BOOKHAVEN NATIONAL LABORATORY

Brookhaven Bulletin December 20, 1996

Congratulations, Graduates!

Nine BNL employees were among the 17 students who received their Master of Science degrees in Environmental and Occupational Science from Hunter College of the City University of New York. Held on the BNL site, the September commencement was the culmination of a threeyear program sponsored by BNL's Human Resources (HR) Division, in which professors from Hunter College commuted weekly to the Lab to teach the BNLers, three family members, and five others from the U.S. Occupational Health & Safety Administration, the Suffolk County Health Department and the Suffolk County Water Authority. To earn the degree, the students had to complete 36 credits, a thesis project and a comprehensive examination, which was passed by all at the first attempt and in which Paula Bennett, Biology Department, scored the highest grade ever recorded at Hunter. Overall, the 17 graduates achieved a grade point average of 3.7. Shown in the photo above with Marilyn Pandorf (right), HR, who coordinated the program for BNL, are eight of the BNL graduates: (from left) Andrew Ackerman, National Synchrotron Light Source (NSLS) Department; Fredrick Horn, Safety & Environmental Protection (SEP) Division; Paula Bennett, Biology; Terence Monahan, SEP; Sheila Bubka, SEP, who initiated the program; Ken Krasner, SEP, who served as faculty-student liaison; Neil Schaknowski, Instrumentation Division; and Richard Lykins, SEP. Not present is David Albinus, former employee. Liz Seubert

A Matter of Degrees

In addition to the eight BNLers pictured at left and 35 who received their master's degrees in Environmental Technology in December 1995, 22 other employees completed academic degrees under BNL's Tuition Refund Program during fiscal year 1995. Congratulations to:

Name	Dept./Div.	Degree	School
Stephen Boose	Applied Science	BS	NY Inst. of Tech.
Marie-Christine Chung	Director's Office	AA	Suffolk Comm. Coll.

John Woods	AGS	AAS	Suffolk Comm. Coll.

Assessing Environmental Dosimeters

As their name implies, dosimeters measure doses, and the doses they measure are exposure to radiation. Over 17,000 sites worldwide are monitored with environmental dosimeters, which measure the dose of external environmental radiation received by the general public and must withstand extreme weather conditions.

But, since there are no accredited requirements for these monitoring devices, the Environmental Measurements Laboratory (EML), a U.S. Department of Energy facility located in Manhattan, collaborates with other federal sites or universities in holding

controlled assessments of dosimeter performance to ensure quality control. This year's assessment — the 11th International Intercomparison of Environmental Dosimeters — is being held at BNL, and 121 participants from 31 countries have mailed in 172 sets of dosimeters to be tested under field or laboratory conditions.

Other dosimeter tests are being made in laboratory conditions at EML and at BNL's calibration facility. Results from the program, which is voluntary, are published without identification, giving participants a chance to evaluate their own performance or to test new dosimeters in a noncompetitive spirit. EML also incorporates special conditions into the procedures to provide new data on which to base performance standards. —Liz Seubert

Dosimeters hang in a remote location at BNL for a three-month test period, while the Environmental Monitoring Laboratory's (EML) monitoring ionization chambers (front right) provide an independent measure of radiation exposure. EML's Gladys Klemic (kneeling, left), leads the program, with George Holeman (right) and Subash Sengupta (center) of BNL's Safety & Environmental Protection (SEP) Division, and Jileen Shobe (not present), National Institute of Standards and Technology. Project members also include Henry Kahnhauser (left), SEP, and Pepin Carolan (second right) from the U.S. Department of Energy's Brookhaven Group.

In Memoriam

The following retirees passed away recently:

Ambrose Miscavish, who worked in the Medical Department for 15 years, died on August 30. He was 82 years old. He started at BNL on August 17, 1959, as a dietary assistant III, and retired August 28, 1974, as a dietary services assistant.

Frederick E. Baumfalk, whose 15 years at BNL were all in the Plant Engineering & Planning Department, died on November 5, at the age of 84. He had joined the Lab on February 18, 1957, as an associate engineer, and he was a facilities engineer I when he retired on June 30, 1972.

Reese David Thomas, who worked at BNL for almost 28 years before retiring on June 30, 1981, died on November 21. He was 80 years old. He had joined the Accelerator Department as a senior designer on July 1, 1953, and he was a design engineer in the Alternating Gradient Synchrotron Department at the time of his retirement.

On-Site Fire Drill Coordinated With County, Local Fire Departments

On the Lab's railroad spur, a train collides with a bus, and the bus hits two cars. Meanwhile, one of the train's freight cars bursts into flames, which soon threaten an adjacent propane tank car.

