ball

One of the highlights of this social season promises to be the First Annual Winter Cricket Ball. The Brookhaven International Cricket Club is sponsoring this gala event at the Brookhaven Center on Saturday, March 12, beginning at 8:30 p.m.

Presiding over arrangements for the Ball are Miss Gail Thompson, Bellport, Mr. Debaprasad Majumdar, Brookhaven and Mr. Edward Beardsworth, Jr., also of Bellport.

Besides the usual quantities of food and drink, they have selected a rather lively band for dancing and some other entertainment which it would not be cricket to disclose at this time. A small charge of \$6 per person will be levied. Do plan to attend.

Sports News

Bowling

Purple & White League

2/3/77: The Penthos are holding tight to first place, closely followed by the Odd Balls, Woodchucks, and the Pin Pickers. High rollers for the men were Ted Erickson 204, John Usher 203, and Joe Mayeski 202. Keeping it all in the family, Nancy Mayeski also had a great night bowling a 185/174 to lead the women. Good games also by Mary Austin 171, Carolyn Eterno 169, and Pat Manzella 165.

Red League

The Freon Loaders bowled 3056 pins for the night with an 1107 game putting them into first place. R. Marlow had a 213 in the 8-3 win. The Bubble Boys knocked down 3024 pins and took 11 points. J. Cain had a good night with 664 gross and W. Kollmer had a nice 202 game. For the Sandbaggers, R. Jones bowled 221, Ed Meier 207 and C. Bohnenblusch a 204. For the 76'ers R. Larsen had a 202.

Green League

2/1/77: The Charlie Browns took eleven from the Old Timers to stay in first place. J. Scott had a 207 game. The Super Cools moved into second by taking eleven points from the Sandbaggers. G. Speidell had a 210 and B. Belligan a 223. The Blue Jays took eight from the Pinball Wizards. For the Blue Jays T. Iarocci had a 246. For the Wizards R. Eggert had a 201/203.

2/8/77: The Charlie Browns took only six points from the Got-A-Hit-Ums to stay in first place by one point. For the losers, N. Parrinello had a 205. The Blue Jays socked the Cosmos for eleven points to move within one point of first place. For the Blue Jays T. Iarocci had a 212 and J. Berech a 213. The Super Cools in third took eight points from the Old Timers. The Pinball Wizards lost eight with R. Eggert having a 200 game.

Black & Blue League

The Pinsplitters continue to lead the league as the combination of Bugala's and Tyler's prove to be very effective in the second half. High games were Bob Holland 200, Pat Oster 186, Debbie Antonio 179. High gross pots were won by Bob Holland 245 and Rosemary Brehm 216.

Basketball

In the first game of the double-header on January 27, the hapless Persuaders were defeated by the Dribbles 85-72. Wayne Smith lead the Dribbles with 28 points and Greg Donaldson put in 22 points for the Lakers. The second game was a close defensive contest with the Spuds outlasting the Browns 87-86. Stanley Gilbert led the Spuds with 29 points although Bob Doty and Mike Dagg both contributed 20 points apiece. Jerry Hobson had 28 points for the Losers.

In the first game of the double-header on February 3, the Dribbles defeated the first-half champs, the Spuds, 77-74. Bob Doty led the Spuds with 27 points while Jeff Gaffney scored 21 points for the victorious Dribbles. In the second game, the Browns stomped the Persuaders 115-80. They were led by Jerry Hobson with 46 points, the Moose with 29 points and Leroy James with 23 points. High scorers for the Persuaders were Greg Donaldson with 24 points and Leon Carmel with 21 points.

In the first game of the double-header on February 10, the Persuaders, although leading the Spuds at half-time 40-37, exhausted themselves to lose 80-68. The precision passing of Jim Garrison allowed Dr. K to operate for 24 points for the Persuaders. Stanley Gilbert went bananas and scored 41 points for the Spuds. The second game the Browns defeated the Dribbles 100-93. Jerry Hobson led the Browns with 36 points, and Leroy James contributed 24. Leading scorers for the Dribbles were Jeff Gaffney with 29 points, Dennis Nordstrom with 24 points and Wayne Smith with 20 points.

Volleyball

Employee's League

This week the Cool Tools edged past the Spikers (22-20, 21-8, 11-21), and Phoenix barely squeaked by the Atom Spikers (21-17, 21-9, 21-17). Chemistry continued to win, beating the Circuits (10-21, 21-9, 21-15). This week Chemistry plays the Spikers, the Road Runners face the Cool Tools, and the Atom Spikers take on the Circuits. Standings after two weeks of play are:

	Won	Lost	Pct.
Phoenix	6	0	1.000
Road Runners	2	1	.667
Chemistry	3	3	.500
Spikers	3	3	.500
Cool Tools	2	4	.333
Circuits	1	2	.333
Atom Spikers	1	5	.167

Mixed League

Latest results as of February 7th:

Division A:

Trolls - Parton Propellers
(12-15, 15-5, 15-4)
Spikers - Upstarts
(15-4, 15-10, 15-12)
Oceanography - Pushovers
(16-14, 12-15, 15-4)

Division B:

Nuke Powers - Center Crew
(15-11, 10-15, 15-13)
Lookin Good - Diamonds
(15-12, 12-15, 15-11)
Terabits - Flashers
(15-2, 15-6, 15-4)

Standings			
Division A	Won	Lost	Pct.
Trolls	24	3	.889
Spikers	15	12	.555
Oceanography	14	13	.519
Parton Prop's	12	15	.444

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position, with consideration given to candidates in the following order of priority:(1) present employees within the department, with preference to those within the immediate work group;(2) present employees within the Laboratory as a whole; and (3) outside applicants.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all nonscientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment, as indicated below. Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Personnel Placement Supervisor, Ext. 2874 or 2882.

LABORATORY RECRUITMENT: Opportunity for present Laboratory employees.

70. OFFICE SERVICES ASSISTANT - To assist in departmental purchasing and budget/cost reporting functions. Requires typing ability, as well as training or experience in accounting or similar detailed, analytical office work. This is a responsible position with growth potential. Physics Department.

71. TOOL & INSTRUMENT MAKER, GROUP LEADER - Central Shops Division.

72. APPRENTICE - Electrician. Two positions. Plant Engineering Division.

73. APPRENTICE - Experimental Machinist. Two positions. Central Shops Division.

74. APPRENTICE - Carpenter. Plant Engineering Division.

75. APPRENTICE - Refrigeration and Air Conditioning. Plant Engineering Division.

76. MATERIAL HANDLER - Supply & Materiel Division.

OPEN RECRUITMENT: Opportunity for present Laboratory employees and outside applicants.

77. DEVELOPMENT ENGINEER - BSEE degree or equivalent with experience in the design of pulsed high current/high voltage power supplies and analog, high noise immunity logic circuitry. Accelerator Department.

78. PUBLIC RELATIONS ASSOCIATE - MA degree or equivalent. Requires working familiarity with exhibit concepts and proficiency in the design and production of brochures, booklets and displays. Director's Office.

79. REFRIGERATION & AIR CONDITIONING ENGINEER - Plant Engineering Division.

80. CABINETMAKER - Plant Engineering Division.

81. HEAVY EQUIPMENT MECHANIC OPERATOR - Plant Engineering Division.

82. OFFICE SERVICES ASSISTANT - Requires proficiency in claims processing for group, medical, life and disability insurances. Personnel Division.

83. OFFICE SERVICES ASSISTANT - Requires good communication skills. Public relations, tour, or exhibit experience helpful. Director's Office.
