Wednesday, October 29, 2014

## Carol Creutz Symposium

Wednesday, October 29, 2014

**9am:** **Alex Harris** – Welcome  
Chairman, Department of Chemistry  
Brookhaven National Laboratory

**Bruce Brunshwig**  
California Institute of Technology, Director, Molecular  
Materials Research Center, Beckman Institute  
*Solar Water Splitting: From Molecular Sensitizers  
to Semiconductor Electrodes*

**Thomas Meyer**  
University of North Carolina at Chapel Hill  
Arey Distinguished Professor of Chemistry  
*A Creutz Legacy: Molecular Assemblies for  
Energy Conversion*

**R. Morris Bullock**  
Pacific Northwest National Laboratory  
Laboratory Fellow and Director,  
Center for Molecular Electrocatalysis  
*Molecular Electrocatalysts for the Oxidation of Hydrogen*

**Etsuko Fujita**  
Brookhaven National Laboratory  
Senior Chemist & Group Leader  
Artificial Photosynthesis Group  
and

**James Muckerman**  
Brookhaven National Laboratory  
Senior Chemist  
*Is water or acetonitrile the better solvent?*

Linda Sallustio [lsallust@bnl.gov](mailto:lsallust@bnl.gov), 631-344-4303

**BROOKHAVEN**  
NATIONAL LABORATORY