Fortunately this scenario was not a real accident, but one staged for a fire drill held on site Sunday, November 3.

With members of a Boy Scout troop in Ridge acting as accident victims, the scenario successfully tested the Lab's ability to coordinate its response to emergencies on site or in the neighboring communities with other responders.

Originated by Deputy Fire Chief Michael Carroll of BNL's Fire/Rescue Group in the Safety & Environmental Protection (SEP) Division, the drill involved over 150 people, including employees and volunteers from: SEP; BNL's Police Group in the Safeguards & Security Division; the Gordon Heights, Manorville, Ridge, Rocky Point and Yaphank Fire Departments; the Manorville Ambulance Company; Long Island Rail Road; Suffolk County Department of Fire/Rescue & Emergency Services; and the U.S. Depart-

ment of Energy's Brookhaven Group. Because the drill provides practice in coordinating all these groups, it will be repeated next year.

Brookhaven Bulletin December 20, 1996

Kick Off BNL's 50th Anniversary Year in Style . . .

Lend Your Talents To the Celebration!

BNL is on the verge of a very exciting year — the Laboratory's 50 anniversary year. And the Lab plans to celebrate its golden anniversary in grand style, with events throughout the year, including an employee picnic in July.

Some of the events being considered by BNL's 50th anniversary planning committee would involve your talents or interests — so the committee needs to know what they are. Could you or your family members contribute to a concert? a talent or variety show? a theatrical presentation? an art show? a parade? an international festival? Contributions could be artistic or behind-the-scenes; all are important and needed to make any event a success.

Employees and retirees and their family members who think they would have something to contribute to these festivities should call Susan Foster, Ext. 2888. Your call will not constitute a commitment on either side, but could help the committee decide what events to sponsor.

BNL's United Way Needs a Little Extra

Will your child have enough gifts this holiday?

Most BNLers are in a position to make sure that special family members and friends will have plenty even an excess — of gifts, warmth, food and company during the holiday season and the coming year.

We are all aware, though, that some people will be left out: Poor kids will wear too-small, leaky boots; families of drug addicts or alcoholics may be abused or left without food money; the elderly caregiver for a bedridden spouse will be desperate for aid.

No one person can wipe out all this distress—but a donation to the United Way will help. "Skilled, devoted workers who run invaluable specialist service agencies are waiting anxiously for every dollar of the support they get from the United Way to improve the circumstances of countless Long Islanders," said Peter Esposito, this year's BNL United Way Fund Drive Chair. "Your extra, last-minute gift will make more than a yearlong difference in someone's life."

Lab employees have brought this year's BNL United Way fund up to almost \$80,000. If just 200 more people were to pledge \$1 a week or give a onetime extra \$52, the Lab's \$90,000 goal would be achieved. To make a donation or for more information, call Esposito, Ext. 2879, or Coordinator Ann Emrick, Ext. 5756. —Liz Seubert

Published weekly by the Public Affairs Office for the employees of BROOKHAVEN NATIONAL LABORATORY

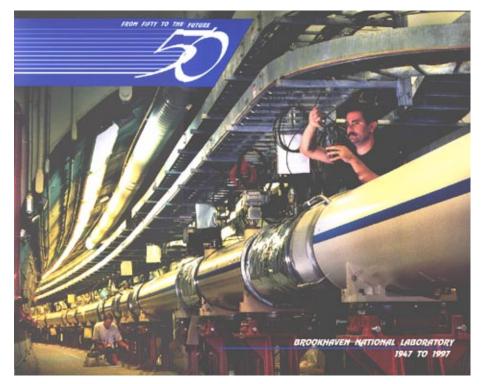

ANITA COHEN Editor MARSHA BELFORD, Assistant Editor

Bldg. 134, P.O. Box 5000 Upton NY 11973-5000

Tel. (516) 344-2345; Fax (516) 344-3368 World Wide Web: http://www.pubaf.bnl.gov/~pubaf/bulletin.html

The Brookhaven Bulletin is printed on pa er containing at least 50 percent recycled materials, with 10 percent post-consumer waste. It can be recycled.

Give Commemorative Calendars!

This week, each full-time BNL employee should have received a personal copy of BNL's 50th anniversary calendar, the cover of which is shown above, featuring a photo by Roger Stoutenburgh. This commemorative calendar is a gift to employees from the Laboratory in appreciation for employees' commitment to Brookhaven and their help in making the Lab a world-class research center. A limited supply of calendars is still available for purchase by retirees, visitors and guests, and by employees who want more than one. At only \$5 each, these calendars make great last-minute gifts and stocking stuffers — and they're an excellent way to give family, friends and colleagues far away an idea of what BNL is all about. Buy them today at the Science Store, and, while they last, at the BERA Store in Berkner Hall or at the Public Affairs Office, Bldg. 134, Ext. 2345.

