Exploring New Science Frontiers at NSLS-II

October 21–23, 2019
www.bnl.gov/newscience2019
Brookhaven National Laboratory
Stony Brook University, Wang Center

Science Areas
- Biosystems, Earth, and Environment
- Catalysis and Chemical Sciences
- Materials and Engineering Sciences
- Molecular and Cell Biology
- Quantum Materials
- Soft Matter Research

Confirmed Speakers
- Peter Abbamonte (Univ. of Illinois)
- Jean Daillant (SOLEIL)
- Darby Dyar (Mount Holyoke Coll.)
- David Ginley (NREL)
- Sossina Haile (Northwestern Univ.)
- Zahid Hasan (Princeton)
- Wayne Hendrickson (Columbia Univ.)
- Heather Jamieson (Queen’s Univ.)
- Axel Knop-Gericke (Fritz-Haber-Inst.)
- Carolyn Larabell (UC San Francisco)
- Bob Leheny (John Hopkins Univ.)
- Lyle Levine (NIST)
- Chinedum Osuji (Univ. of Penn.)
- Susannah Scott (UC Santa Barbara)
- Brandy Toner (Univ. of Minnesota)
- Moniek Tromp (Univ. of Groningen)
- Michael Wiener (Univ. of Virginia)
- Amir Yacoby (Harvard)

Workshop Chairs
- Qun Shen
- Ignace Jarrige
- Juergen Thieme

Registration Deadline
September 23, 2019

Participation in the workshop is free of charge. Registration is required.

The Strategic Planning Workshop of NSLS-II, “Exploring New Science Frontiers at NSLS-II”, will serve as a forum for the community to discuss exciting opportunities for further development of NSLS-II, with a focus on the grand challenge questions and research needs in specific scientific fields, the new capabilities that will be required to advance the research in these fields, and how NSLS-II may help to fill in the capabilities gaps by establishing new beamlines, new instruments, and/or new techniques. The workshop program will be organized based on scientific themes, with a blend of plenary sessions and parallel breakout sessions.
