

Meet ALEX[®]: New and Improved!

ALEX[®] is your easy-to-use online tool that will help you select the employee benefit plans that best meet the needs of you and your family.

This year, ALEX has been expanded and now includes information on the medical, dental, life, AD&D, and long term disability plans—as well as reimbursement accounts, vision care and retirement programs. ALEX will ask you a few questions about your health care needs (your answers remain anonymous, of course), crunch some numbers, and recommend a plan that best meets your needs. It's that easy!

How long does it take go through ALEX?

Most people spend about 7 minutes going through the entire ALEX experience. However, clicking every possible button can take about 30 minutes. Also, you can always save your place in ALEX and return later simply by providing your email address.

How can I make the most of my ALEX experience?

ALEX is best experienced on a desktop computer with sound (either headphones or speakers), but you can also use it on an Android or iOs (Apple) mobile device.

Will I need to do anything to prepare for ALEX this year?

Using ALEX is very simple. You won't have to dig through your insurance records or anything like that, but if you'd like to prepare for the questions about your medical and dental needs, it helps to have an idea of:

- How many dependents you plan to cover
- Estimated number of visits to a doctor
- Estimated number of prescriptions
- Estimated amount of dental care

How does ALEX calculate recommendations?

ALEX estimates the total yearly out-of-pocket costs for each plan (a combination of your premium contributions and the costs for the services you plan to use) and recommends the one with the lowest overall cost to you based on the information you provide. ALEX's cost data is based on health insurance plan design features and the estimated cost of services for each plan option, but keep in mind ALEX does not include out-of-network costs in its calculations..