Here & There

At the Gordon Conference on Nuclear Waste and Energy, held in Prohonice Nr. Prague, Czech Republic, in mid-September, retired Senior Scientist Arland Carsten, who is now a consultant with the Department of Advanced Technology, organized and served as discussion leader for the session on "Risk Analysis and Biological Effects of Short- and Medium-Lived Radioisotopes.'

The prestigious Gordon Conferences have explored the frontiers of science since 1923, and this was one of the first ones to be held outside of the United States.

Peter Soo, Department of Advanced Technology, was one of two members of the Long Island chapter of the American Nuclear Society to travel upstate to the Science Teachers Association of New York State conference November 4 & 5, in Ellenville.

He and an industrial colleague staffed a booth that provided information on nuclear power, nuclear waste and nuclear technology to the 1,700 teachers who attended the meeting.

With new computer hardware and software that can handle a gigabyte and a half of incoming information a day, the **External Data Center** (XDC) for the multi-institution Atmospheric Radiation Measurement (ARM) Program opened recently in Bldg. 490.

At an open house on November 8, the Department of Applied Science staff who will run the XDC for ARM's many contributing researchers demonstrated the center's capabilities, including automatic data collection and Web-based visualization of the environmental data ARM collects.

ARM is aimed at improving understanding and modeling of global climate change by gathering detailed information about Earth's surface conditions.

Let it Snow

Remember last winter and the record 90.75 inches of snow that fell at BNL? Photographer Roger Stoutenburgh took the photos on page 1 following the Blizzard of 1996, on January 7-8, which deposited 19 of those inches on the Lab site.

As this Brookhaven Bulletin went to press, a mere trace of snow had fallen on Long Island so far this season. But what's in store for the rest of the winter? Will it be as bad as last year?

"Not at all," says BNL Meteorologist Victor Cassella. "Hopefully, we'll just get a normal winter, about 30 inches of snow in total."

Will any of that snow fall in time to give us a white Christmas? "Maybe," says Cassella.

An area of high pressure should bring us generally sunny days but cold temperatures through this weekend, Cassella says. However, there may be some snow flurries tonight that could whiten the ground and get people in the holiday spirit.

But Cassella's also watching another system — an Alberta Clipper, a type of low-pressure system that should be over the Great Lakes on Sunday, bringing us a light snow on Monday. "When the cold front moves through, a coastal low should develop off the Atlantic and then move northward," Cassella says. "If it does, we should see some sort of precipitation Christmas Eve or Christmas Day."

"The temperatures in the beginning of this storm should be cold enough for snow," Cassella continues, "but if it moves inland, it will be a wet Christmas. But, if it's a perfect storm that moves to our east, we could see six inches."

While Cassella said he's "hedging more toward rain than snow, he also says, "my fingers are crossed for a white Christmas!"

— Anita Cohen

Thanks for 25 Years of Caring

For 25 years — as long as Blood Drives have been held on the BNL site - volunteers from the Southold Chapter of the American Red Cross have come to the Lab to help donors as they go through the collection process. At BNL's most recent drive, held December 3-4, Blood Drive Coordinator Susan Foster presented 12 volunteers with certificates "from your friends at Brookhaven National Laboratory, for 25 years of caring for our employees during our annual Blood Drive." Signed by BNL Director Nicholas Samios, the certificates proclaimed, "Your lifesaving efforts through your activities as Volunteers for the American Red Cross-Southold Chapter are warmly appreciated." The volunteers shown here — (from left) Libby Meredith, Southold Chapter Chairperson Anita Samuels, Camille Wilson, Mary Drum, Ronnie O'Regan and Ruth Hyatt — helped collect 351 pints of blood over the two-day drive.

Today is the last day to do your holiday shopping

A.M. Cash on 12/31

Because the IPAP system will be up

only until noon on Tuesday, December

31, the cashier's window in Bldg. 134

will be open from 9:30 a.m. to 11:30

Holiday Notes

For the Christmas holiday, the Lab will be closed for a half day Tuesday, December 24, and the entire day on Wednesday, December 25. And the Lab will be closed New Year's Day, Wednesday, January 1. As a result, the following schedules will be in effect:

• Brookhaven Bulletin — There will be no Bulletin next week; the next issue will be published on Friday, January 3. The classified ad deadline for that issue is noon on Thursday, December 26. The deadline for club notices and other submittals is noon on Friday, December 27.

