

IXS2019

The 11th International Conference on Inelastic X-ray Scattering

Charles B. Wang Center, Stony Brook University, New York, USA
June 23-28, 2019

IXS2019 will bring together scientists from all over the world interested in the use and development of inelastic x-ray scattering to address a broad range of material science problems. Topics will include quantum materials, energy materials & catalysis, functional materials, soft, glassy and biological materials, systems in time domains and under extreme and operando conditions. IXS2019 is your opportunity to share new scientific discoveries and latest developments in novel IXS instrumentation, experimental approaches and theories, and to discuss future directions in the field.