- Credit Union The Teachers Federal Credit Union will be open until 1 p.m. on Tuesday, December 24, but will be closed on Wednesdays. December 25 and January 1. The automatic teller machine in the foyer of Berkner Hall will be open throughout the holidays.
- Food Services The *Cafeteria* will offer service until 1 p.m. on Tuesday, December 24, and will be closed Christmas and New Year's Days. The Brookhaven Center Club will be closed December 24 & 25. The Center Club will be open only 5-9 p.m. on Tuesday, December 31, but it will be closed on January 1. Vended food in Bldg. 912 will be available continuously.
- Gym & Pool The swimming pool and gymnasium will be closed from after lunchtime hours on Tuesday, December 24, through Christmas Day, but will reopen on December 26. They will be closed again on Wednesday, January 1, but regular hours will resume on Thursday, January 2, which also starts a new, three-month pool-pass
- Recreation Building The Recreation Building in the apartment area will be closed Tuesday, December 24, through Monday, January 6.
- Research Library The library will be closed after noon on Tuesday, December 24, through Wednesday, December 25, and all day Wednesday, January 1.
- Safety Glasses & Shoes The Safety Glasses Shop will be closed Wednesdays for Christmas and New Year's Days. The Safety Shoe Shop will be closed on Tuesday, December 24.
- U.S. Post Office The window of the Upton Branch of the U.S. Postal Service will be open until 1 p.m. on Tuesday, December 24. The branch will be closed Christmas and New Year's Days.

1997 New York City Train Trips

This is the only time that the 1997 schedule of special discounted trips to New York City (NYC) via the Long Island Railroad (LIRR) will be published in the Bulletin, so clip and save the information below:

Saturday trips — The Patchogue-Medford Library runs trips to NYC on the third Saturday of March through June and September through December. The group meets at the Patchogue station at 8:15 a.m., to take the 8:29 a.m. train. Purchase round-trip tickets, at \$7 each, at the library at least one week before the trip. For information, call 654-4700, Ext. 20.

Wednesday trips — Diane Weid will run NYC train trips on Wednesdays as listed below, leaving from Patchogue at 7:56 a.m. The round-trip cost is \$8 per person.

A minimum of 30 people is needed for each trip. For reservations, send a check payable to Cash to: Diane Weid, 645 Old Medford Avenue, Patchogue, NY 11772-1122. Checks should be received by the Monday before a trip, and should include your phone number and the trip date.

Resolve to Exercise!

BERA aerobic dance and stretch classes will resume on January 7, after a holiday break. So, come sweat off those cookies and eggnog at aerobics classes on Tuesdays or Thursdays, or stretch classes on Wednesdays, at 5:15 in the Recreation Building. For more information, call Pat Flood, Ext. 7886, or Kara Villamil, Ext. 5658, or e-mail karav@bnl.gov.

ment) - Requires an AAS degree or equivalent experience in survey methodology and a background in precision alignment techniques, including the use of optical levels and theodolites. Familiarity with precision measuring tools and machine shop practice also required; computer skills highly desirable. National

Synchrotron Light Source Department

Reserve Santa Claus, Elf!

If you want Santa Claus (Lieutenant Chuck LaSalla) and his Elf (Firefighter Frank Palmeri Jr.) to come dashing through the snow in their sleigh (Fire Engine #2) at a special time during their rounds of the

site on Tuesday, December 24, then call the North Pole, Ext. 2351, to make your reservation for some time between 9:30 p.m. and noon. For Santa to visit your workplace, you'll have to have been nice, not naughty — and he'll check his list twice to make sure.

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position. Consideration is given to candidates in the following order: (1) present employees within the department/ division and/or appropriate bargaining unit, with preference for those within the immediate work group; (2) present employees within the Laboratory; and (3) outside applicants. In keeping with the Affirmative Action plan, selections are made without regard to age, race, color, religion, national origin, sex, handicap or veteran status.

Each week, the Human Resources Division lists new placement notices, first, to give employees an opportunity to request consideration for themselves through Human Resources, and second, for general recruiting under open recruitment. Because of the priority policy stated above, each listing does not necessarily represent an opportunity for all people.

Except when operational needs require otherwise, positions will be open for one week after publication. For more information, contact the Employment Manager, Ext. 2882, or call the JOBLINE, Ext. 7744 (344-7744), for a complete listing of all openings.

Current job openings can also be accessed via the BNL Home Page on the World Wide Web. Outside users should open "http://www.bnl.gov/bnl.html", then, under "Information," select "Jobs." For scientific staff openings, select "Scientific Personnel Openings"; for all other vacancies, select "General Person-
